CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY.

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all stages of *pulmonary disease* by Dr. Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success*. Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible*, into universal use, as I know that they will prove not only

As Sure a Remedy in Consumption
as Quinine is in Intermittent Fever, but also
as Effectual a Preservative
as Vaccination is Small Pox."

"*In no instance* have I found the remedy *fail to produce everything that could reasonably be expected from it.*"

"Out of twenty-two cases *in the third or last stage*, treated at my Dispensary, during the past year, *eight have completely recovered*, eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

This Remedy is the most powerful generator of [illegible] known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, *Marasmus*, *Dropsy*, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile signature.*

By no other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

Price, $1.00, or three bottles for $5,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., [illegible] John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S. on receipt of twelve cents in stamps to cover expense of postage. Also, circulars and all requisite information without charge. Let no one delay, but seek to be relieved in so fatal a malady as Consumption. Address,

How to Make Money.

It is astonishing that more people don't learn to make money, when so many seem to be striving for that end. It is just the simplest thing in the world and always was, and it seems a pity that any should fall short of their desires when this is the end to be attained. There are some it is true who wouldn't be rich on any account; who in fact would be afraid to live in any civilised community if such were the case, from the fact, that rich men are so frequently murdered for their money; or are bothered so much by friends who like to visit with those who live in fine houses, and have plenty to eat and drink. Then again, when men get rich they are very likely to die suddenly and unexpectedly, and thus be cheated out of all they are worth—then, having had a good house to live in here, they are very apt to fail to reach that "house not made with hands," according to the good book—then again, if, mind we say "if" by any unforeseen calamity the rich man looses his money while he yet lives, it comes so hard to him to always afterwards have it said by those who have eat and drank and almost slept with him, that "he amounts to nothing and never did,"—that he fears the dreadful fall, and therefore prefers not to ascend the money mountain—then, once more, rich men are so apt to get perplexed with the care of their money, and likely enough get it into their heads that they are coming to poverty, that they get twisted and hang themselves, which to the surviving relatives is a very unpleasant calamity.

But, notwithstanding all these little objections to being rich, there are a great many who are willing, and probably about the same number who really desire to try the experiment; and having fairly and openly pointed out the consequences, we propose to open the way and reveal to every one the road to wealth—the way to make money.

That every one may have time to grow calm over this anouncement, and make a little preparation for the journey they will desire to start on immediately, we defer the details until to-morrow, when we shall expect to see every aspirant for wealth at an early hour in front of the HERALD office, with knapsack in hand, and right foot forward ready to start as soon as the HERALD appears.

A Vagabond Law.

We understand that the Common Council of the City of Rochester, has passed an Ordinance requiring that every man and boy that may be found in the streets of that City after dark without a three cent piece, or that amount of good current coin in his pocket, (wouldn't a postage stamp do?) shall be arrested and sent to a place of refuge for vagabonds.—This may be a very good law, but pray where is the force to make the arrests—the food to feed, and the roofs to shelter the multitude that will be gathered up in that city if such a law is put in force?

Hogs are dying daily of a disease known as the hog cholera—and it is supposed that these animals are taken at night and sold to the butchers, and subsequently retailed by them as food. Probably the better plan would be to avoid pork altogether during the dog days.—*Exchange.*

Wouldn't it be better to let pork alone altogether? The custom before many years will be deemed hoggish!

The Hon. Elisha Litchfield, died at Cazenovia, Madison County, on the 4th inst., in the 74th year of his age. Mr. L. lived in Onondaga from 1850 to 1848. In 1820 he was sent to Congress, and was a Member of the Assembly in 1831, '32 1833 and 1834, serving as Speaker thro' the latter session. He was a very estimable man, in every relation of life, and he leaves behind him an unsullied reputation.

Eight Children at a Birth.

Correspondence of the N. Y. Tribune.

JOHNSON, Trumbull County, O., August 4th, 1859.—On the 2d of August Mrs. Timothy Bradley gave birth to eight children—three boys and five girls. They are all living, and are healthy, but quite small. Mr. B.'s family is increasing fast. He was married six years ago to Eunice Mowery who weighed 273 pounds on the day of their marriage. She has given birth to two pair of twins, and now eight more, making twelve children in six years. It seems strange, but nevertheless is true, Mrs. B. was a twin of three, her mother and father both being twins, and her grandmother the mother of five pair of twins. Mrs. B. has named her boys after noted and distinguished men. One after the Hon. Joshua R. Giddings, who has given her a splendid gold medal; one after the Rev. Hon. Champlin, who gave her a deed of 50 acres of land, and the other after James Johnson, Esq., who gave her a cow. Mr. Bradley says it is profitable to have twins, as the neighbors have clothed the others ever since they were born. Mr. B. is a poor, industrious laborer, but says he will not part with any of his children while he is able to work.

RATHER HOT.—Baron Alderson, in a letter to his son, says: "I have been obliged at last to send for Sir Benjamin Brodie, to see me for my sciatica, and to-day, by his order, I have been stewed alive in a vapor-bath. Dreadfully hot, I can tell you—140 degrees, while a hot bath is only 98 degrees. Yet it was not unpleasant after all; for hot air does not burn like hot water, as it communicates its heat gradually to you, air being what they call a bad conductor of heat. So, by the time the hot air makes you warm, a perspiration breaks out and cools you again.—People have been known to bear 400 degrees of heat without much inconvenience. Sir Francis Chantrey told me once he had gone into the oven where he baked his moulds, which is heated by a nearly red-hot plate at the bottom. He wore thick wooden shoes to protect his feet, and a flannel dress, and was able to bear it very well. That was a heat that would have baked a pie, and yet a man alive would not be heated much above blood heat, or about 100 degrees. Is not this curious? Life is able, you see, to bear heat which would roast a dead body."

A QUEER INSTITUTION.—In his examination before the Coroner's Jury, Mr. William White testified that he is the President of the "Albany, Vermont & Canada Railroad," but that it has no Corporation or Directors. What sort of a monstrosity is it then? What kind of a legal concern would the Courts and lawyers call it? A thing with a head, and perhaps a tail, but no body. We have what is known in the law and among men as individuals, partnerships, joint stock associations, and bodies corporate. But who before ever heard of a thing with a President but no Directors, Corporation or other folks to be President of? This is an invention for which certainly a patent right should be secured. It's a kind of institution that the Legislature even in its fecundity of invention never dreamed of.

The American rowdy is a terrible nuisance. Hear how the poor Dutch landlord described his suffering at the hands of one of those amiable beings: "Ter rowdy comed in und axed me to sell him sum peer. I tells 'im he had more as would do 'im goot. He calls me von ole Tuch liar, and pegun to broke two tumplers. My vife she calls for de vatch 'ouse. 'Fore de vatch 'ouse got dare, de rowdy he kick Hans Scruggle pehint his pack, kissed my taughter Petsy pefore her face, proke all ter tumplers 'cept ter ole stone pitcher, and spilt my vife und tedder peer parrels town in ter de sellar."

The New York hotels are doing now a more thriving business than for many years, even in the busiest seasons, so that the late comers esteem themselves privileged to get accommodation in the larger establishments. At one house alone—the Astor—the arrivals have averaged over one hundred and fifty a day for upwards of a week including a number of ladies, of whom, this year, there are more at the leading hotels.

In the constitution being formed for Kansas, women are allowed to vote in school matters. They may vote for school officers, school taxes, and everything pertaining to the organization of Common Schools, equally with men. Conferring this much of the elective franchise upon females is intended as an experiment. We believe that females are allowed to vote in school matters in Canada and Louisiana.

To resuscitate a drowned Englishman, place a piece of roast beef under his nose; an Irishman, a gill of poteen; a Scotchman, a halfpenny; a Welshman, a few leeks; a Frenchman, a pinch of snuff; a Spaniard, some fresh blood; an old maid, an offer of marriage; a Yankee, attempt to pick his pocket.

At what age are ladies most happy?—*Ans.—Marri-age.*

Miscellany.

The man who was seriously injured by the discharge of duty, is said to be out of danger.

Anoint a villain and he will prick you; prick a villain and he will anoint you.

"Lord!" said Mrs. Partington, "what monsters these cotton-planters must be.—I am told that some on 'em have a hundred hands.

A young thief, charged with picking pockets, protested that he didn't pick them at all but took them just as they came.

A miser having threatened to give a poor man some blows with a stick, "I don't believe you," said the other, "for you have not the heart to give anything."

Polly being bantered one day by some of her female friends in regard to her lover' who had but one leg, she replied to them smartly, "Pooh I wouldn't have a man with two legs; they're too common!"

NO BAD RULE.—"I never come late to a friend's dinner," says Coileau, "for I have observed that when a company is waiting for a man, they make use of that time to load him with abuse."

The Springfield Republican says a novel idea is entertained in astronomical circles, which will be startling to every one. It is that of *picking* the great comet, so that he will carry up his tail.

A newspaper correspondent writes that while travelling in the South he attended a negro meeting, when the sable preacher offered an earnest prayer for "de white element in our population."

READING AND THINKING.—It was predicted of a young man lately belonging to one of our Universities, that he would certainly become a prodigy because he read sixteen hours a day. "Ah!" replied a fellow-student, but how many hours a day does he think?"

The Board of education of New York has resolved to apply to the next Legislature for an act empowering it to provide for free vaccination, and that no children be admitted to the public schools unless vaccinated.

A lady writes from Paris to say that the heat during the last week has been so intense that it is impossible to keep a secret for longer than an hour.—*Punch*

THE SPOILS IN VERMONT.—

"The Democrats will win," said Smith;
Quoth Lee, "I shouldent wonder—
Already they are running with
Big Saxe to hold the plunder."

A wag remarked the other day, with a very grave countenance, that "however prudent and virtuous young widows might be, he had seen many a widow-err."

A VERY GOOD FASHION.—The latest "fashion" announced from Europe, is that of dressing very plainly when going to church. Some of the ladies "of the first circle" go up to worship in plain calico.—It is thus sought to encourage the attendance of the very poor, who have hitherto withheld their presence for lack of "Sunday clothes."

The English papers of a late date record the death of Gen. Proctor, who played an important part in the last war with Great Britain. He commanded the 82d regiment at the battle of Fort Erie, and subsequently served in the campaign along the Niagara frontier.

The Patent Office having obtained seeds of the cork tree from Europe, sent several packages last year to California, which possesses a climate similar to France and Spain, where it flourishes. These seeds were planted at Sonora, and about 87 per cent, of them have come up, and give promise of becoming stately trees.

QUEENLY BUT REDICULOUS.—The present Queen of England does not appear to disapprove of rigid courtly ceremonies.—When on a visit to the royal family of France at Eu, the Queen of Belgium had been told that her Majesty of England took every morning at ten o'clock a glass of iced water. Accordingly on the day after her arrival, a servant duly made his appearance at the appointed hour bearing on a silver salver a carafe and two glasses, which he tendered to the sovereign, who declined the refreshments with a wave of the hand. The Belgian Queen seeing this, whispered to her son, who was present, to *pour out* a glass of water, and offer it to the Queen; this being done, was graciously accepted, the fact being that etiquette would not allow her to pour out the water for herself when a servant was present! The Queen may not speak to a tradesman; and Victoria has been seen standing not a yard away from one, addressing all her inquiries to an equerry, who reported them to the tradesman, and again repeated to her Majesty all his answers.

All over the West, while the towns and cities have diminished in business and population, the country has increased in both. Men who would not live in town have gone out upon the prairies, determined that it is better to raise wheat than it is to trade on credit.

Arrival of the Steamer Hammonia.

NEW YORK, Aug 9.

The steamship Hammonia arrived this morning from Hamburg via Southampton 26th ult.

Ship Alina, from Calcutta from London, had been lost at sea. Twenty lives were lost.

The London Times of the 25th says that four notices are offered in the House of Commons on the subject connected with the military and naval defences of British Empire.

The London Times of Tuesday gives the preliminaries of the peace of Villafranca as follows:

The two sovereigns will favor the creation of an Italian Confederation. That Confederation shall be under the honorary Presidency of the Holy Father.

The Emperor of Austria cedes to the Emperor of France his rights in Lombardy excepting the fortresses of Mantua and Peschiera, which right the Emperor of France will hand over to the King of Sardinia.

Venetia forms a part of the Italian Confederation, but remains under the crown of Austria.

The Dukes of Tuscany and Modena are to return under the condition of granting a general amnesty.

Both Emperors will ask the Pope to introduce indispensable reforms.

A full and complete amnesty is to be granted to all the people.

DISEASED PORK.—The City Inspector of New York warns the people against purchasing pork during this hot weather, as large quantities of diseased pork are now daily thrown upon the market, the hogs having died of cholera. It is generally introduced during the night time, which prevents its detection and seizure.

Denslow's New Religion
IN MEDICINE!
——oo——
The times have chang'd, since Denslow found
The use of Roots and Herbs,
Were hyge'ne on, more truthful ground,
And Ills of Life disturbs:
It was in olden times, 'tis said,
That Poisons held the cure—
And patients then, were surely bled,
To drain off blood impure;
'Twas then, when Ills in fury ran,
The Patient was reduc'd—
And on his back depletive flung—
By Alopaths seduc'd!
'Twas then, that Nature had no aid,
And Science was her foe—
While Ills the suff'ring forms pervade,
And Poisons were the go!—
'Twas then, that Scientifics taught,
That Poisons would transform,
Each Patient, who, with Ills were fraught,
And rout disease by storm!—
'Twas then, they taught, if Poisons cure,—
'Twas changing Ills for it—
When Nature was, most always sure,
To make hyge'nic fit!
But now, Botanics ev'ry where,
Teach quite reverse of that,
And use such aids as will compare,
With Nature's sure combat!
Then Nature in her prompt-est flow,
Demands the Roots and Herbs,
To aid her to a healthful glow,
When fell Disease disturbs.
And People all, should know the where,
To get these kindest aids,
To build up Nature blooming fair,
While health their forms pervade!
And faith—its "Denslow in the rear,"
Who has them all on hand,
As fresh as from the Earth they peer,
Or in the forest stand!
There, all can get the Native Cures,
Which grow on ev'ry Farm,
That depurates, and health secures,
Without the least alarm!
He has these Plants in compound form,
Made up with propper skill—
And Composition, too, that's warm—
In Powder, or in Pill!—
In Syrups, too, for great and small,
That's powerful and right—
And Drops that makes the sweat to fall,
And show disease a fight!
He asks no odds of any man,
In getting up a sweat,
And with his Physopathic plan,
He'll cure a Nervous fret!
Oh, ye that would the Truth receive,
And practice honest right,
And thus to Self most faithful live,
Do not Botanics slight:
For in these Herbs, there's teeming life,
That points to all alike,
With such recuperative strife,
That fell Disease, 'twill strike!
'Tis God who permeates them all,
Imparting well its Cures—
And hence, the Devil would forestall,
What He to us secures!
But Denslow waits, a chance to tell,
His Majesty the right,
Which hath to Demons even fell,
And blaz'd to them its light!
Yet when he opens front again,
He'll fire a louder gun!—
And scatter Fogie's Logic train,
Beyond the setting Sun!

MEDICINES, &c.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER, and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "*impurity of the blood*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice*, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY.

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all *stages of pulmonary disease* by Dr Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady,*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible,* into universal use, as I know that they will prove not only

As Sure a Remedy in Consumption
as Quinine is in Intermittent Fever, but also
as Effectual a Preservative
as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases in *the third or last stage,* treated at my Dispensary, during the past year, *eight have completely recovered, eight have died, and six are still under treatment. Such a result is altogether unparalleled in the annals of Medicine.*"

☞ This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile* signature.

☞ No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

☞ Price, $2,00, or three bottles for $5,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 49 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postages. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

How to Make Money.

That's the question—the secret we shall proceed now to reveal. Lucky are the subscribers to the DAILY HERALD, to receive as a premium for their patronage this profound secret that the anxious world has so long been looking and seeking for, and all for six cents a week.

Before proceeding to the direct question, we must first disclose another little matter that has up to this time been held secure in a big vault with no other company than a number of ponderous money-bags. This disclosure is pregnant with momentous results—there may be a man missing to-morrow—there was once a man missing in this place by the name of MORGAN—as some of our oldest inhabitants can perhaps remember—for committing a similar act, that is: making a disclosure, but the cat he let out, was nothing more than a kitten to a cat-a-mount, compared with what we are preparing to relate.—We refer to that which has thus far been kept, of course, a profound secret from those who enquire "how shall we make money"—it embodies in fact, a part of the main secret, and hence has been held so secure by the man who carries the money bags, and locks them, and it, up in the big vault with the double-bolt, double-bar, and anti-blow-off-with gunpowder lock that Hobs could'nt pick with a key that had more faces than a hypocrite, and more *wards* than a rich uncle.

The matter which we have now *referred* to sufficiently to make it understood when we came to it; is nothing more nor less—and more it couldn't very well be and get it into the DAILY HERALD—than the money makers cat echism—which of course is the cat-in-the-bag, that it was never intended to have "let out," but which we shall now proceed to do, that justice may be done if heaven tumbles down,—as the old Latin writer had it, but which we give in plain English, that all may run as they read, if this catastrophe should happen to take place after we have unfolded the secret.

This cat-echism must be thoroughly learned by heart, and entirely relied upon by the money maker; in fact, the most effectual way to get the entire good of it, will be to grease and swallow it—and mind you, that it goes down head first, and at one gulph, and that there is no backward movement calculated to excite sparks on its back as they are dangerous in exciting an explosion.

Are our readers prepared for the cat-echism? If so let there be one simultaneous shout—READY!!!

THE MONEY MAKERS CAT-ECHISM.

Q. 1. What is the chief end of man?

A. To get money.

Q. 2. What is money?

A. An Idol worshipped by enlightened man, and the more enlightened he is, the more he worships the Idol, and gathers it unto himself.

Q. 3. What is this Idol composed of?

A. Three different metals, gold, silver and copper, the three united in one Idol, but differing greatly in substance, but separate in men's pockets.

Q. 4. What means are offered us for getting money?

A. Take it always whenever you can reach it. It is the plain duty of man to get all the good he can in this world, and as money *is* good, it is just, and right, and proper, to get it always, and under all circumstances when within reach.

Q. 5. What short sentence comprises the whole law of getting money?

A. Keep all you have got, and get all you can.

THE END.

We will now give our readers a few moments to take breath, before proceeding to the final SECRET. To the multitude that blocks up the street in front of the HERALD office, we would address a few words to bring peace and patience. Hold on to your knapsacks, and keep the right foot forward ready to start when you come to the—finale.

THE GREAT SECRET.

The sure and certain road to wealth will be opened to every one who will conform to the following instructions, that will be found broad enough to accommodate all who may desire to travel therein:—

1st. Fear neither God, Man, nor the Devil.

2d. Ignore conscience, charity and mercy.

3rd. Believe that nothing is of more importance to man than money.

4th. Paste this upon the inside of your skull, that it may face, and be always in sight of your mental faculties and your reward will be certain.

FINALE.

P. S. Those who do not accept this may about as well go to Pike's Peak.

THE FROZEN WELL.—A correspondent of *The Boston Journal*, at Rutland, Vt., gives the following account of a visit to the frozen well at Brandon:

"A visit to the frozen well at Brandon, 17 miles distant, and the tertiary deposit of brown coal in which fossil fruit is found, will reward one for the trouble. Iron ore of excellent quality, a remarkably white and pure pipe-clay, and a bed of manganese, make, together with the brown coal, a combination of deposits curious and valuable. The frozen well is dug on the easterly side, near the foot of a high gravelly knoll, probably a glacial moraine, through which the road has been cut, showing beds of clay of three or four feet thickness, interspersed among the gravel. The well was dug in November last through 25 feet of gravel and 15 feet of frozen earth, when water was found. The well was then stopped up and has been frozen up ever since. Last winter it was necessary to descend and cut with a hatchet a passage for the bucket to the water beneath the ice.

"By the aid of a mirror, the sun-light can be thrown into the well, and about three feet from the bottom a rim of ice, at least six or eight inches thick, can be seen projecting from the sides, leaving barely room for the bucket to pass through. The stones for six or eight feet are incrusted with frost and ice. Occasionally a current of air can be felt, cold as a snow-bank, which may come from below, or may be the outer air suddenly cooled. The water is excellent—remarkably pure, and, of course, icy cold. This well is a 'puzzler' to the savans, some of whom, at Burlington, have appropriated $300 to investigate the phenomenon, and propose to sink one or more wells in the vicinity, to see if the same result follows. Whether this ice is formed by chemical combinations in the earth, whether it is caused by currents of air passing over the water, producing rapid evaporation and consequent refrigeration, or whether an iceberg stranded there long ages ago and was covered subsequently by accumulations of clay and gravel, being thus preserved from melting away—who knows?"

A firm in Philadelphia have manufactured a splendid sewing machine to be presented to the Empress Eugenie, which is thus described: Upon a silver base is embossed in elaborate elegance the escutcheon of the Empire, while the whole rests upon four silver lions, over which an eagle is perched. The names of Napoleon's generals and victories appear upon one side of the base, and at the end upon a square, a statue of the great Napoleon is standing. This is done in enameled work, and is a gem in its line. At the side of this figure the goddess of Industry is seen, and over both a spread eagle is flying, which, bending forward, forms the vibrating arm of the machine, the needle being in the beak of the royal bird. The plate of the machine is of highly polished steel, supported by four angels of silver with wings of gold, and in the front of the case is the inscription. The case and table of the machine are to be made of wood from Mount Vernon.

THE GOLD MINES OF VERMONT.—The Bellows Falls Times says of the operations in the Vermont gold mines of which we gave an account some time ago that the miners of Plymouth, in Windsor County, are generally making very fair wages.—Mr. Hankerson never averages less than $5 a day to each hand. On Thursday of week before last he got $20; on Friday $30; on Saturday $40; on Monday $25; and Tuesday $25, and some of the time with only one hand. This makes $140 in five days. On Friday, July 8, Sawyer & Eddy got $40. On the same day they found one piece valued at $12. People continued to flock to the diggings every day, among whom are reporters to the press.

A FRENCH STORY.—One of the Paris letter writers for the New York Press, tells the following good story:

At the Theatre of the Varieties there is an actress one of the best in Paris, who has the misfortune to be exceedingly, deplorably thin—we might almost say scrawny. A short time since she heard of a doctor who, it is said, had succeeded in manufacturing a mineral water which had the power of making people grow fat. She went to him instanter. 'Doctor,' said she, 'what must I do to get fat?' 'Take my waters.' 'And shall I get fat?' 'Immediately.' The thin actress plunged into the doctor's baths, and drank the water early and late. Three months passed away, but she grew no fatter. At last she called the doctor and said: 'Doctor, I don't grow fat.'—'Wait a little while,' replied the doctor.—'Will it be long.' 'Fifteen days at the farthest. You see that big, fat woman walking in the garden. When she first came here, she was, perhaps, thinner than you.' 'What! may I hope!'

Two months passed; the actress grew thinner and thinner. One day, as she was taking her warm mineral bath, she heard a dispute going on in the room next to her own. "Decidedly, doctor," said the big fat woman above introduced; "decidedly, doctor, I don't get a bit thinner." "Have patience, madame," said the doctor; "you see that very thin lady who sometimes walks in the garden?" "Yes." "Well, she is an actress from the Varieties, whose excessive fat forced her to leave the stage; she came to me—you see the result.—Before fifteen days, I promise you shall be thinner than she is." At these words, the thin actress rose from her bath, dressed herself, and, with a heart divided by grief and indignation, silently left the house, hoping, however, to keep her misfortunes a secret, but in Paris a secret is an impossibility, and somehow or other the story got out.

FATAL RAILROAD ACCIDENT AT NEWARK—LADY KILLED.—A terrible affair occurred at the Newark station on the Central Railroad on Tuesday evening. The accommodation train from Syracuse, due here at 8:25, reached that place 7:05, as usual, and stopped on the south track.—At the same time two long stock trains from the west stopped on the north track to water, blocking up the highway for some time. While matters were thus situated, a Mr. Welcher, who resides about a mile north of the station, drove up with a one horse wagon, containing, besides himself, two young ladies, his sisters.—Finding his road obstructed by the stock cars, Mr. Welchester drove as near to them as he could, and stopped. In a few moments the train moved on, and simultaneously the accommodation train, which was hidden from Mr. W.'s view by the stock train, also started. The moment the last car of the stock train passed him Mr. Welchester drove over the north track and got upon the south track just in time for his horse to be struck by the locomotive of the accommodation train. The animal, which had one of its feet cut off by the collision, immediately turned short around, cramping the wagon so as to overturn it, and the occupants were thrown out. Mr. Welcher had the good fortune to fall clear of the track, but, both the ladies were thrown directly beneath a car. One of them was seized by a man who jumped from the rear car of the stock train, and dragged from her perilous situation unharmed, but the other was run over the body and terribly mangled.—She died instantly. Neither Mr. Welcher or the young ladies that were saved suffered any serious injury.—*Roch. Dem.*

From California: The Overland Mail arrived at St Louis, Saturday night.—New gold and silver mines had been discovered in the Washo Valley, which promised to pay well. Frazer River had fallen sufficiently to permit the resumption of mining on bars. A man named Brever had been arrested at Camp Floyd for having in his possession $80,000 in counterfeit government checks on the sub treasury at St. Louis. Horace Greeley was at Salt Lake City. The Indians were committing depredations in Humboldt county, and the Mormons were implicated.

The New York correspondent of the Cleveland Leader says:

I was told a few evenings since that Mr. A. T. Stewart, the Merchant Prince of New York, intends to build a large House for Widows and Indigent Women, and endow it most liberally; and that if one million of dollars are not enough, he will use two millions. Mr. Stewart says it is to the women he is indebted for his fortune, and now in return he will use it to benefit them, without regard to *sect or creed.*

A NOBLE PROJECT.—It is said that Mr. A. T. Stewart, the Merchant Prince of New York, intends to build a large Home for Widows and Indigent Women, and endow it most liberally; and that if one million of dollars is not enough, he will use two millions. Mr. Stewart says that it is to the women he is indebted for his fortune, and now in return he will use it to benefit them, without regard to sect or creed.

Miscellany.

The drought at the West has been mitigated by copious rains.

The apparently interminable war of races in Yucatan has ceased, and peace has been restored.

It is believed there is not a single case of yellow fever at any American port at the present time.

A table compiled from official documents gives the number of Free Masons in the United States as 211,538, and the income of the lodges at about $1,450,000.

A first class locomotive costs about $10,000; a passenger car $2,000; a baggage car $1,500; a freight car $650; a gravel car $450. The iron of a railroad costs from $5,000 to $8,000 per mile.

GREAT DISCOVERY!

NEW MODE OF ADVERTISING.

The Proprietor of the Great American Shoe Store, No. 2 Odd Fellows Hall, south side Main street, nearly opposite the Post Office, claims to be the inventor of the cheapest and best mode of advertising in the world. He claims to be the manufacturer of

BOOTS AND SHOES

that will advertise themselves, by giving ample satisfaction to the wearer, thereby speaking in language not to be misunderstood by him, which he immediately interprets to his neighbors. After having tested the merits of his invention for the last twenty years, he feels confident of its

ENTIRE SUCCESS.

and would recommend it to all the other Boot and Shoe makers and dealers in this vicinity, to be adopted by them. And he would especially call the attention of the citizens of Genesee county and advise them to study well its operations.

He has on hand a good assortment of Stock, such as

Oak and Hemlock Sole Leather,

French calf skins, kip and morocco, &c., which he holds will stand investigation from the best of judges; and *MECHANICS* to manufacture it who are second to none in the State.

Also the largest stock of Ready Made Boots and Shoes in the county; both *Eastern and Home Made, at prices that defy Competition.*

Thankful for the very liberal patronage you have been pleased to extend, I would respectfully solicit a continuance of the same.

DR. M'LANE'S

CELEBRATED

VERMIFUGE

AND

LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,

PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and *take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa.* To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

SACKVILLE, N. B. Aug. 10.

The date for the Zurich conference was not yet fixed, but it was expected to meet in a few days.

In the House of Commons, on the 28th, Lord John Russell made his statement relative to foreign affairs. He would have postponed it if there had been any prospect of being able to announce a definite settlement of the affairs of the Continent before the approaching close of the session.

He was glad to see in the Moniteur that the Emperor of France had determined to place the army and navy on a peace footing. After reviewing the ground of peace as proclaimed by the two Emperors, he said as England did not interfere in the war he did not think it was for her to interfere in the peace. The sacrifice of a province by Austria did not affect the state of affairs of Europe sufficiently to warrant the interference of the neutral powers.

The most important part of the treaty, however, relative to the future of Italy, and the invitation of the Emperor Napoleon to England, to enter the Congress, and to consult on the actual state of affairs of Italy, quite irrespective of the terms of the treaty of Villafranca.

Mr. Disraeli expressed a wish that Lord John Russell had been more explicit, particularly as to any terms that may have been afforded Austria by the neutral powers. He reiterated his objection to England having anything to do with the conference, or she would thereby be bound by the treaty of Villafranca. Lord Palmerston denied that England submitted any terms to Austria which were less favorable than these obtained from France.

The government at the request of the French Ambassador had consented to be the channel of communication, and had submitted some terms to Austria, but at the same time distinctly stating they were the views of the French Government, and that England gave no advice nor opinion in the matter.

It would be impossible for the government to join in the Congress, until the result of the Zurich Conference was known.

Mr Whiteside said that the government had been made a cats-paw of, and by transmitting terms to Austria virtually assented to them.

Mr. Gladstone eulogized the conduct of Sardinia.

After speeches by other members the subject was dropped.

Denslow's New Religion
IN MEDICINE!
The times have chang'd, since Denslow found
The use of Roots and Herbs,
Were hygeine ed. more truthful ground,
And Ills of Life disturbs!
It was in olden times, 'tis said,
That Poisons held the cure—
And patients then, were surely bled,
To drain off blood impure;
'Twas then, when Ills in fury run,
The Patient was reduc'd—
And on his back depictive flung—
By Alopaths seduc'd!
'Twas then, that Nature had no aid,
And Science was her foe—
While Ills the suff'ring forms pervade,
And Poisons were the go!—
'Twas then, that Scientifics taught,
That Poisons would transform,
Each Patient, who, with Ills were fraught,
And rout disease by storm!—
'Twas then, they taught. If Poisons cure,—
'Twas changing Ills for it—
When Nature was, most always sure,
To make hygeinic fit!
But now, Botanics ev'ry where,
Teach quite reverse of that,
And use such aids as will compare,
With Nature's sure combat!
Then Nature in her promptest flow,
Demands the Roots and Herbs,
To aid her to a healthful glow,
When fell Disease disturbs.
And People all, should know the where,
To get these kindest aids,
To build up Nature blooming fair,
While health their forms pervade!
And faith—its "Denslow in the rear,"
Who has them all on hand,
As fresh as from the Earth they peer,
Or in the forest stand!
There, all can get the Native Cures,
Which grow on ev'ry Farm,
That depurates, and health secures,
Without the least alarm!
He has these Plants in compound form,
Made up with propper skill—
And Composition, too, that's warm—
In Powder, or in Pill!—
In Syrups, too, for great and small,
That's powerful and right—
And Drops that makes the sweat to fall,
And show disease a fight!
He asks no odds of any man,
In getting up a sweat,
And with his Physopathic plan,
He'll cure a Nervous fret!
Oh, ye that would the Truth receive,
And practice honest right,
And thus to Self most faithful live,
Do not Botanics slight:
For in these Herbs, there's teeming life,
That points to all alike,
With such recuperative strife,
That fell Disease, 'twill strike!
'Tis God who permeates them all,
Imparting well Its Cures—
And hence, the Devil would forestall,
What He to us secures!
But Denslow waits, a chance to tell,
His Majesty the right,
Which hath to Demons even fell,
And bias'd to them its light!
Yet when he opens front again,
He'll fire a louder gun!—
And scatter Fogie's Logic train,
Beyond the setting Sun!

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium, of the fluids in the body, the want of which is the sole cause of inflamation!

NOTICE TO INVALIDS!! The following forms which the unbalanced fluids assume, and many others mentioned, that have more or less fever or pain, are as easily subdued by the New Medical Salt, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

MEDICINES.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases: consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER, and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "*impurity of the blood,*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice,* and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

MEDICINES.

DR. JOHNSON'S

HERB DISPENSARY!

OFFICE 95 MAIN STREET,

(3d door, Up Stairs, Buffalo, N. Y.)

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgy pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea, or Fleur Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflamation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the institution is new; it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $1 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world-wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to prevent the few who may be unacquainted with us, we would state that we have no connection with any other Gift Books House—and though many advertise under the name of Evans & Co., the firm constituted by D. W. EVANS and J. H. PRESTON, is the first and only concern rightfully using the name. But to prevent all confusion in the future we shall use the style of D. W. CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY,

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all *stages of pulmonary disease* by Dr Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible,* into universal use, as I KNOW that they will prove not only

As Sure a Remedy in Consumption
as Quinine is in Intermittent Fever, but also
as Effectual a Preservative
as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage,* treated at my Dispensary, during the past *year, eight have completely recovered,* eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

This Remedy is the most powerful generater of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile* signature.

No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No Iron or other drug should be combined with them, or taken at the same time.

Price, $1,00, or three bottles for $3,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the sole General Depot in the U. S., 49 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postage. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address

THE DAILY HERALD.

BATAVIA, Friday, Aug. 12, 1859.

SUBSCRIPTION PRICE 6 CENTS PER WEEK.

TO CORRESPONDENTS:

No notice can be taken of anonymous communications. Whatever is intended for insertion must be authenticated by the name and address of the writer; not necessarily for publication, but as a guarantee of his good faith.

We also beg to inform our readers that we do not hold ourselves responsible for the opinions of our correspondents.

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

The Crowd Yesterday.

Some wag circulated the report that there would be a revelation, "how to get money" in the HERALD yesterday, and that it was only a sell, to call people together, Something after the Barnum sort, This with the intense heat of the day, and the prospects of a shower, deterred many from appearing in front of the HERALD office at the hour when we went to press. Notwithstanding these little drawbacks, the crowd was quite as large as we expected, and in five minutes after the HERALD was distributed, there was not a man to be seen. One shipwrecked knapsack, and the heels of several boots were said to have been seen on the road to Pike's Peak but of this we have no positive information.

A good deal of discussion has been had in private circles about the matter, and some have averred that the cat that was let out, was decidedly black. Some are disposed to think that there is a mystery yet not altogether solved, and a number of private audiences have been granted distinguished individuals who called to enquire what it all meant, but our answer has invariably been—PHUN.

A MISER OUTWITTED.—Greasy King, a great miser in San Francisco who a few years ago decamped from New Orleans with a fortune, leaving his creditors only tracks, and leg bail, has recently been caught. He occupied a room called "Kings castle" on the third story of a fire proof, thief proof, and as he supposed sherriff proof building, to which he never admitted any one, doing all his business on the street. A Sheriff with an execution from New Orleans however watched his chance and on finding the door unbolted, entered, greatly to the consternation of the sole inhabitant. Upon locking around, there were actually lying about, $30,000 in bags of gold coin, watches, diamonds, stocks and other property. These were discovered in the bed, stuffed between the mattrasses and under the pillow. But besides this, there is an iron closet in the room, and from the revelations made, it is supposed that King is really worth about $300,000.

This poor man has worn the same suit of clothes ever since he first went to California, hence the name, Greasy King.

SUMMER SOURS.—Physiological research has fully established the fact that acids promote the separation of the bile from the blood, which is then passed from the system, thus preventing fevers, the prevailing disease of summer. All fevers are "bilious," that is, the bile is in the blood. Whatever is antagonistic to fever is "cooling." It is a common saying that fruits are "cooling" and also berries of every description; it is because the acidity which they contain aids in separating the bile from the blood, that is, aids in purifying the blood,

The above and more of the same sort is credited to Dr. Hall of the Journal of Health who is more extensively quoted, than any other writer on medical subjects we know.

The condition termed "bilious" is a consequence of a feverish state of the system, and in nowise a cause of fever. When there is fever, there is deficient secretion of the liver and hence the bile remains in the bood and produces the appearance and symptoms known as "bilious."

There is no more absurd popular error than that disease comes from being "bilious." Acids allay fever, and hence promote the normal function of the liver.

Women who wear hoops made out of green timber are said to be liable to take cold and die of the hooping-cough.

A cargo of six hundred Africans have been landed on the coast of Florida, near Tampa. The vessel was abandoned.

SHOCKING—FAXON the "Local" of the Buffalo Republic descants on the "fashion" said to be introduced in Europe of wearing calico to church as follows:—

If such a thing should be introduced here as a style, not one in a hundred would attend church. It isn't the sermon or the holiness of the place that attracts —the desire to see what others wear, to outdress or out-strip all rivals in hoops, or insufficient dress, or in laces, jewelry, feathers, &c., is the main object with fashionable church goers. And by the way, how can a lady of the style pretend to be an applicant for a place in Heaven, with such hoops, for "straight is the gate and narrow is the way."

Let 'em just turn the hoops up edgewise and we reckon they will be able to squeeze in.

STREET PREACHING.—At a meeting of evangelical ministers, and religious friends of different denominations, recently held in Cincinnati, it was decided to commence preaching in the open air. Steps are to be taken immediately to district the city, and to appoint persons, clergyman and laymen, to preach in the street, not only on Sunday, but on the other days of the week. At the same meeting, Judge Storer, who was Chairman, gave the following definition of the word "Evangelical." "All who love Jesus and depend on "him for salvation, without regard to their "works or merits."—*Exchange.*

Pray what is the use of preaching if "works or merits" have nothing to do with salvation? To teach men to depend on Jesus and be as wicked as they please —this is a comfortable doctrine truly.— The world will reform fast on such preaching no doubt!

A MAN MAY CHANGE HIS NAME.—the New York Court of Common Pleas (Daly J.) has recently decided that a man may change his name and lawfully use his new cognomen in all business and other transactions. Any contract or obligation he may enter into, or which others may enter into wich him, by that name, or any grant or devise he may make by it, would be valid and binding. In this state, under the act of 1847, a Judge of the Higher Courts may authorize any person of full age resident here, to assume another name, if the Judge is satisfied that the applicant will derive any pecuniary benefit from assuming another name. Though the custom is widespread and universal for all males to bear the name of their parents, there is nothing in the law prohibiting a man from taking another name if he choose. There is no penalty or punishment for so doing.

THE HEAT OF THE SUN.—The depth to which the heat of the sun extends into the earth varies from fifty to a hundred feet; never, however, exceeding the latter distance. The greatest natural tempertare ever authentically recorded was at Bagdad in 1779, when the thermometer (Farenheit's) rose to one hundred and twenty degrees in the shade; on the west coast of Africa the thermometer has been observed as high as one hundred and eight degrees in the shade; and Backhardt in Egypt and Humboldt in South America, observed it at one hundred and seventeen degrees in the shade. We have known it to stand at 102 in the shade, in this city.—*Albany Argus.*

Sleeping in Church.—What a wretched habit! It is as unseemly as it is miserable. What a sight! head fallen back, eyes shut, mouth open, and nostrils distended. No wizard nor ghost ever dwelt in the Emerald Isle more frightful. A few of them in a congregation is enough to upset its gravity, and to destroy the spirit and power of the best sermon in the world.

KEEP WRITING LETTERS.—The Schenectaday Star thinks the case of Wise and his letter is an argument against the practice of letter-writing by candidates for office. We think differently—that the practice is a first-rate one, for *such* candidates, and ought to be encouraged—for in this way the people find out the true character of the candidates. Let other office seekers "go and do like-*Wise*," by all means.

EXTRAVAGANT DINNERS AT SARATOGA.— One lady is reported to have given a dinner, to twenty friends, which cost $400, and a New York Banker paid $750 for twenty-eight persons. A Southerner, however, surpassed that, he having paid $1,400 for one dinner, the largest private dinner ever given at that fashionable resort. The fool and his money &c.

We have a curious piece of intelligence from the assessors of Ohio, relative to damages by dogs. In 11 counties, 7,654 sheep were killed, and 7,360 wounded by dogs during the year—the value of the aggregate lots being $25,342.

Forty thousand Frenchmen are to remain in Italy for the present. Quite as many more will remain there forever, having become seized and possessed of certain houses that will last till doomsday.

Arrival of the Steamship Fulton.

NEW YORK, Aug. 11.

The steamship Fulton arrived this morning from Havre, via Cowes, on the evening of the 27th ult. She brings 130 passengers. Her news is mostly anticipated.

The following are the very latest advices by telegraph to Southampton:

Advices from Paris indicate unpleasant feelings towards England.

An article in the Moniteur discrediting the rumored probability of an accord between France and England, on the question of the Congress and disarmament, had produced painful impressions.

The London Herald's Paris correspondent says the banding together of France, Russia and Austria, and the immense naval preparations of France, renders it difficult to disbelieve the universal report of a great blow being contemplated against England.

The French steam navy is to be increased to 150 men of war, exclusive of 72 transports.

St. Petersburg papers publish the treaty between Russia and China, ratified by the two Emperors. It grants leave to Russia to send ambassadors to Pekin; promises protection to christian ministers, and authorises a monthly service between Kiachk and Pekin.

NEW YORK, Aug. 11.

The steamer North Star arrived to day, with California dates to the 23d ult., and Aspinwall to the 3d of August.

Nothing important from California.

The excitement on the Isthmus about the Indian mounds is dying out.

The English steamer Paramatta was still lying on the reef near St. Thomas.

All her cargo had been thrown overboard, and divers were at work blowing up the coral rock on which she is lying.

California markets dull, with little prospect of immediate improvement.

East India and China projects declining in consequence of heavy stock.

You Spoke Too Late.

A traveler on the Mississippi relates the following experience:

"Early this morning there were added to our company of travelers a pair who looked like runaways. The gentleman was a tall, raw-boned specimen of the 'half horse, half-alligator' class, and the lady a fair match for him. Among the passengers from Napoleon is a solemn looking gentleman, who has all along been taken for a preacher. About nine o'clock last night I was conversing with the 'reverend' gentleman, when a young man stepped up, and addressing him, remarked: 'We're going to have a wedding, and would like to have you officiate.' 'All right, sir,' he replied, laughingly, and we stepped into the ladies' cabin, where, sure enough, the couple stood waiting. There had been some 'kissing games,' and several mock marriages gone through with during the evening, and I supposed this was merely a continuation of the sport; and so thought the 'preacher,' who, I could see, had a good deal of humor in him, and was inclined to promote general good feeling and merriment. The couple stood up before him, (a good deal more solemn than was necessary in a mock marriage, I thought,) and the 'preacher' asked the necessary questions, and then, proceeding in the usual way, pronounced them 'husband and wife.'

There was a good deal of fun afterward, and when it was over I left the cabin, and so did the 'preacher,' who remarked to me that he liked to see young folks enjoying themselves, and took a good deal of pleasure in contributing to their fun; but he did not understand why they should select him to act the preacher. Just then some one called me aside, and the old gentleman stepped into his state-room, which was next to mine. When I returned, the door stood open, and the 'preacher' stood just inside, with his coat and vest off, and one boot in his hand, talking with the gentleman who played the 'attendant,' and who, as I came up, remarked: 'Well, if that is the case, it is a good joke, for they are in dead earnest, and have retired to the same state-room.' The old gentleman raised both hands, as he exclaimed: 'Good heavens! you don't tell me so!' and rushing just as he was, boot in hand, to the state-room indicated, commenced an assault on the door, as if he would batter it down, exclaiming at each lick: 'For heaven's sake don't; I ain't a preacher!' The whole cabin was aroused, every state-room flying open with a slam, when the door opened, and the 'Arkansas traveler,' poking out his head, coolly remarked: 'Old hoss, you're too late!'"

FOND OF HER DRINK.—There is one dowager lady at Saratoga who drinks eighteen glasses of the Congress water every morning, before breakfast, and another one drinks twelve glasses! Capacious.

Murders: The Windham Journal says that on Saturday, the 30th ult., no less than eight men were confined in the Catskill jail under the charge of murder.

Great excitement prevails at the Kansas gold mines in consequence of a discovery of rich diggings at the head waters of the Colorado. Hundreds were leaving daily for the new diggings.

The value of the hay crop in Delaware this year will be nearly ten millions of dollars.

Tar and sweet oil, properly mixed and applied, is the only "sure thing" we know of, to prevent gnat and mosquito bites.

"Did you present your account to the defendant?" inquired a lawyer of his client. "I did." "And what did he say?"— "He told me to go to the devil and I came to you."

THE GREAT AMERICAN

Boot & Shoe Store,

No. 2, Odd Fellow's Hall.

GREAT DISCOVERY!

NEW MODE OF ADVERTISING.

The Proprietor of the Great American Shoe Store, No. 2 Odd Fellows Hall, south side Main street, nearly opposite the Post Office, claims to be the inventor of the cheapest and best mode of advertising in the world. He claims to be the manufacturer of

BOOTS AND SHOES

that will advertise themselves, by giving ample satisfaction to the wearer, thereby speaking in language not to be misunderstood by him, which he immediately interprets to his neighbors. After having tested the merits of his invention for the last twenty years, he feels confident of its

ENTIRE SUCCESS,

and would recommend it to all the other Boot and Shoe makers and dealers in this vicinity to be adopted by them. And he would especially call the attention of the citizens of Genesee county and advise them to study well its operations.

He has on hand a good assortment of Stock, such as

French calf skins, kip and morocco, &c., which he holds will stand investigation from the best of judges; and *MECHANICS* to manufacture it who are second to none in the State.

BY TELEGRAPH.

NEW YORK, Aug. 11.

The Atlantic Telegraph Company have decided to make the conductor of the next cable of copper wires twisted, and about six times the size of the old cable. There will be no outside covering of iron wire as on the cable laid last year, except for a few hundred miles at each end. The new cable is to be made, laid down, and guaranteed in all respects, and is expected to be in order for business early next summer.

Mr. Cyrus W. Field, of this city, occupies two columns of some of the New York papers with a full account of the affairs of the Company.

We understand that the American public will have opportunity to subscribe to the new stock guaranteed by the British Government.

DETROIT, Aug. 11.

It has been officially determined to close the Saut Ste Marie Canal for repairs as contemplated during the present season of navigation.

NEW YORK, Aug. 11.

It appears from Liverpool papers of the 30th that Mr. Ten Broecks' horse, Starke, won the Bentwick memorial stakes on the previous day, in a field of 15 horses. Prioress was third. The value of the stakes was 1000 sovereigns.

Mr. Ten Broecks is said to have won £25,000 on the Goodwood stakes, before reported won by Starke.

Denslow's New Religion

IN MEDICINE!

The times have chang'd, since Denslow found
The use of Roots and Herbs,
Were hyge'ne on, more truthful ground,
And Ills of Life disturbs:
It was in olden times, 'tis said,
That Poisons *held* the cure—
And patients then, were *surely* bled,
To drain off blood impure;
'Twas then, when Ills in fury ran,
The Patient was reduc'd—
And on his back depletive flung—
By Alopaths seduc'd!
'Twas then, that Nature had no aid,
And Science was her foe—
While Ills the suff'ring forms pervade,
And Poisons were the go!—
'Twas then, that Scientifics taught,
That Poisons would transform,
Each Patient, who, with Ills were fraught,
And rout disease by storm!—
'Twas then, they *taught*, if Poisons cure,—
'Twas *changing* Ills for *it*—
When Nature was, most always sure,
To make hyge'nic fit!
But now, Botanics ev'ry where,
Teach quite reverse of that,
And *use* such aidens will compare,
With Nature's sure combat!
Then Nature in her promptest flow,
Demands the Roots and Herbs,
To aid her to a healthful glow,
When fell Disease disturbs.
And People all, should *know* the where,
To get these kindest aids,
To build up Nature blooming fair,
While health their forms pervade!
And faith—its "Denslow in the rear,"
Who has them all on hand,
As fresh as from the Earth they peer,
Or in the forest stand!
There, all can get the Native Cures,
Which grow on ev'ry Farm,
That depurates, and health secures,
Without the least alarm!
He has these Plants in compound form,
Made up with propper skill—
And Composition, too, that's warm—
In Powder, or in Pill!—
In Syrups, too, for great and small,
That's powerful and right—
And Drops that makes the sweat to fall,
And show disease a fight!
He asks no *odds* of any man,
In getting up a sweat,
And with his Physiopathic plan,
He'll cure a Nervous fret!
Oh, ye that would the Truth receive,
And practice honest right,
And thus to Self most faithful live,
Do not Botanics slight:
For in these Herbs, there's teeming life,
That points to all alike,
With such recuperative strife,
That fell Disease, 'twill strike!
'Tis God who permeates them all,
Imparting well its Cures—
And hence, the Devil would forestall,
What He to us secures!
But Denslow waits, a chance to tell,
His Majesty the right,
Which hath to Demons even fell,
And blaz'd to them its light!
Yet when he opens front again,
He'll fire a louder gun!—
And scatter Fogie's Logic train,
Beyond the setting Sun!

DR. COGGSWELL'S NEW MEDICAL SALT,

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues Inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium, of the fluids in the body, the want of which is the sole cause of inflammation!

NOTICE TO INVALIDS! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are speedily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough, Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more, no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*.

Ask your neighbors about the *New Medical Salt*. If sick, try; if not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S NEW MEDICAL SALT is for sale in Batavia by H. W. Fellows and by all enterprising druggists wherever the Herald is. As it is not a *Patent* medicine, but the prescription of an eminent Physician, no one should fail to try the New Medical Salt. For aid estimonial and directions see circular.

MEDICINES.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease in any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases: consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER, and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "*impurity of the blood*," is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice*, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

DR. JOHNSON'S
HERB DISPENSARY!

OFFICE 95 MAIN STREET,

(Till acor, Up Stairs, Buffalo, N. Y.)

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually, to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion: Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgia pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea, or Fleur Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflammation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without exposure, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $5 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

N. B. *A word of explanation* to those who have known us under the style of Evans and Co. The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world-wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade; to protect the few who may be unacquainted with us, we would state that we have no connection with any other Gift-Book House—and though many advertise under the name of Evans & Co., the firm constituted by D. W. EVANS and J. H. PRESTON, is the first and only concern rightfully using the name. But to prevent all confusion in the future we shall use the style of D. W. EVANS & CO., and all persons wrongfully using the appellation to mislead the public, will be made to suffer the penalty of the law.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY.

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all *stages of pulmonary disease* by Dr. Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible,* into universal use, as I KNOW that they will prove not only

As Sure a Remedy in Consumption
as Quinine is in Intermittent Fever, but also
as Effectual a Preservative
as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage,* treated at my Dispensary, during the past year, *eight have completely recovered,* eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

☞ This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles, with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile* signature.

☞ No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

☞ Price, $2,00, or three bottles for $5,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 49 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postages. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

Blondinism.—Rochester is rejoicing over the prospects of a rope walking exploit over the Genesee Falls and River, within the precincts of that city. Such notoriety as **Blondin** has attained is always epidemic, and there is always little imitators of great feats. M. **Delave** is the man who is seeking to win the applause of the Rochester people in risking his life in an attempt to cross on a rope over the chasm below the falls of Genesee River.

The Rochester *Union* gives a circumstantial account of the preparations, the length and size of the rope, and the certain death that will come to the undertaker in case of a fall, all of which of course heightens the interest.

What a pity men cannot be found who will risk as much in that which will do good, as in such acts of reckless folly, merely for the sake of shouts of applause from a congregated rabble, or to see their names in print.

Blondin was entitled to the credit of doing that which no man had before undertaken, but his imitators will fall infinitely below a claim for decent respect in getting up such exhibitions.

Buffalo Invaded.—Buffalo is being "eaten up alive" by grasshoppers. The Lockport *Daily Advertiser*, says a gentleman just returned from a visit to that city, reports that the pavements, public grounds, steps of the buildings, and the entrances to the stores are covered with the insects, dressed in gray, green and hay colored suits. Their black, junk bottle colored eyes glisten like specks of antharcite, and a million of wings can be seen fluttering in the sunlight. Their visit to the city seems to be for the purpose of having an old fashioned country hop. They break up in small companies occasionally, for a pic-nic on the green lawns. They seem to have a remarkable penchant for calico, which they munch up into linty parcels; probably for the wounded. Swarms, headed towards Main street, are seen sleeping on the deserted side walks in the morning, exuding from their mouths a grass colored juice. They fly off at a tangent, in clouds, when disturbed in these morning devotions."

Buffalo must be a thrifty growing place, to furnish food for so many grasshoppers; and intensely green, to impart its hue to the insects that live in it, we will go out one of these hot days and enjoy the shade.

Brief News Items.

The letter of Gov. Wise, which is claimed on all hands to be very un-wise, still occupies a larger space in the political newspapers. Superficially viewed, the whole thing has been exceedingly funny, but a little lower down the evidences of corruption and political intrigue were any thing but mirthful.

The Inhabitants of Troy and regions northward into Vermont have been shocked by an Earthquake. It was felt on board the cars, on the Northern Railroad, when in motion.

Spiritualism seems to be gaining popularity of late, even in the newspapers.—Of all the murders, suicides, or other domestic calamities of which the papers have been so full lately, not a case has appeared charged to Spiritualism. The Buffalo Commercial even gives an account of a Spiritual wedding, and of the Plymouth Convention and absolutely admits that Free Love is ignored by the Spiritualists.

The report that the Davenport Boys were miraculously let out of the Oswego Jail, is contradicted.

The Telegraph gives an account of a potograph taken of a body after death which, when finished, was found to have the likenesses of two angels upon it, besides the form of the dead man.

The last arrival from the Isthmus of Panama brings further intelligence of the gold discoveries at Chiriqui.

Sublimity.—The Local of the Buffalo Republic has been out to Niagara Falls, and in giving an account of the "sights" relates the following see-n:

"One gentleman, about six feet high, in a fine dress coat, the skirts of which hung nearly to the ground, concluded to have his "pictur" taken together with the "mighty cataract." He took a position with his back turned to the Falls, stretched forth his right hand, and fixing his features in a rigidly stern expression, seemed to be saying to a person standing close by his side, "Behold the power of the Almighty as displayed in this sublime and awful spectacle: fear to offend Him, lest he should plunge you, at the last day, into a gulf of fire which will see the as doth this gulf at the foot of the cataract—above all, behold *me*, the Minister of God, standing here in the majesty of my calling, in the attitude of admonition, and who am about to be photographed together with this wondrous, awe-inspiring work of God." The sun, with the aid of the photographer, fixed the image of "God's Minister" and the splendid scene beyond, upon paper, and his reverence paid his bill and strode away. Whoever looks at that photograph will be likely to exclaim, "What a pity it is that that man stood in the way when this view of the Falls was taken!"

An old tar came down to the ladies cabin one cold, drizzly day, with some message, whilst Lady Hamilton was present. Seeing the cold condition of the sailor, she asked which he would prefer—a glass of wine or a glass of brandy. "It don't matter which," replied Jack; "but if your ladyship pleases, I can be drinking the wine while you are pouring out the brandy."

No married man ever prospered in the world without the co-operation of his wife. If she unites in mutual endeavors, or rewards his labors with an endearing smile, with what confidence will he resort to his daily toil, meet difficulty and encounter danger, if he knows he is not spending his strength in vain, but that his labor will be rewarded by the sweets of home! Solicitude and disappointment enter the history of every man's life, and he is only half provided for his voyage who finds but an associate for happy hours, while for his months of darkness and distress no sympathizing partner is prepared.

Live While You Live.—Thousands of men breathe, move, and live, pass off the stage of life, and are heard of no more. Why? They do not partake of good in the world, and none were blessed by them; none could point to them as the means of their redemption; not a line they wrote, not a word they spake, could be recalled; and so they perished; their light went out in darkness, and they were not remembered more than insects of yesterday. Will you thus live and die, O man immortal? Live for something. Do good and leave behind you a monument of virtue. —*Chalmers.*

Just Right.—The friends of the Rev. B. C. Smith, of Prattsburgh, have settled upon him a yearly anuity of two hundred and fifty dollars while he shall remain a resident invalid. This is as it should be. A minister stricken down in the service of a people should not be shifted to some remote field to starve; and none but downright barbarians would think of doing so. —*Bath Advocate.*

Rev. Mr. Smith is the gentleman whose extraordinary trial by the Presbytery of his church, on a charge of preaching heretical doctrine, attracted much attention a few years ago. It will be recollected that one feature of the trial was his preaching a "specimen" sermon before his *very* learned accusers and triers, which they denounced as abominable, when he cooly turned and showed that he had been simply rehearsing a discourse of one of the greatest lights of the church!

Cholera Mixture.—The above heading was suggested to us, says the Utica *Telegraph*, as we saw a wagon load of watermelons moving up street, and we commenced an arithmetical calculation, in which was involved the probable number of summer complaints embodied in the load—the number of doctor's prescriptions which their consumption would occasion—the number of coffins, of all sizes, it would take to accommodate the victims—the cries and groans of bereaved relatives—and, as a natural result of the above cause, the addition to the business of livery proprietors, retailers of mourning goods, undertakers and sextons. To counterbalance the above category of results, all we could figure up was the mere momentary gratification of the palate. We, therefore, concluded that eating watermelons is "paying too dear for the whistle."

A **young** Sawbones having courted a girl for a year, and got the mitten, turned round and sued her father for "visits" he paid her.

A Romantic Attachment.

The New York correspondent of the Charleston Courier tells a pretty story about a pretty maid servant, which we copy, proem and all:

Almost everybody that is anybody is now out of town. The business streets are less crowded than usual, while the fashionable ones are entirely deserted. The young men in the downtown wholesale stores have nothing to do but to loaf, read the papers, and try to keep cool. The splendid residences in the Fifth avenue and other similar streets are barred and bolted, and even a procession with a band of music brings no one to the windows as it passes, but the servant girls who remain at home. They have a good time playing the lady while their mistresses are dancing at Saratoga and bathing at Newport. But I would have you to know that some of the maid servants here are a very good-looking and well-behaved class. A most amusing illustration of the infatuation of others, occurred the other day. A young man from one of the interior States, having come to town, thought it but right and proper that he should pay his respects to a family with whom members of his own had been well acquainted. He got himself up regardless of expense, and having been shaved and shampooed at Phalon's and dined at the St. Nicholas, he started to call upon his aristocratic, but unfamiliar friends. Ringing the bell a very handsome young woman came to the door and let him in. Upon inquiry as to whether the "folks were at home," he was informed that they were not, but they had been out of town some time, and would be absent all Summer. The young man was fresh from the country, and could not distinguish the lady from the lady's maid. Having heard his sister describe Miss B——, he made up his mind that the person before him was none other than she whom he had called to see. The maid servant denied the soft impeachment, but he would have it that she was only playing off. He had a night or two before been to see "She Stoops to Conquer" at one of our theaters. The maid servant finding it impossible to undeceive the young man from the country, invited him into the parlor. They spent the evening very pleasantly together, the ready and spirited conversation of the servant convinced her visitor that she had been playing an assumed part. He thought that she was intelligent and handsome enough to be the daughter of the proprietors, if she were not. Under this conviction he went to his hotel, not, however, until he had assured her that he would call again, and his sleep was of course sweetened by pleasant dreams. His visits were frequent and constant. And although he has since satisfied himself that the young woman whom he saw was a maid servant, and not the young lady of the house, his interest in her has increased to such an extent that he has formally proposed marriage. He is honest in his intentions, and well to do in the world and of course she will have him. This marriage will or should create quite as much talk as that soon to take place between the millionaire Spaniard and the daughter of a gentleman late a Lieutenant in the Navy.

A Curious Resurrection Case.—"A curious case occurred last week at Rome, in Franklin County, Ohio. Mrs. Peters, wife of a German of that name, after a short illness, was supposed to have died. Her husband made immediate arrangements for her funeral, having procured a coffin in this city. On placing her body in the coffin, a general perspiration was observed throughout the skin, which was reported to the husband with the suggestion the burial be deferred, in the hope of reanimation. To this the husband objected, and had her interred the same day (Saturday). After the burial services were over, some relatives of the supposed deceased, who reside in this city, arrived at Rome to attend the funeral, which had already taken place, and hearing of the circumstances, caused the body, which then had been four hours in the grave, to be disinterred, when, to their surprise and joy, they found signs of life still remaining. Restoratives being administered, Mrs. Peters gradually recovered, was taken by her friends to this city, and is now well—We are informed that she refuses to again live with her husband. The circumstances connected with the affair are strange indeed, and should undergo investigation. —*Columbus (O.) Fact.*

Horace Greeley Among the Mormons.—The Deseret News of July 13 thus chronicles the arrival of Horace Greeley in Salt Lake City:

Horace Greeley, Esq., editor of the New York Tribune, arrived on Sunday evening last in the mail stage from the East, on the way to the Pacific. We understand that he intends to remain here a short time to see the "lion," as there is no 'elephant,' and other curiosities that may be found in and about the city.

A Hindoo female said to a Christian lady, "Your Bible must have been written by a woman, it contains so many kind things about us. Our Shasters say nothing but what is hard and cruel of us."

A Phragment of an Owed to a Phreemont Poll, Whot was a Bein Cut Down for Stove Would:

Woodman! Spare them poles,
Touch not a single wun,
Last fall they cheered our soales,
Just let 'em stand for phun.

It was our Phreemont Clubb
That let did place them there;
Oh! please, sur, let 'em stand,
Or else yew'll hear us sware.

It is in the power of every man to preserve his probity; but no man living has it in his power to say that he can preserve his reputation, while there are so many evil tongues in the world ready to blast the fairest character, and so many open ears ready to receive their reports.

The truly wise man and christian will not ignore all works of the imagination, but will select for his family those which exalt virtue and deprecate vice. Thus supplying a want of our nature with proper ailment, Christ spoke in parables, and Bunyan has converted thousands through his immortal fictions.

Small acts of kindness, how pleasant and desirable do they make life! Every dark object is made light by them, and every tear of sorrow is brushed away.—When the heart is sad, and despondency sits at the entrance of the soul, a trifling kindness drives away despair, and makes the path cheerful and pleasant.

A quantity of cheese manufactured at Granville, Washington county, this state, had been sold and eaten, both in Brooklyn and Baltimore, and families in both cities were recently taken down with symptoms of poisoning. The cheese was submitted to chemical analysis, and an arsenite said to have been found in the "dressing," or composition employed by the dairy women. If this is the case, the drug was probably used to prevent the "blowing" by the flies.

"My son," said a philosophical old gentleman, "when draymen take the temperance pledge and the police refuse bribes, when an omnibus half empty goes the same pace as a full one, when the laws of private property extend to umbrellas, and when a bachelor in lodgings finds a shirt without a button off, then thou mayest chance to find a wife who will not object to travel without eight and twenty packages, and who will show herself possessed of such angelic self-denial as even to refuse thine offer of a dress simply because she thinks she doesn't need it."

An Easy Way to Make Money.—The Washington States describes a novel way of raising funds, which is carried on in that and other cities. It says:

"It seems that a firm in New York advertise that they have money to loan.—On application being made, the borrower is required to advance one per cent on the amount he desires, pending the consideration of his application. If it is rejected, one half of the amount of one per cent on the sum desired is returned to him, and the remaining half goes to the firm for the 'trouble' they have been placed at in considering the application.

Under the supposition that all applications are rejected, quite a handsome amount on the percentage must result to the pretended lenders. The firm is located in New York, and an agency now exists somewhere in this city. Some one of the applicants who has his application numbered as rejected, '300,' has reported the matter to the New York police authorities. However, it may be questioned whether there are any false pretences about this, in view of the fact that the applicant, before investing his money, understands the terms of the bargain."

The Proprietor of the Great American Shoe Store, No. 2 Odd Fellows Hall, south side Main street, nearly opposite the Post Office, claims to be the inventor of the cheapest and best mode of advertising in the world. He claims to be the manufacturer of

Denslow's New Religion
IN MEDICINE!

The times have chang'd, since Denslow found
The use of Roots and Herbs,
Were hyge'ne on more truthful ground,
And Ills of Life disturbs:
It was in olden times, 'tis said,
That Poisons *held* the cure—
And patients then, were surely bled,
To drain off blood impure;
'Twas then, when Ills in fury run,
The Patient was reduc'd—
And on his back depletive flung—
By Alopaths seduc'd!
'Twas then, that Nature had no aid,
And Science was her foe—
While Ills the suff'ring forms pervade,
And Poisons were the go!—
'Twas then, that Scientifics taught,
That Poisons would transform,
Each Patient, who, with Ills were fraught,
And rout disease by storm!—
'Twas then, they *taught*, if Poisons *cure*,—
'Twas *changing* Ills for it—
When Nature was, most always sure,
To make hyge'nic fit!
But now, Botanics ev'ry where,
Teach quite reverse of that,
And use such aids as will compare,
With Nature's sure combat!
Then Nature in her promptest flow,
Demands the Roots and Herbs,
To aid her to a healthful glow,
When fell Disease disturbs.
And People all, should *know* the where,
To get these kindest aids,
To build up Nature blooming fair,
While health their forms pervade!
And faith—its "Denslow in the rear,"
Who has them all on hand,
As fresh as from the Earth they peer,
Or in the forest stand!
There, all can get the Native Cures
Which grow on ev'ry Farm,
That depurates, and health secures,
Without the least alarm!
He has these Plants in compound form,
Made up with propper skill—
And Composition, too, that's warm—
In Powder, or in Pill!—
In Syrups, too, for great and small,
That's powerful and right—
And Drops that makes the sweat to fall,
And show disease a fight!
He asks no odds of any man,
In getting up a sweat,
And with his Physopathic plan,
He'll cure a Nervous fret!
Oh, ye that would the Truth receive,
And practice honest right,
And thus to *self* most faithful live,
Do not Botanics slight:
For in these Herbs, there's teeming life,
That points to all alike,
With such recuperative strife,
That fell Disease, 'twill strike!
'Tis God who permeates them all,
Imparting well its Cures—
And hence, the Devil would forestall,
What He to us secures!
But Denslow waits, a chance to tell,
His Majesty the right,
Which hath to Demons even fell,
And blaz'd to them its light!
Yet when he opens front again,
He'll fire a louder gun!—
And scatter Fogie's Logic train,
Beyond the setting Sun!

DR. M'LANE'S

CELEBRATED

VERMIFUGE

AND

LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,

PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa. To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium of the fluids in the body, the want of which is the sole cause of inflammation!

NOTICE TO INVALIDS!! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough, Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more, no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*.

Ask your neighbors about the *New Medical Salt*. If sick, try it; if not sick, remember the *New Medical Salt*.

SECTION 1. The commissioners of the canal fund are hereby authorized to borrow on the credit of the state two million five hundred thousand dollars, at a rate not exceeding six per cent. per annum, and reimbursable at such periods as shall be determined by the said commissioners, not exceeding eighteen years from the time of making such loan. All the provisions of law in relation to loans made by commissioners of the canal fund, and the issue and transfer of certificates of stock, shall apply to loans authorized by this act, so far as the same are applicable.

§ 2. The moneys realized by such loan shall be applied exclusively to the payment of claims against the state not otherwise provided for, for work done on the canals of the state, and for private property appropriated by the state for the use of such canals, and for injury to private property growing out of the construction of the canals or to the payment of the principal and interest of such loan, and for no other purpose whatever.

§ 3. Two million five hundred thousand dollars is hereby appropriated, to be paid out of the treasury, on the warrant of the auditor of the canal department, from the said moneys, within two years from the time when this act shall take effect, for the payment of claims against the state, specified in the last preceding section, and for the payment of the interest on the loan authorized by this act, which shall become payable prior to the receipt into the treasury of the first annual tax, hereinafter directed to be levied and collected, for the payment of the interest and principal of the loans authorized by this act; but any sum applied to pay interest as aforesaid, may be refunded out of the proceeds of the said taxes when received into the treasury.

§ 4. An annual tax is hereby imposed, and shall be levied and collected in the same manner as other State taxes are levied and collected sufficient to pay the interest and redeem the principal of the loan hereby authorized, within eighteen years from the time of the contracting thereof. The comptroller shall ascertain and determine what sum, being applied in payment of principal and interest, in the first year after the tax can be collected as aforesaid, and in each succeeding year thereafter, within a period of eighteen years from the time of contracting said loan, will be sufficient to pay the interest and redeem the principal of said loan within said period of eighteen years; and shall in each year apportion the sum so required among the several counties of this state, according to the then last corrected assessment rolls returned to his office, and shall give notice of such apportionment to the boards of supervisors of the respective counties. It shall be the duty of the boards of supervisors of the respective counties to cause the amount so apportioned in each year to be levied, collected and paid to the treasurer of this state in the same manner as other state taxes. The money collected and paid into the treasury under this section shall constitute a sinking fund to pay the interest and redeem the principle of the loan contracted pursuant to this act, and shall be sacredly applied to that purpose; and if at any time, the sinking fund shall be insufficient to comply with the requirements of this section, the comptroller shall increase the sum thereafter to be levied and collected by tax in each year, so as to make the fund adequate for the purpose aforesaid.

§ 5. The fourth section of this act, imposing a tax may be repealed whenever the revenues of the canals, after meeting all present constitutional charges upon them, shall amount to enough to form a sinking fund sufficient to pay the interest and redeem the principal of all loans without the eighteen years mentioned in the first section of this act.

§ 6. This act shall be submitted to the people of this state, at the next election, and the votes given for its adoption, shall be endorsed "Constitutional loan," and shall be in the following form: "For a loan of two million five hundred thousand dollars, to pay the floating debt of the state," and "Against a loan of two million five hundred thousand dollars to pay the floating debt of the State." The inspectors of the several election districts in this state, shall provide a separate box in which the ballots given in pursuance of this act shall be deposited. The ballots shall be canvassed and returned, and the result shall be votes given for the office of Governor of this determined and certified in the same manner as state. If a majority of the votes cast, pursuant to this act, shall be "For a loan of two million five hundred thousand dollars to pay the floating debt of the state," then the preceeding sections of this act shall take effect; but if a majority of the votes so cast, shall be "against a loan of two million five hundred thousand dollars to pay the floating debt of the state," then the said sections shall not take effect, but shall be inoperative.

You are without delay to deliver a copy of the above notice to the Supervisor or one of the Assessors of each town or ward in your county; and also to cause a copy of said notice to be published in all the public newspapers printed in your county, once in each week until the election.

Yours respectfully,
GIDEON J. TUCKER, Sec'y of State.

DR. JOHNSON'S

HERB DISPENSARY!

OFFICE 95 MAIN STREET,

(2d door, Up Stairs, Buffalo, N. Y.)

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion: Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgy pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea, or Fluor Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflamation—a state of morbid irritability, hence the want of success on the part of the old School Doctors.

DR. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $5 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

N. B. *A word of explanation* to those who have known us under the style of Evans and Co. The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to prevent the few who may be unacquainted with us, we would state that we have no connection with any other Gift-Book House—and though many advertise under the name of Evans & Co., the firm constituted by D. W. EVANS and J. H. PRESTON is the first and only company [illegible] name. But to prevent all confusion in the future we shall use the style of D. W. EVANS & CO., and all persons wrongfully using the appellation to mislead the public, will be made to suffer the penalty of the law.

CONSUMPTION CURED!
DR. CHURCHILL'S DISCOVERY.

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA.

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all stages of *pulmonary disease* by Dr. Churchill's new treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable* success. Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible*, into universal use, as I know that they will prove not only

As Sure a Remedy in Consumption
as Quinine is in Intermittent Fever, but also
as Effectual a Preservative
as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*

"*Out of twenty-two cases in the third or last stage, treated at my Dispensary, during the past year, eight have completely recovered, eight have died, and six are still under treatment. Such a result is altogether unparalleled in the annals of Medicine.*"

This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda, J. Winchester, New York." Each bottle has also a *fac-simile signature.*

No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

Price, $2,00, or three bottles for $5,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the sole General Depot in the U. S., 43 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postage. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

A Fancy Clergyman.

The Rev. G. W. Godfrey, of New York, was ordained at Trinity (Episcopal) Church in that city, sometime last winter, and soon afterwards received a call to assume the pastorial charge of an Episcopal Church at Galveston Texas. A few weeks since he turned up at Suspension Bridge, having left Texas, as he says, because the Church would not pay him his salary. At Suspension Bridge he somehow fell into a house of ill fame where he met a blooming woman, calling herself Mrs. D. E. Sickles, but in fact the wife of a Mr. Dyke, a telegraph operator at Syracuse, to go to whom she had ostensibly left her home at Canada West. The Rev. gentleman calling himself, Rev. James W. Hartford of Texas, being facinated with Mrs. Dyke, at once arranged to have her accompany him on to New York. Stopping over one day at the Adam's House, Albany, Dyke got on the track of his absconding wife and discovered her there, and tried to induce her to return with him, but she having a predeliction for clergymen, escaped and proceeded on to New York, to which city the Rev. gentleman had himself departed from Albany for, on the appearance of Dyke the husband. Arriving at N. Y., Mrs. Dyke proceeded to look up her Rev. friend, in which she seems to have had no difficulty, finding him in Leroy-st., at the house of his mother-in-law by a former marriage, where he was comfortably domiciled, having in his possession her trunks ets which he had had the precaution to take with him from Albany. Here Dyke again appears in search of his truant wife, finding the house and relating his grievances to the lady mistress; but the Rev. gentleman was too cunning for him, and moves the baggage, taking himself and it is supposed Mrs. Dyke, to parts not yet known.

The New York Tribune, from an account in which we condense the above facts, further says:—"Mr. Godfrey has been twice a widower, having married the sister of his first wife early last Spring, about four months after he had become a widower. The second wife died about two months subsequent to the marriage. The Rev. Mr. Godfrey officiated at the Episcopal Church in Rahway, N. J., on the following Sabbath after the occurrences above related."

We have no doubt the Rev. Mr. Godfrey would be glad to accept a call from any Church without a Pastor, that would pay him a good salary.

CURIOSITIES IN SCIENCE.—The water which drowns us as a fluent stream can be walked upon as ice. The crystallized part of the oil of roses is a compound substance, containing exactly the same elements, and in exactly the same proportions, as the gas with which we light our streets. The tea which we daily drink with benefit and pleasure, produces palpitations, nervous tremblings, and even paralysis, if taken to excess; yet the peculiar organic agent, called theine, to which tea owes its qualities, may be taken by itself without any appreciable effect. The water which will allay our burning thirst augments it when congealed into snow; but if the snow be melted, it becomes drinkable water. If melted before entering the mouth, it assuages thirst like water; but when melted in the mouth, it has the opposite effect. Ice, which melts more slowly than snow in the mouth, is very efficient in allaying thirst.

At Detroit an artesian well has been bored for the purpose of supplying the State Prison with water. At the depth of one hundred and fifty-five feet they struck what seemed to be an inexhaustible vein of pure water, and in such quantity as to supply all the shops. At the depth of ten feet the workmen struck a solid rock, and it continued, varying somewhat in hardness only until they came to water.

The Isthmus Gold Diggins.

A correspondent of the Panama Star who is evidently familiar with the locality in which the discoveries have been made, writes as follows:

"The discovery is a very interesting one in many points of view. The possession of such a quantity of the precious metal must inevitably tend to improve the industrial prosperity of that province, populate the country, and eventually lead to discovery of the mines from which the gold has been originally obtained, and which can only be in the adjacent Cordilleras.

They further show the universality of that belief in immortality, which like geological strata, we find in the new world as well as in the old. From the tumulus which contain the warrior, his horse and his drinking cup, to be used again the halls of Odin of our Scandinavian ancestors, to the playthings of the Indian children, now brought to light in the "Huacas" of Chiriqui; the earthen barrows of ancient Troy. Greece and Scythia in the steppes of Tartary; (where two corpses were found wrapped in sheets of gold weighing 40 pounds,) the mounds of the valley of the Mississippi and the table lands of Mexico—all speak the same sentiment; and it is to be regretted that no intelligent artist and "correspondent" is present at Chiriqui to depict and record the nature and form of these interesting relics of lost tribes, as modern avarice shall have destroyed the only hieroglyphics that remain to us of their industry, their hopes and fears about a future existence.

The ancient burying grounds are indicated in various ways—some have a heap of stones piled up rudely over the grave, others are shown by a piece of the column of basaltic rock, placed in the centre, some have a circle of stones inclosing the grave. They are found everywhere throughout the Province, from the shores of the Lagoon of Chiriqui to the Islands of the Pacific. They exist in the deepest valleys and along the highest recesses of the Cordilleras. Such as have been opened hitherto in the wooded plains produced but little gold. They were probably an agricultural race, and the utensils of the dead were in relation thereto. The present discovery has taken place near two villages called Boqueron and Bujaba, westward towards Punta Burica and Golfo Dulce. The plains thence become heavily wooded. Trees of large girth are found over the "huacas." The data as to their age is by no means precise. That they were before the conquest is plain enough, seeing that the conquerors respected neither the temples of God, nor the repose of the dead, if gold was to be gained.

All kinds of ghost stories are afloat among the natives, who report hearing unearthly noises and tambores (drums) in the Cordilleras, which they attribute to His Sable Majesty who does not wish the graves to be molested."

A communication from Rome says:

"The magnificent statue of the Marine Venus which was discovered a few weeks ago in some excavations made in the gardens of Julius Cæsar, not far from the Portese-gate, has been definitively purchased for the Imperial Museum of St. Petersburg, for a sum of about 50,000f.

Christ said, "render unto Cæsar the things that are Cæsars."

COAL DISCOVERED.—Mr. P. BARMORE has left with us, says the Fredonia *Censor*, specimens of coal which have been brought to light in the excavation for the gas tank of the Natural Gas Company on Center street. The seam is about a fourth of an inch in thickness, compressed between the layers of slate rock, but the coal is very rich apparently in bituminous matter. In this coal exists the key to the solution of the natural gas phenomena in this section.—From the decompositon of this bituminous matter, located hundreds of feet perhaps below the surface, the gas is generated which finds its outlet through fissures of the superincumbent strata, and by which our village is now lighted.

A SMALL WORLD.—The great globe in Leicester Square, London, is the greatest globe ever made, being 60 feet in diameter. It would hold an ordinary house inside of it. The inequalities of surface on the globe are very accurately represented, and one sees on it that the height of the highest mountain is very insignificant compared with the immense diameter of the planet, and scarcely affects the spherical form of the globe. One thing strange about this glope is that you have to go inside of it to look at it, the map being all on the concave surface.

We are glad to see, says a lady writer the revival of an old fashion which we always liked very much and that is aprons. A neat dress, with lace collar, and pretty blacksilk apron, was always our ideal of home toilette. The styles, as worn at present, are small and tasteful, made of single colored silk and ornamented with pockets and trimming of black velvet, or rows of narrow lace.

Time is money that passes current, and was never counterfeited.

It is said that Dickens will be in America in eight weeks.

A car load of white (new) Michigan wheat the first of the season was received at Albany, Tuesday of last week.

In these days of folly, frivolity and appearances, there's no telling what the character of any preson is, for both sexes now wear false bosoms.

The cheapest gas in the United States is made at Pittsburgh, Pa., at $1,50 per thousand. The dearest in this State is at Auburn, where they pay $7. There are 43 cities and towns in the State which use it.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases: consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S
Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER, and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "*impurity of the blood,*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice,* and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

OBITUARY.

It is with extreme sorrow that we have to chronicle the death of JEREMIAH J. DARROW. He died last night about 11 o'clock after an illness of little more than two weeks, of remittent fever. The deceased was thoroughly known in all this community, and was esteemed as a most worthy man—being always kind, charitable, benevolent and most scrupulously honest all things. It was the aim of his life to be good as an erring mortal could be, he revealed to the appreciating mind the loveliness of character—a something within the external man that drew the art out in affection for him.

With the poor he was always most pa ent and charitable, never refusing to min ter to their wants when possible for him do so, and very successfully too, as a edical adviser, in which he was entirely lf educated. He at an early day em raced Spiritualism, and held steadfastly his faith to the last, always adhering to, d living out its doctrines so far as his portunities give him knowledge. FROM EUROPE,

Arrival of the Vanderbilt.

NEW YORK, Aug 13.

The steamship Vanderbilt, from Southampton on the 2d inst., arrived at this port this evening.

ENGLAND.

The Queen and Royal family sailed around the squadron, at Spithead, on Saturday, July 30th. Royal salutes were fired, &c.

The Russian squadron joined in the demonstration.

The London Herald has the following:—We have reason to believe that Mr. Dallas has recently placed in the hands of Lord John Russell, a dispatch from Washington, in which it is stated that the U. S. Government has resolved to abandon privateering, and thus to accept the declaration respecting this portion of Maritime law, agreed upon at the Congress in Paris, in 1856.

The Patria contradicts the report about Prince Napoleon being charged with a mission to Vienna.

The London Post says that Garibaldi has sent a circular to all the free States of Italy, in which he declares his army to be ready at any moment to continue the Italian war of independence.

The Prague Gazette says that a fearful fire broke out in the town of Klosterb, containing about 165 houses, and about 1000 inhabitants, few of whom saved any of their goods or houses. The entire town was destroyed in 1782.

The amount of the debt of India on the 1st of May, 1858, is returned at the sum of £80,104,084, of which £56,165,605 was registered debt—the rest floating.

The grand Duchess Marie, of Russia, arrived at Dover, after a rough passage from Ostend.

FRANCE.

The Times correspondent says that the Count De Presigney has left Paris on his return to London.

The Minister of War had addressed an order to all Colonels of regiment to send home all soldiers whose absence had been recalled, as the declaration of war against Austria, and likewise all those who are entitled by their services for leave of absence for six months, so that they may be at the disposal of the farmers who may require them for getting in the harvest.

The accounts from the agricultural districts are not unfavorable. The harvest, altogether, will exceed that of good ordinary year, and there will be an overplus for exportation.

AUSTRIA.

The Vienna correspondent of the Times says:—Although Count Colloredo had an audience of the Emperor on the 28th of July, and was long closeted with the Minister of Foreign affairs, he is not likely to leave for Zurich until the beginning of the coming week.

For a time a very unfriendly feeling towards England prevailed here, but the wrath of the Austrians is rapidly subsiding.

The promise of the Emperor of the French to put his army and navy on a peace footing has made a great impression on the Austrian financial world.

The Count De Bonnyville will return here as the representative of France.

SPAIN.

The Madrid journals of the 26th, state that a number of deputies of Lagranja had waited on the Queen to congratulate her pregnancy.

It is said that the government had resolved on establishing a municipal system in the Island of Cuba.

PIEDMONT.

Garibaldi has issued the following order, dated, LEVERE, July 29.

Howsoever political affairs may go in the present circumstances, it is the duty of the Italians not only not to lay down their arms and manifest discouragement, but to swell the ranks and show to Europe, that, guided by the heroic Victor Emanuel, they are ready again to confront the vicissitudes of war, in whatever form they may present themselves.

PAPAL STATES.

The Times correspondent from Rome says, that there is a great dissatisfaction felt here, and I have no hesitation in saying that the French soldiers alone keep down a general outbreak.

The Jesuits have been driven out Faenza, Forli and Terrara—in the last city only one hour was given them to leave, and in the other two, 24 hours.

The Bologna Gazette publishes a declaration to the effect that the Province of Romagna, had shaken off the Papal yoke, never to retain it again, and that it is their wish to be annexed to Sardinia.

TURIN, 30th.—The Dictator of Modena has convoked the popular assemblies. All persons competent to read and write, and whose age is not less than 21, will be entitled to vote. Perfect order prevails.

LATER.

PARIS, Wednesday.—The Moniteur announces the dissolution of the army of Rhigo.

The Corps of Chalons and Elfant remain established.

The Times' correspondent says the Emperor is very anxious to satisfy European powers of his pacific intentions, and before many days the European powers will be invited to a Congress, when a solution of the Italian difficulty will be proposed, which will deserve support for its liberal character.

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium, of the fluids in the body, the want of which is the sole cause of inflammation!

NOTICE TO INVALIDS!! The following forms which the unbalanced fluids assume, and many not here mentioned that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt.*

Ask your neighbors about the *New Medical Salt. If sick, try; if not sick, remember the New Medical Salt.*

DR. COGGSWELL'S NEW MEDICAL SALT is for sale in Batavia by D. W. Fellows and by all enterprising druggists wherever the Herald is read. It is not a Patent Medicine, but the prescription of an eminent Physician, no one fashionable to try the New Medical Salt.

CHAP. 271.

AN ACT to submit to the people a law authorizing a loan of two million five hundred thousand dollars, to provide for the payment of the floating debt of the state.

Passed April 13th, 1859—three-fifths being present.

The People of the State of New York represented in Senate and Assembly, do enact as follows:

SECTION 1. The commissioners of the canal fund are hereby authorized to borrow on the credit of the state two million five hundred thousand dollars, at a rate not exceeding six per cent. per annum, and reimbursable at such periods as shall be determined by the said commissioners, not exceeding eighteen years from the time of making such loan. All the provisions of law in relation to loans made by commissioners of the canal fund, and the issue and transfer of certificates of stock, shall apply to loans authorized by this act, so far as the same are applicable.

§ 2. The moneys realized by such loan shall be applied exclusively to the payment of claims against the state not otherwise provided for, for work done on the canals of the state, and for private property appropriated by the state for the use of such canals, and for injury to private property growing out of the construction of the canals or to the payment of the principal and interest of such loan, and for no other purpose whatever.

§ 3. Two million five hundred thousand dollars is hereby appropriated, to be paid out of the treasury, on the warrant of the auditor of the canal department, from the said moneys, within two years from the time when this act shall take effect, for the payment of claims against the state, specified in the last preceding section, and for the payment of the interest on the loan authorized by this act, which shall become payable prior to the receipt into the treasury of the first annual tax, hereinafter directed to be levied and collected, for the payment of the interest and principal of the loans authorized by this act; but any sum applied to pay interest as aforesaid, may be refunded out of the proceeds of the said taxes when received into the treasury.

§ 4. An annual tax is hereby imposed, and shall be levied and collected in the same manner as other state taxes are levied and collected sufficient to pay the interest and redeem the principal of the loan hereby authorized, within eighteen years from the time of the contracting thereof. The comptroller shall ascertain and determine what sum, being applied in payment of principal and interest, in the first year after the tax can be collected as aforesaid, and in each succeeding year thereafter, within a period of eighteen years from the time of contracting said loan, will be sufficient to pay the interest and redeem the principal of said loan within said period of eighteen years; and shall in each year apportion the same so required among the several counties of this state, according to the then last corrected assessment rolls returned to his office, and shall give notice of such apportionment to the boards of supervisors of the respective counties. It shall be the duty of the boards of supervisors of the respective counties to cause the amount so apportioned in each year to be levied, collected and paid to the treasurer of this state in the same manner as other state taxes. The money collected and paid into the treasury under this section shall constitute a sinking fund to pay the interest and redeem the principal of the loan contracted pursuant to this act, and shall be sacredly applied to that purpose; and if at any time, the sinking fund shall be insufficient to comply with the requirements of this act, the comptroller shall increase the

§ 5. The fourth section of this act, imposing a tax may be repealed whenever the revenues of the canals, after meeting all present constitutional charges upon them, shall amount to enough to form a sinking fund sufficient to pay the interest and redeem the principal of all loans without the eighteen years mentioned in the first section of this act.

§ 6. This act shall be submitted to the people of this state, at the next election, and the votes given for its adoption, shall be endorsed "Constitutional loan," and shall be in the following form: "For a loan of two million five hundred thousand dollars, to pay the floating debt of the state," and "Against a loan of two million five hundred thousand dollars to pay the floating debt of the State." The inspectors of the several election districts in this state, shall provide a separate box, in which the ballots given in pursuance of this act shall be deposited. The ballots shall be canvassed and returned, and the result shall be votes given for the office of Governor of this determined and certified in the same manner as state. If a majority of the votes cast, pursuant to this act, shall be "For a loan of two million five hundred thousand dollars to pay the floating debt of the state," then the preceding sections of this act shall take effect; but if a majority of the votes so cast shall be "against a loan of two million five hundred thousand dollars to pay the floating debt of the state," then the said sections shall not take effect, but shall be inoperative.

You are without delay to deliver a copy of the above notice to the Supervisor or one of the Assessors of each town or ward in your county; and also to cause a copy of said notice to be published in all the public newspapers printed in your county, once in each week until the election.

Yours respectfully,
GIDEON J. TUCKER, Sec'y of State.

DR. JOHNSON'S
HERB DISPENSARY!

OFFICE 95 MAIN STREET,
(2d door, Up Stairs, Buffalo, N. Y.)
A NEW, SPEEDY, AND MOST SUCCESSFUL
MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgic pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea or Fleur Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflammation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $5 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY.

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA.

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all *stages of pulmonary disease* by Dr. Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—remove all remaining doubt, as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible,* into universal use, as I KNOW that they will prove not only

As Sure a Remedy in Consumption as Quinine is in Intermittent Fever, but also as Effectual a Preventive as Vaccination in Small Pox.

"*In no instance* have I found the remedy *fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage,* treated at my Dispensary, during the past year, *eight have completely recovered,* eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile* signature.

No other can be relied on as the purely hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

Price, $1,00, or three bottles for $2,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 43 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer, in the U. S., on receipt of twelve cents in stamps to cover expense of postage. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

TO CORRESPONDENTS:

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

New York State Map and Gazetteer.

We have been called upon by an agent of the Publishers of the above works, and enjoyed an opportunity to inspect the same.

The Map contains an area of 36 feet and is constructed from a new, actual survey of the entire State, every road and line having been determined by course and distance. The location of School Houses, Churches, Mills, Factories, Post Offices, Hamlets, Villages, Lakes, Ponds, Streams, Canals, Rail Roads, Hills and Mountains are distinctly and clearly shown by the usual conventional signs; and the details are so full that the location of any house or point in the State can readily be pointed out. It also contains *separate Maps on a uniform scale of all the cities in the State*, showing Streets and their names, and Wards and their numbers; a *Meteorological Map of the State*, showing mean annual temperature, depth of rain, and direction of winds since 1825, at the Meteorological stations established by the Regents of the University and by the Officers of the U. S. Army: a *Geological and Land Patent Map*, showing the Geology of the State, according to the New York system; and the boundaries, location and names of all the Land Grants within the State of more than 50,000 acres.

THE GAZETTEER contains a General View of the Topography, Geology, History and Institutions of the State, including the Internal improvements, Education, Religion, Legislative, Judicial and Administrative departments of Government, Agriculture, Manufactures, Commerce and Navigation. Also, a brief History and Description of every County, City, Town, Village, Hamlet and Locality; all prepared from material collected by competent men, who have been sent through the State for the purpose.

It would seem needless to enlarge upon the importance of, and practical utility to every family in the state of such a history and chart of the State, as is comprised in the "Map and Gazetteer."

Genesee county is now being canvassed for subscribers, and we can assure our readers that these Works contain more valuable information than any similar works ever published, and of a kind that cannot fail to reward the purchaser.

The works are prepared under the Supervision of J. H. FRENCH, and Published by R. PEARSALL SMITH, Syracuse N. Y., and sold only by subscription, it being positively asserted by the Publisher that no more copies will be furnished than are actually subscribed for.

Price of the Map and Gazetteer $10.

The Chiriqui Gold Discoveries.

A correspondent of the New York Tribune, writing from Boca Del Toro, confirms the discovery of gold in the graves of the aborigines. He says the "Talamancus" who peopled Chiriqui before the conquest by the spaniards were numerous and powerful, as well as rich, and that the northern slope of the Province was as thickly peopled as the south. He predicts that the original mines will yet be discovered, and that an immense emigration will sit in from the north for that country.

From the accounts already received it would seem that gold diggins is very profitable and likely to hold out. The distance is but about half that to California, the climate is said to be healthy, and gold plenty. Who will go to the new Eldorado, the land of Ophir, where summer is eternal, fruits grow spontaneaciously, and grave-digging the only agricultural labor yet introduced—who will go, going, or gone!

NEW PUBLICATIONS.

"LECTURES FOR THE PEOPLE," by the Rev. HUGH STOWELL BROWN, with a Biographical Introduction by Dr. R. SHELTON MACKENZIE. Published by G. G. Evans, 439 Chestnut-st., Philadelphia, 12 mo. pp. 414. Price $100.

ITALY AND THE WAR of 1859, by MADAME JULIE DE MARGUERITTES, with introduction by Dr. R. SHELTON MACKENZIE. G. G. Evans Publisher, No. 439 Chestnut-st., Philadelphia, 12 mo. pp. 392. Price $1,25

We have recieved a copy of each of the above works from the Publisher, G. G. Evans of 439 Chestnut-st., Philadelphia, the originator of the great Gift Book Enterprise. They are works of more than ordinary interest, and will demand a large sale. The "Lectures for the People" are of a high order of merit, being discourses by Rev. Mr. Brown, of the Myrtle-st. Chappel. Liverpool, and embrace a great number of subjects, or texts of every day concern. They are by no means dry theological discussions, but full of interest and life, ever keeping in mind however the necessity of cultivating the good of our nature for our present and future welfare. There is no mincing words for the sake of being clerical, but he talks it out and out, so that no one who reads can help understanding.

Take for instance the Lecture from the old proverb, "Penny wise and pound foolish," and he tells how the farmer "looses a sheep for the want of a half-penny worth of tar;" or, "for the want of a nail, the shoe was lost, or for the want of the shoe, the horse was lost," and thus illustrating by homly, but expressive language, great principles which leave their impress never to be forgotton.

ITALY and the War of 1859 has been got out with great promptness, and contains a complete survey of the cause and and results of the recent war so far as known. The authoress is a Lady of brilliant talents, admirably qualified to make an entertaining book.

☞ These Works are to be had at G. G. EVANS' GIFT BOOK STORE No. 439 Chestnut-st., Philadelphia Pa., together with a Gift of greater or less value, on enclosing to him the price of the book and twenty one cents to pay postage on the same.

PERSONAL.—We noticed says the Utica Telegraph, two ladies in town to-day dressed in the Bloomer costume. As to the becomingness of this peculiar innovation on the old style of dress, there are great differances of opinion. But there is one fact connected with it, that can hardly be denied, that it was never seen on the person of any one that could lay the remotest claims to good looks. If any brother of the press, more fortunate than ourself, has seen a handsome woman in a Bloomer dress, let him speak out or forever after hold his tongue. Speak!

We have—just the prettiest little damsel we ever did see, but we advised her to take off the trowsers for she stood alone in them.

AN UNEXPECTED CLIMAX.—Speaking of the tendency of temperance orators to put themselves forward as previous examples of the blighting effect of drink, an exchange says: "My friends, three months ago I signed the pledge. (Clapping of hands and approving cheers.) In a month afterwards, my friends, I had a sovereign in my pocket—a thing I never had before. (Clapping and loud cheers.) In another month, my friends, I had a good coat on my back—a thing I never had before. (Cheers and clapping of hands much louder.) A fortnight after that, my friends, I bought a coffin!" The audience was going to cheer here, but stopped and looked serious. "You wonder," continued the speaker, "why I bought a coffin. Well my friends, I bought the coffin because I felt pretty certain if I kept the pledge another fortnight, I should want one!"

ANOTHER YANKEE INVENTION.—The London Times notices an invention exhibited to the Lords of the Admiralty by Mr. W. H. Ward, of Auburn, N. Y., which is for transmitting messages and carrying on correspondence of any length from ship to ship, becalmed or sailing within telescope sight of each other on the ocean, with equal facility to that of electric telegraph on land. It was pronounced a very important instrument and well calculated to prove of immense benefit to the entire naval and merchant service afloat.

Punch says the House of Hapsburg should in future be called "The House of Mishapsburg."

A correspondent at Newport gives an account of an entirely new kind of [illegible] in that city, girls "all unconscious of [illegible] charms." We don't think the dear cr[illegible] have yet been seen in any la-s f[illegible]

A TIMELY SUGGESTION.—A Southern journalist, who was once employed in the arduous duties of taking the census, to avoid many of the inconveniences attending upon that duty, makes the following timely suggestions for 1860:

"Now, what we suggest is, that each farmer this Fall, as he gathers his crops, shall keep something like an accurate account of the quantity and value of the same; and, if he will take the trouble to make out a statement of the names and ages of his family; the number of acres of land, cleared and timbered; the number and ages of his servants; the number and value of his horses and mules; the number of bales of cotton, barrels of corn, bushels of wheat, oats, rye, barley, potatoes, &c., and the value of each, and leave it in some place where any member of the family who may be at home when the Deputy Marshal shall call, can readily get hold of it, it will save time to all concerned, and very greatly assist to make the census returns perfect, complete and satisfactory."

A STRONG JOKE.—The other day, an Irishman, late from Erin's fair turf, while at work in a stone quarry near this city, found a skunk under a flat stone which he was raising. Catching a glimpse of the animal, he stopped lifting, called to a companion to hold the stone while he got the kitten, as he called it, out, and not kill the poor thing. Jamie came, held up the stone, while Patrick got down on his knees, reached his hand under, and pulled out the animal. Handling it a little too rough for ordinary occasions, he all of a sudden let go, sprang up, with one hand to his nose, and sung out—"*Howly mithir of——, and what has that cat been eating?*"—*Milwaukee News.*

THE "GREAT EASTERN."—The English papers report that the engines of this big ship are now erected, the propeller is in its place, and the floats are on the paddle-wheels. The machinery, indeed, is so far complete that the steam has been got up to try the accuracy of the bearings and so forth. Of her six masts, the first, fifth and sixth are in and rigged. The carpenters having put up the deck bulwarks, the painters are giving the boards the first coat. In a short period the Great Eastern will be coaled and provisioned, and ready to take her trial trip to sea.

LA MOUNTAIN, THE BALLOONIST.—The attempt of Mr. La Mountain to pass from Watertown to the seaboard in his balloon, of which we have heard so much, proved a failure. About twenty thousand people gathered at watertown on Thursday to see the ascension. Mr. L. was to take up a gentleman and lady, but he could not obtain gas enough, and so ascended alone. It is said that a leak in the valve of the balloon wasted a large quantity of gas while filling, and that to this is attributed the lack of a supply. The aeronaut attained an altitude of three miles and landed near Perch Lake, not having been able to get out of Jefferson county.

A California letter states that all the recently pending differences between Col. Fremont and other owners in his Mariposa estate have been amicably adjusted. All suits growing out of them have been withdrawn and the Colonel is about to erect new additional quartz mills upon the river. Col. Fremont's family and household are encamped upon the top of Mount Bullion, 2,000 feet above Bear Valley, and about 4,500 feet above tide-water, where the air is comfortable in the hotest season.

One of the men attached to Dan Rice's Circus has been arrested in Connecticut for murder. About a week since an old man who sold corn salve near the circus was killed at Coxsackie, New York, and the man arrested is called to answer for the crime.

The Bishop of Troyes commenced a recent circular to his clergy thus: "God has written a magnificent page of history, *with the assistance of France.*" After this fashion, a Frenchman patronizes the Deity whenever he wishes to do some tall writing.

The Agricultural Society which holds its Fair at Dundee in October, offers a premium of five dollars to the young lady, who will pare a peck potatoes in the shortest time and do it the best!"

The amusements of the people of Boston consist in attending lectures, temperance meetings, and fugitive law conventions, and at these they become very much excited. Their lecturers are generally schoolmasters and professors (the people are nearly all professors.)

A Shop Lifter Arrested.

Yesterday a chap was detected in taking from the store of A. Smith & Son, a piece of silk worth twenty dollars. He had secreted it under his coat and gone out before the goods was missed, upon which Mr. Wilber Smith sent a boy in pursuit of him, and called officer Buxton who succeeded in his arrest. The fellow denied the charge, but on tracing out his tortuous windings about town, the silk was at last discovered in a pile of lumber down the alley by the Bakery.

He plead guilty on the discovery of the silk and was sent to Jail for thirty days. On searching the fellows trunk, it was found filled with new clothing, not suited to his use, and most probably stolen. It is believed that he had accomplices, and our citizens should look well to keep all things secure from such visitors.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only.

DR. COGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the reckless loss of blood and strength, it effectually subdues inflammatory diseases, (in either) by producing an equilibrium, of the fluids of the body, the want of which is the sole cause of inflammation!

NOTICE TO INVALIDS! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as surely subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Face, Fits, Inflamed eyes, ears, nose, lungs and liver. Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough, Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more—no less—equalizes the fluids by removing from the system all general and various obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

The attention of Inspectors of Election and County Canvassers is directed to chap. 271, of Laws of 1859, a copy of which is printed herewith, for instructions in regard to their duties under said act, "submitting to the people a law authorizing a loan of two million five hundred thousand dollars, to provide for the payment of the floating debt of the state."

CHAP. 271.

AN ACT to submit to the people a law authorizing a loan of two million five hundred thousand dollars, to provide for the payment of the floating debt of the State.

Passed April 13th, 1859—three-fifths being present.

The People of the State of New York represented in Senate and Assembly, do enact as follows.

SECTION 1. The commissioners of the canal fund are hereby authorized to borrow on the credit of the state two million five hundred thousand dollars, at a rate not exceeding six per cent. per annum, and reimbursable at such periods as shall be determined by the said commissioners, not exceeding eighteen years from the time of making such loan. All the provisions of law in relation to loans made by commissioners of the canal fund, and the issue and transfer of certificates of stock, shall apply to loans authorized by this act, so far as the same are applicable.

§ 2. The moneys realized by such loan shall be applied exclusively to the payment of claims against the state not otherwise provided for, for work done on the canals of the state, and for private property appropriated by the state for the use of such canals, and for injury to private property growing out of the construction of the canals, or to the payment of the principal and interest of such loan, and for no other purpose whatever.

§ 3. Two million five hundred thousand dollars is hereby appropriated, to be paid out of the treasury, on the warrant of the auditor of the canal department, from the said moneys, within two years from the time when this act shall take effect, for the payment of claims against the state, specified in the last preceding section, and for the payment of the interest on the loan authorized by this act, which shall become payable prior to the receipt into the treasury of the first annual tax, hereinafter directed to be levied and collected, for the payment of the interest and principal of the loans authorized by this act; but any sum applied to pay interest as aforesaid, may be refunded out of the proceeds of the said taxes when received into the treasury.

§ 4. An annual tax is hereby imposed, and shall be levied and collected in the same manner as other State taxes are levied and collected sufficient to pay the interest and redeem the principal of the loan hereby authorized, within eighteen years from the time of the contracting thereof. The comptroller shall ascertain and determine what sum, being applied in payment of principal and interest, in the first year after the tax can be collected as aforesaid, and in each succeeding year thereafter, within a period of eighteen years from the time of contracting said loan, will be sufficient to pay the interest and redeem the principal of said loan within said period of eighteen years; and shall in each year apportion the sum so required among the several counties of this state, according to the then last corrected assessment rolls returned to his office, and shall give notice of such apportionment to the boards of supervisors of the respective counties. It shall be the duty of the boards of supervisors of the respective counties to cause the amount so apportioned in each year to be levied, collected and paid to the treasurer of this state in the same manner as other state taxes. The money collected and paid into the treasury under this section shall constitute a sinking fund to pay the interest and redeem the principle of the loan contracted pursuant to this act, and shall be sacredly applied to that purpose; and if at any time the sinking fund shall be insufficient to comply with the requirements of this section, the comptroller shall increase the sum thereafter to be levied and collected by tax in each year, so as to make the fund adequate for the purpose aforesaid.

§ 5. The fourth section of this act, imposing a tax may be repealed whenever the revenues of the canals, after meeting all present constitutional charges upon them, shall amount in enough to form a sinking fund sufficient to pay the interest and redeem the principal of all loans without the eighteen years mentioned in the first section of this act.

§ 6. This act shall be submitted to the people of this state, at the next election, and the votes given for its adoption, shall be endorsed "Constitutional loan," and shall be in the following form: "For a loan of two million five hundred thousand dollars, to pay the floating debt of the state," and "Against a loan of two million five hundred thousand dollars to pay the floating debt of the State." The inspectors of the several election districts in this state, shall provide a separate box, in which the ballots given in pursuance of this act shall be deposited. The ballots shall be canvassed and returned and the result shall be votes given for the office of Governor of this Commonwealth and certified in the same manner as state. If a majority of the votes cast, pursuant to this act, shall be "For a loan of two million five hundred thousand dollars to pay the floating debt of the state," then the preceding sections of this act shall take effect; but if a majority of the votes so cast, shall be "against a loan of two million five hundred thousand dollars to pay the floating debt of the state," then the said sections shall not take effect, but shall be inoperative.

You are without delay to deliver a copy of the above notice to the supervisor or one of the Assessors of each town or ward in your county; and also to cause a copy of said notice to be published in all the public newspapers printed in your county, once in each week until the election.

Yours respectfully,
GIDEON J. TUCKER, Sec'y of State.

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgy pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea or Fleur Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named, have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflammation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $1 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

N. B. *A word of explanation* to those who have known us under the style of Evans and Co. The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world-wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to prevent the few who may be unacquainted with us, we would state that we have no connection with any other Gift Book House—and though many advertise under the name of Evans & Co., the firm constituted by D. W. EVANS and J. H. PRESTON, is the first and only concern rightfully using the name. But to prevent all confusion in the future we shall use the style of D. W. EVANS & CO., and all persons wrongfully using the appellation to mislead the public, will be made to suffer the penalty of the law.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY.

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in *all stages of pulmonary disease by* Dr. Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible,* into universal use, as I know that they will prove not only

As Sure a Remedy in Consumption as Quinine is in Intermittent Fever, but also as Effectual a Preservative as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage,* treated at my Dispensary, during the past year, *eight have completely recovered, eight have* died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile signature.*

No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

Price, $1,00, or three bottles for $5,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 49 John Street. The Rochester Rope Walking.

M. Delave *did* walk over the rope across the Genesee River yesterday at Rochester, and then walked back again, greatly to the astonishment of fifteen thousand men women and children who were on hand to witness the wonderful feat. M. Delave is now a famous man, and Rochester is a great city, almost equal to *Niagara Falls*. We rejoice in the magnitude of both, the man and the city.

Just before M. Delave stepped upon the rope, a heavy dash of rain fell upon the assembled multitude which had the effect to abate the fever of their excitement, and cool down their enthusiasm a good deal.

There was but one serious accident that we hear of, and that was from a stone falling from the bank upon a boys head below—and not from M. Delave falling on his own head, as many predicted he would.

Doing Something.

Not many years ago there were two young men in this city, one of whom was the son of a rich man, and whose accomplishments consisted in being able to dress well, and have a rich father. On the other hand the other of the two young men was a mechanic, working twelve hours in the day at his trade, and devoting four to study and the improvement of his mind. Both young men were in love with a young lady who had wealthy relations and anticipations. The mechanic altho' for a time snubbed and rebuffed, kept on with his attentions, determined to overcome her prejudices, while the fop twisted his mustache in anticipated success, and fairly captivated the young lady with his expensive dress and habits. The mechanic kept on, however until he overheard her say that she would never marry a man who was in the habit of 'doing something' for a living, when his visits were suddenly discontinued. The young lady married fop, and their two fortunes together, were a fine independence. To day the young mechanic is worth a hundred thousand dollars or more, has a beautiful loving wife and several charming children, has retired from business, and is doing nothing. To-day the fop is at Auburn, clad in parti-colored raiment *"doing something,"* if pecking stones can be called doing something, while his wife with their sickly children are in the poor-house, dependent upon charity. This story is not only true; but bears a moral with it, and that is "do something," and never be ashamed of the faculties that can bring bread and happiness from the earth, the air, or the water.

To those who have been brought up to be doing nothing, we trust this short moral yarn will have a significance, proving that idleness (instead of money) is the root of all evil.—*Buffalo Republic.*

Hid in a Boiler.—One of the convicts in the cooper shop at Auburn Prison, was missing on Thursday noon, and notwithstanding a vigilant and careful search was made, he was not found until he had been absent forty-two hours. The whole prison yard and shops were thoroughly searched without avail. Finally, it was determined to examine the large boiler in the cooper shop, when lo and behold, it was found that the convict had taken up his quarters inside. The boiler had a large quantity of water in it, in which the convict had lain *forty-two hours*. During that time he had only one ration of bread to eat.—It was supposed that he might have taken refuge in the chimney, into which the furnace to the boiler discharges its smoke, and for the purpose of driving him out, if there, a fire was kindled under the boiler yesterday. The convict says that when the water began to grow warm he had serious apprehensions that a hot scald would be his portion.

Spiritualist Divorce Case.—A suit was recently instituted by W. B. Coan, before the Supreme Court of New York, for divorce from his wife, Ada L. Coan, on the ground of adultery. The husband alleges that he was married to the defendant in 1852; that they had one child—a boy four years of age. He charged that the wife had proved false to her marriage vow. No answer was put in on the part of the wife, and the Court decreed a judgement of divorce against her. She has operated pretty extensively as a Spirit medium, having been esteemed by the Spiritualists as one of the best mediums in the world.

Newspapers---By James Russell Lowell.

Wonderful to him who has eyes to see it rightly, is the newspaper. To me, for example, sitting on the critical front bench of the pit, in my study here in Salem, the advent of my weekly journal is that of a strolling theatre, or rather of a puppet show, on whose stage, narrow as it is, the tragedy, comedy, and farce of life are played in little. Behold the whole huge earth sent to me hebdomadally in a brown paper wrapper!

Hitherto my obscure corner, by wind or steam, on horseback, on dromidary back, in the pouch of the Indian runner, or clicking over the magnetic wires, troop all the famous performers from the four quarters of the globe. Looked at from a point of criticism, tiny puppets they seem all, as the editor sets his booth up on my desk, and officiates as showman. Now I can truly see how little and transitory is life. The earth appears almost as a drop of vinegar on which the solar microscope of the imagination must be brought to bear in order to make out anything distinctly.

The animalcule there, in the pea-jacket, is Louis Phillippe, just landed on the coast of England. That other, in the grey surtout and cocked hat, is Napoleon Bonaparte Smith, assuring France that she need apprehend no interference from him in the present alarming juncture. At that spot, where you seem to see a speck of something in motion, is an immense mass meeting. Look sharper, and you will see a man brandishing his mandibles in an excited manner. This is the great Soandso, defending his position amid tumultuous and irrepressible cheers. That infinitesimal creature, upon whom some score of others, as minute as he, are gazing in open-mouthed admiration, is a famous philosopher, expounding to a select audience their capacity for the infinite. That scarce discernible puffet of smoke and dust is a revolution. That speck there is a reformer just arranging a lever with which he is to move the world. And lo! there creeps forward the shadow of a skeleton that blows one breath between its grinning teeth, and all our distinguished actors are whisked off the slippery stage into the dark beyond.

Yes, the little show box has its solemn suggestions. Now and then we catch a glimpse of a grim old man, who lays down a scythe and hour glass in the corner while he shifts the scenes. There too, in the dim back ground, a wierd shape is delving. Sometimes he leans upon his mattock, and gazes as a coach whirls by, bearing the newly married on their wedding jaunt, or glances carelessly at a babe brought home from christening. Suddenly (for the scene grows larger and larger as we look) a bony hand snatches back a performer in the midst of his part, and him whom yesterday two infinites (past and future) would not suffice, a handful of dust is enough to cover and silence forever. Nay we see the same fleshless fingers opening to clutch the showman himself, and guess, not without a shudder, that they are lying in wait for spectators also.

Think of it! for two dollars a year I buy a season ticket to this great Globe Theatre, whose scene shifter is Time, and whose curtain is rung down by Death.

Such thoughts will occur to me sometimes as I am tearing off the wrapper of my newspaper. Then suddenly that otherwise too often vacant sheet becomes invested for me with a strange kind of awe. Look! Deaths and marriages, notices of inventions, discoveries, and books, list of promotions, of killed, wounded, and missing, news of fires, accidents, of sudden wealth, and as sudden poverty. I hold in my hand the end of myriad invisible electric conductors, along which tremble the joys, sorrows, wrongs, triumphs, hopes, and despairs of as many men and women everywhere. So that upon that mood of mind which seems to insolate me from mankind as a spectator of their puppet pranks, another intervenes, in which I feel that I, too, unknown and unheard of, am yet of some import to my fellows.

For, through my newspaper here, do not families take pains to send me, an entire stranger, news of a death among them? are not here two who would have me know of their marriage? And strangest of all, is not this singular person anxious to have me know that he has received a fresh supply of Dimity Bretagnes? But to none of us does the present (even for a moment discerned as such) continue miraculous.—We glance carelessly at the sunrise, and get used to Orion and the Pleiades. The wonder wears off, and to-morrow this sheet, in which a vision was let down to me from heaven, shall be a wrapper for a bar of soap, or the platter for a begger's broken victuals.

What strange dramas of life are constantly being enacted. A few years since, a daughter of Robert Fulton, the inventor, was hanged in one of the river counties for the murder of her children, and last week, his sister died in the poor-house of Monroe county, Ind.

Low-necked Dress.—The New York Sunday Times says:

"Walking down Broadway, behind a lady of evident respectability, a day or two ago, we could look under, not over, her shoulders. and have, by strange apertures, a telescopic view of the street beyond and in front of the said lady. Nor is this an extreme case. Quite the contrary. It appears just at present, to be the general rule of the street costume. Crinoline, which is stretched at the bottom to do duty as a volunteer street sweeper, appears to be shrunk at the top in an equal ratio, till, like Paddy's blanket, it is lengthened at one end by a piece cut off from the other. This may be all very well for those wild and reckless individuals whose motto is "neck or nothing;" but for staid, sober, and quiet folk, it is a melancholy waste of raw material. In sober sadness, we seriously and earnestly object to a style so excessively "decolleta," which is French for lownecked dress, as a style of street costume. It is conducive neither to health nor to morality. It is also in bad taste, and, instead of exciting admiration in the opposite sex, only provokes remarks little complimentary to those who indulge in it. Therefore it is a mistake, since women loves to please, and the sooner it is reformed the better."

Touching Affection.—The Buffalo Republic relates the following instance of sensibility, on the part of a boarding school Miss:

A young lady living not over a dozen leagues from Buffalo, when at home, but being educated at a fashionable seminary east of us, last week received a letter from her mother with the usual marks of mourning upon it—black-edged and sealed with black. She was almost overcome, and fainted twice before she could summon courage to attempt to dispel the fearful suspense that was brooding over her.—Finally she opened the letter, and therein written was the information that he brother—a young man of about eighteen had died suddenly from an attack of cholera morbus—she sank down in a flood of tears, while her fair companions grouped around, sadly endeavored to console her, but in vain. "Poor fellow," said she, with a succession of sobs, "my brother—my dear and blessed brother—oh," said she, for the first time raising her head since the sad news arrived—addressing the weeping and sympathizing girls around her—"to think how unfortunate—*and his merschaum just beginning to color so beautifully!*—There was no consolation for such poignant woe as this, and the girls left her alone to her sobs and the tender recollection of her dear and only brother and his scarcely tinted tobacco merschaum.

The Fools not all Dead.—The following story is circulating in the western papers to the disgrace of this enlightened age, and to humbug the credulous. It is strange that the clergy of any denomination will rely upon any such stuff to convince their hearers of the truths of the Gospel which they are solely called upon to preach. Such a fabulous yarn might be taken in by the weakminded, but it must disgust intelligent hearers:

On last Sabbath evening, July 31, in the Baptist pulpit in Delevan, Rev. Mr. Stinson related as a well attested fact, that when the Rev. Mr. Knapp was preaching at Erie, Pa., a young, sleek, smooth-tongued Universalist minister was a great hindrance to the work of the Lord, by attending the meetings, mingling with the young people whom Mr. Knapp wished to affect, and making remarks about the preaching, &c. This was a great grief to Mr. Knapp, and in a public meeting, when the Universalist was present, he audibly prayed to the Lord, that if He could not convert him according to the divinely established means of working, He would shut his mouth—strike him dumb. Immediately after this prayer, or at the service, the Universalist minister could not open his mouth, was dumb, had lost the use of his organs of speech; he sent for his physician, who could neither account for so very extraordinary an event, nor afford him any relief whatever and he has never recovered the use of his speech! There could be no mistake, said Mr. Stinson, for when I was preaching in another place, I saw a brother who resided at Erie, and he confirmed the statement.

Stephen Harris, of Troy, has a blueberry pasture, containing about twenty acres, from which he gathers, on an average, three hundred bushels a year of those berries, and has done so for twenty years, which yield an annual income of about five hundred dollars.

There is living near Ripley, Va., in perfect health, a good looking and intelligent young lady 24 years of age, who weighs but 40 pounds. She is three feet ten inches high and well proportioned.—There is no danger of her ever becoming a *heavy* charge to a husband.

Bridget Murray was recently pardoned from prison by the Governor of Michigan, on condition that she would abstain from rance. Failing to do so, she was d to her quarters. We never be ard of such a condition being en-

Miscellany.

A large black bear was seen to enter the woods in Lewis Co., last Monday night.

Many run about after felicity, like an absent-minded man hunting after his hat while it is on his head or in his hand.

At Portsmouth, N. H., resides two elderly ladies, who each completed their century of life on the 15th inst.

The burglars are making serious demonstrations in Elmira and towns in that vicinity.

An enormous shark measuring eleven feet long, and weighing 150 pounds, was caught in Long Island Sound, opposite Cold Springs, last Thursday, while feeding on the body of a dead horse.

Sheridan was witty when, staggering along, half tipsy, he was eyed by a policeman, and exclaimed, confidentially, "My name is Wilberforce, I am a religious man, don't expose me."

Scarcity of Potatoes in Wisconsin.—The Milwaukee News says the drouth has affected the potatoe crop of Wisconsin so seriously that the fall yield will not be one-third that of last year.

The great wrong of society is in listening to every idle rumor, every malignant report, every vindictive "hearsay," which may be set agoing. Integrity in man and virtue in woman are the crown and jewel of good society, and gossip and tattlers are but usurpers and hypocrites, whose father is the devil.

The returns show that in the whole country some 40,000,000 pounds of wool are produced annually, while the annual consumption in the United States is rather above than below 100,000,000 pounds, and is steadily increasing. More than 50,000,000 pounds of wool are imported every year into this country, which the country is abundantly able to produce within its own borders.

The Chicago papers are notoriously unreliable. It is related that a woman in that city was recently chided for not going to see her husband who had been badly injured. Her excuse was that she only heard of his injury through the papers, and "they don't always tell the truth." Perhaps she would have believed them had they said the husband started East, a party to a runaway match.

The grass-hopper plague has been seriously felt in Oneida county; but the farmers thereabouts are now rejoicing at the advent of an enemy of the hoppers. They are found covered with lice, which attach themselves to the insect, eat off their wings and finally destroy them.

Within five years in Indiana there have been erected twenty-seven hundred school houses, at an expense of eleven hundred thousand dollars. In the last year six hundred and fifty school houses were built at a cost of three hundred thousand dollars. This sum is obtained by a special school tax that was paid by the people with general cheerfulness.

A Scamp.—About the 4th of July, a young man named Hodges, accompanied by his wife, an invalid, arrived in Clinton, Oneida county, from Oswego, and took lodgings at the Clinton House. It now transpires that his real name is George Hodges Finn; that the woman is not his wife, but the wife of a man named Steele, in Oswego, from whom and her two children she has twice before run away, and who has as often welcomed her home again. She left her family the last time about three months since. Finn's wife finally appeared in town, exposed his knavery, and he abandoned both.

WASHINGTON, July 16.

The extensive machine blacksmith, and sawing shops of the capitol extension works, were burnt at half past 3 o'clock this morning. The origin of the fire is not as yet known, but it is supposed to have been accidental. The building was comparatively valueless, but the machinery destroyed was very expensive, including a lathe for turning the immense stone columns for the public buildings, and several powerful engines.

A large quantity of tools and some costly marble finished and unfinished was also destroyed. There was no insurance.

The loss is variously estimated at from $50,000 to $60,000.

The Rochester Rope Walking.

M. Delave *did* walk over the rope across the Genesee River yesterday at Rochester, and then walked back again, greatly to the astonishment of fifteen thousand men women and children who were on hand to witness the wonderful feat. M. Delave is now a famous man, and Rochester is a great city, almost equal to *Niagara Falls.* We rejoice in the magnitude of both, the man and the city.

Just before M. Delave stepped upon the rope, a heavy dash of rain fell upon the assembled multitude which had the effect to abate the fever of their excitement, and cool down their enthusiasm a good deal.

There was but one serious accident that we hear of, and that was from a stone falling from the bank upon a boys head below—and not from M. Delave falling on his own head, as many predicted he would.

Doing Something.

Not many years ago there were two young men in this city, one of whom was the son of a rich man, and whose accomplishments consisted in being able to dress well, and have a rich father. On the other hand the other of the two young men was a mechanic, working twelve hours in the day at his trade, and devoting four to study and the improvement of his mind. Both young men were in love with a young lady who had wealthy relations and anticipations. The mechanic altho' for a time snubbed and rebuffed, kept on with his attentions, determined to overcome her prejudices, while the fop twisted his mustache in anticipated success, and fairly captivated the young lady with his expensive dress and habits. The mechanic kept on, however until he overheard her say that she would never marry a man who was in the habit of 'doing something' for a living, when his visits were suddenly discontinued. The young lady married fop, and their two fortunes together, were a fine independence. To-day the young mechanic is worth a hundred thousand dollars or more, has a beautiful loving wife and several charming children, has retired from business, and is doing nothing. To-day the fop is at Auburn, clad in parti-colored raiment *"doing something,"* if pecking stones can be called doing something, while his wife with their sickly children are in the poor-house, dependent upon charity. This story is not only true; but bears a moral with it, and that is "do something," and never be ashamed of the faculties that can bring bread and happiness from the earth, the air, or the water.

To those who have been brought up to be doing nothing, we trust this short moral yarn will have a significance, proving that idleness (instead of money) is the root of all evil.—*Buffalo Republic.*

HID IN A BOILER.—One of the convicts in the cooper shop at Auburn Prison, was missing on Thursday noon, and notwithstanding a vigilant and careful search was made, he was not found until he had been absent forty-two hours. The whole prison yard and shops were thoroughly searched without avail. Finally, it was determined to examine the large boiler in the cooper shop, when lo and behold, it was found that the convict had taken up his quarters inside. The boiler had a large quantity of water in it, in which the convict had lain *forty-two hours.* During that time he had only one ration of bread to eat.—It was supposed that he might have taken refuge in the chimney, into which the furnace to the boiler discharges its smoke, and for the purpose of driving him out, if there, a fire was kindled under the boiler yesterday. The convict says that when the water began to grow warm he had serious apprehensions that a hot scald would be his portion.

SPIRITUALIST DIVORCE CASE.—A suit was recently instituted by W. B. COAN, before the Supreme Court of New York, for divorce from his wife, ADA L. COAN, on the ground of adultery. The husband alleges that he was married to the defendant in 1852; that they had one child—a boy four years of age. He charged that the wife had proved false to her marriage vow. No answer was put in on the part of the wife, and the Court decreed a judgement of divorce against her. She has operated pretty extensively as a Spirit medium, having been esteemed by the Spiritualists as one of the best mediums in the world.

Newspapers---By James Russell Lowell.

Wonderful to him who has eyes to see it rightly, is the newspaper. To me, for example, sitting on the critical front bench of the pit, in my study here in Salem, the advent of my weekly journal is that of a strolling theatre, or rather of a puppet show, on whose stage, narrow as it is, the tragedy, comedy, and farce of life are played in little. Behold the whole huge earth sent to me hebdomadally in a brown paper wrapper!

Hitherto my obscure corner, by wind or steam, on horseback, on dromidary back, in the pouch of the Indian runner, or clicking over the magnetic wires, troop all the famous performers from the four quarters of the globe. Looked at from a point of criticism, tiny puppets they seem all, as the editor sets his booth up on my desk, and officiates as showman. Now I can truly see how little and transitory is life. The earth appears almost as a drop of vinegar on which the solar microscope of the imagination must be brought to bear in order to make out anything distinctly.

The animalcule there, in the pea-jacket, is Louis Phillippe, just landed on the coast of England. That other, in the grey surtout and cocked hat, is Napoleon Bonaparte Smith, assuring France that she need apprehend no interference from him in the present alarming juncture. At that spot, where you seem to see a speck of something in motion, is an immense mass meeting. Look sharper, and you will see a man brandishing his mandibles in an excited manner. This is the great Soandso, defending his position amid tumultuous and irrepressible cheers. That infinitesimal creature, upon whom some score of others, as minute as he, are gazing in open-mouthed admiration, is a famous philosopher, expounding to a select audience their capacity for the infinite. That scarce discernible puffet of smoke and dust is a revolution. That speck there is a reformer just arranging a lever with which he is to move the world. And lo! there creeps forward the shadow of a skeleton that blows one breath between its grinning teeth, and all our distinguished actors are whisked off the slippery stage into the dark beyond.

Yes, the little show box has its solemn suggestions. Now and then we catch a glimpse of a grim old man, who lays down a scythe and hour glass in the corner while he shifts the scenes. There too, in the dim back ground, a wierd shape is delving. Sometimes he leans upon his mattock, and gazes as a coach whirls by, bearing the newly married on their wedding jaunt, or glances carelessly at a babe brought home from christening. Suddenly (for the scene grows larger and larger as we look) a bony hand snatches back a performer in the midst of his part, and him whom yesterday two infinites (past and future) would not suffice, a handful of dust is enough to cover and silence forever. Nay we see the same fleshless fingers opening to clutch the showman himself, and guess, not without a shudder, that they are lying in wait for spectators also.

Think of it! for two dollars a year I buy a season ticket to this great Globe Theatre, whose scene shifter is Time, and whose curtain is rung down by Death.

Such thoughts will occur to me sometimes as I am tearing off the wrapper of my newspaper. Then suddenly that otherwise too often vacant sheet becomes invested for me with a strange kind of awe. Look! Deaths and marriages, notices of inventions, discoveries, and books, list of promotions, of killed, wounded, and missing, news of fires, accidents, of sudden wealth, and as sudden poverty. I hold in my hand the end of myriad invisible electric conductors, along which tremble the joys, sorrows, wrongs, triumphs, hopes, and despairs of as many men and women everywhere. So that upon that mood of mind which seems to insolate me from mankind as a spectator of their puppet pranks, another intervenes, in which I feel that I, too, unknown and unheard of, am yet of some import to my fellows.

For, through my newspaper here, do not families take pains to send me, an entire stranger, news of a death among them? are not here two who would have me know of their marriage? And strangest of all, is not this singular person anxious to have me know that he has received a fresh supply of Dimity Broisgins? But to none of us does the present (even for a moment discerned as such) continue miraculous.—We glance carelessly at the sunrise, and get used to Orion and the Pleiades. The wonder wears off, and to-morrow this sheet, in which a vision was let down to me from heaven, shall be a wrapper for a bar of soap, or the platter for a begger's broken victuals.

What strange dramas of life are constantly being enacted. A few years since, a daughter of Robert Fulton, the inventor, was hanged in one of the river counties for the murder of her children, and last week, his sister died in the poor-house of Monroe county, Ind.

Mrs. Barbour, aged 110 years, the oldest resident of Chemung county, died at her residence in Catlin, on the 23d of July.

LOW-NECKED DRESS.—The New York Sunday Times says:

"Walking down Broadway, behind a lady of evident respectability, a day or two ago, we could look under, not over, her shoulders, and have, by strange apertures, a telescopic view of the street beyond and in front of the said lady. Nor is this an extreme case. Quite the contrary. It appears just at present, to be the general rule of the street costume. Crinoline, which is stretched at the bottom to do duty as a volunteer street sweeper, appears to be shrunk at the top in an equal ratio, till, like Paddy's blanket, it is lengthened at one end by a piece cut off from the other. This may be all very well for those wild and reckless individuals whose motto is "neck or nothing;" but for staid, sober, and quiet folk, it is a melancholy waste of raw material. In sober sadness, we seriously and earnestly object to a style so excessively "decollete," which is French for lownecked dress, as a style of street costume. It is conducive neither to health nor to morality. It is also in bad taste, and, instead of exciting admiration in the opposite sex, only provokes remarks little complimentary to those who indulge in it. Therefore it is a mistake, since women loves to please, and the sooner it is reformed the better."

TOUCHING AFFECTION.—The Buffalo Republic relates the following instance of sensibility, on the part of a boarding school Miss:

A young lady living not over a dozen leagues from Buffalo, when at home, but being educated at a fashionable seminary east of us, last week received a letter from her mother with the usual marks of mourning upon it—black-edged and sealed with black. She was almost overcome, and fainted twice before she could summon courage to attempt to dispel the fearful suspense that was brooding over her.—Finally she opened the letter, and therein written was the information that her brother—a young man of about eighteen had died suddenly from an attack of cholera morbus—she sank down in a flood of tears, while her fair companions grouped around, sadly endeavored to console her, but in vain. "Poor fellow," said she, with a succession of sobs, "my brother—my dear and blessed brother—oh," said she, for the first time raising her head since the sad news arrived—addressing the weeping and sympathizing girls around her—"to think how unfortunate—*and his merschaum just beginning to color so beautifully!*—There was no consolation for such poignant woe as this, and the girls left her alone to her sobs and the tender recollection of her dear and only brother and his scarcely tinted tobacco merschaum.

THE FOOLS NOT ALL DEAD.—The following story is circulating in the western papers to the disgrace of this enlightened age, and to humbug the credulous. It is strange that the clergy of any denomination will rely upon any such stuff to convince their hearers of the truths of the Gospel which they are solely called upon to preach. Such a fabulous yarn might be taken in by the weakminded, but it must disgust intelligent hearers:

On last Sabbath evening, July 31, in the Baptist pulpit in Delevan, Rev. Mr. Stinson related as a well attested fact, that when the Rev. Mr. Knapp was preaching at Erie, Pa., a young, sleek, smooth-tongued Universalist minister was a great hindrance to the work of the Lord, by attending the meetings, mingling with the young people whom Mr. Knapp wished to affect, and making remarks about the preaching, &c. This was a great grief to Mr. Knapp, and in a public meeting, when the Universalist was present, he audibly prayed to the Lord, that if He could not convert him according to the divinely established means of working, He would shut his mouth—strike him dumb. Immediately after this prayer, or at the service, the Universalist minister could not open his mouth, was dumb, had lost the use of his organs of speech; he sent for his physician, who could neither account for so very extraordinary an event, nor afford him any relief whatever and he has never recovered the use of his speech! There could be no mistake, said Mr. Stinson, for when I was preaching in another place, I saw a brother who resided at Erie, and he confirmed the statement.

Stephen Harris, of Troy, has a blueberry pasture, containing about twenty acres, from which he gathers, on an average, three hundred bushels a year of those berries, and has done so for twenty years, which yield an annual income of about five hundred dollars.

There is living near Ripley, Va., in perfect health, a good looking and intelligent young lady 24 years of age, who weighs but 40 pounds. She is three feet ten inches high and well proportioned.—There is no danger of her ever becoming a *heavy* charge to a husband.

Bridget Murray was recently pardoned from prison by the Governor of Michigan, on condition that she would abstain from intemperance. Failing to do so, she was returned to her quarters. We never before heard of such a condition being enforced.

Miscellany.

A large black bear was seen to enter the woods in Lewis Co., last Monday night.

Many run about after felicity, like an absent-minded man hunting after his hat while it is on his head or in his hand.

At Portsmouth, N. H., resides two elderly ladies, who each completed their century of life on the 15th inst.

The burglars are making serious demonstrations in Elmira and towns in that vicinity.

An enormous shark measuring eleven feet long, and weighing 150 pounds, was caught in Long Island Sound, opposite Cold Springs, last Thursday, while feeding on the body of a dead horse.

Sheridan was witty when, staggering along, half tipsy, he was eyed by a policeman, and exclaimed, confidentially, "My name is Wilberforce, I am a religious man, don't expose me."

SCARCITY OF POTATOES IN WISCONSIN.—The Milwaukee News says the drouth has affected the potatoe crop of Wisconsin so seriously that the fall yield will not be one-third that of last year.

The great wrong of society is in listening to every idle rumor, every malignant report, every vindictive "hearsay," which may be set agoing. Integrity in man and virtue in woman are the crown and jewel of good society, and gossip and tattle are but usurpers and hypocrites, whose father is the devil.

The returns show that in the whole country some 40,000,000 pounds of wool are produced annually, while the annual consumption in the United States is rather above than below 100,000,000 pounds, and is steadily increasing. More than 50,000,000 pounds of wool are imported every year into this country, which the country is abundantly able to produce within its own borders.

The Chicago papers are notoriously unreliable. It is related that a woman in that city was recently chided for not going to see her husband who had been badly injured. Her excuse was that she only heard of his injury through the papers, and "they don't always tell the truth." Perhaps she would have believed them had they said the husband started East, a party to a runaway match.

The grass-hopper plague has been seriously felt in Oneida county; but the farmers thereabouts are now rejoicing at the advent of an enemy of the hoppers. They are found covered with lice, which attach themselves to the insect, eat off their wings and finally destroy them.

Within five years in Indiana there have been erected twenty-seven hundred school houses, at an expense of eleven hundred thousand dollars. In the last year six hundred and fifty school houses were built at a cost of three hundred thousand dollars. This sum is obtained by a special school tax that was paid by the people with general cheerfulness.

A SCAMP.—About the 4th of July, a young man named Hodges, accompanied by his wife, an invalid, arrived in Clinton, Oneida county, from Oswego, and took lodgings at the Clinton House. It now transpires that his real name is George Hodges Finn; that the woman is not his wife, but the wife of a man named Steele, in Oswego, from whom and her two children she has twice before run away, and who has as often welcomed her home again. She left her family the last time about three months since. Finn's wife finally appeared in town, exposed his knavery, and he abandoned both.

The extensive machine blacksmith, and sawing shops of the capitol extension works, were burnt at half past 3 o'clock this morning. The origin of the fire is not, as yet known, but it is supposed to have been accidental. A large quantity of tools and some costly marble finished and unfinished was also destroyed. There was no insurance.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE LIVER PILLS,

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other) by producing an equilibrium of the fluids in the body, the want of which is the sole cause of inflammation!

NOTICE TO INVALIDS! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of Blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver. Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

CHAP. 271.

AN ACT to submit to the people a law authorizing a loan of two million five hundred thousand dollars, to provide for the payment of the floating debt of the State.

Passed April 13th, 1859—three-fifths being present.

The People of the State of New York represented in Senate and Assembly, do enact as follows:

SECTION 1. The commissioners of the canal fund are hereby authorized to borrow on the credit of the state two million five hundred thousand dollars, at a rate not exceeding six per cent. per annum, and reimbursable at such periods as shall be determined by the said commissioners, not exceeding eighteen years from the time of making such loan. All the provisions of law in relation to loans made by commissioners of the canal fund, and the issue and transfer of certificates of stock, shall apply to loans authorized by this act, so far as the same are applicable.

§ 2. The moneys received by such loan shall be applied exclusively to the payment of claims against the state not otherwise provided for, for work done on the canals of the state, and for private property appropriated by the state for the use of such canals, and for injury to private property growing out of the construction of the canals or to the payment of the principal and interest of such loan, and for no other purpose whatever.

§ 3. Two million five hundred thousand dollars is hereby appropriated, to be paid out of the treasury, on the warrant of the auditor of the canal department, from the said moneys, within two years from the time when this act shall take effect, for the payment of claims against the state, specified in the last preceding section, and for the payment of the interest on the loan authorized by this act, which shall become payable prior to the receipt into the treasury of the first annual tax, hereinafter directed to be levied and collected, for the payment of the interest and principal of the loans authorized by this act; but any sum applied to pay interest as aforesaid, may be refunded out of the proceeds of the said taxes when received into the treasury.

§ 4. An annual tax is hereby imposed, and shall be levied and collected in the same manner as other State taxes are levied and collected sufficient to pay the interest and redeem the principal of the loan hereby authorized, within eighteen years from the time of the contracting thereof. The comptroller shall ascertain and determine what sum, being applied in payment of principal and interest, in the first year after the tax can be collected as aforesaid, and in each succeeding year thereafter, within a period of eighteen years from the time of contracting said loan, will be sufficient to pay the interest and redeem the principal of said loan within said period of eighteen years; and shall in each year apportion the sum so required among the several counties of this state, according to the then last corrected assessment rolls returned to his office, and shall give notice of such apportionment to the boards of supervisors of the respective counties. It shall be the duty of the boards of supervisors of the respective counties to cause the amount so apportioned in each year to be levied, collected and paid to the treasurer of this state, in the same manner as other state taxes. The money collected and paid into the treasury under this section shall constitute a sinking fund to pay the interest and redeem the principle of the loan contracted pursuant to this act, and shall be sacredly applied to that purpose; and if at any time, the sinking fund shall be insufficient to comply with the requirements of this section, the comptroller shall increase the sum thereafter to be levied and collected by tax in each year, so as to make the fund adequate for the purpose aforesaid.

§ 5. The fourth section of this act, imposing a tax, may be repealed whenever the revenues of the canals, after meeting all present constitutional charges upon them, shall amount to enough to form a sinking fund sufficient to pay the interest and redeem the principal of all loans within the eighteen years mentioned in the first section of this act.

§ 6. This act shall be submitted to the people of this state, at the next election, and the votes given for its adoption, shall be endorsed "Constitutional loan," and shall be in the following form: "For a loan of two million five hundred thousand dollars to pay the floating debt of the state;" and "Against a loan of two million five hundred thousand dollars to pay the floating debt of the state." The inspectors of the several election districts in this state shall provide a separate box in which the ballots given in pursuance of this act shall be deposited. The ballots shall be canvassed and returned, and the result shall be votes given for the office of Governor of this state, determined and certified in the same manner as now. If a majority of the votes cast, pursuant to this act, shall be "For a loan of two million five hundred thousand dollars to pay the floating debt of the state," then the preceding sections of this act shall take effect; but if a majority of the votes so cast, shall be "against a loan of two million five hundred thousand dollars to pay the floating debt of the state," then the said sections shall not take effect, but shall be inoperative.

You are without delay to deliver a copy of the above notice to the Supervisor or one of the Assessors of each town or ward in your county; and also to cause a copy of said notice to be published in all the public newspapers printed in your county, once in each week until the election.

Yours respectfully,
GIDEON J. TUCKER, Sec'y of State.

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorrhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgic pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhea or Fluor Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflamation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

DR. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new; it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $1 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA.

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all *stages of pulmonary disease* by Dr. Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible,* into universal use, as I KNOW that they will prove not only

As Sure a Remedy in Consumption
as Quinine is in Intermittent Fever, but also
as Effectual a Preservative
as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage,* treated at my Dispensary, during the past year, *eight have completely recovered,* eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

☞ This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *facsimile* signature.

☞ No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them or taken at the same time.

☞ Price, $1.00, or three bottles for $2.50, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the sole General Depot in the U. S., 49 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S. on receipt of twelve cents in stamps to cover expense of postage. Also circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S
Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Eruptive and Skin Diseases, St. Anthony's Fire, Rose, or Erysipelas, Pimples, Pustules, Blotches, Blains and Boils, Tumors, Tetter, and Salt Rheum, Scald Head, Ringworm, Rheumatism, Syphilitic and Mercurial Diseases, Dropsy, Dyspepsia, Debility, and, indeed, all Complaints arising from Vitiated or Impure Blood. The popular belief in "*impurity of the blood,*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice,* and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

N. B. *A word of explanation* to those who have known us under the style of Evans and Co. The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world wide as the original "Evans & Co's Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to prevent the few who may be unacquainted with us, we would state that we have no connection with any other Gift-Book House—and though many advertise under the name of Evans & Co., the firm constituted by D. W. EVANS and J. H. PRESTON, is the first and only one rightfully using the name. But to prevent all confusion in the future we shall use the style of D. W. EVANS & CO., and all persons wrongfully using the appellation to mislead the public, will be made to suffer the penalty of the law.

A Life Preserving Car.—A car has been lately built in New Jersey, under a patent secured some time ago, by a French gentleman named Le Moulie, which promises to hold its passengers safe under all circumstances. It is built of iron, and is constructed with such strength that no amount of rolling down precipices will do it any injury, though what is to prevent the unlucky passengers inside from being unpleasantly mingled does not appear.—The thickness of the sides allows in the car much more width of room, and the whole weighs less by a ton than an ordinary wooden structure. The car is to be tried on the Patterson railroad before coming on the Boston and Worcester road, where it is finally to be used. "To be tried," we say; but though the strength of the car may be tested by tumbling it down hill, or running it into another train, it is not easy to see how the safety of the passengers can be demonstrated, for it is hardly credible that even for a "free ride," will any number of people allow themselves to be shot down a bank, though in a "life preserving car."—*Boston Courier.*

As a steamboat was about to start from Cincinnati, the other day, a young man came on board leading a blushing damsel by the hand, and approaching the polite clerk, said, in a suppressed voice: "I say, me and my wife have just got married, and I'm looking for a commodations." "Looking for a birth?" hastily inquired the clerk —passing tickets out to another passenger. "A birth! thunder and lightning, no!" gasped the astonished man, "we haint but just got married; we want a place to stay all night, you know."

Blondin Again.

Blondin crossed the rope over the Niagara River, yesterday, with a man on his back. The most interesting features of this exhibition is to be seen in its effect on Rochester. Since Blondin's great feat was adapted, and become strictly a Buffalo enterprise, Rochester become desponding, and never recovered until Tuesday last, when Delave brought her up in performing a feat said to be more wonderful than Blondin's. But Blondin, determined to do what no live man ever before did, has "gone and did it." Rochester will now make a desperate effort to come up again, but will she do it? Delave must foot-up the line and carry two, in order to beat Blondin.

The Rev. G. W. Godfrey.

This gentleman has written a letter to the N. Y. Tribune denying as false all the allegations made against him in that paper concerning Mrs. Sykes, of which we gave a brief account a few days since.—He makes at least one good point in his own defence, in saying that men who elope with other men's wives generally run *from* home, which was not his case.

We do not believe human nature is one half as bad as newspaper reports would make it appear, and we are glad to know that Mr. Godfrey gives a flat denial to the charges against him.

A SINGING MOUSE.—Dr. Tom O. Edwards, of Dubuque, Iowa, has a canary which is a very fine singer. Sometime since the servant girl, who was sitting one night in the kitchen, was much astonished at an imitation of the canary's notes, which proceeded from a cupboard. Thinking, perhaps, that it was the devil, she precipitantly fled, but the next night and the next it was no better. Investigation, however revealed the cause. The cupboard was left open, and a watch was placed, and soon after a mouse came out, got up on his haunches, curled its tail squirrel fashion over its back, and commenced warbling exactly like the canary, in a sweet, but low tone. This has been repeated night after night, and has been witnessed by hosts of people. This is a very singular phenomenon, and leads one to think that the mice are capable of better things than to nibble cheese or afford dinners for prowling cats.

MONEY DIGGERS.—A few weeks ago, in the town of De Witt, Onondaga Co., there was some excitement in consequence of the discovery of four men digging apparently a grave at night in a fresh ploughed field. On being discovered, they made good their escape. Recently, the secret has come to light. It seems there were four persons from a neighboring town who had reason to suppose that years ago a quantity of money was burried in the place where they were discovered digging, and they resolved to posses themselves of the treasure. Their operations were interrupted in the manner heretofore described and they returned to their homes without the gold. One of their friends to whom the secret had been confided, revealed it, and also gave the names of the party.

GENESEE VALLEY RAILROAD.—The Mt. Morris Union says that at a meeting of the Directors of the Genesee Valley Railroad, held at the office of the Secretary in that village, the following officers were chosen: President, Henry P. North; Vice President, John R. Murray; Treasurer and Secretary, Augustus Conkey; Superintendent, Geo. W. Phelps.

The following committees were appointed:

Finance—John R. Murray, Charles H. Carroll, E. R. Hammatt.

Executive—Hiram P. Mills, George S. Whitney, George Hastings.

The Swing as a Cure for Consumption.

I wish to say a few words to "whom it may concern" on the use of the swing—one of the gymnastic exercises—as a preventive and cure of pulmonary disease. I mean the suspending of the body by the hands by means of a strong rope or chain fastened to a beam at one end and at the other a stick three feet long, convenient to grasp with the hands. The rope should be fastened to the centre of the stick, which should hang six or eight inches above the head. Let a person grasp this stick, with the hands two or three feet apart, then swing very moderately at first—perhaps only bear the weight, if very weak—and gradually increase as the muscles gain strength from the exercise, until it may be used from three to five times daily. The connection of the arms with the body (with the exception of the clavicle with the sternum or breastbone) being a muscular attachment to the ribs, the effect of this exercise is to elevate the ribs and enlarge the chest; and as nature allowes no vacuum, the lungs expand to fill the cavity, increasing the volumes of air—the natural purifier of the blood—and preventing congestion of the deposit of tuberculous matter. I have prescribed the above for all cases of hemorrage of the lungs and threatened consumption for 35 years, and have been able to increase the measure of the chest from two to four inches within a few months, and always with good results. But especially as a preventative I would recommend this exercise. Let those who love life cultivate a well formed capacious chest. The student, the merchant, the sedentary, the young of both sexes—aye, *all* should have a swing upon which to stretch themselves daily, and I am morally certain that if this were to be practiced by the rising generation, in a dress allowing a free and full development of the body, thousands, yes, tens of thousands, would be saved from the ravages of that *approbrium medicorum*, consumption.

LAWSON LONG, M. D.

Holyoke, June 8, 1859.

A man named Devline, at Stratford, C. W., struck another named Patterson, with his fist, and killed him by a single blow.

Was this Billy Patterson who was struck some years ago, by somebody, nobody could tell who? Does the N. Y. Herald know?

The Hon. Horatio King of the Postoffice Department, in reply to the application of a gentlemen in Princetown, N. J., says that "a letter deposited in a Post-office on Saturday, and indorsed 'To lie over on the Sabbath' may be delayed until monday—provided the Postmaster at the destributing station does not overlook the indorsement.' On ocean steamships this rule does not apply. We presume that the pious gentlemen who wrote this inquiry refuses to accept interest on his notes and mortgages for the fifty-two Sundays in the year.

THE TOMATO AS FOOD.—Dr. Bennet, a professor of some celebrity, considers the tomato an invaluable article of diet, and abscribes to it very important medical proprieties.

1st. That the tomato is one of the most powerful aperients of the liver and other organs; where calomel is indicated, it is probably one of the most effective and the least harmful remedial agents known to the profession. 2d. That a chemical extract will be obtained from it that will supersede the use of calomel in the cure of disease. 3d. That he has successfully treated diarrhea with this article alone.—4th. That when used as an article of diet it is almost sovereign for dyspepsy and indigestion. 5th. That it should be constantly used for daily food, either cooked, raw, or in the form of catsup, it is the most healthy article now in use.

The Montreal Pilot wants to acquire the State of Maine, and says:

Portland will still have to be our Atlantic terminus for the season, and we now feel more than ever the effects of that stupidity which, in settling the boundaries between Canada and the U. S., was the means of depriving us of what should have been ours—the through passage to the seaboard. Every now and then cousin Jonathan is fond of twitting us about our annexation proclivities, and the certainty that one day Canada will become part and parcel of the U. S. There are many wonders, no doubt, looming in the distance, but we do not think this is likely to be one of them. If Canada could, however, by annexation, purchase, or in any other way, acquire possession of the State of Maine—which of right *ought* to have been hers—it would conduce largely and would add materially to our prosperity and our wealth.

A new invention for railroad cars, by which they can be made to turn corners at nearly right angles has lately been made in Louisiana. The whole thing is done by the wheel, and not by any change in the axle, nor by any improved fifth wheel, as most persons would be likely to suppose.

Good Children.

The Professor at the Breakfast Table, in his talk to the readers of the Atlantic, for August, offers some pungent suggestions concerning good children and their memoirs:

In early life, while the child "feels its life in every limb," it lives in the body and for the body to a very great extent—It ought to be so. There have been many very interesting children who have shown a wonderful indifference to things of earth, and an extraordinary development of the spiritual nature. There is a perfect literature of their biographies, all alike in their essentials, the same, disinclination to the usual amusements of childhood; the same remarkable sensibility; the same docility; the same conscienciousness; in short, an almost uniform character, marked by beautiful traits which we look at with a painful admiration.

It will be found that most of these children are the subjects of some constitutional unfitness for living, the most frequent of which I need not mention. They are like the beautiful, blushing, halfgrown fruit that falls before its time because its core is gnawed out. They have their meaning. I am convinced that many healthy children are injured morally by being forced to read too much about these little meek sufferers and their spiritual exercises.

Here is a boy that loves to run, swim, kick, football, turn somersets, make faces, whittle, fish, tear his clothes, coast, skate, fire crackers, blow squash "tooters," cut his name on fences, read about Robinson Crusoe and Sinbad the Sailor, eat the widest angled slices of cakes and candies, crack nuts with his back teeth and bite out the better part of another boy's apple with his front ones, turn up coppers, "stick" knives, call names, throw stones, knock off hats, set mousetraps, chalk doorsteps, "cut behind" anything on wheels or runners, whistle through his teeth, holler Fire!" on slight evidence, run after soldiers, patronize an engine company, or in his own words, "blow for tub No. 11," or whatever it may be; isn't that a pretty nice sort of a boy, though he has not got anything the matter with him that takes the taste of this world out?

Now, when you put into such a hot-blooded, hard-fisted, round-cheeked little rogue's hand a sad-looking volume or pamphlet, with the portrait of a thin, white-faced child, whose life is really as much a training for death as the last month of a condemned criminal's existence, what does he find in common between his own overflowing and exulting sense of vitality and the experience of the doomed offspring of invalid parents? It is not until he has worked his way thro' the period of honest, hearty, animal existence which every robust child should make the most of—not until he has learned the use of his faculties—which is his first duty—that a boy of courage and animal vigor is in a proper state to read these fearful records of premature decay. I have no doubt that disgust is implanted in the minds of many healthy children by early surfeits of pathological piety.

I do verily believe that He who took children in His arms and blessed them, loved the healthiest and most playful of them just as well as those who were rich in the tuberculous virtues.

GREELY AMONG THE OUTSIDE BARBARIANS.—Horace Greely writes from Big Sandy, Oregon July 6, that "white men with two or three squaws each are quite common throughout this region, and young and relatively comely Indian girls are bought from their fathers by white men as regularly and openly as Circassians at Constantinople. The usual range of prices is from $40 to $80—about that of Indian horses. I hear it stated that though all other trade may be dull, that of young squaws is always brisk on Greene River and the North Platte."

"Mr. Merchant, I have traded with you a great deal, and paid you up promptly and honestly, haven't I?" "O, yes," said the merchant, "I make no complaint." "Well, said the customer, "I always insisted that honesty is the best policy, and the best rule to live and die by." "That's so," replied the merchant.—And the customer turned to depart.—"Hold on, friend," cried the merchant, "speaking of honesty, I have a bit of advice to give you. Whenever you come to trade again, you had better wear a longer coat, or steal a shorter cod-fish."

At a trial of French, American and English reapers which recently took place on Napoleon's farm at St. Cloud, the first of the foreign prizes was awarded to Mr. McKenzie, who entered the original McCormick reaper so improved as to lay the grain in regular swarths for the binder, and requiring only one man, to drive, to operate it; the second to W. A. Wood of Hoosaic Falls; the third to Manny's reaper.

A stranger meeting a man in the streets of Boston, a few days since, roughly accosted him with, "Here, I want to go to the Tremont House!" The deliberate reply was, "Well, you can go if you don't be gone long."

NEWS SUMMARY

Few men are driven to desperation, without having had themselves a hand in the driving.

If a pound of copper will make a cow bell, how much will it take to make a cow beller?

Truth is considerably cracked up as a virtue, and yet we know of nothing that would sooner make a nuisance of a man. Speak the truth of every one you meet, and where would your head be?

Chicago papers announces that Mike Joy, formerly a hackman in Albany, has fallen heir to $30,000 by the death of his brother James, in California. Unfortunately, however, Mike has to serve a term of years in the Illinois State Penitentiary at Alton, before he can enjoy his unexpected windfall.

If the Scientific Convention had set a day longer, a report would have been made to the effect that the reason why the lightning never strikes a house protected by a rod, is because it is afraid that the rod would strike back again.

It is stated that Mr. Sickles will surrender his claim to represent the third Congressional District in Congress. The plan is to hold a special election, the contracting parties agreeing to nominate an anti-Lecompton and a Lecompton Democrat.

The body of a man was taken from the canal in Lyons Wednesday. A bottle of whiskey was found upon his person. He was doubtless thrown over from some Buffalo canal boat. The liquor found on such will kill through a glass bottle if brought in contact with the vitals.

The Binghampton Republican says a boy in the town of Spencer, Tioga county, was drawn three-forths of a mile by a cow, the lad having tied the tail of the animal around his wrist. The boy was extricated from his unpleasant position quite insensible and seriously injured.

MODESTY.—An Irish corporal, who now and then indulged in a noggin of right good poteen, was thus accosted by his captain, whilst standing at ease: "Pat, what makes your nose so red?" "Plase your honor," said Patrick, I always blush when I speak to an officer."

PHILADELPHIA, Aug. 17

The bark Dollett has arrived here with Porto Cabello dates of the first inst. Gen. Falcon, at the head of 500 revolutionists, had landed a few miles below Porto Babello, and being joined by Gen Guevara, was preparing to attack the City. He had prepared a plan to enter the City but it had been foiled by the arrest of his accomplices in the city.

Falcon was enabled to make the landing he did through the complicity of some of the Government officials.

Some of the Government vessels interfered until the landing was effected.

Porto Cabello was defended by 200 Government troops and 6 pieces of artillery.

A GOOD SUGGESTION.—The New York Central Railroad Co. have had introduced to their water tanks at this station, faucets suited to the Fire Engine hose, so that in case of fire in that vicinity, these reservoirs can be made available for its extinction. For this timely preventative measure, the residents in that part of the town are indebted to Mr. LOUIS M. COX, freight agent of the Central, and Foreman of Rescue Engine Co. No. 1.

GREAT DISCOVERY!

NEW MODE OF ADVERTISING.

The Proprietor of the Great American Shoe Store, No. 2 Odd Fellows Hall, south side Main street, nearly opposite the Post Office, claims to be the inventor of the cheapest and best mode of advertising in the world. He claims to be the manufacturer of

Latest News.

BY TELEGRAPH.

Arrival of the Steamer Saxonia.

NEW YORK, Aug 17.

A telegram from Paris says all vessels at different ports are being disarmed, and those on the roads are being ordered back into port.

Disarmament has been also commenced at Toulon, and orders given to disband all sailors having served five years.

The Paris correspondent of the Times says the Sardinian Minister of Foreign Affairs had declared to Count Russet, French Commissioner, that Sardinia could not accede to the wishes of France so far as to make efforts to have the Grand Duke recalled, and that it would be preposterous to expect Piedmont to do so contrary to the wishes and interests of Italy.

The Paris Constitutionel, of Wednesday, has an article from the pen of M. de Casagnac, entitled Ingratitude of Italy, in which the Italians are reminded of the immense obstacles which beset the Emperor at the very beginning of the war, but which were faced and surmounted by his single will, and he reminds Italy these obstacles.

He continues to show, if need be, the enormity of forgetfulness. Had the Emperor persisted it would, he says, have cost tedious sieges, fresh battles, new loans, immediate war on the Rhine, insurrections in Hungary, and elsewhere, which it would have been necessary to permit and even to encourage. In a word, it would have cost the abandonment of the principles of order and the adoption of revolutionary principles, agitation renewed for the present, without speaking of a possible reverse of fortune.

The article concludes with the following menace:—

Italy must know well that if the powerful hand which is extended for a moment over her is withdrawn, neither the fine speeches of the English Parliament nor the sterile sympathies of the Liberal party in Europe, would hinder Austria from dominating again in Italy, and this time, from Turin to Messina.

It is again stated that Piedmont formally declines entering the Italian Confederacy of Austria from a part of it.

The Times Vienna correspondent says the Prussian note of the 23d August will probably put an end to the discussion between Austria and Prussia, or it is pretty clearly proved that the Emperor Napoleon made a statement at Villafranca which was not perfectly correct. The Journal St. Petersburg also declares itself empowered to state that not only were no bases for a mediation agreed to, but not even discussed. The writer adds that having had the experience that he was deceived at Villafranca, the Emperor Francis Joseph may probably come to the conclusion that it will be better in future to leave diplomatic matters to his Minister of foreign affairs.

DR. M'LANE'S

CELEBRATED

VERMIFUGE

AND

LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,
PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS, Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa. To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form, or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium, of the fluids in the body, the want of which is the sole cause of inflamation!

NOTICE TO INVALIDS! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia, Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough, Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more, no less—equalizes the fluids by removing them from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*.
Ask your neighbors about the *New Medical Salt*. If sick, try it; if not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S NEW MEDICAL Salt is for sale in Batavia by H. W. Fellows and by all enterprising druggists wherever the Herald is [illegible]. As it is not a Patent Medicine, but the [illegible]ption of an eminent Physician, no one [illegible] fail to try the New Medical Salt. [illegible] and directions see circular.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all stages of *pulmonary disease* by Dr. Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible,* into universal use, as I know that they will prove not only

As Sure a Remedy in Consumption
as Quinine is in Intermittent Fever but also
as Effectual a Preservative
as Vaccination in Small Pox.

"*In no instance* have I found the remedy *fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage,* treated at my Dispensary, during the past year, *eight have completely recovered,* eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile* signature.

No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

Price, $2,00, or three bottles for $5,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 49 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postages. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

DR. JOHNSON'S

HERB DISPENSARY!

OFFICE 95 MAIN STREET,
(2d door, Up Stairs, Buffalo, N. Y.)
A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorrhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community: dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or consumptive Wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgic pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea, or Fleur Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflammation—a state of morbid irritability, hence the want of success on the part of old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $1 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases: consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Eruptive and Skin Diseases, St. Anthony's Fire, Rose, or Erysipelas, Pimples, Pustules, Blotches, Blains and Boils, Tumors, Tetter, and Salt Rheum, Scald Head, Ringworm, Rheumatism, Syphilitic and Mercurial Diseases, Dropsy, Dyspepsia, Debility, and, indeed, all Complaints arising from Vitiated or Impure Blood. The popular belief in "*impurity of the blood,*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice,* and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

N. B. *A word of explanation* to those who have known us under the style of Evans and Co. The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to protect the few who may be unacquainted with us, we would state that we have no connection with any other Gift Book House—and though many advertise under the name of Evans & Co., the firm constituted by D. W. EVANS and J. H. PRESTON, is the first and only concern rightfully using the name. But to prevent all confusion in the future we shall use the style of D. W. EVANS & CO. and all persons wrongfully using the appellation to mislead the public, will be made to suffer the penalty of the law.

ONLY SIX CENTS A WEEK.

No married man ever prospered in the world without the co-operation of his wife. If she unites in mutual endeavors or rewards his labors with an endearing smile, with what confidence will he resort to his daily toil, meet difficulty and encounter danger, if he knows he is not spending his strength in vain, but that his labor will be rewarded by the sweets of home! Solicitude and disappointment enter the history of every man's life, and he is only half provided for his voyage who find but an associate for happy hours, while for his months of darkness and distress no sympathizing partner is prepared.

The New Steam Plow.—The steam plow of Mr. Fawks, of Christiana, Pa., recently tested, consists of eight very large and deep plow-shares attached to the engine by chains, and arranged so as to be raised or lowered in a few seconds, as the person guiding the machine may wish. It is of thirty horse power and weighs seven tons, being the largest size that can well be constructed for any practical purpose.—It can plow either up or down a hill with great facility. The furrows are very deep and regular, so much so as to excite the admiration of several veteran farmers who were present, and rubbed their hands as they looked at the machine making such sad havoc with the soil. It plowed up one acre in twelve minutes, turns in a small circle, backs, and is entirely and easily manageable for all practical ends.

Is there a husband, father, or brother in the United States who will permit the drudgery of hand sewing in his family, when a Grover & Baker Machine will do it better, more expeditiously, and cheaper than can possibly be done by hand?

TO CORRESPONDENTS:

We also beg to inform our readers that we do not hold ourselves responsible for the opinions of our correspondents.

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

WHERE IS IDLEPORT.—The Lockport *Journal* copies our remarks concerning the crops between Batavia and Idleport and asks—

"Where is Idleport? If it is the general *land of ease*, there will be a large increase of population about these days."

It is about nine miles north-west of Batavia in this county, and derives it name from idle which means "set round and do nothing," and port, a kind of wine in great repute among the people. The "idle time" is said to be gained by each person in the place minding his own business, which gives them as a people a great amount of leisure over most other communities. We claim the discovery of this remarkable people, and intend to have the place put down on the map. Lock-porters are advised to keep away.

HOW AND WHEN TO EAT FRUIT.—Hall's Journal of Health says: "Fruit should not be indulged in between meals, as though it was a luxury, but used in moderation at meal time, in the place of animal and other food. It should not be eaten for desert, after a full meal had been made, as is usually done—a custom which cannot be too severely reprehended.—Fruit may, with safety, be eaten at any meal; but it would be well to confine it to breakfast. The old saying will be fourd true by practice: "Fruit is gold in the morning silver at noon and lead at night.' Let it constitute a part of the breakfast, and be eaten at no other period of the day; let it be ripe, and not eaten immoderately, and incalculable benefits will arise from its use, both in preventing the access and staying the progress of disease during the summer and fall months.'

INDIANA DIVORCES WORTH NOTHING IN THIS STATE.—The case of Julia E. Clark against Alvin B. Clark, which was tried before Judge Bacon at the last term of the Supreme Court, in June last, in Lewis Co. has been decided in favor of the plaintiff upon all the issues of the case. The action was brought against the defendant on the ground of adultery. The Court held that a divorce obtained in the State of Indiana, when the party goes there for the purpose of procuring such divorce, and then returns to this State, is wholly inoperative and void.

RAILWAY INSURANCES.—The system of insurance against railway accidents is now brought to such complete perfection in England that at almost any station there are agents empowered to issue the requisite policies—which are simple tickets.—Two or three pence additional paid on purchasing a ticket secures the repayment of any loss or damage to person or property during the trip. Accidents are so much more rare in England than in this country that passengers do not avail themselves of the privilege, but a similar system in the United States would doubtles work well both for the Insurance Company and the passengers or relatives.

The growth of a tree requires a given amount of solar heat, according to its bulk, which becomes latent in it, and remains until combustion or decay takes place when the latent heat becomes sensible again in proportion to the activity of the process. Vegetation gives back to the earth and the atmosphere exactly the amount of heat it receives in its growth, hence the warmth of rapidly decaying substances, spontaneous combustion, and the fervid heat of combustion by fire.

A DANGEROUS CAT.—The New Bedford Mercury says that a day or two since a child asleep in its cradle in that city, in the absence of its mother, was almost deprived of its life by a cat which was found with her claws fastened to the dress of the child, drawing its breath, and it was with great difficulty that the stealthy creatures was withdrawn.

WILL WOOD DECAY IN THE GROUND?—This question has been disputed, and there is a difference of opinion about the matter. Now and then an instance is presented to show that wood buried in the earth will remain sound for many years. Yesterday W. L. Hanford was engaged in clearing an old sewer near the site of the old Buffalo street Bathing House, and came upon the pump logs which used to convey the water to that establishment. They were found as sound as the day they were put down, which is more than thirty years ago. This fact is worth knowing by those who are using wood for the conveyance of water.—*Rochester Union.*

Wood so situated as to be entirely excluded from free oxygin, as it exists in the atmosphere, can never decay. The decay of wood is a slow combustion, produced by the union of oxygin with its carbon forming carbonic acid and water, precisely the same process that takes place when consumed as by burning. Oxygin has a stronger affinity for hydrogin in the formation of water, than it has for carbon, hence wood will not decay deep in the earth shut out from atmosphere.

THE STATE FAIR.—Speaking of the approaching State Fair, to be held on Troy Road, the Journal of Commerce says:

We anticipate for the coming exhibition a liberal share of success. It is many years since the Society has held a Fair in the Eastern part of the State, and if there is anything in the system of alternating between the different sections, the breeders and farmers, and manufacturers and fruit-growers of the river counties and those contiguous, ought to be prepared to put forth their accumulated resources, and to contribute very liberally to all departments of the show. Probably there are more breeders of blood stock who can be accommodated at Albany, than at any point further West. All along the Hudson, in Weschester, Duches, Rockland, Columbia, Albany, Rensselaer, and also on Long Island, are fine herds of Short Horns, Devons, and other improved breeds, whose owners take an honest pride in exhibiting them on all proper occasions; and we do not doubt that, now the location of the Fair is within convenient reach, there will be a more extensive show of blood stock than is usual in our State Fairs.

BLONDIN AND DELAVE BOTH ECLIPSED. A canal driver at Candaigua, is anounced to walk a tow line two hundred feet long at an altitude of three hundred feet, at any desirable point, *without a pole.* The next we expect to hear is some genius who will walk 500 feet through the air without either rope or pole.—*Exchange.*

Better than that, a man "went up" the other day in New Orleans for a hundred thousand dollars without a single thing to show for it, and has not been seen since.

Psalms of David.

The following is an eloquent extraction from a late lecture from Henry Giles, on the Psalms of David:

"Great has been their power in the world. They resounded amidst the court of the tabernacle; they floated through the lofty and solemn space of the temple: they were sung with glory in halls of Zion; they were sung with sorrow by the stream of Bable. And when Israel had passed away, the harp of David was still awake. In all the years and ages the inspiration of the royal prophet has enraptured its devotions and enobled its rituals. Chorused by the winds of heaven, they have swelled throughout God's own on the sky and stars; they have rolled over the broad desert of Asia, in the matins and vespers of ten thousand hermits. They have rung through the deep valleys of the Alps, in the sobbing voices of the forlorn Waldenses; through the deeps and caves of the Scottish Covenanters; through the woods and wilds of primitive America, in the heroic hallelujahs of priestly pilgrims."

A preacher of the Methodist church was traveling in one of the back settlement, and stopped at a cabin where an old lady received him very kindly. After setting provisions before him she began to question him: "Stranger, where mought you be from? "Madam I reside in Shelby county, Kentucky." "Well, stranger, hope no offense, but what mought you be doin' way up here?" Madam I am searching for the lost sheep of the house of Israel." "John John!" shouted the old lady "come right here this minute; here's a stranger all the way from Shelby county, Kentucky a hunting stock, and I'll just bet my life that tangled-haired old black ram that's been in our lot last week is *one of them.*

A brute named Alex. Molholland is in Chicago jail, charged with killing his own offspring, a newly-born babe. He took the child in his hands and crushed the life out of it. Liquor and jealousy were the inciting causes of this deed.

A table compiled from official documents gives the number of free masons in the United States as 211,533, and the income of the lodges as about $1,450,000.

Miscellany.

A gentleman killed himself in Florida last week for the love of a Miss Bullett, who was lodged in his heart.

Dickens says of a mother who died with her babe on her bosom: "Clasping that slight spar with her arms, she drifted out upon the dark and unknown sea that rolls around all the world."

An Ohio editor recently took a cotemporary to task for copying choice scraps from his editorial columns, without giving proper credit for them. The cotemporary replied by saying that he didn't "do a credit business."

Digby sat a long time very attentive, considering a cane-bottom chair. At length he said: "I wonder what fellow took the trouble to find all them holes and put straw around them.

Quin had a gardener who was very slow. "Thomas," said he, "did you ever see a snail?" "Certainly." "Then," rejoined the wit, "you must have met him, for you could never overtake him."

The story about eight children at a birth was a malicious hoax. The parties of whom it was related are respectable citizens of Johnston, Ohio, and have no children.

A Young Gentleman who had just married a little beauty, says, "She would have been taller, but she is made of such precious materials that nature couldn't afford it."

A preacher lately said in his sermon: "Let women remember, while putting on their profuse and expensive attire, how narrow are the gates of Paradise."

A negro boy was driving a mule, when the animal suddenly stopped and refused to budge. "Won't go, hey!" said the boy: "feel grand do you? I s'pose you forget your fader was a Jack-ass."

"Why glitters gold upon the most prominent station of your cathedral?" asked a gentleman of one of the canons of St. Paul's. "Why," replied the divine, with much simplicity, "because it is the 'highest object' of the church."

The Michigan State Prison, for the last six months has earned $1,725 25 more than its expenses.

THOMAS WILSON, formerly of Cleveland committed suicide at Dover, Ohio, on the 12th inst., by taking strychnine.

The Agricultural Society which holds its fair at Dundee, in October, offers a premium of five dollars to the young lady "who will pare a peck of potatoes in the shortest time and do it the best!"

The editor of a denominational paper at the west says: "A man needs grace to edit a religious paper properly at any time, but especially when he has the rheumatism."

Profound silence in a public assemblage has been thus neatly described: "One might have heard the stealing of a pocket handkerchief."

Mount Vesuvius is still blazing away.—Resina and Portici are now thought to be in danger.

At this period of the year grape vines in cities and large villages are infested with worms, which feed voraciously on the leaves and do considerable injury. The most convenient way to destroy them is by the use of tobacco juice and sulphur. A pound of tobacco steeped for an hour in ten gallons of water, in which two ounces of sulphur has been stirred, makes a solution of sufficient strength, to be sprinkled with a watering-pot over the entire vine. Two or three sprinklings may be required before the pests are all destroyed.

On the Mobile and Ohio Railroad, not far from Jackson, in Tennessee, says an exchange paper, still stands the humble log cabin 18 by 20 feet in size, built and occupied, while he lived in the district, by the far-famed David Crockett. Its logs are fast decaying, and desolation surrounds it, but no traveler passes it without an eager desire to look upon the humble roof.

The sudden appearance of heavy black clouds on Monday, prognosticated rain, though here no rain fell. The shower passed south and east of Le Roy a few miles, where it came down with a vengeance. Just before the bursting of the clouds, a couple of John Carmichael's boys went into the pasture to catch a fine colt for the purpose of breaking it. When within eight rods of the colt, a thunder-bolt came down and struck the animal dead.—*LeRoy Gazette.*

A SHOWER OF SNAKES.—The Detroit Tribune says that immediately after a great shower last week, a gentleman residing in that city, on walking about his premises, discovered a large number of striped or garter snakes, averaging about six inches in length. Some of them were on the front porch four feet from the ground, and some on the kitchen door steps. He commenced killing the reptiles until he had dispatched forty-seven by actual count. His neighbors also killed quite a large number, and the finding of the "snaix" continued for four or five days.

DEATH.—SINGULAR DREAM.—Hon. A. H. Hanscom, a prominent politician of Michigan, and speaker of the Assembly of that State in 1847, died at Marquette, Lake Superior, on the 4th inst, of hemorrhage of the lungs. He was one of the most genial men in the State, and his death in the prime of manhood, will cause very many heavy hearts.

It is announced, as a singular fact, that his wife (at the time a long distance from him) dreamed, during the night of his death, that he had died, and related the dream to her friends a day or two after the intelligence of his death reached them.

THE NEW YORK WEEKLY has now engaged a force of talent that cannot be rivaled by any establishment in the world!

NOTICES OF THE PRESS.

Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters, our editorial brethren have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.

GENERAL CHARACTER OF THE NEW YORK WEEKLY.

The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means. We shall never publish a word or line, the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's Intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.

Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."

Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.

Our Mirthful Morsels, our Items of Interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or in the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taken tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly."

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops, you do not lose advance subscriptions, sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.

OUR TERMS:

The price of the NEW YORK WEEKLY is FOUR CENTS, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $12. Postmasters and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty-five cents extra with every subscription, to pre-pay the American postage.

All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to,

GREAT DISCOVERY!

NEW MODE OF ADVERTISING.

The Proprietor of the Great American Shoe Store, No. 2 Odd Fellows Hall, south side Main street, nearly opposite the Post Office, claims to be the inventor of the cheapest and best mode of advertising in the world. He claims to be the manufacturer of

BOOTS AND SHOES

that will advertise themselves, by giving ample satisfaction to the wearer, thereby speaking in language not to be misunderstood by him, which he immediately interprets to his neighbors. After having tested the merits of his invention for the last twenty years, he feels confident of his

ENTIRE SUCCESS,

and would recommend it to all the other Boot and Shoe makers and dealers in this vicinity to be adopted by them. And he would especially call the attention of the citizens of Genesee county and advise them to study well its operations.

He has on hand a good assortment of Stock such as

Oak and Hemlock Sole Leather,

French calf skins, kip and morocco, &c., which he holds will stand investigation from the best of judges; and MECHANICS to manufacture it who are second to none in the State.

Also the largest stock of Ready Made Boots and Shoes in the county; both *Eastern and Home Made, at prices that defy Competition.*

Thankful for the very liberal patronage you have been pleased to extend, I would respectfully solicit a continuance of the same.

DR. M'LANE'S

CELEBRATED

VERMIFUGE

AND

LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,
PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa. To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

DR. COGGSWELL'S NEW MEDICAL SALT,

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium, of the fluids in the body, the want of which, is the sole cause of inflammation!

NOTICE TO INVALIDS! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia, Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*.

Ask your neighbors about the *New Medical Salt*. If sick, try; if not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S New MEDICAL Salt is for sale in Batavia by H. W. Fellows and by all enterprising druggists wherever the Herald is [illegible]. As it is not a Patent Medicine, but the [illegible] of an eminent Physician, no one [illegible] fail to try the New Medical Salt. For [illegible] testimonial and directions see circular

The attention of Inspectors of Election and County Canvassers is directed to chap. 271, of Laws of 1859, a copy of which is printed herewith, for instructions in regard to their duties under said act, "submitting to the people a law authorizing a loan of two million five hundred thousand dollars, to provide for the payment of the floating debt of the state."

CHAP. 271.

AN ACT to submit to the people a law authorizing a loan of two million five hundred thousand dollars, to provide for the payment of the floating debt of the State.

Passed April 13th, 1859—three-fifths being present.

The People of the State of New York represented in Senate and Assembly, do enact as follows:

SECTION 1. The commissioners of the canal fund are hereby authorized to borrow on the credit of the state two million five hundred thousand dollars, at a rate not exceeding six per cent. per annum, and reimbursable at such periods as shall be determined by the said commissioners, not exceeding eighteen years from the time of making such loan. All the provisions of law in relation to loans made by commissioners of the canal fund, and the issue and transfer of certificates of stock, shall apply to loans authorized by this act, so far as the same are applicable.

§ 2. The moneys realized by such loan shall be applied exclusively to the payment of claims against the state not otherwise provided for, for work done on the canals of the state, and for private property appropriated by the state for the use of such canals, and for injury to private property growing out of the construction of the canals or to the payment of the principal and interest of such loan, and for no other purpose whatever.

§ 3. Two million five hundred thousand dollars is hereby appropriated, to be paid out of the treasury, on the warrant of the auditor of the canal department, from the said moneys, within two years from the time when this act shall take effect, for the payment of claims against the state, specified in the last preceding section, and for the payment of the interest on the loan authorized by this act, which shall become payable prior to the receipt into the treasury of the first annual tax hereinafter directed to be levied and collected, for the payment of the interest and principal of the loans authorized by this act; but any sum applied to pay interest as aforesaid, may be refunded out of the proceeds of the said taxes when received into the treasury.

§ 4. An annual tax is hereby imposed, and shall be levied and collected in the same manner as other State taxes are levied and collected sufficient to pay the interest and redeem the principal of the loan hereby authorized, within eighteen years from the time of the contracting thereof. The comptroller shall ascertain and determine what sum, being applied in payment of principal and interest, in the first year after the tax can be collected as aforesaid, and in each succeeding year thereafter, within a period of eighteen years from the time of contracting said loan, will be sufficient to pay the interest and redeem the principal of said loan within said period of eighteen years; and shall in each year apportion the sum so required among the several counties of this state, according to the then last corrected assessment rolls returned to his office, and shall give notice of such apportionment to the boards of supervisors of the respective counties. It shall be the duty of the boards of supervisors of the respective counties to cause the amount so apportioned in each year to be levied, collected and paid to the treasurer of this state in the same manner as other state taxes. The money collected and paid into the treasury under this section shall constitute a sinking fund to pay the interest and redeem the principle of the loan contracted pursuant to this act, and shall be sacredly applied to that purpose; and if at any time the sinking fund shall be insufficient to comply with the requirements of this section, the comptroller shall increase the sum thereafter to be levied and collected by tax in each year, so as to make the fund adequate for the purpose aforesaid.

§ 5. The fourth section of this act, imposing a tax may be repealed whenever the revenues of the canals, after meeting all present constitutional charges upon them, shall amount to enough to form a sinking fund sufficient to pay the interest and redeem the principal of all loans within the eighteen years mentioned in the first section of this act.

§ 6. This act shall be submitted to the people of this state at the next election, and the votes given for its adoption, shall be endorsed "Constitutional loan," and shall be in the following form: "For a loan of two million five hundred thousand dollars, to pay the floating debt of the state," and "Against a loan of two million five hundred thousand dollars to pay the floating debt of the State." The inspectors of the several election districts in this state, shall provide a separate box, in which the ballots given in pursuance of this act shall be deposited. The ballots shall be canvassed and returned, and the result shall be votes given for the office of Governor of this determined and certified in the same manner as state. If a majority of the votes cast, pursuant to this act, shall be "For a loan of two million five hundred thousand dollars to pay the floating debt of the state," then the preceding sections of this act shall take effect; but if a majority of the votes so cast, shall be "against a loan of two million five hundred thousand dollars to pay the floating debt of the state," then the said sections shall not take effect, but shall be inoperative.

You are without delay to deliver a copy of the above notice to the Supervisor or one of the Assessors of each town or ward in your county; and also to cause a copy of said notice to be published in all the public newspapers printed in your county, once in each week until the election.

Yours respectfully,
GIDEON J. TUCKER, Sec'y of State.

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgic pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea, or Fleur Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders, and a host of others not named, have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflammation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

DR. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these disabilities, will receive for $2 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

N. B. *A word of explanation* to those who have known us under the style of Evans and Co. The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to protect the few who may be unacquainted with us, we would state that we have no connection with any other Gift——Book House——and though many advertise under the name of Evans & Co., the firm constituted by D. W. EVANS and J. H. PRESTON, is the first and only concern rightfully using the name. But to prevent all confusion in the future we shall use the style of D. W. EVANS & CO., and all persons wrongfully using the appellation to mislead the public, will be made to suffer the penalty of the law.

ONLY SIX CENTS A WEEK.

Rev. Henry Ward Beecher says of the "items column" in the newspapers, that it "is worth more than all the small fry of correspondents, with an editor thrown in to boot! Like a caravan, it stretches along in columns, with packages and parcels, spices and gems, bits of fragrance or cunningly wrought metals, gathered from Orient and from the whole world besides. The items of the paper, like the stuffing of a Thanksgiving turkey, represents everything in the house, crusts of bread, crackers and all spices."

The London Times employs in its establishment some 850 persons. It has eighteen reporters at the house of Parliament, and for these, as well as the majority of its compositors, the working hours are the night hours exclusively. It owns four cabs, which are employed solely in carrying reporters and reports at night to and fro between Printing House Square and the Palace at Westminister. The reporters relieve each other every quarter hour, and thus though the debate in the commons last till four o'clock in the morning the Times gives it in full by sunrise, though it covers two pages of the journal.

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

A Double Joke.—Some wag in Buffalo got out a report that the Niagara Suspension Bridge Co. had served an injunction on Blondin to restrain him from again carrying a person across the River. The Buffalo Courier takes up the matter in dead earnest, and claims that Blondin should be allowed *full* liberty to turn an honest penny, and entertain the public.—The sell consists in the fact that the Suspension Bridge Co. has an exclusive right to carry passengers over the Niagara River.

Attractive force of dead Bodies.—An absurd statement is going the rounds of the papers that three ounces of quicksilver put into a loaf of bread, will cause it to float to a point directly over a body lying under water, and descend to it, by which means drowned persons may be found. Some people are wise, those who believe such nonsense as this, are otherwise.

An interesting topic of conversation in Newburyport, Mass., at present, is the recent development of free-love principles in spiritualistic circles there. Two couples have already separated, and if rumor be true, there are others in a fair way to become so. One pair who have dissolved partnership had been united but a few months, and the gentleman is well known in that vicinity as the former husband of a distinguished literary lady, whose writings are familiar to those acquainted with the current literature of the day.—*Exchange.*

A queer kind of love that breaks up families in that way. Why not call vices by their right names?

Where the Grasshoppers go to.—We are glad to know that this jumping fraternity are to be destroyed in some way. The Port Hope (Canada) Guide says that they are falling a prey to a grub very similar in appearance to the weevil. On examination they are found covered with these small but formidable enemies, the strength gradually departs from the joints of the strongest and they die. It is said that the grasshoppers may be seen in myriads, "stark and stiff," in the fields, while those alive are so dull and inactive that they can do but little mischief to the green crops. Some farmers assert with all sincerity, that the weevil, appearing too late to successfully attack the fall wheat pounced upon the grasshoppers, then young and tender, and will destroy them instead of the grain. If this should prove to be the case, it will be one of the most extraordinary circumstances on record.

Important if True.—Dr. Bissel, one of the quarantine physicians at Staten Island, N. Y. is of the opinion "if a person's hair be washed he is not liable to disease." The Norfolk Herald supports the opinion. "So *important* a result," says that paper "from so simple a cause may seem incredible to many, but not to us. There is not a more effectual preventative of disease than the *immersion of the head in cold water the year round.*"

Wouldn't the Norfolk Herald accept hanging?

The editor of the Bainbridge Georgian has been assaulted in his sanctum by a young lawyer, and in reference to what occurred the editor says coolly: He mildly hit us on the head with a closed knife, or something else hard in his hand. We happened to have our Colt near at hand, which we got, and as soon as we could extricate ourselves, we accidentally pulled the trigger some four or five times, putting one ball through his coat and shirt sleeve between his arm and body; another between the skirt and waist, and a third somewhere else. He managed to escape unhurt, however, by dodging out of a side door, and jumping from a height of some 14 or 15 feet, hatless, with his coat tail shivering in the breeze.

A tooth of some extinct monster was found near Lafayette, Ind., a few days since. It weighed two pounds and over. A similar discovery was made in Fountain county about the same time. A portion of the jaw bone of some mastodon was found which measured three feet long and one foot wide at the widest part.

A Mysterious Marriage.

A correspondent of the Newark *Advertiser* writes as follows:

The article about a singular dream in your yesterday's edition attracted some attention, and was the means of reviving my remembrance of another case of a similar character, the parties in which were well known to me.

In 1854, Mr. W. was a rather reckless young man of twenty-five, of a nervous billious temperament, and not at all romantic, having run the gauntlet of an army experience. He had been early orphaned, and some hard experience had not added polish or improved his views of the gentler sex; however, from early youth he had entertained certain well-defined ideas of proper conjugal relations, and was ever hoping for an ideal partner to fill the void caused by the loss of a loved and loving mother.

In one of our New England States resided Miss L., passing twenty-five, mild and amiable. For a period of years she had resisted the persecutions of a selfish parent, who for pecuniary reasons would have coerced her to marry a man thrice her own age. Twice had she been induced to consent to a marriage, and twice evaded it—the last time, wedding clothes and every preparation for a trip to Europe were made, but as the time for its consummation approached, her excessive grief again postponed the affair. Shortly after, in 1852, in New York State, one morning, while half sleeping and half waking, she became conscious of a human form bending down close over her head, the face alone being clearly visible. She looked steadily until all her faculties were aroused, and then hurriedly covered her head. On arising, the room was thoroughly examined, yet not the slightest indication of outside intrusion could be discovered.

In speaking of it, Miss L. expressed her firm conviction that she should meet the counterpart of the person presented at her bedside, and would marry him. Two years pass; meanwhile Mr. W., then residing at Philadelphia, heard, through an intimate friend, of Miss L. and her waking dream, and was assured by his friend that he answered to the description given.—When an opportunity occurred he visited the East quite unexpected, and arranged to be introduced to the lady under another name than his own—choosing that of a young man whose mother Miss L. knew, but not the son. On meeting for the first time, and being introduced, Miss L. was observed to look searchingly at the gentleman, and after some common-place remarks inquired where his mother was. The peculiarity of the question caused him for a moment to incline his head forward, when Miss L. recognized the position, instantly flushed up, and *called him by his proper name.* Three days subsequently, and at a mutual friend's house, Mr. W. arose from the dinner table, and acting from an unaccountable and irresistable impulse, not at all premeditated, followed the lady into another room, and in less than three months from that time they were married, notwithstanding Miss L.'s often and emphatically repeated assertion that she never would marry a man younger than herself.

A few years have passed since then, and the domestic relations and parentage of these parties are to this day fully in keeping with the happy harmony that brought them together. When facts of this kind are well vouched for, we can but wonder at the unknown powers of the human mind, and at a climax of thought we mentally repeat "Man know thyself."

A New York paper gives the following as a specimen of Wall street financiering: "A street broker purchased from a member of the Board several hundred shares of New York Central Railroad stock, buyer's option. The purchaser called for the stock, and the seller refused to deliver the same, on the ground that, had it gone the other way the buyer would not have been able to respond. Failing to appreciate the force, not to say the morality, of his logic, the purchaser made complaint to the Exchange Board. Three gentlemen were appointed a committee to investigate the matter."

Mrs. Benjamin Reeves, on her way westward, while on the steamer Armenia, lost her pocketbook containing $30, all the money she had to pay her way to St. Louis. Lieut. Bradenburgh met her in Albany, bemoaning her loss. Upon ascertaining the facts of the case, he accompanied her to the office of the Central Railroad, and upon representing the case to the President, Erastus Corning, Esq., he gave her a free pass to Chicago and a letter to a gentleman in that city, requesting him to see that the lady was given a ticket to St. Louis. The interest manifested in behalf of the lady is creditable to all concerned.

That was a courageous man, says the Springfield Republican, a down east lumberman, that passed through this city Wednesday, on foot for Watertown, N. Y., having walked from the lumber regions of Maine, above Bangor, to this city, in two and a half weeks, a distance of 500 miles.

Death from the Bite of a Turtle

We find in the Middleboro Gazette the following statement:

We chronicled last week the death of a boy in Plympton, in consequence of the bite of a turtle. We have since learned some of the circumstances of the case. It seems that the lad brought from a pool of water near by a number of these turtles to play with, and while engaged in this sport one of them bit his finger. Not long after he began to be sick, and we believe became feverish. The physician inquired if the finger was sore, and he always insisted that the pain was in his leg. The finger was at length lanced, and matter discharged. Black spots appeared on his other hand and there were indications of some virus rankling in his system.

He finally went into paroxysms, and began to snap and bite at his bed clothes and everything coming in his way, after the manner of a turtle. The physician, fearing the results, charged those who had the care of him to avoid by all means a bite from him. In this way the poor fellow died, apparently from turtlephobia.

Subsequently to this event, in the pond at the Parker works, a flock of ducks were swiming about in search of food, and one of them putting his head under water was noticed in a sad, struggling plight, apparently confined in a very uncomfortable condition. Some one on going to extricate it drew out a large turtle also. The voracious creature had grabbed the duck's head, broken its neck and held on like a vice, so that both came from the pond together; the turtle alive, the duck dead.

A party of pleasure seekers from this State are journeying South in a novel manner, described by the Washington Star as follows: "A month ago, company of eleven ladies and gentlemen of Buffalo, N. Y., started upon a pleasure trip to the South, taking a novel mode of traveling.—They have a large coach like an omnibus in which they travel, and carry with them a tent sufficiently large to accommodate the entire company, and camp out, much after the gipsy fashion, though in better style. They arrived near Bladensburgh a day or two ago, and pitched their tent near the toll-gate. Yesterday they spent in visiting the buildings and seeing the sights in the metropolis. It is the plan of the company to spend ten months in this trip, and they design to Winter at some point on the Gulf coasts.

The Milwaukee Wisconsin has no doubt the crop of spring wheat now harvested in that State is larger than in any former year. It estimates the amount at 14,000,000 bushels, and allowing 4,000,000 for consumption, there will be 10,000,000 bushels for export. The Wisconsin does not anticipate high prices, but claims that the excellent quality of the wheat will create a demand for it among millers. It urges wheat raisers to clean their wheat carefully, and advises them to send their crops forward before December.

At the Methodist church at Morehouse, Louisana, a week ago last Sunday, the Rev. John. B. Spencer was discoursing the third chapter of 1st Corinthians, 21st, 52d and 23d verses. He had arrived at the middle of his discourse on "life and death," when he suddenly stopped, then attempted again to proceed, and, only uttering "all are yours," sank back speechless.—He died in a few hours. The scene was very impressive. "Therefore, let no man glory in men, for all things are yours, whether Paul, or life, or Appollos, or Cephas, or the world, or life, or death, or things present, or things to come, all are yours, and you are Christ's, and Christ is God's."

Struck a Rich Gold Lead.—A tobacconist in Milwaukee was opening and arranging a sack or ball of tobacco direct from Havana, he found in the ball a sheepskin purse, or bag, containing between six and seven hundred dollars in gold, mostly Spanish coin. It was doubtless secreted there by some thief, who, to escape detection, hid the money in the sack before it was stitched up for market, and thus lost his plunder.

Patent Metalic Window-Blinds.—These blinds, though somewhat heavier than those made of wood, having a very light and tasteful appearance. The frame is made of meliable cast, and the slats of corrugated sheet iron. Being made entirely of metal they are "fire and burglar proof," and of course desirable. Another superiority in these blinds is the certainty and ease with which the slats are opened and closed, without the danger of drawing or splitting out the wires, which so often occur with the wooden slats, especially after repainting.

James Peck and Sons have failed.—This is one of the largest houses in Chicago, and one of the most extensive ship owners on the Lake. The failure is attributable to the present low prices of grain and their consequent loss on old stock.—This failure is but the commencement of what must inevitably follow. The wheat speculations have been disastrous. The Banks of Western New York are largely involved in these transactions, as the Chicago operators have obtained loans freely.

Miscellany.

The receipts of the Central Road are increasing, and the expectation of the managers is that the traffic of August will show an increase of $70,000 or $80,000.

A woman who recently offered herself to Rochester justice as bail for her son, was informed that she must have a bondsman of "good moral character," whereupon she exclaimed: "Well, if that's the case, I shall have to find somebody outside the county!"

A dispatch has been received from Humboldt informing his friends that he was welcomed into the spirit world by his friend Aargo, who was first to take him by the hand.

"I do wish I could be cured of lying in bed so long in the morning," said a lazy husband lounging upon his pillow. "Well, I will try the water cure," said his wife, pouring a bucket full on him.

The extensive paper mill at Casenovia, owned by Sweetland Brothers, was destroyed by fire at noon on Monday.

The Valley Sentinel says that Hon. F. E. Spinner, of Mohawk, was seriously hurt by a kick from a colt, on Monday last.—One heel struck Mr. S. in the breast, smashing his gold watch, the other struck him on the arm.

Four thousand strangers, it is estimated are in Newport, of which the public houses take about one-half. The great majority of visitors the present season are from New York and Philadelphia. The number from the South is comparatively small.

A rattlesnake was killed, lately, 20 miles west of Terre Haute, 21 feet in length, 18 inches round in the largest part and with 111 rattles. This same snake, or one like it, was seen in the same locality thirty years ago. The monster was killed with a rifle bullet, and is undoubtedly the biggest rattlesnake on record.

THE GREAT AMERICAN

No. 2, Odd Fellow's Hall.

GREAT DISCOVERY!

NEW MODE OF ADVERTISING.

The Proprietor of the Great American Shoe Store, No. 2 Odd Fellows Hall, south side Main street, nearly opposite the Post Office, claims to be the inventor of the cheapest and best mode of advertising in the world. He claims to be the manufacturer of

BOOTS AND SHOES

that will advertise themselves, by giving ample satisfaction to the wearer, literally speaking in language not to be misunderstood by him, which he immediately interprets to his neighbors. After having tested the merits of his invention for the last twenty years he feels confident of his

ENTIRE SUCCESS,

and would recommend it to all the other Boot and Shoe makers and dealers in this vicinity to be adopted by them. And he would especially call the attention of the citizens of Genesee county and advise them to study well its operations.

He has on hand a good assortment of Stock, such as

Oak and Hemlock Sole Leather,

French calf skins, kip and morocco, &c., which he holds will stand investigation from the best of judges; and MECHANICS to manufacture it who are second to none in the State.

Also the largest stock of Ready Made Boots and Shoes in the county; both *Eastern and Home Made, at prices that defy Competition.*

Thankful for the very liberal patronage you have been pleased to extend, I would respectfully so licit a continuance of the same.

THE

NEW YORK WEEKLY,

A HANDSOME QUARTO PUBLICATION,
BEAUTIFULLY ILLUSTRATED,
IS NOW UNIVERSALLY ACKNOWLEDGED TO BE

THE BEST STORY PAPER IN THE WORLD!

Among its Regular Contributors will be found the names of some of the best male and female writers in the United States! Such writers as Justin Jones, (Harry Hazel) Augustine J. H. Duganne, William Earle Binder, Harry Hazleton, James Reynolds, Francis S. Smith.

Mrs. Mary J. Holmes, Helen Forest Graves, Mary C. Vaughan, Margaret Verne, Anna Raymond, Ella Mayville, Write for it regularly, while a score of other well known writers occasionally contribute to its columns.

THE NEW YORK WEEKLY has now engaged a force of talent that cannot be rivaled by any establishment in the world!

NOTICES OF THE PRESS.

Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters, our editorial brethren have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.

GENERAL CHARACTER OF THE NEW YORK WEEKLY.

The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means. We shall never publish a word or line the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S Smith's Intensely Interesting Domestic Story. Maggie, The Child or Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.

Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."

Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.

Our Mirthful Morsels, our Items of interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or in the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taken tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY; while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly"

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops, you do not lose advance subscriptions, sent to a place where you have no means of lookin after it. We trust the day is not far distant when every town, large enough to sustain a Post Office will have its News Agency.

OUR TERMS:

The price of the NEW YORK WEEKLY is FOUR CENTS, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $6, eight copies for $12. Postmaster and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty-five cents extra with every subscription, to pre-pay the American postage.

All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to,

STREET & SMITH,
EDITORS AND PROPRIETORS,

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and *of* SODA.

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all *stages of pulmonary disease* by Dr. Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible*, into universal use, as I know that they will prove not only

As Sure a Remedy in Consumption
as Quinine is in Intermittent Fever, but also
as Effectual a Preservative
as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*"

"*Out of twenty-two cases in the third or last stage, treated at my Dispensary, during the past year, eight have completely recovered, eight have died, and six are still under treatment. Such a result is altogether unparalleled in the annals of Medicine.*"

☞ This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis Nervous Diseases, Chlorosis, Dyspepsia,—in whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F Churchill Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile signature.*

☞ No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

☞ Price, $2.00, or three bottles for $5.00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 41 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postage. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

DR. M'LANE'S

CELEBRATED

VERMIFUGE

AND

LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above-mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,
PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and *take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa.* To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium of the fluids in the body, the want of which is the sole cause of inflamation!

NOTICE TO INVALIDS! The following forms which the unbalanced fluids assume, and pains not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtain d from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*.

Ask your neighbors about the *New Medical Salt*. If sick, try; if not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S NEW MEDICAL Salt is for sale in Batavia by H. W. Fellows and by all respectable druggists wherever the Herald is read. As it is not a Patent edicine, but the prescription of an eminent Physician, no one need be afraid to try the New Medical Salt. For testimonial and directions see circular.

WANTED.

A CONVENIENT HOUSE FOR A SMALL FAMILY.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases: consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Eruptive and Skin Diseases, St. Anthony's Fire, Rose, or Erysipelas, Pimples, Pustules, Blotches, Blains and Boils, Tumors, Tetter, and Salt Rheum, Scald Head, Ringworm, Rheumatism, Syphilitic and Mercurial Diseases, Dropsy, Dyspepsia, Debility, and, indeed, all Complaints arising from Vitiated or Impure Blood. The popular belief in "*impurity of the blood,*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC.

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice,* and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific remedy for

CONSUMPTION!

The extraordinary results obtained in all stages of *pulmonary disease* by Dr. Churchill's new treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment, with almost *invariable* success. Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible*, into universal use, as I know that they will prove not only

As Sure a Remedy in Consumption as Quinine is in Intermittent Fever, but also as Effectual a Preservative as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage*, treated at my Dispensary, during the past year, *eight have completely recovered*, eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile signature.*

No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

Price, $2,00, or three bottles for $5,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 43 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postage. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgic pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea, or Fluor Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases all the above named disorders and a host of others not named, have their seat primarily in the sexual organs, and arise from secondary affections and chronic inflammation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $1 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

N. B. *A word of explanation* to those who have known us under the style of Evans and Co. The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to protect the few who may be unacquainted with us, we would state that we have no connection with any other Gift Book House—and though many advertise under the name of Evans & Co., the firm constituted by D. W. EVANS and J. H. PRESTON, is the first and only concern rightfully using the above. But to prevent all confusion in the future we shall use the style of D. W. EVANS & CO., and all persons wrongfully using the appellation to mislead the public, will be made to suffer the penalty of the law.

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

THE BUFFALO REPUBLIC.—Of all our exchanges, the *Daily Republic*, of Buffalo, is the one we look for first. The No. for Saturday last contained fifteen columns of reading matter, embracing news and intelligence from all quarters of the world. C. C. BRISTOL, Esq., who presides over the columns of the *Republic*, has the look of a Patriarch and a Prophet, but the only prophecy he ventures on is that the *Republic* shall be acknowledged to be the best pader in Buffalo, and this he mans to fulfill himsel. FAXON, of the "Local" department, is inimicable—the "author" of Blondin's reputation, and several other good things. Buy the Republic if you want the cheapest and best Buffalo paper.

We observe that Daniel E. Sickles, the man that lives with the murdered Key's Mistress, leads the list of the Democratic State Committee in calling a State Convention. Whether the assassin or the mistress gives the most weight or respectability to the Democratic State Committee, is a mooted question.—*Schoharie Jeffersonian.*

The man who wrote the above paragraph deserves to have the flesh rot from his bones, while yet he is obliged to carry it about, sickened and sickening with the fetor of his own corrupt moral and physical degradation.

BROADCLOTH AN ENEMY OF HEALTH.—Professor HAMILTON, in an able address on hygiene to the graduates of Buffalo Medical College in this city, denounces "broadcloth" as an enemy to exercise, and therefore to health. His remarks are pointed and sensible. He says:—"American gentlemen have adopted as a national costume, broadcloth—a thin, tight-fitting black suit of broadcloth. To foreigners, we seem always to be in mourning; we travel in black, we write in black, and we work in black. The priest, the lawyer, the doctor, the literary man, the mechanic, and even the city laborer, choose always the same unvarying, monotonous black broadcloth; a style and material which ought not to have been adopted out of the drawing-room or the pulpit; because it is feeble and expensive fabric; because it is at the north no suitable protection against the cold, nor is it indeed any more suitable at the south. It is too thin to be warm in the winter, and too black to be cool in the summer; but especially do we object to it because the wearer is always afraid of soiling it by exposure. Young gentlemen will not play ball, or pitch quoits, or wrestle and tumble or any other similar thing, lest their broadcloth should be offended. They will not go out into the storm, because the broadcloth will lose its luster if rain falls upon it; they will not run because they have no confidence in the strength of the broadcloth; they dare not mount a horse, or leap a fence, because broadcloth as everybody knows is so faithless. So these young men, and those older men, merchants, and all, learn to walk, talk and think soberly and carefully; they seldom venture even to laugh to the full extent of their sides."

GOOD FOR SOMETHING.—A son of Cassius M. Clay, while gunning recently, says an exchange, was bitten on the foot by some poisonous reptile, supposed to be a rattlesnake, and his body immediately exhibited all the symptoms of the most virulent poisoning; but he was dozed until stupified with apple brandy, and the next morning was as well as ever. So confident was Mr. Clay of the efficacy of alchoholic spirits in all cases of poison by the bites of snakes and insects, that he did not even send for a physician. Saleratus was bound upon the bitten spot, until ammonia could be produced, when the former was moistened with it. This was upon the theory that poison is an acid, and any alkali will answer, though ammonia is thought to be the best.

Mr. Clay's experience is confirmed by that of many others, and it is the part of wisdom for all to remember, and to use when needed, this simple antidote; but we hope that no body will think that, because whiskey is a good remedy for poisonous bites it is also to be used as a preventative.—For, although a snake would be justified in refusing to bite a whisky-soaked, creature we don't think one ever did.

Horace Greeley's two Hours with Brigham Young.

SALT LAKE CITY, UTAH, July 13, '59

My friend Dr. Bernhisel, M. C., took me this afternoon, by appointment, to meet Brigham Young, President of the Mormon Church, who had expressed a willingness to receive me at 2 P. M. We were very cordially welcomed at the door by the President, who led us into the second-story parlor of the largest of his house (he has three), where I was introduced to Heber C. Kimball, Gen. Wells, Gen. Ferguson, Albert Carrington, Elias Smith, and several other leading men in the Church, with two full-grown sons of the President. After some unimportant conversation on general topics, I stated that I had come in quest of fuller knowledge respecting the doctrines and polity of the Mormon Church and would like to ask some questions bearing directly on these, if there were no objection. President Young avowed his willingness to respond to all pertinent inquiries, the conversation proceeded substantially as follows:

H. G.—Am I to regard Mormonism (so-called) as a new religion, or as simply a new development of Christianity?

B. Y.—We hold that there can be no true Christian Church without a priesthood directly commissioned by God in immediate communication with the Son of God and Savior of mankind. Such a church is that of the Latter-Day Saints, called by their enemies Mormons; we know no other that even pretends to have present and direct revelations of God's will.

H. G.—Then I am to understand that you regard all other churches professing to be Christian as the Church of Rome regards all churches not in communion with itself—as schismatic, heretical, and out of the way of salvation?

B. Y.—Yes, substantially.

H. G.—Apart from this, in what respect do your doctrines differ essentially from those of our Orthodox Protestant Churches—the Baptist or Methodist for example?

B. Y.—We hold the doctrines of Christianity, as revealed in the Old and New Testaments—also in the Book of Mormon, which teaches the same cardinal truths, and those only.

B. G.—Do you believe in the doctrine of the Trinity?

B. Y.—We do; but not exactly as it is held by other churches. We believe in the Father, the Son, and the Holy Ghost, as equal, but not identical—not as one person [being]. We believe in all the Bible teaches on this subject.

H. G.—Do you believe in a personal devil—a distinct, conscious, spiritual being, whose nature and acts are essentially malignant and evil?

B. Y.—We do.

H. G.—Do you hold the doctrine of Eternal punishment?

B. Y.—We do; though perhaps not exactly as other churches do. We believe it as the Bible teaches it.

H. G.—I understand that you regard Baptism by Immersion as essential.

B. Y.—We do.

H. G.—Do you practice Infant Baptism?

B. Y.—No.

H. G.—Do you make removal to these valleys obligatory on your converts?

B. Y.—They would consider themselves greatly aggrieved if they were not invited hither. We hold to such a gathering together of God's People as the Bible foretells, and that this is the place and now is the time appointed for its consummation.

H. G.—The predictions to which you refer have usually, I think, been understood to indicate Jerusalem (or Judea) as the place of such gathering.

B. Y. Yes, for the Jews—not for others.

H. G.—What is the position of your Church with respect to Slavery?

B. Y.—We consider it of Divine institution, and not to be abolished until the curse pronounced on Ham shall have been removed from his descendents.

H. G.—Are any slaves now held in this Territory?

B. Y.—There are.

H. G.—Do your Territorial laws uphold Slavery?

B. Y.—Those laws are printed—you can read for yourself. If slaves are brought here by those who owned them in the States we do not favor their escape from the service of those owners.

(*To be Continued.*)

A MONSTROUS LUSUS NATURÆ.—One day, week before last, the passengers on board a ferryboat near Quebec were attracted by the singular appearance of a woman who occupied a rather secluded position, and who seemed to be under the car of some persons who acted as if anxious to shield her from observation. Her arms were bandaged, but not so closely as to prevent a constant and very unusual motion, and her head, which was completely covered to sway instantly backward and forward, beneath the folds of cloth. As soon as the ferry boat reached the shore, the figure was conveyed to a train of cars in waiting, and seated therein; but at this moment a sort of struggle and tumult again attracted the notice of the bystanders, and the car was filled with eager enquirers. Those who entered, however, hastily returned, their faces pallid with horror. Among them was the conductor of the train, who begged that no one would approach, for the bandages had been thrown off, and it had been discovered, that the creature was a monster possessing the form of a woman, except the head and arms, which were those of a pig! No mere human resemblance, but the absolute fact. This would seem incredible, were it the only case of the kind. It is known, however, that there lived in Albany, New York, a few years ago, a similar creature, having a woman's body and a pig's head; in this instance the arms were human. This being was always kept in close confinement, and never suffered to leave a certain room in the house, where those who had charge of her resided, excepting when no visitors were about.—She could talk imperfectly and was capable of some degree of mechanical labor, for her sewing was said to be beautiful. Her head was in every respect that of a pig,—no particular was wanting—ears, bristles, even tusks, all were there. This creature died at about the age of thirty five years, after having been for some time destitute of the little reason she once possessed.—*Boston Courier.*

Shillaber on Swearing.

Almost every one accustomed to smoking, who has a proper regard for the little courtesies of life, asks before he indulges in his propensity, if it may be offensive to any. Suppose the same questions were asked with regard to swearing, by those who are disposed to indulge in the luxury of blaspheming. There are times where good taste is fearfully shocked by the introduction of words and sentiments that should not be spoken by the members of any circle; and though not disposed to claim for ourselves a very great measure of sanctity, there are times when we have been offended—to use a very mild term for the feeling—at expressions which good manners should have suppressed, and good morals should never allow to have entered the minds of those who uttered them. We think the time has gone by when profanity is generally regarded as an essential adjunct of wit, and that a story loses nothing of its piquancy when the profanity is left out. It is very offensive to have an obtrusive head with an oath ever between its teeth, thrust among decent people, and it is a wonder that sensible men, themselves, who speak properly—and there are too many such—should not see the probably disagreeable nature of it to those who hear them, and suppress it. At least they might preface their remarks with the question, "is swearing offensive to you?"—*Mrs. Partington's Knitting Work, by Shillaber.*

Got the Blues.

Our pork, flour and grain speculators have got the blues awfully. We cannot say that we are surprised at this. For sixty days the prices have been going down, down, down. Pork has fallen some six dollars a barrel. This, to the gentlemen who held two or three thousand barrels, is a matter that is well calculated to "crowd the mourners." Flour has fallen about four dollars a barrel since May.—Grain has also gone down about a "feet." Oats have fallen from sixty to thirty-five cents, while the immense crop ready to come to market shows that we can expect no advance in rates for the coming year.—The experience of the past twelve weeks shows that speculators can see no further into the future than other people. The "sharpest" buyers are those who are most "bit." It is only the old fogy houses that escape without serious loss. As the old fogies aforesaid were not anxious to get "rich in a hurry," they took things coolly, and bought to sell rather than to "hold on and wait for a rise." The result is that Fogy has very little to grieve over, while Smart, Splurge & Co., have become low-spirited because their cash book proves that they are worse off now than they were six months ago. That the fall in all kinds of produce has not led to more failures is a matter to wonder at. That our speculators stand up under the infliction as they do, makes it evident that they are possessed of some considerable back-bone and capital. We expect to see a good article of flour sold in October for four dollars a barrel, and oats at thirty cents a bushel.—*Albany Knickerbocker.*

A NEW DAILY MAIL ROUTE.—A new daily mail route has been established between our village and Batavia—"over land." It went into operation yesterday. This will be a great convenience to our citizens as well as the people on the route, and those east and south of us. It was through the exertions (mainly) of Hon. John B. Skinner, that the route was obtained. The mail leaves Batavia at 10 o'clock A. M., and Warsaw at 10 A. M. It arrives at each place at 4 P. M.—*Western New Yorker.*

THE

NEW YORK WEEKLY,

A HANDSOME QUARTO PUBLICATION,

BEAUTIFULLY ILLUSTRATED,

IS NOW UNIVERSALLY ACKNOWLEDGED TO BE

THE BEST STORY PAPER

IN THE WORLD!

Among its Regular Contributors will be found the names of some of the best male and female writers in the United States' Such writers as Justin Jones, (Harry Hazel) Augustine J. H. Duganne, William Earle Binder Harry Hazleton, James Reynolds, Francis S. Smith.

Mrs. Mary J. Holmes, Helen Forest Graves, Mary C. Vaughan, Margaret Verne, Anna Raymond, Ella Melville. Write for it regularly, while a score of other well known writers occasionally contribute to its columns.

THE NEW YORK WEEKLY has now engaged a force of talent that cannot be rivaled by any establishment in the world!

NOTICES OF THE PRESS.

Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters, our editorial brethren, have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.

GENERAL CHARACTER OF THE NEW YORK WEEKLY.

The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means We shall never publish a word or line, the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's Intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.

Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."

Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.

Our Mirthful Morsels, our Items of Interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or in the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taken tens, they are now taking hundreds of copies. This is the general effect among the five thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly."

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops, you do not lose advance subscriptions, sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.

OUR TERMS:

The price of the NEW YORK WEEKLY is FOUR CENTS but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $12. Postmaster and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty-five cents extra with every subscription, to pre pay the American postage.

All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to

STREET & SMITH,
EDITORS AND PROPRIETORS,
22 BEEKMAN STREET, NEW YORK.

BY TELEGRAPH.

By Telegraph—1 o'clock Monday Morning.

Further by the Hungarian.

FARTHER POINT.

The steamship Hungarian passed this Point at 7:30 this morning, with Liverpool advices of the 10th inst. She was boarded by the news yacht of the New York Associated Press and her news brought ashore. She left Liverpool at 9 A. M. of the 10th instant.

GREAT BRITAIN.

On the 8th, the affairs of Italy were debated in both Houses of Parliament.

In the House of Lords the Marquis of Normandy inquired if there was any objection to produce the papers relative to the project of peace, transmitted to Austria before the treaty of Villa Franca. He denounced the conduct of the government as one sided, and as evincing no desire to maintain neutrality.

Lord Wodehouse, in reply, reiterated the statement that England sent terms of peace to Austria at the request of France, but without giving any advices or expressing an opinion on the subject. He said it would be most inconvenient to produce the documents in the present state of negotiations.

Earl of Granville—The act of Lord John Russell as the united act of the Cabinet.

In the House of Commons, Lord Elcho moved an address to the Queen, declaring that it would be inconsistent with the honor and dignity of England, after having preserved a strict neutrality, to take part in any conference to settling the details of the peace, the preliminaries of which having already been arranged between the Emperors of France and Austria. He praised the neutral course of the late government, and censured the Anti-Austrian feeling evinced by the present Cabinet.

Mr. Kinglare moved the previous question, feeling it would be unwise to blind the government to any line of policy, regardless of changes which might take place almost at any hour.

Mr. Gladstone said that Lord Elcho's motion was not relevant to the present position of affairs. The government had no intention of taking part in settleing the details of the peace on the basis of the Villa Franca treaty. The belligerents themselves would settle those details, and what would remain to be settled would be the great question of European policy, in which he thought England should play her traditional part. He defended the government, and called for a decisive vote against the resolution.

Mr. S. Fitzgerald said the object of the resolution was to restrain the government from carrying out it personal sympathies, which were inconsistent with the treaty obligations of the county. Parliament ought not to sanction it; the government joining in the Congress without being informed of what the great powers had agreed upon in regard to the subject.

Mr. Sidney Herbert argued that the new treaty expired with the war, and that he saw no reason why England could not consistently join in the Congress.

Messrs. Horseman and Whiteside spoke in favor of the resolution, and denounced the foreign policy of the government.

Lord John Russell again proclaimed that the government had not the slightest intention to go into a European Congress to settle the details of the peace of Villa Franca. Nobody ever invited them to do so.

He admitted that there were difficulties in the way of the government entering in the Congress, and matters were in that state that no determination had been come to. He appealed to the House to leave the question in the hands of the Ministers, who would decide when the whole facts of the case were before them.

Mr. D'Israeli warned the government of the dangers to be incurred by entering the Congress, but stated his objection to the House coming to a decision after a hasty deliberation, and hope Lord Elcho would not press his motion to a division.

After some remarks from Lord Palmerston, in defense of his course and in denunciation of the resolution.

Lord Elcho said that he was satisfied with the admissions made by the government and the result of the debate, and would, therefore, not press his motion.

In the House of Lords on the 9th, the subject of National defence was referred to.

The Earl of Ripon thought it would be most injudicious to resort to compulsory powers, and pledge every effort of the government to make the defences secure.

In the House of Commons the East India Loan bill was passed.

The completion of the steamship Great Eastern was formerly celebrated on the 8th, by a banquet given on board, which was attended by many members of both Houses of Parliament, and a number of most distinguished engineers and scientific men. The engineers, both screw and paddle, were [illegible] the first time, and the r[illegible]y in the very highest d[illegible]ond expectations.

DR. M'LANE'S

CELEBRATED

VERMIFUGE

AND

LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,
PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and *take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa.* To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. DR. COGGSWELL'S NEW MEDICAL SALT.
For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (as no other,) by producing an equilibrium, of the fluids in the body, the want of which is the sole cause of inflamation!

NOTICE TO INVALIDS!! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

Ask your neighbors about the *New Medical Salt*. If sick, try; if not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S NEW MEDICAL Salt is for sale in Batavia by H. W. Fellows and by all enterprising druggists wherever the Herald is [illegible]. A CONVENIENT HOUSE FOR A SMALL FAMILY.

Enquire at this Office or of

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases: consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S
Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "*impurity of the blood*," is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a Disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice*, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all stages of *pulmonary disease* by Dr. Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success*. Let no Consumptive delay a moment to try it. *Its rather has hope!*

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible*, into universal use, as I know that they will prove not only

As Sure a Remedy in Consumption
as Quinine is in Intermittent Fever, but also
as Effectual a Preservative
as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to procure everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage*, treated at my Dispensary, during the past year, *eight have completely recovered*, eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

☞ This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *facsimile* signature.

☞ No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

☞ Price, $2.00, or three bottles for $5.00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 49 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postages. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

(*Corner, Up Stairs, Buffalo, N. Y.*)

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eyesight, loss of memory, dizziness of the head, neuralgic pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea or Fluor Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now in ninety-nine cases out of every one hundred cases all the above named disorders and a host of others not named, have their seat primarily in the ... of ..., and arise from one ... clement and ... Inflammation—a state of morbid irritability, hence the want of success on the part of old school Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $5 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

N. B. A word of explanation to those who have known us under the style of Evans and Co. The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade. In order to prevent the public who may be unacquainted with us, we would state that we have no connection with any other Gift—Book House—and though many advertise under the name of Evans & Co., the first established by D. W. EVANS and J. H. PRESTON, is the first and only concern rightfully using the name. But to prevent all confusion in the future we shall use the style of D. W. EVANS & CO., and all persons wrongfully using the appellation to mislead the public, will be made to suffer the penalty of the law.

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

Horse Taming.

Professor Rarey the great American Horse tamer, is advertised to be in Batavia on the 29th instant; and Dr. Seaton, who accompanies him will give a free lecture on the mental Philosophy of the Horse at Ellicott Hall.

This subject of Horse Taming has been before the public for some time, and has already come to be considered something more than a slight of hand trick, or mere act of individual expertness.

We know little of Prof. Rarey's philosophy on the subject, but we are inclined from what little we have seen, to think that he has struck a great principle, universal in its application, and brings the horse under its subduing influence, by knowing how to communicate with that animal.

The law of kindness is applicable to every species of the brute creation—not one of all the races of animated nature but what may be subdued by mere kindness when the power, or faculty of communicating kind intentions exists. It is equivolent in the lower animal to, what we call, love in man, the higher attribute in human nature that comes off conqueror always when exhibited in mercy and charity. This is the ruling principle of the world, and to Mr. Rarey is due much credit for having discovered the method by which the horse is made acquainted with the kind intentions of his master, and at once yields submissively. The intelligence of the horse is reached by a natural language, by which the animal world communicate with one another. Who has not seen the Ox turn to his mate and with a pleasant look call him to lick a part of his head or neck that he could not reach himself; thus by natural language relief is sought and obtained for an itching.

We by no means claim that this is Mr. Rarey's philosophy, but such as is suggested by general principles, which is perfectly understood and acted upon all the beasts of the field would in time come under the subjection of man, and be obedient to his will. The great secret we apprehend consists in being kindly disposed towards the horse, and then in being able to make the animal understand and feel that you are so.

From the extensive and complimentary notices of the Press from every place Mr. Rarey has visited, we are confident that his coming here will afford the lovers of that noblest animal, the horse, a rare opportunity for pleasure and profit.

One of the Humbugs.—We published yesterday a horrible story about a woman with a pig's head which appeared originally in the *Boston Courier*, a paper that has shown wonderful acumen in the detection of humbugs and impositions of all kinds. The *Courier's* fame in this regard, has sent the pig-woman story all over the country as a reality, whereas there is not a word of truth in the matter. No such being was ever seen in the cars at Quebec, nor was there ever such a being living in Albany. Think for instance how consistent—a boars head with tushes, ears bristles &c., upon the body of a woman! with intelligence sufficient to do with great nicety, mechanical work.

The Boston *Courier* may be a very smart paper, and very expert in detecting humbugs, but it must be decidedly pigheaded to ever have such a story imposed upon it.

Stretching Whisky.—The Crawfordsville (Ind.) Journal reports a case of poisoning by whisky that ought to be as effective as a dozen temperance lectures.—It says that a young man named Lewis, of that county, drank whisky on the 30th of July which burnt his throat and stomach and made him vomit—not unusual occurrences with more liquors than whisky—The next day he drank again, and in the afternoon, an hour or so after swallowing the last glass, he was seized with convulsions which lasted six hours, and contorted his body and limbs terribly. His toes were drawn in upon the soles of his feet, his fingers in on his palms, and his head and feet back towards each other till they met and bent his body into a circle.—His jaws were locked fast and could not be opened at all, but he retained his consciousness. *For ten days*, at intervals of one to five hours, these spasms have returned, but happily with entire unconsciousness in the patient since the first ones.

Bad News for Chilly People.—According to the views of a distinguished astronomer, the earth is gradually increasing its distance from the sun, and in the course of *six thousand* years, the distance will be so great that only an eighth of the warmth we now enjoy will be communicated to the earth from the sun; the earth, therefore, will be covered with eternal ice and snow, as we now see the plains of the north where the elephant formerly lived, and where there is neither Spring or Autumn. In this case, we recommend rheumatic and gouty people to lay in a stock of flannels and see to their drawers. Six thousand years will pass away very soon, and there is no telling how expensive flannel and *sich* will be at the time mentioned.

An English writer has recently asserted that an undue proportion of lime in the system is the cause of premature gray hair, and advises to avoid hard water, either for drinking pure, or when converted into tea, coffee, or soup, because hard water is always strongly impregnated with lime.—Hard water may be softened by boiling it; let it become cold, and then use it as a beverage. It is also stated that a liquid that will color the human hair black, and not stain the skin, may be made by taking one part of bay rum, three parts of olive oil, and one part of good brandy, by measure. The hair must be washed with this mixture every morning, and in a short time the use of it will make the hair a beautiful black, without injuring it in the least. The articles must be of the best quality, mixed in a bottle, and always shaken well before being applied.

To-morrow Blondin is advertised for another exhibition of great feats upon the rope at the Falls. This time he will cross in chains, bound hand and foot, and return with a stove and cooking utensils, with which the will prepare a repast, when in the middle of the rope, for the passengers on the "Maid of the Mist," lowering the eatables down to her deck.

Strange Accident.—As last Tuesday's day express on the Erie Road was coming from Batavia, it ran into a flock of sheep belonging to Byram Moulton, Esq., some 8 miles north of this villiage. We have not learned how extensive the slaughter was; but there was *some scattering* among the flock. The old Buck, we understand, made a well aimed *butt* for a pair of horns which adorned the head of the engine, and locking his horns, and resting his hind feet upon the pilot, he safely rode into Attica, where he was set down unharmed.—This marvelous adventure gives rise to some *sheepish jokes*:

"Lucrative accident," exclaimed our Partingtonian friend Ira, as the *ludicrous* position of the buck forcibly struck him!

"Wool up, and mutton advancing," says the market man!

"Blondin and DeLave both outdone" exclaims the admirer of aerobatic performances,—"leaping safely upon the locomotive of an express train under full headway and making a triumphant ride there, beats crossing rivers on ropes and backing over passengers!"

"Old Buck always triumphant!" shouts an administration man—"Cant be beat even by a locomotive!"

"Flora Temple distanced!" exclaims the admirer of fast horses. "Yes, and by an old sheep, too!" adds one who thinks less of the turf than he does of the fine wool.

"In, a full length ahead of the iron horse on an 8 mile heat—fastest time on record!" says the man who attends the races.

"Yes, and backing all that distance faster than your horse can run forward!" retorts the man whose horse got distanced at the last race.

"A hint to Patchin to *Buck up* now!" puts in an employee whose wages was a little behind.

"Caught in the act stealing mutton, that locomotive looks sheepish!" says the policeman.

"Free freight on the Erie Road!" says one—"And expedicious loading," adds another.—*Attica Atlas.*

Man Superior to Circumstances.

We contend that every man is independent of existing circumstances, for the reason that he can *create* circumstances at will. Were it otherwise, he would be a very insignificant and helpless being; instead of being the "lord of creation," he would be the slave of all creation. There is no single circumstance, or combination of circumstances but may be changed for the better or worse by one of the humblest and weakest of men.

There is no power in the Universe equal to intelligence; there is no manifestation or expression of intelligence but produces a change—whether perceptable or not—in the general state of being. Intelligence creates, combines and in every way determines the nature of circumstances.

If a man dislikes the circumstances in which he is placed, he has but to exert himself, and they will be superseded by others; but whether those which supercede are better or more conducive to his happiness than the ones superseded, depends upon the amount of wisdom he may exercise in his movements.

The person who submits to what are called unfavorable circumstances is a poor, weak, miserable specimen of humanity; he is not out of babyhood, and should be subjected to the care and guidance of those who have attained to manhood. An intelligent man can make every circumstance around him subserve his purposes, and if his purposes are high, the better it will be for him.

Frequently when a man fails to accomplish what he undertakes, he assigns as a reason "unfavorable circumstances," when the truth would be that he lacked wisdom or force of character. Let it be understood that the term circumstance does not imply a positive condition or power, but rather a relation. All those people who have attained an elevated position in life have ever been superior to, and controlled circumstances. They have never submitted to difficulties, but conquered them. More of such men we need; and that more of life and strength may be exhibited by the many miserable murdering mortals now in the world, is our constant prayer.—*Buffalo Republic.*

From California.

New Orleans, Aug 22.

The steamship Havana is below, with San Francisco dates of the 5th.

The Steamers John L. Stephens and Orizaba had over a million in specie and 1,000 passengers from New York.

Business at San Francisco was dull and prices tending downward.

Horace Greeley was made a lion of everywhere.

He estimates that 30,000 emigrants are on their way to California by the overland route.

The mining news was favorable. Receipts of dust light.

Official returns of the election elect Judge Crane to Congress.

At Carson Valley they were forming a provisional government, it being the intention of the people to throw off all allegiance to the Mormon rule. They design electing a Governor, Judges and all other necessary officers.

A party of Californians enroute for St. Louis, were attacked near the South Pass, on the 15th of June, by the Crow Indians. Geo. Stevenson of Pittsburgh, David Moore of Lancaster, Pa., and C. M. Hall of Cincinnati, were killed. Henry Florence of Carlisle, Pa., was made prisoner.

The advices from Oregon say that Stout, Democrat, is elected to Congress by 41 majority.

Lieut. Mullen was progressing finely with the new road from Walla-Walla to Salt Lake.

A large party of Frazer river miners had arrived at the new diggins at North Colville, Oregon. They reported that they were making from $8 to $10 per day.

The accounts from Frazer river mines were more favorable. New discoveries of gold had been made north of Fort Alexander. Rich quartz had been received at Victoria, from Queen Charlotte's Island.

The dates from Minititlan are to the 17th inst. The mails and passengers were robbed by the Patricions. The mail bags were cut open 6 miles from Tehuantepec.

Miramon had dissolved his Cabinet.—Marquizza has revolted against Miramon but the Liberals were besieging him in Guadalajara.

The Archbishop of Mexico has excommunicated the Liberal party. Gen. Wall had been defeated in Tamaulipas, losing al his artillery. Gen. Degollado had assumed command of the Liberal army.—He promises to take the capital by October, but wants $3,000,000 and 40,000 men to do it. The decree against the church property was being executed. The bonds of the matured debt had risen ten per cent.

Horace Greeley's two Hours with Brigham Young.

H. G.—Am I to infer that Utah, if admitted as a member of the Federal Union, will be a Slave State?

B. Y.—No; she will be a Free State. Slavery here would prove useless and unprofitable. I regard it generally as a curse to the masters. I myself hire many laborers and pay them fair wages; I could not afford to own them. I can do better than subject myself to an obligation to feed and clothe their families, to provide and care for them in sickness and health. Utah is not adapted to Slave Labor.

H. G.—Let me now be enlightened with regard more especially to your Church polity; I understand that you require each member to pay over one-tenth of all he produces or earns to the Church.

B. Y.—That is a requirement of our faith. There is no compulsion as to the payment. Each member acts in the premises according to his pleasure, under the dictates of his own conscience.

H. G.—What is done with the proceeds of this tithing?

B. Y.—Part of it is devoted to building temples and other places of worship; part to helping the poor and needy converts on their way to this country; and the largest portion to the support of the poor among the Saints.

H. G.—Is none of it paid to Bishops and other dignitaries of the Church?

B. Y.—Not one penny. No Bishop, no Elder, no Deacon, or other church officer, receives any compensation for his official services. A Bishop is often required to put his hand in his own pocket and provide therefrom for the poor of his charge, but he never receives anything for his services.

H. G.—How, then, do your ministers live?

B. Y.—By the labor of their own hands like the first Apostles. Every Bishop, every Elder may be daily seen at work in the field or the shop, like his neighbors; every minister of the Church has his proper calling by which he earns the bread of his family; he who cannot or will not do the Church's work for nothing is not wanted in her service; even our lawyers (pointing to Gen. Ferguson and another present, who are the regular lawyers of the Church) are paid nothing for their services; I am the only person in the Church who has not a regular calling apart from the Church's service, and I never received one farthing from her treasury; if I obtain anything from the tithing-house, I am charged with and pay for it, just as any one else would; the clerks in the tithing-store are paid like other clerks, but no one is ever paid for any service pertaining to the ministry.—We think a man who cannot make his living aside from the Ministry of Christ, unsuited to that office. I am called rich, and consider myself worth $250,000, but no dollar of it was ever paid me by the Church or for any service as minister of the Everlasting Gospel. I lost nearly all I had when we were broken up in Missouri and driven from that State; I was nearly stripped again when Joseph Smith was murdered and we were driven from Illinois; but nothing was ever made up to me by the Church, nor by any one. I believe I know how to acquire property and how to take care of it.

H. G.—Can you give me any rational explanation of the aversions and hatred with which your people are generally regarded by those among whom they have lived and with whom they have been brought directly in contact?

B. Y.—No other explanation than is afforded by the crucifixion of Christ and the kindred treatment of God's ministers, prophets and saints in all ages.

H. G.—I know that a new sect is always decried and traduced—that it is hardly ever deemed respectable to belong to one—that the Baptists, Quakers, Methodists, Universalists, &c., have each in their turn been regarded in the infancy of their sect as the offscouring of the earth; yet I cannot remember that either of them were ever generally represented and regarded by the older sects of their early days as thieves, robbers, murderers.

B. Y.—If you will consult the cotemporary Jewish accounts of the life and acts of Jesus Christ, you will find that he and his deciples were accused of every abominable deed and purpose—robbery and murder included. Such a work is still extant, and may be found by those who seek it.

H. G.—What do you say of the so called Danites, or Destroying Angels, belonging to your Church?

B. Y.—What do *you* say? I know of no such band, no such persons or organization. I hear of them only in the slanders of our enemies.

H. G.—With regard, then, to the grave question on which your doctrines and practices are avowedly at war with those of the Christian world—that of a plurality of wives—is the system of your Church acceptable to the majority of its women?

B. Y.—They could not be more averse to it than I was when it was first revealed to us as the Divine will. I think they generally accept it, as I do, as the will of God.

H. G.—How general is polygamy among you.

B. Y.—I could not say. Some of those present (heads of the Church) have each but one wife; others have more; each determines what is his individual duty.

H. G.—What is the largest number of wives belonging to any one man?

B. Y.—I have fifteen; I know of no one who has more; but some of those sealed to me are old ladies whom I regard rather as mothers than wives, but whom I have taken home to cherish and support.

H. G.—Does not the Apostle Paul say that a bishop should be "the husband of one wife?"

B. Y.—So we hold. We do not regard any but a married man as fitted for the office of bishop. But the Apostle does not forbid the bishop having more wives than one.

H. G.—Does not Christ say that he who puts away his wife, or marries one whom another has put away, commits adultery?

B. Y.—Yes; and I hold that no man should ever put away a wife except for adultery—not always even for that.—Such is my individual view of the matter. I do not say that wives have never been put away in our Church, but that I do not approve of the practice.

H. G.—How do you regard what is commonly termed the Christian Sabbath?

B. Y.—As a divinely appointed day of rest. We enjoin all to rest from secular labor on that day. We would have no man enslaved to the Sabbath, but we enjoin all to respect and enjoy it.

Malicious Mischief.—We are informed that Mons. Blondin, on examining the guys of his cable stretched across Niagara River, on Monday morning, found that nineteen of them had been severed by some malicious wretch who sought thus to do him an injury, and prevent his ascension, as advertised. Whatever motive actuated the person who committed this act it was a base and wicked one. Blondin will have the guys properly repaired, and will walk the rope on Wednesday.—*Rock Democrat.*

Along the line of the La Crosse road, a few miles above Horicon, says the Milwaukee News, is a sign board, on which is painted in large letters, so plain that "he who runs may read:" "*As both of us are so d——d poor, don't run over my cattle.*

THE GREAT AMERICAN

Boot & Shoe Store

No. 2, Odd Fellow's Hall.

GREAT DISCOVERY!

NEW MODE OF ADVERTISING.

The Proprietor of the Great American Shoe Store, No. 2 Odd Fellows Hall, south side Main street, nearly opposite the Post Office, claims to be the inventor of the cheapest and best mode of advertising in the world. He claims to be the manufacturer of

BOOTS AND SHOES

that will advertise themselves, by giving ample satisfaction to the wearer, thereby speaking in language not to be misunderstood by him, which he immediately interprits to his neighbors. After having tested the merits of his invention for the last twenty years, he feels confident of its

ENTIRE SUCCESS.

and would recommend it to all the other Boot and Shoe makers and dealers in this vicinity to be adopted by them. And he would especially call the attention of the citizens of Genesee county and advise them to study well its operations.

He has on hand a good assortment of Stock, such as

Oak and Hemlock Sole Leather,

French calf skins, kip and morocco, &c., which he holds will stand investigation from the best of judges; and *MECHANICS* to manufacture it who are second to none in the State.

Also the largest stock of Ready Made Boots and Shoes in the county; both *Eastern and Home Made, at prices that defy Competition.*

Thankful for the very liberal patronage you have been pleased to extend, I would respectfully solicit a continuance of the same.

THE

NEW YORK WEEKLY,

A HANDSOME QUARTO PUBLICATION,

BEAUTIFULLY ILLUSTRATED,

IS NOW UNIVERSALLY ACKNOWLEDGED TO BE

THE BEST STORY PAPER IN THE WORLD!

Among its Regular Contributors will be found the names of some of the best male and female writers in the United States! Such writers as Justin Jones, (Harry Hazel) Augustine J. H. Duganne, William Earle Binder, Harry Hazleton, James Reynolds, Francis S. Smith.

Mrs. Mary J. Holmes, Helen Forest Graves, Mary C. Vaughan, Margaret Verne, Anna Raymond, Eda Mayville. Write for it regularly, while a score of other well-known writers occasionally contribute to its columns.

THE NEW YORK WEEKLY has now engaged a force of talent that cannot be rivaled by any establishment in the world!

NOTICES OF THE PRESS.

Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters, our editorial brethren have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.

GENERAL CHARACTER OF THE NEW YORK WEEKLY.

The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means. We shall never publish a word or line, the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's Intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.

Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."

Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.

Our Mirthful Morsels, our Items of Interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or in the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taken tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly."

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops, you do not lose advance subscriptions, sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.

OUR TERMS:

The price of the NEW YORK WEEKLY is FOUR CENTS, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2.00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $12. Postmaster and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty-five cents extra with every subscription, to pre-pay the American postage.

All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to,

STREET & SMITH,
EDITORS AND PROPRIETORS,
22 BEEKMAN STREET, NEW YORK.

Further Foreign News.

ENGLAND.—The Daily News gives the provisions of Mr. Sidney Herbert's new bill providing for a military reserve force. It authorizes the enrolment and maintenance of a reserve force of 20,000 men, consisting of soldiers who have previously served. This force is to be called out 12 days each year, and permanently in case of invasion.

The Paris correspondent of the London Post telegraphs the result of the Tuscan Elections. They took place with great order and gave a majority of men of modern liberalism, but quite opposed to the restoration of the old dynasty.

FRANCE.—The London Times correspondent says the report was still current that measures would shortly be officially announced confirmatory of the hopes entertained of the maintenance of peace, and calculated at the same time to give a great impetus to commercial affairs.

One of them, it is said, will be the reduction of the present excessive duties on articles of necessity. The completion of the railroads to be accelerated and industrial works in general are to be encouraged.

The Moniteur publishes a long official report by Vice-Admiral Romain Desfosses, regarding the operation in the Adriatic. He shows that the fleet consists of 45 vessels of all classes anchored before Venice, in sight of the domes of St. Marc and were prepared to open fire when peace was proclaimed.

The Paris Constitutional ascribes the proposed fortification of Antwerp to the influence of England, who foreseeing war with France, wishes to provide himself with an entrenched camp in Belgium.

GERMANY.—The relations between Austria and Prussia almost assume the dimensions of a regular rupture, and were regarded as dangerous to the smaller German states, which were already looking towards France for protection.

The King of Bavaria apologized for the passing of troops through his territory.

ITALY—Early on Monday morning, the 7th the King of Sardinia entered Milan, accompanied by his ministers and members of Parliament and the municipal bodies of Turin and Genoa. His Majesty passed through the Corso on horseback amid enthusiastic acclamation.

A Te Deum was performed, at which the King was present. He afterward received the authorities of the city. In the evening a general illumination took place. The aspect of Milan during the fete was very imposing.

The Sardinian Government has recalled the Sardinian Commissioners at Parma and Piacenza.

The Opinione of Turin says that 40,000 French troops will remain in Italy provisionally in consequence of the dangerous state of some provinces.

DR. M'LANE'S

CELEBRATED

VERMIFUGE

AND

LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,
PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and *take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa.* To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium, of the fluids in the body, the want of which is the sole cause of inflammation!

NOTICE TO INVALIDS! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erycipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

Ask your neighbors about the *New Medical Salt*. If sick, try; if not sick, remember the *New Medical Salt*.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER, and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "*impurity of the blood*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice,* and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all *stages of pulmonary disease* by Dr. Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value of this Discovery.*—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible,* into universal use, as I know that they will prove not only

As Sure a Remedy in Consumption as Quinine is in Intermittent Fever, but also as Effectual a Preservative as Vaccination in Small Pox.

"*In no instance* have I found the remedy *fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage,* treated at my Dispensary, during the past year, *eight have completely recovered,* eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

☞ This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile* signature.

☞ No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

☞ Price, $2,00, or three bottles for $5,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 49 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postages. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

DR. JOHNSON'S HERB DISPENSARY!

OFFICE 95 MAIN STREET,
(2d door, Up Stairs, Buffalo, N. Y.)

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eyesight, loss of memory, dizziness of the head, neuralgic pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea, or Fleur Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflammation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicines sent them by mail or express.

Young Men suffering from these dreadful ills, will receive for $5 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

N. B. *A word of explanation* to those who have known us under the style of Evans and Co. The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world-wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to prevent the gent who may be complaining that with us, we would state that we have no connection with any other Gift Book House—and though many advertise under the name of Evans & Co., the firm established by D. W. EVANS and J. H. PRESTON, is the first and only one now rightfully using the name. But to prevent all confusion in the future we shall use the style of D. W. EVANS & CO., and all persons wrongfully using the appellation to mislead the public, will be made to suffer the penalty of the law.

A Battle Fought—One Hundred Indians and Five Whites Reported Killed.

Special Dispatch to the Missouri Democrat.

KANSAS CITY, Aug. 16th.

The Western Metropolitan Extra has the following:

This (Friday) morning, Mr. Charles S. Hasler, a merchant at Emporia arrived in this city bringing news of an alarming nature concerning recent attacks by the Indians upon the settlements of Whitewater and Walnut rivers, in Butler and Greenwood counties, Kansas Territory.

The number of Kaw, Osage and Camanche Indians in that vicinity is about 5,000; all warriors. They have lately removed from the Little Arkansas, where they have been collecting for some time back, for the purpose, it seems of driving back the settlers from the frontier. Some interpret their motive to be revenge for the hanging of the two Kaws at Council Grove, some time since; but this would hardly seem so, as the point of attack is some seventy miles distant. It may, however, be a plan to decoy the men away so that the point mentioned will fall an easy prey. Certain it is that the people at the Grove have anticipated an attack for some time.

On Thursday morning 11th inst., a messenger reached Emporia from the Lower Whitewater, bringing information that an engagement had taken place between the Indians and Whites, near the town of Eldorado, in which one hundred of the former and five of the latter were killed.

The same day another messenger arrived from Chelsea, fifteen miles above, bringing a note from Mr. N. S. Stores, of that place, stating that the town was surrounded by Indians, and they were momentarily expecting an attack. He appealed for assistance, in order to get his family away. That evening a company of fifty left Emporia, expecting to reach there next morning, a distance of fifty miles.

A man came from Emporia as our informant left, Friday evening, who stated that he met the company nearly at their destination, and that no attack has yet been made upon that place.

Progress of Crime.

We boast often that we live in a land of law and liberty, and yet acts of disorder and outrage are continually perpetrated. The national character is thus greatly damaged, while life and property are rendered uncertain. The most deplorable part of the matter is, that in too many cases the offenders are permitted to escape. Some policy we think should be adopted to repress this growing disregard of the value of human life and other personal rights. We do not intend to use the word policy in its vulgar sense. There is but one policy of christian virtues—the carrying into practice of the code of human brotherhood, uttered on the shores of Galilee—the forgiveness of injuries—respect for constituted authority, and a surrender of individual passions to the restraint of law. The fault of the present state of things is evidently in society itself. Its representatives in the jury-box and officers of the law are not always true to principle. Corruption has in a measure undermined all government, and from the constable to the Court reform is in many cases demanded, before we can be expected to rid the world of the scenes of blood so recklessly enacted again and again, to startle society from its lethargic indifference.—There is one certainty however, and that it, as we sow, so also shall we reap. If our principles vindicate murders the crop will be an abundant one.

De Lave's Second Performance.

M. DeLave crossed the chasm of the Genesee below the Falls for the second time yesterday. The Rochester Democrat says, that after proceeding to the centre of the cable, he hung himself to the cable by his feet, his head and hands hanging downwards; then by one foot; then by one foot and a hand, and finally let himself down, holding to the cable by his hands alone. After raising again to his feet he proceeded to the west side, and was loudly cheered as he reached the end of his perilous walk. As soon as landed he mounted a horse and rode down upon the Flats to gather dimes from the thousands there assembled, and who must have enjoyed a fine view of the whole feat.

At half-past four DeLave started on his return. On reaching the centre he again halted, lay down upon the rope, first face downwards and then upwards, turned two or three summersaults and lastly stood upon his head! This seemed to be the most perilous of all his performances, and the thousands were for a few moments breathless until he regained his footing.

American State Council.—At a meeting of the American State Council, at Geneva, yesterday, the following officers were elected:

President—G. A. Scroggs, Erie.
Vice President—Amos H. Prescott, Herkimer.
Secretary—James W. Husted, Westchester.

Disgraceful.—On Wednesday of last week a Justice of the Peace, in Lockport married a drunken man to a woman of notorious ill-fame.

Died.—R. S. Wilkerson, cashier of the Exchange Bank, Lockport, died at Providence, N. J. on Thursday evening last. He had gone east on a trip of pleasure, hoping to recover his health which was not good when he left.

Womans Sphere, of which we hear so much, seems to be about twenty-five feet round, made of hoops covered with silk.—In the street it looks like a hemisphere with a handle on top to take hold of.

The Milwaukee Sentinal announces that one of its articles was indited and "set up" by the Hon. Richard Busteed, Corporation council of the city of New York.

Passage of a Steamer from St. Louis to Fort Benton.

One of the most remarkable feats of steamboat navigation ever performed, has just been completed by the steamer Chippewa, which, loading at St. Louis with Indian supplies, made a consecutive trip from that city to Fort Benton, a distance of 4,000 miles. The enterprise was set on foot by Charles P. Choteau, who finally, during the trip purchased the boat of her owners, having from the start insured her. She was at Fort Union when purchased, and at that point Capt. Crapster, who started with her, relinquished, and Capt. John B. LaBarge assumed command. A very interesting account of the voyage in the St. Louis Democrat states that on the 3d of July she left Fort Union with 130 tons of freight, 10 or 12 passengers, and a crew of 40 or 50 men. Every arrangement had been made which tended toward success, and the determination was expressed to put her through, even if it had been over dry bars. At only one point was the channel found so shallow as to be a serious impediment, and there the men hurried into it, dug it out with shovels, and the boat pushed on. The channel between the rocks on the rapids was found to be so narrow there was great danger, should the boat sheer off in the least, of her being dashed to pieces. To avoid this the anchor was placed ahead, and the boat pulled over by the capstan. On the 17th of July, the Chippewa reached Fort Benton, and the navigation of the Missouri river for near 4000 miles was proved not only to be feasible, but with able commanders, of easy accomplishment.

Heretofore the trip in Mackinaw boats occupied ninety days. The Chippewa accomplished it in fourteen days. On the 18th of July her head was turned homeward, and on Wednesday last she reached St. Louis, having been absent a period of eighty-four days.

Daring Feat.—Mr. W. T. Aymar, a favorite performer in the Louise Wells Equestrian Troupe, is about making arrangements to do some somersaults at Niagara, which will entirely eclipse M. Blondin's feat of tight rope walking. He proposes, if Mr. Porter will allow a scaffolding to be erected on Goat Island, to turn a somersault down into the water at the foot of the island, a depth of one hundred and seventy feet from the point where he springs! He chooses this place because it is the only one with sufficient depth of water, and clear of rocks, for him to alight in. The bare contemplation of such a feat, as a thing actually to be accomplished, stamps Mr. Aymar as one of the boldest public performers the world ever saw. If he takes the daring leap, and lives, he is indubitably the world's champion in his line.

The Most Curious Book in the World—is one that was produced in France about three hundred years ago.—It is entitled "Liber Passionis Domini nostril Jesu Christi," and is *neither written nor printed*. The letters are cut out of the finest vellum, and being interleaved with blue paper, may be read as easily as the best of print. The material is of the most delicate and costly kind, the workmanship exquisitely exact, and the labor necessary to complete the work must have been immense. In 1640 Rodolphus 11. of Germany, offered for it 11,000 ducats, nearly equal to 60,000 ducats (or dollars) at this day.

It is reported by late European journals that much excitement exists at Vienna, on account of the quarrels and troubles aroused by the late misfortunes in Italy. The commission of Gen. Urban, the slayer of peasants, and beaten by Garibaldi, has been revoked for his refusal to publish the armistice. Gen. Benedek has been dismissed the service for improper language used in reference to the Imperial order of retreat given at Solferino. Generals Clam Gallas, Nostis and Deliengen are to be tried by court-martial.

The Rev. George Gilfillan lately preached a sermon on revivals in general, and the great Irish revival in particular. "The excesses of excitement; the cries, shrieks, groans uttered, people carried out of the church in fits; some driven mad, and others hurried into extravagance of fierce and savage fanaticism—all tended to convince him that, let Dr. Cook of Belfast say what he pleased, it was hitherto as authentic a work of the devil as was ever on this planet."

A few years ago a powerful revival of religion was witnessed at Oldtown, Maine,—Among the converts was an Indian of the Penobscot tribe. Soon after his conversion Peol attended a prayer meeting, and was called upon to 'tell his experience. Not exactly understanding the construction of the king's English, Peol expressed himself as follows: 'O glory, me feel pious like hell!"

There has been much sickness lately in Paris. Cases of ordinary cholera are very frequent, and some are said to assume a more formidable aspect. In London Asiatic cholera is rumored to prevail, and at Hamburgh the disease is said to have broken out in an alarming manner.

Miscellany.

Fears are expressed that the King of Prussia will soon become blind.

New wheat is selling in Muscatine, Iowa at 60 cents per bushel.

The once powerful tribe of Pequot Indians now number only thirty one persons.

Delave, the rope walker, intends to have his sister cross the rope at Rochester, in the course of the season.

Husband, I must have some change today. "Well, stay at home and take care of the children; that will be change enough any how."

Within three weeks, *eleven dollars* have been put into the Washington Monument box at the New York post-office. Slow, very.

Blondin realized $1,500 from his last exhibition at Niagara. He has probably made $5,000 this season.

In England, our common mullen plant is cultivated in pots, and called the 'American Velvet Plant."

A lady out West is charged with "putting on airs," because she refused to go to a ball barefoot. So the Boston Post says.

Mr. Dennison, a lawyer of La Crosse, was murdered last week, by three men and three women who had a grudge against him. They were arrested.

The Ohio canals were offered at public sale without a bidder. The offers were coupled with the terms which no man or company would accept.

The list of land in Erie county to be sold for non-payment of taxes, fills nearly twelve columns of the Buffalo Courier, in small type. Phat!

A young lady was reproved in company for wearing her dress so low in the neck, by an old one. She replied it was economy; a gentleman replied he would like to see into such economy.

Three children were born at the recent Camp Meeting in the Vineyard. They were literally "children in the woods."

The Turin correspondent of the London Post states that sixty Hungarians who escaped from the Austrian army were taken and placed before a battery, fired upon with grape, and all but two killed.

Jumpertz, a convicted murderer in jail at Chicago, has a kitten which he calls Sophia Werner, after the woman whom he murdered.

The Hon. Edward Everett has been invited to attend the State Fair at Atalanta Ga., in October.

Apples in Oregon.—The Farmer speaks well of the present apple crop. It is so good that $5 a bushel is about as high as it is expected they will sell.

The Paris Constitutionel figures up the cost of the war at 1,300,000,000 francs, or 250,000,000, and then glorifies excessively because they have borrowed one hundred millions of dollars more than will be called for.

Mr. Morphy is in New York and very quiet. He plays no chess matches now, not believing in the American doctrine, that man was made to push along, and keep moving.

Misprints will present themselves in other columns than those of newspapers. The author of a temperance novel, who wrote—"drunkenness is folly," was horror-struck to read "drunkenness is jolly."

Fire in the Woods. Extensive fires are raging in the woods west of Rome.—Between Rome and Verona, the fire is becoming alarming, threatening to consume wood and valuable timber.

The Philadelphia Journal says that one Theodore McDonnell Price crossed the Susquehanna River last week at Espy on a tight-rope, although a smart breeze was blowing at the time. The distance traversed was 1,200 feet—time, 12 minutes.

The Cincinnati Enquirer says William Slatter made a run in billiards of two thousand and eight points on Wednesday night, and was obliged to stop through sheer fatigue, leaving the balls in a condition to continue the game indefinitely.

Tearing up a Railroad Track.—Two men named Tryon, at Grand Rapids, tore up three rails from the track of the Detroit and Milwaukee Railroad, because, as is alledged, the company refuse a settlement a claim for land. They were arrested and held to bail.

The Montreal *Witness* regards the summer frosts as a blessing. The opinion gains ground that the summer frosts which occasioned so much alarm, have been the means of saving the wheat crop. They kept back the midge until it was too late to do much harm.

Cultivated Women.—Sheridan said beautifully, "Women govern us; let us render them perfect. The more they are enlightened, so much the more shall we be. On the cultivation of the mind of women depends the wisdom of men. It [illegible] that Nature writes on the [illegible]

THE

NEW YORK WEEKLY,

A HANDSOME QUARTO PUBLICATION,

BEAUTIFULLY ILLUSTRATED,

IS NOW UNIVERSALLY ACKNOWLEDGED TO BE

THE BEST STORY PAPER IN THE WORLD!

Among its Regular Contributors will be found the names of some of the best male and female writers in the United States! Such writers as Justin Jones, (Harry Hazel,) Augustine J. H. Duganne, William Earle Binder, Harry Hazleton, James Reynolds, Francis S. Smith.

Mrs. Mary J. Holmes, Helen Forest Graves, Mary C. Vaughan, Margaret Verne, Anna Raymond, Ella Mayville. Write for it regularly, while a score of other well-known writers occasionally contribute to its columns.

THE NEW YORK WEEKLY has now engaged a force of talent that cannot be rivaled by any establishment in the world!

NOTICES OF THE PRESS.

Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters, our editorial brethren have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.

GENERAL CHARACTER OF THE NEW YORK WEEKLY.

The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means. We shall never publish a word or line, the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's Intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.

Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."

Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.

Our Mirthful Morsels, our Items of interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or in the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taken tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly."

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops, you do not lose advance subscriptions, sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.

OUR TERMS:

The price of the NEW YORK WEEKLY is FOUR CENTS, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $12. Postmaster and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty-five cents extra with every subscription, to pre-pay the American postage.

All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to.

BY TELEGRAPH.

Leavenworth, Aug 23.

The Express had arrived here with Denver City dates of the 16th inst., six passengers and $16,000 in gold dust.

A portion of the recently framed State Constitution had been published.

No allusion is made to the Slavery question.

In the bill of rights the right of suffrage is restricted to the whites.

The local papers are silent in respect to the provisions of the Constitution.

The richest discoveries have been made since the last arrival, between Cape Lajondre and the Cheyenne, although the opening of new leads was of daily occurrence.

A great rush had been made by the miners towards the Cheyenne Pass, where it was reported that $100 to $1,000 a day was being made by single hands.

The emigration continued light but steady.

Business at Denver City was brisk, and merchandize and provisions were selling cheap.

New York, Aug 23.

The American Telegraph Company have obtained permission from the Secretary of War, to open a marine telegraph station at Fort Lafayette, in the Narrows, and they will proceed immediately to lay a cable from that point to Fort Hamilton, where it will connect with the Brooklyn line, which line stretches to New York.—This line will give the Company unequalled facilities for reporting marine news night and day, as also connect with the line already constructed from Sandy Hook.

The Fifth Avenue Hotel, the largest establishment of the kind in the country, was opened to-day, under the proprietorship of Paran Stevens. The house was thronged all day by thousands of visitors, who testified their admiration of the thorough and systematic arrangements of the building in all its parts. The American Telegraph Company have an office in the basement of the Hotel, connecting it by wires with all parts of the country as with other prominent hotels in the city.—One of the most novel features of this house is the vertical railway for the conveyance of guests from the ground to the upper floor.

Boston, Aug 23.

A trot between Flora Temple and Princess, for a purse of $1,000—mile heats, best three in five—came off this P. M. at the South End of Trotting Park. Flora won in three straight heats Time—2:33, 2:23 and 2:34.

From 15,000 to 20,000 spectators were present.

DR. M'LANE'S CELEBRATED VERMIFUGE AND LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of Liver Complaints; all Bilious Derangements, Sick Head-Ache, &c. In cases of

Fever and Ague,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

Fleming Brothers,
Pittsburgh, Pa.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa. To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other) by producing an equilibrium of the fluids in the body, the want of which is the sole cause of inflammation!

NOTICE TO INVALIDS! ! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia, Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough, Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more, no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*.

Ask your neighbors about the *New Medical Salt*. If sick, try; if not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S NEW MEDICAL SALT is for sale in Batavia by H. W. Fellows and by all enterprising druggists wherever the Herald is [illegible]. It is not a Patent [illegible] the [illegible]tion of an eminent Physician, no one [illegible] to try the New Medical Salt. [illegible] and testimonials and directions see circular.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S
Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Eruptive and Skin Diseases, St. Anthony's Fire, Rose, or Erysipelas, Pimples, Pustules, Blotches, Blains and Boils, Tumors, Tetter, and Salt Rheum, Scald Head, Ringworm, Rheumatism, Syphilitic and Mercurial Diseases, Dropsy, Dyspepsia, Debility, and, indeed, all Complaints arising from Vitiated or Impure Blood. The popular belief in "*impurity of the blood,*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice*, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

CONSUMPTION CURED!
DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all stages of pulmonary disease by Dr. Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value of this Discovery.*—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible*, into universal use, as I know that they will prove not only

As Sure a Remedy in Consumption
as Quinine is in Intermittent Fever, but also
as Effectual a Preservative
as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage* treated at my Dispensary, during the past year, *eight have completely recovered*, eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

☞ This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile* signature.

☞ No other can be relied on as the pure Hypophosphites. Unless perfectly pure they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

☞ Price, $2.00, or three bottles for $5.00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts supplied to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 49 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postage. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

DR. JOHNSON'S
HERB DISPENSARY!

OFFICE 96 MAIN STREET,
(2d door, Up Stairs, Buffalo, N. Y.)
A NEW, SPEEDY, AND MOST SUCCESSFUL
MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of MALADIES prevail to a fearful extent in community, dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eyesight, loss of memory, dizziness of the head, neuralgic pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea or Fluor Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflammation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own homes without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for 25 cents a [illegible] of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

N. B. A word of explanation to those who have known us under the style of Evans and Co. The Business formerly located at No. 439 Broadway, New York city, is the oldest established house in the country, and is known world wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of the popularity so advertised under the same name to increase their trade, to protect the public who may be deceived, and while, as we would state that we have no connection with any other Gift Book House—and though many advertise under the name of Evans & Co., the firm is established by D. W. EVANS and J. H. PRESTON, is the first and only concern rightfully using the name. But to prevent all mistakes in the future we shall use the style of D. W. EVANS & CO. and all persons wrongfully using the name to mislead the public, will be made to suffer the penalty of the law.

ONLY SIX CENTS A WEEK.

Astonishing Result.—In Cleveland, last Monday afternoon, while a number of deck hands were engaged in placing a large quantity of linseed oil in the hole of the steamer *Iron City*, something gave way, and a hogshead fell fair and square on the head of a stalwart darkey who was at work in the hole. The height from which the hogshead fell was some six feet, and it ended about so that one of the heads struck him. A wild though smothered yell came up from that hole, and the other darkies, turning pale as fidelity to parents would permit, rushed down to gather up the mangled remains of their comrade. Imagine their consternation upon seeing the hogshead standing and the frightened and somewhat lacerated countenance of the negro protruding through the upper head! His adamantine cranium had driven through both heads of the hogshead without doing material injury, more than a few cuts and a very bad "scare." The hogshead had to be knocked to pieces in order to release him, and he emerged the greasiest nigger probably ever seen in America. While they were binding up his head he was heard to remark, "Gor a mighty, guess dis are darkey don't want any more ile on har!" He was at work in the afternoon, as well as ever apparently.

A NEW STYLE MACHINE,

It is no longer questioned that these Machines are the best in use for family sewing. They

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

We learn from the Rochester Democrat of this morning, that about 11 o'clock yesterday forenoon, while it was raining pretty hard, eight boys escaped from the House of Refuge and in great haste took themselves off in different directions. The rumor immediately spread up-town and the number was enlarged to twelve or thirteen, but we learn from Supt. Wood that the number was only eight. Mr. W., who had but just left the Refuge on business, immediately returned and enlisted a large force in pursuit of the fugitives and succeeded in arresting five of the runaways, while three were yet at large last evening.

A MINISTER DEPOSED.—The Troy Times says that R. F. Parshall, formerly pastor of the baptist churches of Fort Edward and Sandy Hill, was on Tuesday of last week tried by the church of Sandy Hill for sundry acts of misconduct, and found guilty. He was accordingly turned out of the church, and deprived of his license as a preacher. He had been suspected for over three years of improper conduct. Last spring, he was informed by some of his neighbors that his conduct was known, and that he had better leave the place, which he did, and went to Janesville, Wisconsin. As soon as the church discovered his wrong doings, they proceeded to call the truant to an account. The charges were sent to him, and he was requested to appear for trial, which he never did. The Times adds:

The details of the Elder's *amours* are too gross and indecent to appear in the columns of a public journal; but we cannot forbear to state that he attempted, among his other immoralities, the ruin of little, artless girls, between the ages of thirteen and fifteen years. He is married to an estimable lady, by whom he has five children.

WALKING THE WATER.—A person named Gardner notifies the people of Oswego that he will walk out a mile upon Lake Ontario, and on a subsequent day cross Onondaga Lake. This is a new amusement for the present day, and will no doubt call out thousands of people.—The same feat was advertised many years ago by the celebrated Jemima Walkinson, but we believe her biographer informs us that the lack of faith in those who assembled was her excuse for refusing to make the attempt.

BLONDIN AT NIAGARA.—This intrepid rope walker performed the feats promised "in the bills," in his rope-walking exploit, yesterday. He crossed upon the rope with chains upon his legs and arms, personating the "Liberian Slave," and returned with a cooking-stove, upon which he prepared omelettes for the passengers on board the little steamer. We understand that he was quite successful once more, and came off with flying colors.

BOY DROWNED AT MEDINA.—On Thursday last a little son of James Kent of Medina, aged eight years, while playing on an ice breaker, accidently fell into the canal and was drowned. He was seen to fall in by another lad, who was playing with him, but the latter was so frightened that he ran off home without giving the alarm. The body was recover- half an hour afterwards.

A correspondent in Cherokee county informs us that a citizen buried his wife on Saturday, and at the grave-yard engaged to marry another woman on Monday. In this he was thwarted by the interference of friends, and did not get to marry her until Tuesday, the third day after the burial of his first wife! This is, we believe, that fastest time on record.—*Sumpter (Ga) Republican.*

A recent census demonstrates that the male Mormons have an average of only three and a half wives apiece! They are not so bad, after all.

The Mammoth Ship—The Great Eastern Completed and almost ready for Sea—Her Engines in Motion.

From London Times.

The completion of the Great Eastern was formally celebrated yesterday at a banquet on board the ship, which was honored by the presence of many of the members of both Houses, and some of the most distinguished engineers and scientific men in the kingdom. Three weeks or so ago only one or two of the six masts were fixed, the bulwarks had not been quite completed, and the hull wanted painting, the decks were piled with indiscribable piles of lumber of all kinds while the labyrinth of cabins and saloons below seemed only so many dirty storehouses for unfinished joinery. Yesterday the scene on board was the reverse of all this, and such progress has been made that the ship now looks as she will look when proceeding on the sea, and as she ought to look to keep pace with her reputation as the largest and finest specimen of naval architecture that ever floated.

The screw engines are constructed on the same improved principles. They have four cylinders of 84 inches diameter and four feet stroke. The cylinders are capable of being worked together or separately. When working 45 strokes a minute, with steam on at 15 lbs. and cutting off at one-third of the stroke, these engines give an indicated power of 4,400 horses, but at 55 strokes a minute, steam on at 25 lbs, and cutting off at one quarter of the stroke, the power will reach 6,500 horses. Thus the united efforts of both screw and paddle engines will drive the immense vessel through the water with the power of no less than 12,000 horses. What fleet could stand in the way of such a mass, weighing some 30,000 tons, and driven through the water by 12,000 horse power at the rate of 22 or 23 miles an hour!—The screw engine boilers are in three distinct sets. Their weight is 362 tons and their capacity for water 270 tons. The probable consumption of coal when both engines are at full work, will average 250 tons per day. The cellular compartment at the bottom of the ship will be used for pumping water into instead of ballast, and as the webs subdividing these are made perfectly water-tight, any one or any number can be filled at pleasure. Steam was got up in the paddle engines at half past one. At that time all the visitors were on board and the engine room and hatches, in spite of the heat, were crowded with eager lookers-on.

The first movement of the gigantic cranks and cylinders of the paddle engines was made precisely at half past 1, when the great masses slowly arose and fell as noiselessly as the engines of a Greenwich boat, but exerting in their great revolutions what seemed to be almost irresistible power. There was no noise, no vibration, nor the slightest sign of heating, and the tremendous frame of iron work sprang into life and motion with as much ease as if every rod and crank had been worked for the last ten years. The steam in the boiler was about 2 pound, but, as a matter of course, the engines were turned but slowly, never exceeding six revolutions per minute. Even with this slow motion, and the slight immersion of the paddle-floats, the effect of the enormous power was at once visible upon the ship.

The great mooring chains astern were tightened to the utmost, and it seemed as if even Trotman's anchors themselves wo'd yield under the strain. Fortunately, however these held fast, and then the screw engines were got into motion, working the ship astern, so as to counteract the effect of the paddles. These latter engines worked with the same marvelous ease and freedom; there was no noise, no sign of hot bearings, and the result was considered by all the engineers on board to be satisfactory in the very highest degree, and far beyond what could have been expected. When the engines had been tested to the utmost to which they could be tried with a vessel at her moorings, all the visitors adjourned to the saloons, where a magnificent cold collation had been laid out.

Sunday in Saratoga: The streets in front of the hotels are quiet. To breakfast and then to church is the order of the morning. At noon the day changes.—Men and women ride to the Lake or elsewhere. Teams block up the street.—Ladies in full dress promenade on the piazza. The late dinner hour interferes with those who would go to church, and gives a good excuse to those to whom one sermon is more than enough. The evening is passed at the hotels in singing sacred music. The extempore concerts begin and hold as late as ten or eleven at night, when the day ends.

"Colonel, will you lend me a hundred today?" "Can't possibly do it I never loan a man money the second time, when he disappoints me the first." "Some mistake, I reckon, Colonel, I paid you the fifty I had last week." That's just it. I never expected it back. So you disappointed me. Can't do it, sir, sorry to say. I can't do it on principle.'.

The arrivals at Saratoga average a thousand a day.

[From the Phila. Pennsylvania Inquirer.]

NEW AND PROSPEROUS SETTLEMENT.—Hammonton on the Camden and Atlantic Railroad, is a flourishing village settled chiefly by New Englanders, who wish to escape their frosty climate, and by persons from the West, who are engaged in the grape culture. One year ago the settlement commenced, and since then has a population of fifteen hundred. They have built about three hundred houses, opened four stores, several hotels, one steam saw and planing mill, and one water power saw and planing mill, with schools, churches, and brick yards. They have set out since, forty vinyards, and in short, established a settlement, which from the respectability of the settlers, is destined to become one of the most important and influential places in the State of New Jersey. Grape growers are of the opinion that the strip of land between the Little and the Great Egg Harbor rivers is the best for the vine, owing to both soil and climate, of any that has been found in the country. From the extent they are entering into the buisiness, a supply of pure and unadulterated wines may soon be expected.—They who have raised crops at Hammonton represent that the soil is very productive. It is not surprising that the place should increase so rapidly, when it is considered the advantages over the West in health, climate and market. Crops are secure from frost, that blighting enemy that robs the farmer of the north of so much of his labor and profit.

SAVOY DEMANDS FRENCH ANNEXATION—The following petition, praying for the union of Savoy to France, has been addressed to King Victor Emanuel:

"Sire: The great events which have exalted so high the glory of your Majesty, and those which are still in preparation, clearly indicate that fresh destinies await the people of Italy. The bases of the treaty of peace just signed, and the acts which have emanated from your government, proclaim the foundation of an Italian nationality, clearly defined by the Alps, as well as by the race, the habits, and the language of those who are to form part of it. The conditions, Sire, exclude Savoy, which is not Italian and never can be so. What, then, is the future reserve for her? We hope, Sire, that your Majesty, who has shown yourself so chivalrous towards Italy, will take into consideration the interests of Savoy in a manner conformable to her wishes."

A distinguished astronomer says, "the earth is gradually increasing its distance from the sun, and in the course of six thousand years, the distance will be so great that only an eighth of the warmth we now enjoy will be communicated to the earth from the sun. In this case, we recommend rheumatic and gouty people to lay in a stock of flannels, and see to their drawers. Six thousand years will pass away very soon, and there is no telling how expensive flannel and sich will be at the time mentioned.

American book publishers are interested in the Russian trade to a greater extent than most people imagine. The other day, the Appletons filed an order for three hundred dozen American works, chiefly of American authors, for St. Petersburgh.—The books go into a stock circulating library in the Russian capital. The cultivation of a literary taste among his people is encouraged by the Emperor Alexander.

The London Agricultural Gazette says that the harvest is now general through the midland and even the northern counties of England, and it is nearly completed in the South. The product will be in most parts above the average. There is the old apprehension for the safety of the potato crop in Ireland.

Those Zouaves must from all accounts be a striking mixture of ferocity and tenderness. A letter describing a Zouave regiment on the march says: "One has a cat, another a parrot, a third an owl, a fourth a cage of little birds, and while I write one has just passed under my window leading a lamb."

A few nights ago, three professional burglars from New York, visited Haverstraw, and property was stolen of the value of $16,000. They then stole a horse and wagon and departed. They left the horse and wagon at the Weehawken Ferry, and forgot to take out their tin box containing the $15,000.

The cattle are becoming rabid out in Illinois. A Cook county farmer shot two oxen and a steer that showed unmistakable evidence of the disease. At the commencement the animals appear stupid, then grow uneasy and excited, their eyes glare wildly, frothing at the mouth commences.

We shall never publish a word or line, the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.

Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."

Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.

Our Mirthful Morsels, our Items of Interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or in the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taken tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly."

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops, you do not lose advance subscriptions, sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.

OUR TERMS;

The price of the NEW YORK WEEKLY is four cents, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $10. Postmaster and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty five cents extra with every subscription, to pre-pay the American postage.

All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to,

DR. M'LANE'S

CELEBRATED

VERMIFUGE

AND

LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of Liver Complaints, all Bilious Derangements, Sick Head-Ache, &c. In cases of

Fever and Ague,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

Fleming Brothers,

Pittsburgh, Pa.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and *take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa.* To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only.

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other) by producing an equilibrium, of the fluids in the body, the want of which is the sole cause of inflammation!

NOTICE TO INVALIDS!! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt.*

Ask your neighbors about the *New Medical Salt.* If sick, try; if not sick, remember the *New Medical Salt.*

DR. COGGSWELL'S NEW MEDICAL Salt is for sale in Batavia by D. W. Fellows and by all enterprising druggists wherever the Herald is [illegible] As it is not a Patent medicine, but the [illegible] of an eminent Physician, no one [illegible] to try the New Medical Salt. Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Eruptive and Skin Diseases, St. Anthony's Fire, Rose, or Erysipelas, Pimples, Pustules, Blotches, Blains and Boils, Tumors, Tetter and Salt Rheum, Scald Head, Ringworm, Rheumatism, Syphilitic and Mercurial Diseases, Dropsy, Dyspepsia, Debility, and, indeed, all Complaints arising from Vitiated or Impure Blood. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice,* and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all stages of *pulmonary disease* by Dr. Churchill's new treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—remove all remaining doubt as to the *inestimable value of this Discovery.—Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible,* into universal use; as I know that they will prove not only

As Sure a Remedy in Consumption as Quinine is in Intermittent Fever, but also as Effectual a Preservative as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage* treated at my Dispensary, during the past year, *eight have completely recovered,* eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine."*

This Remedy is the most powerful renovator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda, J. Winchester, New York." Each bottle has also a fac-simile signature.

No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

Price, $1,00, or three bottles for $5,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution, sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 49 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S. on receipt of twelve cents in stamps to cover expense of postage. Also circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

HERB DISPENSARY!

OFFICE 95 MAIN STREET,
(Up Stairs, Buffalo, N. Y.)

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorrhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community,—dooming at least [illegible] thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgic pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea or Fluor Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflammation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own homes without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for 25 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

N. B. A word of explanation to those who have known us under the style of Evans and Co. The Business located at no. 439 Broadway, New York city, is the oldest established house in the country, and is known world wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to prevent the few who may be unacquainted with us, we would state that we have no connection with any other Gift Book House—and though many advertise under the name of Evans & Co., the firm constituted by D. W. EVANS and J. H. PRESTON, is the first and only concern rightfully using the name. But to prevent all confusion in the future we shall use the style of D. W. ONLY SIX CENTS A WEEK.

Twenty or twenty-five years ago old Phleg, up in Madison county, was telling his friend Jones, consarnin' of a fight.—Phleg had a very little edication, but Jones was a man of right smart reading.—So Phleg went on tellin'; "and," says he, "they fit and fit!"

"And," says Jones, with a knowing look, "did they keep a fittin'?"

Old Phleg drawed himself up, and looked as sour as buttermilk into Jones' face; says he:

"You're cursed precise about langaige—*fout,* then, blast you!"

A few days ago, a bright little girl of probably three or four summers, who recently lost her father, came up to Professor Wise, at the Jones House, and said;

"Mr. Wise, wont you take me up with you in your balloon?"

"Why do you want to go my dear?" replied the *Professor.*

"I want to see my papa," was the touching response.

A tear was visible in the aeronaut's eye as he assured her that it was impossible for him to take her high enough to see her papa.—*Lafayette Journal.*

A NEW STYLE MACHINE,

PRICE $50.

It is no longer questioned that these Machines are the best in use for family sewing. They

HEM, FELL, GATHER, AND STITCH

in the most superior manner, and are the only machines in the market that are so well and simply made that they may be sent into families [illegible] than are contained in a pamphlet which accompanies each machine, and from which

A CHILD OF TEN YEARS

may readily learn to use them, and keep them in order. They make upwards of

FIFTEEN HUNDRED STITCHES A MINUTE

and will do the sewing of a family cheaper than a seamstress can do it, even if she works at the rate of

ONE CENT AN HOUR.

Is there a husband, father, or brother in the United States who will permit the drudgery of hand sewing in his family, when a Grover & Baker Machine will do it better, more expeditiously, and cheaper than can possibly be done by hand?

Death of an Old Citizen.

Died in Batavia on the 24th inst. THOS. D. COWDIN. He was the son of John Cowdin, and was born in Winchester, Keene County, New Hampshire, on the 28th day of June 1774. When two years old he came with his father to Cambridge, Washington Co. N. Y. and lived there 24 years. His father was a blacksmith and died in Cambridge at the age of 94 years. Thomas then went to New Haven, Vermont, and lived several years where he had a farm of 22 acres, which he paid for. He had a wife and 10 children.

In 1812 he was drafted into the army and served three years and nine months. He was in Col. Millers Regiment and was honorably discharged at Greenbush. He was in action at Little York "now Toronto" where he lost the use of his right hand for two months, by an explosion at Fort George, and at Stony Creek—then at Chippewa and the sortie of Fort Erie and Lundy's Lane. At Stony Creek he had a bayonet put through him that laid him up for three months.

He had lived in Batavia since 1816, was a sort of cobler and fond of talking over the wants of the last war with England, for his services in which, he received a land warrant and should have had a pension. "Uncle Tom," as he was familiarly called, was fond of whiskey, but always peaceful and quiet, and for many years past depended entirely on the bounty of his friends and the public. *

A FEMALE INCENDIARY.—The Corning people have been greatly excited by the revelations of a colored girl, who states that a hag named Catherine McCann, employed her to fire buildings. She was to have set fire to the hotels and railroad depots, and some private dwellings. Both are in jail.

The Journal of Commerce says the farmers and speculators may as well accept the decline in prices as a fixed fact. To attempt any longer to ignore it, it says, is only to add to their embarrassment, without changing the truth. And this decline in prices, it adds, is not all evil, even to those who seem to suffer the most from it. We quote:

> "When the West has settled down upon it, and made up its mind to give up the visions of accumulated wealth which it had hugged to its bosom, and pay its debts with the stores it had called its surplus earnings, then its prosperity will begin anew, with a slower increase, but on a more substantial basis. The present difficulty is, that many who deem themselves rich, and would be so calling property at its old nominal value, are loth to acknowledge the self deception, and by parting from their hoard to pay their honest dues, show that they are left penniless. It must come to this, however, or worse."

SINGULAR PRESENTMENT.—A young man employed in this city, whose parents reside in Cologne, some months since had a presentment that on a certain day a brother at home had died. He subsequently received a letter, informing him of the death of his brother, which had occured at the precise time indicated by him. On the 2nd instant the feelings of the young man became suddenly and unaccountedly depressed, and on the 5th he was impressed with the idea that his mother was dead, and it was impossible to shake his belief in this particular. A letter received in New York a few days since conveyed the intelligence of the death of the young man's mother, which occured on the 2d.—*Newark Mercury*

WASHINGTON, Aug. 25.

It is known that a report has for some months prevailed of the probability that Commander Maury, in charge of the National Observatory, would be ordered to sea service. Newspapers and men of science in this and other countries have in consequence expressed their regret at this rumored contemplated act by the Navy department. On enquiry, however, at the proper source, it is ascertained that at no time has Secretary Toucey even thought of detailing him from the Observatory for the above named or any other purpose.

It was proposed to the Monument Society many years ago to surround the foot of the obelisk with a base of a Pantheon form, and an engraving was made of the monument as it would appear if completed in accordance with that plan. An impression has been in this way created throughout the country, that the engraved design had been adopted and cannot now be deviated from without tearing down what has already been built; but as it has not been the intention of the Society to accept the plan referred to, and as the error which exists seems to have an injurious effect, Lieut. Ives suggests the expediency of notifying the public officially that the obelisk is the only portion of the monument the former of which is decided upon, and that the determination of the desgin for the base is still open for consideration.

In this suggestion of Lieut. Ives, the Society has concurred.

TORONTO, Aug 25.

Prof. Steiner left Toronto at 4:20 P. M., in his balloon Europa for Boston. He made a splendid start—rose rapidly but steady, and went off in a southern direction. Weather fine and wind in the west. He passed Whitby about 55 miles distant at about 5 o'clock.

A riot occured on Monday, at Tacony, near Philadelphia, during an excursion of the St. Vincent Sunday School, with the Franklin Rifle Company of that city. A party of rowdies attacked the soldiers during the target firing; the soldiers in defence, used the but end of their rifles, and some loaded theirs with pebbles and fired upon the rowdies. About twenty persons were stabbed and otherwise wounded.—The riot was resumed on the arrival of the soldiers in the city, but the prompt interference of the Police prevented serious results.

THE VELOCITY OF LIGHT.—The velocity with which light travels is so inconceivable that we require to make it intelligible by some illustrations. It moves from the sun to the earth in seven and a half minutes; whereas a cannon-ball fired from the earth would require 17 years to reach the sun. Light moves through a space equal to the circumference of the earth, or about 25,000 miles, in about the eighth part of a second. The swiftest bird would require three weeks to perform this journey. Light would demonstrably require five years to move from the nearest fixed star to the earth and probably many thousand years from the most remote star seen by the telescope. Hence, if a remote visible star had been created at the time of the creation of man, it may not yet have become visible to our system.

The Patterson market is quite plentifully supplied with strawberries, which readily bring six and eight cents per basket.—This is the second or "Fall" crop, and the berries are remarkable for their sweet, delicious superiority over the Spring crop; and as the second bearing season is never very prolific, the price is high. The *Guardian* thinks there is little doubt but berries could be produced, with care, to supply the market during part of August and September, were the growers to undertake the culture of the plants for that purpose.

A fellow of Chicago, the other day, was found on the roof of a house "peeking" into the window of a young lady's bed-chamber. The proprietor of the house discovered him, quietly drew a pistol and fired at him, but the young man managed to escape the shot and got away from the premises. He was subsequently arrested and fined $60 and costs.

TAKING IT COOL.—The residents on Jefferson Avenue were much amused at the coolness of a party of mourners who followed the last remains of some departed relative or friend to the grave, the other day. They were seated in a wagon, in the most cosy and sociable of attitudes, with a huge water-melon reposing in the midst, from which each carved and eat with a gusto peculiar to the occasion, the rinds strewing the road on each side, and marking their course down the avenue, as far as could be seen.—*Detroit Free Press.*

A little paper called *The Spy*, at Cleveland, Ohio, is edited by a young lady, who in the personal column, spied so closely into the affairs of a young gentleman of that city, that he declared war, went to her sanctum, and demolished her fixtures and printing press *in toto*, throwing the latter out of the window.

A Yankee Schoolmaster, named Comstock, turned a drove of cattle into the corn field of a farmer in Dubuque, Iowa, and during the confusion which this act created in the family, ran away with the farmer's daughter and married her.

A well known lawyer of Albany recently ordered six coffins from an undertaker by a way of a joke; but the undertaker took him at his word and he now has the "merchandise" on his hands. He proposes to donate the whole to the Republican Committee of Albany.

Recent advices from the Kansas gold region report the most astonishing discoveries of the precious metal in various localities, but especially between Cape Laponde and the Cheyenne Pass. A great rush of miners had occurred towards the latter place where the amounts asserted to have been taken out daily by a single hand are so extraordinary as to excite a suspicion of exaggeration.

[From the Phila. Pennsylvania Inquirer.]

NEW AND PROSPEROUS SETTLEMENT.—Hammonton on the Camden and Atlantic Railroad, is a flourishing village settled chiefly by New Englanders, who wish to escape their frosty climate, and by persons from the West, who are engaged in the grape culture. One year ago the settlement commenced, and since then has a population of fifteen hundred. They have built about three hundred houses, opened four stores, several hotels, one steam saw and planing mill, and one water power saw and planing mill, with schools, churches, and brick yards. They have set out since, forty vinyards, and in short, established a settlement, which from the respectability of the settlers, is destined to become one of the most important and influential places in the State of New Jersey. Grape growers are of the opinion that the strip of land between the Little and the Great Egg Harbor rivers is the best for the vine, owing to both soil and climate, of any that has been found in the country. From the extent they are entering into the business, a supply of pure and unadulterated wines may soon be expected.—They who have raised crops at Hammonton represent that the soil is very productive. It is not surprising that the place should increase so rapidly, when it is considered the advantages over the West in health, climate and market. Crops are secure from frost, that blighting enemy that robs the farmer of the north of so much of his labor and profit.

STAR WRITING FLUID.

In bringing this WRITING FLUID before the Public, the Proprietor knows he has a great deal to contend with, as there is so many spurious Inks manufactured that are utterly worthless, but I do not wish to say this is the only Ink and best in use. I will say that it is second to none, as my motto is, "Try it, if you like it—buy it." The superior qualities of this FLUID are, namely: It is decidedly a business Ink, and so permanent and ineffaceable, that even the test of Oxalic Acid cannot remove it from paper: hence its value to business men and the community. This Acid instantly effects most Inks, even that from the largest establishments. Arnold's of London, is gradually effected by it. Harrison's of Philadelphia, instantly disappears, while no effect upon the Star Ink is visible, till at last it is changed by the Acid to a reddish tinge, but remains ever afterwards as permanent and legible as ever. Test our Ink with a drop of the Acid, then test others' you will observe the result. There is but one other kind of Ink besides ours that will stand the test, that is thicker, redder and dearer than ours, or all of these combined, every one can see that the Ink which cannot be effaced, and then counterfeited by rogues as is often done on Bank Bills, Deeds, Wills, Records, &c., not only deserves but will command the custom of an enlightened community. As it is a Chemical preparation I challenge all competition. It flows more readily from the pen, will not mould, and is easily removed from the hands when stained. It needs only to be tried and you will buy no other kind.

NOTICES OF THE PRESS.
Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters our editorial brethren have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.
GENERAL CHARACTER OF THE NEW YORK WEEKLY.
The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means. We shall never publish a word or line, the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's Intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.
Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.
Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."
Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.
Our Mirthful Morsels, our Items of Interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or in the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.
OUR CIRCULATION & PROSPECTS
The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.
The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taking tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.
How and Where to Get the "Weekly"
Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops, you do not lose advance subscriptions sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.
OUR TERMS:
The price of the NEW YORK WEEKLY is FOUR CENTS, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $12. Postmasters and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty-five cents extra with every subscription, to pre-pay the American postage.
All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to,
STREET & SMITH,
EDITORS AND PROPRIETORS,
22 BEEKMAN STREET, NEW YORK.

DR. M'LANE'S
CELEBRATED
VERMIFUGE
AND
LIVER PILLS.
WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to
Dr. Chas. M'Lane's Celebrated
Vermifuge and Liver Pills.
We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:
THE VERMIFUGE,
For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.
THE LIVER PILLS,
For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of
FEVER AND AGUE,
preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.
As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.
Their unprecedented popularity has induced the proprietors,
FLEMING BROTHERS,
PITTSBURGH, PA.
to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to
FLEMING BROS., Pittsburgh, Pa.
P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and *take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa.* To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium of the fluids in the body, the want of which is the sole cause of Inflamation!

NOTICE TO INVALIDS!! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water; to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*.

Ask your neighbors about the *New Medical Salt*. If sick, try; if not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S NEW MEDICAL Salt is for sale in Batavia by H. W. Fellows and by all enterprising druggists wherever the Herald is [illegible] As it is not a Patent Medicine, but the [illegible]ption of an eminent Physician, no one should fail to try the New Medical Salt.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases: consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S
Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Eruptive and Skin Diseases, St. Anthony's Fire, Rose, or Erysipelas, Pimples, Pustules, Blotches, Blains and Boils, Tumors, Tetter, and Salt Rheum, Scald Head, Ringworm, Rheumatism, Syphilitic and Mercurial Diseases, Dropsy, Dyspepsia, Debility, and, indeed, all Complaints arising from Vitiated or Impure Blood. The popular belief in "*impurity of the blood,*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice,* and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA.

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all *stages of pulmonary disease* by Dr. Churchill's new *treatment*—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible,* into universal use, as I KNOW that they will prove not only

As Sure a Remedy in Consumption as Quinine is in Intermittent Fever, but also as Effectual a Preservative as Vaccination in Small Pox.

"*In no instance* have I found the remedy *fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage,* treated at my Dispensary, during the past year, *eight have completely recovered,* eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

☞ This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile* signature.

☞ No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

☞ Price, $2.00, or three bottles for $5.00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 43 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postages. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

HERB DISPENSARY!

OFFICE 95 MAIN STREET,

(2d door, Up Stairs, Buffalo, N. Y.)

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorrhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgic pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea or Fleur Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflammation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $5 a series of Health Rules and perfect chart of cure, which will be to them a true polar star through life.

The Tribune on Bennett.

The New York Tribune has recently contained two articles that were apparently, to the casual reader, very friendly to JAMES GORDON BENNETT, of the Herald, even venturing so far as to advise the Democracy to nominate him for the Mayoralty. We see these articles are taken in good faith by the Buffalo Express which holds with regard to them the following language under the head of "eminently eccentric:"—

"The New York Tribune, with all its ability and usefulness, is at times very eccentric. This peculiar trait has seldom been more strikingly manifested than in an attack of admiration for James Gordon Bennett, which appears in that print of Thursday. It is so peculiar, so unexpected, and yet so apparently earnest and sincere, that we copy it. It is seldom that the Democrats look to their opponents for advice as to their candidates, but in this instance they may be pleased to do so.—Bennet has not had such a puff from any quarter since his yacht run through Plum Gut, to make short distance and time in the race."

Following the above is a lengthy extract from the Tribune article from which we quote:—

"And though, should Mr. Bennett be nominated for Mayor, it would be our duty to oppose his election, and support his Republican opponent, we should do so with the consciousness that in Mr. Bennett was put forth a competent and congenial representative of the Democratic party of New York, its principles and its aims."

If Bennett is a "congenial representatives of the Democratic party of New York," and of its "principles and its aims," pray what are the "principles and aims" of the Democratic party? The "aim" of the Tribune articles is very evident, and if the Editor of the Express would put on his specs he would be able to see it.

The Rope Walking Mania.

Speaking of the intense rivalry between Buffalo and Rochester, in the matter of ropewalkers, the N. Y. Times says:

"They are the moments 'imps of fame.' They have evoked, to each man his party. The town of Niagara swears by Blondin; the city of Rochester thunders for De Lave. It would seem to be impossible for our people to escape falling into factions over every subject which for a single hour occupies their attention. The names of these two miserable rope-dancers, whose popularity depend upon their success in harrowing up the minds and exciting the nerves of their spectators by a hideous trifling with human life, have become the rallying cries of two emphatic parties.—The followers of each urge their champion on to attempt new monstrosities of recklessness. One makes it his boats that he can perform his perilous feat safely on a wet and swinging rope. The others retorts that he can trip over his narrow bridge with another human being on his back, and proposes, furthermore, to take the earliest opportunity of falling off his rope into the river and swimming ashore! The spectacle is not complimentary to our civilization; but, while its vulgar attractions continue to swell the fares on the Railroads, and to crowd the hotels at the rival head-quarters of this modern 'dance of death,' it is probably a waste of words to protest against it. It is less imposing, certainly, than the bull fighting of Spain, but no doubt more profitable in a pecuniary sense, both to the spectators and to the performers."

APOLOGY.—A recent married young man in Cincinnati got intoxicated at a wine party, and in that state went home to his wife. As soon as he appeared, she leaps from the sofa on which she had been half reclining, and throwing her alabaster arms about his neck, inquired, "Are you ill, dearest? What ails you? You do not seem to be yourself." "Well, the fa—fa—truth is that—that—that—that I want to sit—sit up with a si—sick brother, belonging to our—our—our lodge, you see, my love, and the li—light went out, and giving him brandy, as—as the doctor had pre—prescribed, I—I must have ma—made a mistake—a mistake in the da—dark, and taken the liquor myself; whi—which I should—should—ha—have hand—handed—my friend—you see—my dear."

GOOD NIGHT!—There is something sadly sweet in a gentle "good night!" from the lips of one we love. We are pleased and filled with a quiet joy—a holy feeling of tenderness; and yet the soul is hushed in calm melancholy, we can almost hear the breathings of low plaintive melodies and it may be that tears steal into the moveless eyes. Good night!

"Ah surely nothing dies, but something mourns,

And when the little one robed in white, comes with his innocent upturned eyes to kiss your cheek and lisp, in baby tones, "Good night!" how your voice softens and your tones are instinctively modulated to a musical whisper as "Good night!" like a holy benediction follows your gentle kiss on the beaming forehead! And then you fall to musing on the uncertain future of the trusting child, and wonder if his life will have as many dark shadows and as few bright spots as yours—and it may be that you forget the sweet sunshine that the little face has just showered upon your soul and thus caused it to moodily muse as the light recedes and the darkness gathers over it again, to be dispelled for a moment when another "Good night!" makes low sweet music in your ear. And then you think of the last "Good night! to life and love" on earth, a slumberous dream of peace steals into your mind, and you seem to hear the poet whisper:

"In vain shalt though or any call
The spirits from the golden day,
Except like them thou too canst say,
My spirit is at peace with all!"

A SUDDEN SENSATION.—A Philadelphia paper tells the following singular story:

"While the fire was burning at Ninth and Market streets, a gentleman was passing that vicinity. He was a man of large stature, great dignity of appearance, and walked with the air of one who was above all anxieties as to things of this world, being evidently the possessor of ample wealth. As he passed up Ninth street, on the other side of the way from the fire, he was saluted by two splendidly attired ladies.—Greatly to their surprise, at the very instant, instead of a bland reception of the courtesy, the gentleman sprang into the air about six feet, and gave utterance to such a yell that would have done no discredit to a most ambitious Supe in the tragedy of 'Metamora.' As he alighted on his feet he struck off his hat and began to tear his hair in such a manner that the ladies shrieked with mortal fear, evidently apprehending that their friend had gone insane. A policeman picked up the gentleman's hat, an inspection of which satisfactorily elucidated the cause of so violent a demonstration. A red hot cinder, as large as a pigeon's egg, thrown from the funnel of one of the steam fire engines, had fallen upon the top of his hat, burned a hole through it, fallen again upon the gentleman's head, and burned its way down to the scalp."

A WOMAN'S REVENGE.—Miss Hetty Walker is a stitcher by vocation, and has been employed in that capacity by an establishment in Broadway, New York.—Her workmanship attracted the favorable attention of her employers, so much so that one of them condescended to bestow upon her sundry gold dollars as a befitting acknowledgment. Scandal went so far as to say that words of endearment passed between the parties. Hetty is handsome, and Mr. Augustus Snyder did much to render such rumors plausible. The senior partner of the house, not relishing imputations against the reputation of the establishment, informed Hetty a week or more since, that the firm had no further occasion for her services. But matters did not rest in this predicament. Mrs. Snyder had heard that there was "goings on," and considered that the best vengence for her wrongs was to make them and herself as public as possible, which she did by cowhiding Hetty in the streets a day or two since.

FOLLOW THE RIGHT.—No matter who you are, what your lot, or where you live; you cannot afford to do that which is wrong. The only way to obtain happiness and pleasure for yourself, is to do the *right thing*. You may not always hit the mark; but you should nevertheless always aim at it, for with every trial your skill will increase. Whether you are to be praised or blamed for it by others; whether it will seemingly make you richer or poorer, or whether no other person than yourself knows of your action; still, always, and in all cases *do the right thing*. Your first lesson in this rule will sometimes seem hard ones, but they will grow easier and easier, until, finally, doing the right thing will become a habit, and to do a wrong will seem an impossibility.

NARROW ESCAPE OF EX-GOV. KING.—The Long Island Democrat states that a young man named Daniel Dotman, who was being teased by a party of young fellows, with a snake they had caught, seized a loaded gun and fired it into the house. Hon. John A. King was standing on the opposite side of the street, and some of the shot passed through his hat. A son of Dr. Johnson received one of the shot in his face, and two horses were wounded.

TRUE AS GOSPEL.—Women often lose the men they love, and who love them, by mere wantonness or coquetry. They should be careful not to take this step hastily, for a proud, high-minded, gifted man will seldom ask a woman twice. The females who assume distinction where neither their habits, looks, nor mental faculties entitle them to it, should heed the advice given herein. Never turn up your dear little pug noses, nor flaunt your crinoline in the face of a decent man.—Bare your hearts, but allow your bosoms a little covering.

The Dallas (Texas) Herald holds itself responsible for a statement that a young gentleman of that neighborhood, while in a somnambulic state, leaped from a third story window of a hotel upon the pavement below. When discovered he was still asleep, and did not awake till aroused by his friends.

Mr. John B. Roseboom, a respectable farmer of Owasco Cayuga county, was instantly killed on Tuesday last. He was stacking wheat, when his horses which were standing close by, suddenly started. Leaping down in front of the wagon, he was knocked to the ground, and the wheels passed over his head completely crushing in the skull.

A LARGE FAMILY.—The Nashville Advocate in speaking of a large camp meeting recently held in that vicinity, says that among the persons present was a church member named Lynch, a man of wealth and great liberality. "He bore the burthen of feeding and lodging" a large number who were on the camp ground. This Mr. Lynch must be a remarkable man; he has now nineteen children, and his father had thirty-two, and at one time during the last war, thirteen of his sons were in the army. The State of Virginia, where he then lived, passed an act releasing the patriotic patriarch from all taxation.

The *Saratogian* has the painful rumor that Mr. John R. Houghton, formerly a merchant in Saratoga, and a brother of Dr. N. M. and Tilly Houghton, of Corinth, perished from starvation on the plains, while returning from Pike's Peak, a few months since.

The Detroit Tribune is informed by a gentleman of that city, that it "rained snakes" there one day last week. The Tribune's informant found scores of them, six inches in length, in his garden immediately after the shower. There are some unbelieving citizens in Detroit who attribute the sight of the snakes to anything but the rain.

The Tribune, in an article complimentary to the editor of the Herald, says:—"At this very day President Buchanan owes more to Br. Bennett than to all his journalists and fulsome flatterers put together." Considering that the Herald used all its influence to elect Mr. Fremont, the Republican candidate, and to defeat Mr. Buchanan, the compliment is a left-handed one.—*Albany Argus.*

There is talk of holding an extra session of the Michigan Legislature.

Kinkel's *Hermann*, a German weekly paper issued by him in London, has been prohibited in Austria.

Simrock, the celebrated Professor of the University of Bonn, is confined to a lunatic asylum. The recent political excitement in Germany has destroyed the balance of his mind.

STAR WRITING FLUID.

In bringing this WRITING FLUID before the Public the Proprietor knows he has a great deal to contend with, as there is so many spurious Inks manufactured that are utterly worthless, but I do not wish to say this is the only Ink and best in use. I will say that it is second to none, as my motto is, "Try it, if you like it—buy it." The superior qualities of this FLUID are, namely: It is decidedly a business Ink, and so permanent and ineffaceable, that even the test of Oxalic Acid cannot remove it from paper; hence its value to business men and the community. This Acid instantly affects most Inks, even that from the largest establishments. Arnold's of London, is gradually effected by it. Harrison's of Philadelphia, instantly disappears, while no effect upon the Star Ink is visible, till at last it is changed by the Acid to a reddish tinge, but remains ever afterwards as permanent and legible as ever. Test our ink with a drop of the Acid, then test others' you will observe the result. There is but one other kind of Ink besides ours that will stand the test, that is thicker, redder and dearer than ours, or all of these combined, every one can see that the Ink which cannot be effaced, and then counterfeited by rogues as is often done on Bank Bills, Deeds, Wills, Records, &c., not only deserves but will command the custom of an enlightened community. As it is a Chemical preparation I challenge all competition. It flows more readily from the pen, will not mould, and is easily removed from the hands when stained. It needs only to be tried and you will buy no other kind.

LOCAL MATTERS.

BURGLARY.—Mrs. HOLTON'S Millinery Store has again received a call from Burglars. This is the third time that this establishment has been robbed. The method of obtaining entrance was bold in the extreme,—the shutter of one of the front doors was *bored* off with an auger, which required sixteen holes to cut it in two, and then the large pane of glass was broken out, and through the apperature thus made, entrance was effected.

Until within a few nights, we understand, one or more persons have slept in the store, and it would seem that this visitation at this time was advised by a careful knowledge of these facts, therefore the depredators cannot be altogether strangers in these parts.

The loss of goods does not exceed two or three hundred dollars in value, as yet ascertained, but, the selection of seasonable goods would seem to indicate that utility and the present demand, governed the choice. Considering the fact that this is the third time Mrs. Holton has been robbed, and that it required sixteen auger holes to gain entrance to the store, the burglars may reasonably be put under the head of *great bores*.

THE
NEW YORK WEEKLY,

A HANDSOME QUARTO PUBLICATION,
BEAUTIFULLY ILLUSTRATED,
IS NOW UNIVERSALLY ACKNOWLEDGED TO BE
THE BEST STORY PAPER IN THE WORLD!

Among its Regular Contributors will be found the names of some of the best male and female writers in the United States! Such writers as Justin Jones, (Harry Hazel) Augustine J. H. Duganne, William Earle Binder, Harry Hazleton, James Reynolds, Francis S. Smith.

Mrs. Mary J. Holmes, Helen Forest Graves, Mary C. Vaughan, Margaret Verne, Anna Raymond, Ella Mayville. Write for it regularly, while a score of other well known writers occasionally contribute to its columns.

THE NEW YORK WEEKLY has now engaged a force of talent that cannot be rivaled by any establishment in the world!

NOTICES OF THE PRESS.

Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters, our editorial brethren have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.

GENERAL CHARACTER OF THE NEW YORK WEEKLY.

The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means. We shall never publish a word or line, the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's Intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to housekeepers and others.

Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."

Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.

Our Mirthful Morsels, our Items of Interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, as in the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taking tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly."

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops you do not lose advance subscriptions, sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.

OUR TERMS:

The price of the NEW YORK WEEKLY is FOUR CENTS, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $12. Postmasters and others who get up clubs of ten, and send us $14 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty five cents extra with every subscription, to prepay the American postage.

All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to

DR. M'LANE'S
CELEBRATED
VERMIFUGE
AND
LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated
Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,
PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and take none but *Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa.* To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium of the fluids in the body, the want of which is the sole cause of inflamation!

NOTICE TO INVALIDS!! The following forms which the unballanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*.

Ask your neighbors about the *New Medical Salt*. If sick, try; if not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S NEW MEDICAL Salt is for sale in Batavia by H. W. Fellows and by all enterprising druggists wherever the Herald is. As it is not a Patent Medicine, but the ption of an eminent Physician, no one should fear to try the New Medical Salt. For testimonial and directions see circular.

Dr. Coggswell's Antiphlogistic Salt.

ACUTE PACKAGES, $1,00; CHRONIC $2,00.

Sent by mail, free of expense on receipt of price. Invalids with chronic or long standing diseases, should always order a chronic package.

N. B. *A word of explanation* to those who have known us under the style of Evans and Co. The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world-wide as the original "Evans & Co's Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to protect the few who may be unacquainted with us, we would state that we have no connection with any other Gift Book House—and though many advertise under the name of Evans & Co., the firm constituted by D. W. EVANS and J. H. PRESTON, is the first and only concern rightfully using the name. But to prevent all confusion in the future we shall use the style of D. W. EVANS & CO., and all persons wrongfully using the appellation to mislead the public, will be made to suffer the penalty of the law.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases: consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Eruptive and Skin Diseases, St. Anthony's Fire, Rose, or Erysipelas, Pimples, Pustules, Blotches, Blains and Boils, Tumors, Tetter, and Salt Rheum, Scald Head, Ringworm, Rheumatism, Syphilitic and Mercurial Diseases, Dropsy, Dyspepsia, Debility, and, indeed, all Complaints arising from Vitiated or Impure Blood. The popular belief in "*impurity of the blood*," is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice*, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA.

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all *stages of pulmonary disease* by Dr. Churchill's new treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value of this Discovery.*—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success*. Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible*, into universal use, as I KNOW that they will prove not only

As Sure a Remedy in Consumption as Quinine is in Intermittent Fever, but also as Effectual a Preservative as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage*, treated at my Dispensary, during the past year, *eight have completely recovered*, eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

☞ This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "*Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York.*" Each bottle has also a *fac-simile* signature.

☞ No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

☞ Price, $2,00, or three bottles for $5,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 43 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postages. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

HERB DISPENSARY!

OFFICE 95 MAIN STREET,

(Up Stairs, Buffalo, N. Y.)

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorrhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat, shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgic pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea, or Fleur Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflamation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new. It is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $2 a series of Health Rules and perfect chart of cure, which will be to them a true polar star through life.

The New York Tribune has recently contained two articles that were apparently, to the casual reader, very friendly to James Gordon Bennett, of the Herald, even venturing so far as to advise the Democracy to nominate him for the Mayoralty. We see these articles are taken in good faith by the Buffalo Express which holds with regard to them the following language under the head of "eminently eccentric:"—

"The New York Tribune, with all its ability and usefulness, is at times very eccentric. This peculiar trait has seldom been more strikingly manifested than in an attack of admiration for James Gordon Bennett, which appears in that print of Thursday. It is so peculiar, so unexpected, and yet so apparently earnest and sincere, that we copy it. It is seldom that the Democrats look to their opponents for advice as to their candidates, but in this instance they may be pleased to do so.—Bennet has not had such a puff from any quarter since his yacht run through Plum Gut, to make short distance and time in the race."

Following the above is a lengthy extract from the Tribune article from which we quote:—

"And though, should Mr. Bennett be nominated for Mayor, it would be our duty to oppose his election, and support his Republican opponent, we should do so with the consciousness that in Mr. Bennett was put forth a competent and congenial representative of the Democratic party of New York, its principles and its aims."

If Bennett is a "congenial representatives of the Democratic party of New York," and of its "principles and its aims," pray what are the "principles and aims" of the Democratic party? The "aim" of the Tribune articles is very evident, and if the Editor of the Express would put on his specs he would be able to see it.

The Rope Walking Mania.

Speaking of the intense rivalry between Buffalo and Rochester, in the matter of ropewalkers, the N. Y. Times says:

"They are the moments 'imps of fame.' They have evoked, to each man his party. The town of Niagara swears by Blondin; the city of Rochester thunders for De Lave. It would seem to be impossible for our people to escape falling into factions over every subject which for a single hour occupies their attention. The names of these two miserable rope-dancers, whose popularity depend upon their success in harrowing up the minds and exciting the nerves of their spectators by a hideous trifling with human life, have become the rallying cries of two emphatic parties.—The followers of each urge their champion on to attempt new monstrosities of recklessness. One makes it his boats that he can perform his perilous feat safely on a wet and swinging rope. The others retorts that he can trip over his narrow bridge with another human being on his back, and proposes, furthermore, to take the earliest opportunity of falling off his rope into the river and swimming ashore!

The spectacle is not complimentary to our civilization; but, while its vulgar attractions continue to swell the fares on the Railroads, and to crowd the hotels at the rival head-quarters of this modern 'dance of death,' it is probably a waste of words to protest against it. It is less imposing, certainly, than the bull fighting of Spain, but no doubt more profitable in a pecuniary sense, both to the spectators and to the performers."

Apology.—A recent married young man in Cincinnati got intoxicated at a wine party, and in that state went home to his wife. As soon as he appeared, she leaps from the sofa on which she had been half reclining, and throwing her alabaster arms about his neck, inquired, "Are you ill, dearest? What ails you? You do not seem to be yourself." "Well, the fa—fa—truth is that—that—that—that I went to sit—sit up with a si—sick brother, belonging to our—our—our lodge, you see, my love, and the li—light went out, and giving him brandy, as—as the doctor had pre—prescribed, I—I must have ma—made a mistake—a mistake in the da—dark and taken the liquor myself; whi—which I should—should—ha—have hand—handed—my friend—you see—my dear."

Good Night!—There is something sadly sweet in a gentle "good night!" from the lips of one we love. We are pleased and filled with a quiet joy—a holy feeling of tenderness; and yet the soul is hushed in calm melancholy, we can almost hear the breathings of low plaintive melodies and it may be that tears steal into the moveless eyes. Good night!

"Ah surely nothing dies, but something mourns,"

And when the little one robed in white, comes with his innocent upturned eyes to kiss your cheek and lisp, in baby tones, "Good night!" how your voice softens and your tones are instinctively modulated to a musical whisper as "Good night!" like a holy benediction follows your gentle kiss on the beaming forehead! And then you fall to musing on the uncertain future of the trusting child, and wonder if his life will have as many dark shadows and as few bright spots as yours—and it may be that you forget the sweet sunshine that the little face has just showered upon your soul and thus caused it to moodily muse as the light recedes and the darkness gathers over it again, to be dispelled for a moment when another "Good night!" makes low sweet music in your ear. And then you think of the last "Good night! to life and love" on earth, a slumberous dream of peace steals into your mind, and you seem to hear the poet whisper:

"In vain shalt though or any call
The spirits from the golden day,
Except like them thou too canst say,
My spirit is at peace with all!"

A Sudden Sensation.—A Philadelphia paper tells the following singular story:

"While the fire was burning at Ninth and Market streets, a gentleman was passing that vicinity. He was a man of large stature, great dignity of appearance, and walked with the air of one who was above all anxieties as to things of this world, being evidently the possessor of ample wealth. As he passed up Ninth street, on the other side of the way from the fire, he was saluted by two splendidly attired ladies.—Greatly to their surprise, at the very instant, instead of a bland reception of the courtesy, the gentleman sprang into the air about six feet, and gave utterance to such a yell that would have done no discredit to a most ambitious Supe in the tragedy of 'Metamora.' As he alighted on his feet he struck off his hat and began to tear his hair in such a manner that the ladies shrieked with mortal fear, evidently apprehending that their friend had gone insane. A policeman picked up the gentleman's hat, an inspection of which satisfactorily elucidated the cause of so violent a demonstration. A red hot cinder, as large as a pigeon's egg, thrown from the funnel of one of the steam fire engines, had fallen upon the top of his hat, burned a hole through it, fallen again upon the gentleman's head, and burned its way down to the scalp."

A Woman's Revenge.—Miss Hetty Walker is a stitcher by vocation, and has been employed in that capacity by an establishment in Broadway, New York.—Her workmanship attracted the favorable attention of her employers, so much so that one of them condescended to bestow upon her sundry gold dollars as a befitting acknowledgment. Scandal went so far as to say that words of endearment passed between the parties. Hetty is handsome, and Mr. Augustus Snyder did much to render such rumors plausible. The senior partner of the house, not relishing imputations against the reputation of the establishment, informed Hetty a week or more since, that the firm had no further occasion for her services. But matters did not rest in this predicament. Mrs. Snyder had heard that there was "goings on," and considered that the best vengeance for her wrongs was to make them and herself as public as possible, which she did by cowhiding Hetty in the streets a day or two since.

Follow the Right.—No matter who you are, what your lot, or where you live; you cannot afford to do that which is wrong. The only way to obtain happiness and pleasure for yourself, is to do the *right thing.* You may not always hit the mark; but you should nevertheless always aim at it, for with every trial your skill will increase. Whether you are to be praised or blamed for it by others; whether it will seemingly make you richer or poorer, or whether no other person than yourself knows of your action; still, always, and in all cases *do the right thing.* Your first lesson in this rule will sometimes seem hard ones, but they will grow easier and easier, until, finally, doing the right thing will become a habit, and to do a wrong will seem an impossibility.

Narrow Escape of Ex-Gov. King.—The Long Island Democrat states that a young man named Daniel Dotman, who was being teased by a party of young fellows, with a snake they had caught, seized a loaded gun and fired it into the house. Hon. John A. King was standing on the opposite side of the street, and some of the shot passed through his hat. A son of Dr. Johnson received one of the shot in his face, and two horses were wounded.

True as Gospel.—Women often lose the men they love, and who love them, by mere wantonness or coquetry. They should be careful not to take this step hastily, for a proud, high-minded, gifted man will seldom ask a woman twice. The females who assume distinction where neither their habits, looks, nor mental faculties entitle them to it, should heed the advice given herein. Never turn up your dear little pug noses, nor flaunt your crinoline in the face of a decent man.—Bare your hearts, but allow your bosoms a little covering.

The Dallas (Texas) Herald holds itself responsible for a statement that a young gentleman of that neighborhood, while in a somnambulic state, leaped from a third story window of a hotel upon the pavement below. When discovered he was still asleep, and did not awake till aroused by his *friends*.

Mr. John B. Roseboom, a respectable farmer of Owasco Cayuga county, was instantly killed on Tuesday last. He was stacking wheat, when his horses which were standing close by, suddenly started. Leaping down in front of the wagon, he was knocked to the ground, and the wheels passed over his head completely crushing in the skull.

A Large Family.—The Nashville Advocate in speaking of a large camp meeting recently held in that vicinity, says that among the persons present was a church member named Lynch, a man of wealth and great liberality. "He bore the burthen of feeding and lodging" a large number who were on the camp ground. This Mr. Lynch must be a remarkable man; he has now nineteen children, and his father had thirty-two, and at one time during the last war, thirteen of his sons were in the army. The State of Virginia, where he then lived, passed an act releasing the patriotic patriarch from all taxation.

The *Saratogian* has the painful rumor that Mr. John R. Houghton, formerly a merchant in Saratoga, and a brother of Dr. N. M. and Tilly Houghton, of Corinth, perished from starvation on the plains, while returning from Pike's Peak, a few months since.

The Detroit Tribune is informed by a gentleman of that city, that is "rained snakes" there one day last week. The Tribune's informant found scores of them, six inches in length, in his garden immediately after the shower. There are some unbelieving citizens in Detroit who attribute the sight of the snakes to anything but the rain.

The Tribune, in an article complimentary to the editor of the Herald, says:—"At this very day President Buchanan owes more to Br. Bennett than to all his journalists and fulsome flatterers put together." Considering that the Herald used all its influence to elect Mr. Fremont, the Republican candidate, and to defeat Mr. Buchanan, the compliment is a left-handed one.—*Albany Argus.*

There is talk of holding an extra session of the Michigan Legislature.

Kinkel's *Hermann*, a German weekly paper issued by him in London, has been prohibited in Austria.

Simrock, the celebrated Professor of the University of Bonn, is confined to a lunatic asylum. The recent political excitement in Germany has destroyed the balance of his mind.

STAR WRITING FLUID.

In bringing this Writing Fluid before the Public, the Proprietor knows he has a great deal to contend with, as there is so many spurious Inks manufactured that are utterly worthless, but I do not wish to say this is the only Ink and best in use. I will say that it is second to none, as my motto is, "Try it, if you like it—buy it." The superior qualities of this Fluid are, namely: It is decidedly a business Ink, and so permanent and ineffaceable, that even the test of Oxalic Acid cannot remove it from paper; hence its value to business men and the community. This Acid instantly affects most Inks, even that from the largest establishments. Arnold's of London, is gradually effected by it. Harrison's of Philadelphia, instantly disappears, while no effect upon the Star Ink is visible, till at last it is changed by the Acid to a reddish tinge, but remains ever afterwards as permanent and legible as ever. Test our ink with a drop of the Acid, then test others' you will observe the result. There is but one other kind of Ink besides ours that will stand the test, that is thicker, redder and dearer than ours, or all of these combined, every one can see that the Ink which cannot be effaced, and then counterfeited by rogues as is often done on Bank Bills, Deeds, Wills, Records, &c., not only deserves but will command the custom of an enlightened community. As it is a Chemical preparation I challenge all competition. It flows more readily from the pen, will not mould, and is easily removed from the hands when stained. It needs only to be tried and you will buy no other kind.

LOCAL MATTERS.

BURGLARY.—Mrs. HOLTON'S Millinery Store has again received a call from Burglars. This is the third time that this establishment has been robbed. The method of obtaining entrance was bold in the extreme,—the shutter of one of the front doors was *bored* off with an auger, which required sixteen holes to cut it in two, and then the large pane of glass was broken out, and through the apperature thus made, entrance was effected.

Until within a few nights, we understand, one or more persons have slept in the store, and it would seem that this visitation at this time was advised by a careful knowledge of these facts, therefore the depredators cannot be altogether strangers in these parts.

The loss of goods does not exceed two or three hundred dollars in value, as yet ascertained, but, the selection of seasonable goods would seem to indicate that utility and the present demand, governed the choice. Considering the fact that this is the third time Mrs. Holton has been robbed, and that it required sixteen auger holes to gain entrance to the store, the burglars may reasonably be put under the head of *great bores.*

NOTICES OF THE PRESS.

Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters, our editorial brethren have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.

GENERAL CHARACTER OF THE NEW YORK WEEKLY.

The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means. We shall never publish a word or line the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's Intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.

Our Pleasant Paragraphs, an interesting melange, ranging "from grave to gay, from lively to severe."

Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.

Our Mirthful Morsels, our Items of Interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or in the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taken tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly"

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops you do not lose advance subscriptions, sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.

OUR TERMS:

The price of the NEW YORK WEEKLY is FOUR CENTS, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $12. Postmaster and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty-five cents extra with every subscription, to pre-pay the American postage.

STARTLING EVIDENCE.

LET THE SICK READ.—The Easton Scalpel, a medical publication says: Dr. Herrick's Sugar Coated Pills, made at Albany, N. Y., appear to be the pill of the world. Dr. H. makes no secret of their compound; he furnishes all physicians in good standing with the receipt of their ingredients, and with the Pills, sugar coated, by the pound. Among all medicine manufacturers, Dr. Herrick stands in Medical knowledge and medical responsibility, unapproached. As Spring is upon us, and hot weather expected, and a few doses of Herrick's Matchless Pills.—[Dundee Record.

PHYSICIANS USE THEM.

☞ Dr. C. T. Pancoast, of Baltimore, M. D., in a note to Dr. Herrick, says: I have tested your purgative Sugar Coated Pills in a variety of diseases, and find them superior to any cathartic I ever used. My customers, particularly the female portion, have fallen in love with them, and frequently ask me to give them the Sugar Coated Pill. Your discovery in coating a pill with sugar should immortalize your name; and I doubt not your invention will be handed down to future posterity as a discovery worthy the day in which we live. DR. M'LANE'S

CELEBRATED

VERMIFUGE

AND

LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,
PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and *take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa.* To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium, of the fluids in the body, the want of which is the sole cause of inflamation!

NOTICE TO INVALIDS!! The following forms which the unballanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S *New* MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*

Ask your neighbors about the *New Medical Salt*. If sick, try: if not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S New Medical Salt is for sale in Batavia by H. W. Fellows and by all enterprising druggists wherever the Herald is [illegible] As it is not a Patent Medicine, but the [illegible]ption of an eminent Physician, no one [illegible] fail to try the New Medical Salt. CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME and of SODA.

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all *stages of pulmonary disease* by Dr. Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value of this Discovery.—Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable* success. Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, as *speedily as possible*, into universal use, as I know that they will prove not only

As Pure a Remedy in Consumption as Quinine is in Intermittent Fever, but also as Effectual a Preservative as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases in the third or last stage, treated at my Dispensary, during the past year, eight have completely recovered, eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

This Remedy is the most powerful generator of Blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *facsimile signature.*

No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No Iron or other drug should be combined with them, or taken at the same time.

Price, $1.00, or three bottles for $3.00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 49 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S. on receipt of twelve cents in stamps to cover expense of postage. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

DR. JOHNSON'S HERB DISPENSARY!

OFFICE 95 MAIN STREET,

(*Corner Up Stairs, Buffalo, N. Y.*)

A NEW, SPEEDY AND MOST SUCCESSFUL MODE OF TREATING

Spermatorrhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Unrelenting, or unrelenting wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgic pains in various parts of the body, pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea, or Fluor Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named, have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflammation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own homes without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $5 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

I'm Obliged to You!

It is a capital thing to be obliging.—Who has not sung the praises of an obliging man or woman? What a deal of comfort there is in the words, "I'm obliged to you," but to receive them it is necessary to say something—if nothing more than a pleasant word; or do something—if nothing more than nod the head; or give something—if nothing more than cold victuals to a beggar To be blessed with "I'm obliged to you," one must be obliging. Nothing give, nothing get, holds good as well in thanks as in merchandise.

He who hears not the pleasant words, "I'm obliged to you," is truly to be pitied—he dont know what it is to feel the cheerful responce of a greatful heart.—Such a man gives nothing, and of course gets nothing in return, and more than likely goes through life complaining about an unthankful world, and wondering that the cheerful sunshine of grateful hearts do not brighten his path as well as that of others.

It is a great misfortune to become crusted over with selfishness so as to impart nothing, but hold everything that the law allows, and yield nothing to others but what inexorable law requires, It is a lonely life such a man lives, and he should be more pitied than blamed.

Nichols, the murderer of Blakeman, at Lancaster, N. Y., has been arrested at Detroit, Mich.,

Singular Freak.—An unmarried man by the name of Phillip Fezman, residing about a mile this side of New London, says the Rome Sentinel, came to his death a few days since, by the adoption of a singular and extraordinary freak. He lived with his mother, a widow woman, and about a year ago he took it into his head that he ought not to eat anything but bread and water; he lived on that diet alone until about five or six weeks ago, when he again took a notion that his hands were so dirty, that he ought not to eat bread; and water he would not drink only as he inspected it in the bucket as it came from the well; and sometimes he would require that a number of pailsful should be drawn and thrown away before he would drink. For forty-three days before his death, he eat not a mouthful as his mother is positive. He would wash his hands frequently for an hour at a time; whilst he lived on bread, he required that his part should be baked by itself, and then he would break off and eat it as he wanted it. When he became so weak that he could not go out, then he would inspect the water brought him. It was a singular freak; he was doubtless partially insane, although he talked pretty well on other subjects.

Going It.—On Wednesday of last week, passengers on the train known as the "Chautauque Express" of the Lake Shore Railroad, witnessed rather a novel incident—no less than a wedding. A party got on the cars at Dunkirk, including some who had been invited by the conductor, Mr. Haight—to witness the performance of the ceremony. The bride, if not fair, was certainly fat, and considerably past forty; while the groom was older—if not wiser—than the bride.—The train was put in motion, the gay groom and his blushing bride took their places, and the Rev. Mr. Edson, of Dunkirk, soon made them man and wife—literally at the rate of twenty miles an hour.

Fastidious.—Dr. Mackey says: "A peculiarity not so much of American newspapers as of American society, is that while marriages and deaths are invariably announced in their journals, births are excluded. On asking for an explanation, the answer of one person was that there was no reason, except ancient custom; whilst a second informent explained that it was considered indelicate to parade such matters before the public; but how a birth could be more indelicate than a marriage or a death was not stated.

Mr. McEwen, in Crittenden Co., Vt. has lately prepared his grave under his own supervision, thus literally complying with the injunction, "while in life prepare for death."

Country Boys.

Country lads often feel that their lot is a hard one. They see city-bred youngsters on their travels and their sprees at the age of fourteen! veritable young gentlemen, with a finished exterior, a cigar and a cane. The young farmer at the same age finds himself with a hoe in hand and a cheap straw hat on his head, sweating among the hills of corn. He is frequently envious of his city brother—whisking passed him in the cars with kid gloves, delicate ringlets, and plenty of money in his pocket.

Mind your corn, boy; hoe it out clean, keep steadily at the labor you have in hand, do it well, and in time your good days will come too. If you find farming is not suited to your taste, or your strength or circumstances, if you like mechanism better, or have a capacity for business, whatever eventually you may engage in, it is all the same, you have begun right. the city blades have begun wrong; and in due time you will see it. Their fathers and mothers will, in the end, see it too. Do not feel envious of the pleasures that a hot-house man enjoys; but remember, not in a malicious, but sober spirit, that such plants wither. By the time you have acquired fixed habits of industry and acquired a corresponding perfection of mind and body, your delicately reared cotemporary of the town begin to feel the debilitating effects of idleness and dissipation. He is not alone to blame for a weak body and a profitless mind; it is the result of a system; these he must endure for himself in his own person. His father may be a professional man or a merchant, or may be merely rich; the chances are fifty against one that the son will not replace his father. Such is the result of well settled experience; business falls into the hands of those who are most competent; it does not descend to heirs. It is the country boys after all who do the city business.

Observing men have often stated this fact; and inquire into the origin of Cleveland, or Boston, or New York, you will find it to be so. All external circumstances are in favor of the son of the clerk succeeding to the trade of the old firm; but the son seldom—almost never—dies in the position of a partner of the house.—Why is it? Simply because habitual industry is wanting, and habitual indulgence is not wanting. With all the external odds against it, the country furnishes the cities their principle business men. If intelligent, faithful and persevering, and above all, cheerful and contented, the chances are that the lad with the hoe will eventually do the business of the father of the lad in gloves, who is now luxurating in his travels.—*Ohio Farmer.*

Dress and Un-dress.—A Buffalo young lady attending a hop at Congress Hall, is thus described:

"Miss G—n—l—tham, of Buffalo, was dressed in a profound maroon, with lace danglers, a Chinese head-dress, and high-heeled slippers, with pink culminations.—She had an enticing swing to her drapery that captivated the entire male assemblage, and created envy among the angels—present. Her sister was pressed in a blue turban, with marabout feathers, her face exquisitely painted with lily white and carmine—the very rosiness of health and animation. She had a very low-necked dress and bare arms, with a little isthmus of a lace strap on each shoulder, to give the appearance of a connection. The ladies present stated very plainly that 'she didn't have enough clothes to go round,' while the gentlemen, one and all, declared that they did not see that she was *overdressed* in the least, and as far as they could see they were perfectly satisfied with her appearance."

President Making.—It is no use to talk about it's being too early; the "business" is begun in earnest, and the "machine" is at work with all its might and main. "Who is to be the next President?" is the inquiry of every newspaper leader, from Maine to Texas,—and the talk in every grog shop, up to Tammany Hall and down to the lager beer cellars. Happy country! Happy people! Happy "machine!"

Uncle Sam's Property Sold.—The Chicago Journal says that by order of the Superintendent Engineer, a few days since, the Harbor and U. S. property at Chicago was put up for sale. The prices it brought were as follows: The pile hammers were struck off at one cent per pound; a floating pile driver at $7,50; boats at $34 which cost $150, and everything else in proportion, the Government netting the enormous amount above mentioned.

Where the Pipes Come From.—A letter to the Petersburgh Express says:—The tobacco-pipe trade of this country is largely on the increase. The trade of one mercantile house in this county in pipes during the past year, amounted to $12,000. Men, women and children are at work in this trade, and many poverty stricken citizens are enabled now to realize by manufacturing pipes, enough of funds to make life comfortable.

Miscellany.

A man with carroty hair, which has prevailed in his family for severanl generations describes it as he-red-itary.

Michigan has produced a much larger crop of wool this year than in any previous year. The clop is estimated at three and a half millions of pounds. The average price is at 42c per pound.

Wm. G. Weed, Esq., of Albany recently ordered six coffins from an undertaker by way of a joke; but the undertaker took him at his word and he now has the "merchandise" on his hands. He proposes to donate the whole to the Republican Committee of Albany.

Speaking of sundry curious instances of marriages founded on remarkable dreams and simultaneous pre-sentiments, on both sides, a Providence paper advises the girls to give no heed to dreams or presentiments, but to listen to nothing but straight forward proposals from sensible young men.

The bids for the improvement of Black River, thirteen in number, varied from $3,809 to $9,900. The job is not yet let.

A spring has recently been discovered at Little Falls, the water of which is said to contain all the characteristics of the White Sulphur Springs in Virginia.

A Yankee schoolmaster, named Comstock, turned a drove of cattle into the corn-field of a farmer in Dubuque, Iowa, and during the confusion which this act created in the family, ran away with the farmer's daughter, and married her.

A singular freak of an insane girl, fifteen years of age, is noticed by the Chicago Press. During Thursday night, she took an infant sister from the bed where it was sleeping, and fled with it. Some hours afterwards, she was found in a corn-field in West Division, holding the child to her bosom. It had not been injured.

Some lawyers got into a quarrel in the course of a lawsuit, at West Union, Iowa, recently, and it required all the argument which an Attorney, the Sheriff, the Deputy, and some bystanders could draw from huge paws, billets of wood, &c., to quell the contention.

A steamboat has recently returned from a trip up the Missouri River to Fort Benton, a distance of three thousand miles from its mouth and only seventy miles from the sources of the Columbia River.

51,440 emigrants have arrived at New York, since January 1st, against 52,964 for a corresponding period in 1858.

Last Sunday, when the plate was being passed in church, a gentleman said to the collector,—"go on, I'm a dead head—I've got a pass."

STAR WRITING FLUID.

In bringing this Writing Fluid before the Public, the Proprietor knows he has a great deal to contend with, as there is so many spurious Inks manufactured that are utterly worthless, but I do not wish to say this is the only Ink and best in use. I will say that it is second to none, as my motto is, "Try it, if you like it—buy it." The superior qualities of this Fluid are, namely: It is decidedly a business Ink, and so permanent and ineffaceable, that even the test of Oxalic Acid cannot remove it from paper: hence its value to business men and the community. This Acid instantly affects most Inks, even that from the largest establishments. Arnold's of London, is gradually effected by it. Harrison's of Philadelphia, instantly disappears, while no effect upon the Star Ink is visible, till at last it is changed by the Acid to a reddish tinge, but remains ever afterwards as permanent and legible as ever. Test our Ink with a drop of the Acid, then test others' you will observe the result. There is but one other kind of Ink besides ours that will stand the test, that is thicker, redder and dearer than ours, or all of these combined, every one can see that the Ink which cannot be effaced, and then counterfeited by rogues as is often done on Bank Bills, Deeds, Wills, Records, &c., not only deserves but will command the custom of an enlightened community. As it is a Chemical preparation I challenge all competition. It flows more readily from the pen, will not mould, and is easily removed from the hands when stained. It needs only to be tried and you will buy no other kind.

NOTICES OF THE PRESS.

Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters, our editorial brethren have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.

GENERAL CHARACTER OF THE NEW YORK WEEKLY.

The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means We shall never publish a word or line, the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's Intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.

Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."

Our Mirthful Morsels, our Items of interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or in the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taken tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly"

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops, you do not lose advance subscriptions, sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.

OUR TERMS.

The price of the NEW YORK WEEKLY is FOUR CENTS, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $12. Postmaster and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty-five cents extra with every subscription, to pre-pay the American postage.

All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to.

BY TELEGRAPH.

Arrival the City of Washington.

St Johns, Aug. 28th.

The steamship City of Washington, Capt. Petrie, from Liverpool, Wednesday August 17th, and Cork on Thursday, Aug. 18th, arrived off Cape Race on Thursday afternoon at 2 o'clock. The City of Washington has upwards of 400 passengers and a full freight list.

She reports passing Wednesday 25th the steamship Circassian going East.

The City of Washington brings five days later European advices than those by the America, but we can only send to-night the meagre telegraphic report transmitted by the agent of the Associated Press, from Liverpool to Cork on the 18th, the day the City of Washington touched at the latter port.

Telegraphic advices from Paris state that the Zurich Conference is in daily session, but as yet has very little progress in the questions it has under consideration.

The young Grand Duke of Tuscany has arrived in Paris, and met with a very friendly reception from the Emperor.

It is stated from Paris that all the warnings hitherto given to the French newspapers by the Government are to be considered hereafter as nullities.

The time of the sailing of the Great Eastern from this port to Portland, which was originally fixed for the first of Sept., has been postponed to the 15th of Sept., owing to unavoidable delays in getting her ready for sea.

Owing to mismanagement somewhere, we have been able to get over from St. Johns to-night only the City of Washington report, together with the despatch which was telegraphed by our agent from Liverpool to Cork on the 18th, the day the latter touched at the latter port.

As the Nova Scotia line closed on this evening, undoubtedly after transmitting the above meagre dispatch, we were cut off from all opportunity of getting an explanation from our agent at St. Johns.

The dispatch announcing the passing Cape Race of the Bavaria, came to hand at the same time as the other, and consequently we are placed in the same state of uncertainty with regard to her advices. We do not know whether our agent at St. Johns has any on hand or not.

The Bavaria left Southampton on the 18th of August.

As the Nova Scotia line does not open on Sundays, we shall hear nothing from St. Johns until Monday.

August 27.

The steamship Bavaria, Capt. Taube, from Southampton on the 18th inst. passed Cape Race this Saturday morning at 10 o'clock.

OSWEGO, Aug. 27.

Second Despatch—The claim the election of Col. C. C. Medlar, as delegate to State Convention from the third Assembly District of Onondaga Co., and declare that Strong was put forward by the Soft and Douglas men to contest Medlars seat.

DR. M'LANE'S
CELEBRATED
VERMIFUGE
AND
LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,

PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and take none but *Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa.* To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

Scrofula, or King's Ev

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparill

the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "*impurity of the blood*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSI

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice*, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all *stages of pulmonary disease* by Dr. Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—*removes* all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success.* Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible,* into universal use, as I know that they will prove not only

As Sure a Remedy in Consumption
as Quinine is in Intermittent Fever, but also
as Effectual a Preservative
as Vaccination in Small Pox.

"*In no instance* have I found the remedy *fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two *cases in the third or last stage,* treated at my Dispensary, during the past year, *eight have completely recovered,* eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

☞ This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile* signature.

☞ No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

☞ Price, $1,00, or three bottles for $5,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 43 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postages. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

HERB DISPENSARY!

OFFICE 95 MAIN STREET,

(2d door, Up Stairs, Buffalo, N. Y.)

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgy pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea, or Fluor Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarly in the sexual organs, and arise from morbid excitement and chronic inflamation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $5 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

Roorback!

The clique who runs the Genesee Democrat are undoubted believers in the doctrine, that "a lie well stuck to is as good as the truth." The last issue of that beautiful print again puts forth, with the most unblushing effrontery, the assertion that Mr. Wilber was expressly designated as Chairman of the County Central Committee by the Convention at which the Committee was appointed. *The assertion is in its entire length and breadth, absolutely and unqualifiedly untrue*, as every member of that Convention very well knows, and no one knows *its entire falsity* better than its author in the Democrat.—The fact that it is manufactured for the purpose without the semblance of a foundation, constitutes, with him, no sort of objection to its repeated use, in carrying out his disorganizing projects.

We have before us the published proceedings of the County Convention of 1859, which on their face give very satisfactory evidence of the entire falsity of the statement. The profound logician of the Canal Department who gives force and expression to the incoherent ravings of his master, in the columns of the *Democrat* gravely insists that the Convention which appointed the committee, professed authority superior to avoid controlling that of the committee itself in the designation of its own Chairman! The bare statement of the proposition sufficiently establishes its absurdity. In as much, however, as the Convention never assumed the exercise of any authority or doctrine in the premises it stands as a mere "parliamentary" abstraction.

It will be observed then, as the final result of the severe mental cogitations and consequent logical conclusions of the logician aforesaid that our position of last week with reference to the entire regularity of the call for the convention of the first of September, is clearly conceded, as well as the converse of that position, that the call for the 10th is entirely irregular and unauthorized.

We ask our Democratic friends to note the fact that the argument of the Democrat expressly concedes *the abstract authority of the Committee over the subject* as claimed by us. This disposes of the whole question. The "Roreback" is altogether too transparent and its falsity quite too readily established, to answer the purposes for which it was invented.

The Great Humbug Exploded.

A writer to the N. Y. Times, from Niagara Falls, has "let the cat out of the bag" and exposed the Blondin hoax.—This writer is evidently indignant that the people should have been so humbugged, and therefore comes out and makes a clean thing of it, even against his interests, for he says he was making money out of it.—He gives the Buffalo local editors, jesse for keeping up the quiz, and intimates that the people who went to the falls to see the "feats" were so ashamed of being "sold" that they went away and claimed to have seen all that was promised in the bills. Growing indignant he says:—

"When it comes to asserting that Blondin cooks his dinner on a tight rope and feeds the passengers on the *Maid of the Mist* with omelettes dropped like manna from the sky, I must "speak out in meeting,' and say what none of the ten thousand imported dupes of our wonderful story can be expected in deference to human frailty to be the first to make known—that for aught I know there is no such person in the world, or at least in Niagara, as Mr. Blondin at all; that he has never crossed the Falls on a tight-rope, or a slack-rope, or on any rope at all but the string of a very long-bow; and that as the people of Niagara, Rochester, and the Western Railways of New-York have already made perhaps quite money enough out of their "jest's prosperity,' it is time that the thing should be put a stop to before foolish people elsewhere may be led into serious danger by attempting to rival feats that have never been performed.—Since the immortal "Moon Hoax" there has been nothing so successful I suppose in the way of a vast quiz as the rope-walking invention of a bright Niagara bar-keeper, with its echoes from Rochester and other places along our line of country.—As I have not been away from home during the whole Summer I think I am a tolerably credible witness; and I must, therefore, assure you that the whole of this wonderful series of stories has grown up out of a bet made by a person well known in this town that he could bring more people to Niagara in two weeks than the Fall had ever brought here in as many months."

Is there any Niagara Falls?—where is Faxon, where is Blondin? echo answers no where. This *is* a great country sure!

Horace Greeley in California.

We make the following extracts from the copious accounts of Mr. Greeley's appearance in California.

We hope the many and flattering attentions paid him will not make him vain, nor to put on airs on his return.

Correspondence of the N. Y. Tribune.

SAN FRANCISCO, Aug. 5, 1859.

The arrival of HORACE GREELEY has attracted more attention throughout the State than any other occurrence of the last fortnight. He arrived at Genoa, Carson Valley, on the 28th ult, and the next day reached Placerville, where he was received by a committee of citizens, and made the guest of the city or town. He spent three days there examining the adjacent country and the mining operations. On the 1st inst. about noon, he reached Sacramento, where in the evening he delivered an address on the Pacific Railroad, to a crowded audience in the Presbyterian Church, the largest hall in the city. While Mr. Greeley was in Sacramento he was the guest of the city, and was waited upon and honored so much that he had to beg to be spared.—His white coat (which the news papers say he has worn thirty years!) was an object of special attention.

Mr. Greeley has gone to Grass Valley, where, according to report, he is interested in a quartz mine, and from there he will go down to see the wonders of Mariposa County, viz., Col. Fremont, the Yosemite Valley, and the big trees.

It is expected that Mr. Greeley will make his appearance in this city about the 10th inst. A meeting is to be held this evening to appoint a Committee to receive him.

What the Papers say of him.

HIS APPEARANCE.—Mr. Greeley is about 50 years of age, stands nearly or quite six feet high and is tolerable broad in the shoulders. His hair is flaxen, and thinly scattered below the crown and around the back and sides of his head.—The top of his head is entirely bald.—His forehead is broad and massive. He wears a whisker under his chin, and has eyebrows so white and delicately defined that it is difficult at first sight to discover the existence of that ornamental portion of the face. His gait is peculiar. He lifts not only his feet, but his hips, when he walks and keeps his head bent some distance in advance of his body. These remarks are made, not in derision, but because so much has heretofore been said on this head by the Atlantic press that many of our people felt curious to know whether the facts, or a mere fiction, had been stated.

HIS BAGGAGE.—Mr. Greeley's baggage was taken in charge by one of the Committee of Reception at Folsom, and hung upon a hook in one corner of the car. It consisted of a leather carpet sack, containing his clothing; that world wide "old white coat" which, he says, he has had for thirty years—carried with him through Europe, wore while a Member of Congress, and has brought with him to California; a cotton umbrella, considerably worn, and a pair of blankets done up in an oil-cloth cover. In the parlor of the St. George Hotel, Mr. Greeley delivered a second brief speech, which we were not so fortunate as to hear.

From the Sacramento Union, Aug. 4.

Greeley has come and gone. He was here a little short of thirteen hours, during which time he had an informal levee, made a reception speech, partook of a special dinner, delivered an address, saw something of the city, opened and read his letters, partly arranged the programme of his journey through the State, and took a sufficient night's rest to enable him to be up at five the next morning, and take his seat in the stage which left the next hour for Grass Valley, a journey of between 60 and 70 miles, over a wearisome mountain road. This dispatch is characteristic of the man.

It is stated that in and about New York, no less than three hundred churches are closed the present month, owing to the absence of their Pastors, who are taking an airing in the country.

UP in Wales, Erie Co., they have been building a bridge this summer, and in addition to the usual sign, prohibiting a *man* to go faster than a *walk*, painted on each end, the traveller is pleased to read, in his approach, the following:

WALES.

☞ Hard Frost, June 5, 1859.

One Dollar fine, for crossing this Bridge, faster than a walk.

Reminiscences of Daniel Webster.

From the Personal Experiences of Rev. Mr. Milburn, the Blind Preacher.

The following conversation occurred at the dinner table where Mr. Webster for the first time met Colonel Preston, then a new Senator from South Carolina.—"Colonel Preston," said the great Massachusetts lawyer in his stateliest manner, "I am happy to greet you as a member of the body to which it is my pride and honor to belong, but I regret to see that Southern gentlemen so often stand aloof from me." Mr. Preston answered in polite and deferential terms, when the other continued: "The truth is, I am far more a Southern than a Northern man, and I think that I should be treated as 'hail fellow' by all my Southern colleagues." "May I beg to know," said the other, "the grounds upon which you make this claim." "Certainly," replied Mr. Webster. "In the first place, I am very fond of a horse race, and I believe the turf is a Southern institution. Secondly, I have in my cellar a hundred dozen of the best wine, unpaid for, and that I understand to be a trait of Southern life.—Thirdly, before daylight I shall be under the table, and I suppose you are willing to admit this to be a characteristic of Southerners." "Enough," shouted the other, laughing; "you have vindicated your claim to be my compatriot."

Some of my readers will recollect the exquisite manner in which Mr. Webster used to relate the following: One night, before railroads were built, he was forced to make a journey by private conveyance from Baltimore to Washington. The man who drove the wagon was such an ill looking fellow, and told so many stories of robberies and murders, that before they had gone far Mr. Webster was somewhat alarmed. At last the wagon stood in the midst of a dense wood, when the man, turning suddenly round to his passengers, exclaimed fiercely: "Now, sir, tell me who you are." Mr. Webster replied in a faltering voice, and ready to spring from the vehicle, "I am Daniel Webster, Member of Congress from Massachusetts." "What!" rejoined the driver, grasping him warmly by the hand, "are you Webster?" Thank God! thank God! You were such an ugly chap that I took you for a highwayman."

THE WILD DOG OF NIAGARA.—Have you ever heard of the wild dog of Niagara? Just below Suspension Bridge on the Canada side, and hanging over the river to a height of some 200 feet, rises for some distance a huge, broken and over-reaching precipice, which no human being could climb or descend without assistance. Near the surface of the water, and on the broken rocks, a large, noble looking, and peculiarly marked Newfoundland dog has been seen and heard, at various times within the past two years, and lately within a few weeks. This fact is authenticated by the testimony of many respectable and veracious eye witnesses, and as there is no way for the poor animal to return to civilized life and the amenities of human intercourse, he is subject of much curious speculation. He is a kind of Robinson Crusoe among dogs, and it is supposed picks up his precarious living from the fish and small animals on his "beat," which is only half a mile in length. His howling lamentations from the rocky recesses of his retreat are often heard at midnight, and a daring attempt to approach and save him was rendered fruitless by his ferocity. An additional romance has been thrown around his fate by the story that he is bemoaning his master whom he lost at the Clifton House, some two years since. It is probable that he (the dog and not the man) was washed ashore by the rapids, which sweep along here with terrific velocity. But whether an exile or a disheartened misanthrope, the poor castaway has the hearty sympathy of every one who approaches the spot and conjectures his probable fate.

FIRE.—Some scamps set fire to the wood lot of John Lawrence, East of the Bennington mountain, week before last, and great damage was done to the timber and land. Mr. Lawrence nearly lost his life in the endeavor to put the fire out.—About two hundred and fifty cords of wood were burned.

RATHER MIXED.—One of the editors of *The Spirit of the Times* says that a paper just received from Onarga Ill., says that a duel was lately fought between S. Knott and A. W. Shott. "The result was, Knott was shot and Shott was not. We would rather have been Shott than Knott." Who knows Knott?

THE HARVEST IN WISCONSIN.—The farmers of Wisconsin are rejoicing over their glorious crop of grain this year. The Ripon Star says that within a circuit of five miles about Ripon there can be seen from the top of Brockway College over 700 stacks of grain, and when a telescope was used there could be seen 1,404 stacks.—In some directions the limit of observation was only a mile, and in other directions farms were concealed from view. The Star thinks what was seen was less than one half of the product of the square of ten miles, with Ripon for the centre. There must then be 3,000 stacks, and farmers estimate a stack at from 100 to 300 bushels, which would make at least 500,000 bushels in sight, and the Star thinks there must have been in all that ten miles square, full 1,000,000 bushels. It adds:

Could we with facility extend that observation, it would take in a far greater extent in every direction equally as well loaded with Wisconsin's wealth, and would find an equal if not a greater amount in close proximity. It is almost beyond comprehension the amount of produce hereabouts in the hands of farmers; some of them counting in the item of wheat outside 8,000 bush. The breadth of ground sown has been large, and the average yield not far short of 30 bushels per acre—we think more—and all this is of a very superior quality, and secured in complete order. Truly, the husbandmen have reaped as they have sown; and well do they deserve it.

FOSSILS.—The excavation for the new grist mill at the head of the iron bridge, will turn up an abundance of interesting fossils. The rock to be excavated is principally among the Niagara shales, which have a wide reputation for the quantity and interesting nature of the organic remains imbeded therein. Six species of Trilobites, and nine species of Crinoidea, with as many shells which occur in no other rock in the State, it is said, are to be found in the shales hereabouts. Col. Jewett was here a little too early to be in at the resurrection of these tenants of a former world.

A disease is now raging among horses in Westchester county, which has proved fatal to a large number, among which are some of the most valuable in the county. Mr. William Cooper has lost no less than three valuable ones, and James Wilkins has also lost one of great value. When first taken they are unable to stand, and after a short illness die. As yet no remedy has been found for the disease.

OLD BACHELORS.—A Philadelphia paper says as the days grow shorter and colder, old bachelors become more restless and dissatisfied, and after a time a panacea is sought for in a pair of dimples, and a marriage certificate, and five hundred dollars worth of household furniture, and congratulates the clergyman that the coming winter is foreshadowed as one of unusual asperity, and "marriage fees will be plethoric."

STAR WRITING FLUID.

In bringing this WRITING FLUID before t Public the Proprietor knows he has a gre deal to contend with, as there is so man spurious Inks manufactured that are utter worthless, but I do not wish to say this is t only Ink and best in use. I will say that it second to none, as my motto is, "Try it, if y like it—buy it." The superior qualities of th Fluid are, namely: It is decidedly a busine Ink, and so permanent and ineffaceable, th even the test of Oxalic Acid cannot remove from paper: hence its value to business me and the community. This Acid instantly effec most Inks, even that from the largest establis ments. Arnold's of London, is gradually effe ted by it. Harrison's of Philadelphia, instant disappears, while no effect upon the Star Ink visible, till at last it is changed by the Acid a reddish tinge, but remains ever afterwards permanent and legible as ever. Test our In with a drop of the Acid, then test others' yo will observe the result. There is but one othe kind of Ink besides ours that will stand the tes that is thicker, redder and dearer than ours, a all of these combined, every one can see that th Ink which cannot be effaced, and then counte feited by rogues as is often done on Bank Bil Deeds, Wills, Records, &c., not only deserve but will command the custom of an enlightene community. As it is a Chemical preparation challenge all competition. It flows more read ly from the pen, will not mould, and is easily r moved from the hands when stained. Tall Corn and, Taller Apples.

Our readers must not expect much original matter in the HERALD to-day.—Judge Davis brought us in a basket of "Golden sweet" apples and they must be attended to—we hav'nt much time for any thing else. He also bore upon his shoulder a corn stalk, with two large ears of corn on it, which we think stands a head (and inches) taller than any our Niagara Co. friends can produce. Standing up against the wall, the head or tassel bows to the pressure of the seiling overhead, and every body knows the Herald office is especially adapted to specimens of the lofty and sublime, being nine feet and over. The ears are well developed, and twelve inches in length.

Judge Davis informs us that this is a fair sample of thirty acres he has in one field. It was planted late, and consequently, was not sufficiently up to be injured by the frost.

THE NEW YORK WEEKLY has now engaged a force of talent that cannot be rivaled by any establishment in the world!

NOTICES OF THE PRESS.

Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters, our editorial brethren have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.

GENERAL CHARACTER OF THE NEW YORK WEEKLY.

The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means. We shall never publish a word or line, the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's Intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.

Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."

Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.

Our Mirthful Morsels, our Items of interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or in the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taken tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly."

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops, you do not lose advance subscriptions, sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.

OUR TERMS:

The price of the NEW YORK WEEKLY is FOUR CENTS, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $17. Postmaster and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty-five cents extra with every subscription, to pre-pay the American postage.

All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to,

The Chiriqui Gold mines.

PANAMA, Aug. 18, 1859.

The *graven* images obtained from the Indian burying places in Chiriqui still continue to be our nine days' wonder, and the recent accounts received from that locality, together with the further arrival of a quantity of gold, has tended to keep up the excitement. Since I last wrote, a little coasting vessel has arrived, bringing about 100 or 150 pounds weight of the images in the hands of passengers. Those that I have seen were of finer gold than the first lot received here, and some of the figures were exceedingly well executed—indeed it is a pity to think that their ultimate destination is probably the melting-pot. Letters from the locality all state that the quantity of gold already obtained is very great, though the value is variously estimated, and all agree in stating that the number of "huaas" is sufficient to furnish employment to thousands of diggers for some time to come.

DR. M'LANE'S

CELEBRATED

VERMIFUGE

AND

LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,

PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS, Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros, will do well to write their orders distinctly, and take none but *Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa.* To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S New Medical Salt, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium, of the fluids in the body, the want of which is the sole cause of inflamation!

NOTICE TO INVALIDS! ! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia, Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more, no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*

Ask your neighbors about the *New Medical Salt*. If sick, try; if not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S NEW MEDICAL Salt is for sale in Batavia by H. W. Fellows and by all enterprising druggists wherever the Herald is As it is not a Patent medicine, but the prescription of an eminent Physician, no one Fusherified to try the New Medical Salt. Scrofula, or King's Evi

is a constitutional disease, a corruption of t blood, by which this fluid becomes vitia weak, and poor. Being in the circulation, pervades the whole body, and may burst ou disease on any part of it. No organ is free fro its attacks, nor is there one which it may n destroy. The scrofulous taint is variously caus by mercurial disease, low living, disordered unhealthy food, impure air, filth, and fil habits, the depressing vices, and, above all, the venereal infection. Whatever be its origi it is hereditary in the constitution, descendi "from parents to children unto the third a fourth generation;" indeed, it seems to be t rod of Him who says, "I will visit the iniqui of the fathers upon their children."

Its effects commence by deposition from t blood of corrupt or ulcerous matter, which, the lungs, liver, and internal organs, is term tubercles; in the glands, swellings; and on t surface, eruptions or sores. This foul corru tion, which genders in the blood, depresses t energies of life, so that scrofulous constitutio not only suffer from scrofulous complaints, b they have far less power to withstand the attac of other diseases: consequently, vast numbe perish by disorders which, although not scrof lous in their nature are still rendered fatal this taint in the system. Most of the consum tion which decimates the human family has i origin directly in this scrofulous contaminatio and many destructive diseases of the liver, ki neys, brain, and, indeed, of all the organs, ari from or are aggravated by the same cause.

CONSUMPTION CURED!

DR. CHURCHILL'S DISCOVERY

Winchester's Genuine Preparation of the chemically Pure Compound of the

HYPOPHOSPHITES

of LIME, and of SODA,

Originally discovered and prescribed by Dr. J. F. CHURCHILL, of Paris, as a Specific Remedy for

CONSUMPTION!

The extraordinary results obtained in all *stages of pulmonary disease* by Dr Churchill's new Treatment—the HYPOPHOSPHITES OF LIME AND OF SODA—removes all remaining doubt as to the *inestimable value* of this Discovery.—*Consumption is no longer to be regarded as an incurable malady.*

Many hundreds of physicians have already adopted this treatment with almost *invariable success*. Let no Consumptive delay a moment to try it. It is their last hope!

Dr. Churchill says:

"I am anxious that the HYPOPHOSPHITES should be brought, *as speedily as possible*, into universal use, as I KNOW that they will prove not only

As Sure a Remedy in Consumption
as Quinine is in Intermittent Fever, but also
as Effectual a Preservative
as Vaccination in Small Pox.

"*In no instance have I found the remedy fail to produce everything that could reasonably be expected from it.*

"Out of twenty-two cases *in the third or last stage*, treated at my Dispensary, during the past year, *eight have completely recovered*, eight have died, and six are still under treatment. *Such a result is altogether unparalleled in the annals of Medicine.*"

☞ This Remedy is the most powerful generator of blood known, and is equally efficacious in all forms of Debility, Asthma, Bronchitis, Nervous Diseases, Chlorosis, Dyspepsia,—or whatever depends on deficient vitality of the system.

Winchester's Genuine Preparation

is put up in large bottles with the following words blown in the glass: "Dr. J. F. Churchill's Hypophosphites of Lime and of Soda. J. Winchester, New York." Each bottle has also a *fac-simile* signature.

☞ No other can be relied on as the pure Hypophosphites. Unless perfectly pure, they are not only useless, but positively injurious. No iron or other drug should be combined with them, or taken at the same time.

☞ Price, $2,00, or three bottles for $5,00, with full directions for use. A liberal discount to physicians and the trade. The Dry Salts furnished to the profession. Single bottles in concentrated solution sent by mail, when specially ordered. Sold wholesale and retail at the Sole General Depot in the U. S., 43 John Street. Let no one deceive you, but purchase and use only "Winchester's Preparation."

Dr. Churchill's Work on Consumption

is now ready, and will be sent gratis to any Consumptive or Nervous sufferer in the U. S., on receipt of twelve cents in stamps to cover expense of postages. Also, circulars and all requisite information without charge. Let no one delay, for time is precious in so fatal a malady as consumption. Address,

DR. JOHNSON'S HERB DISPENSARY!

OFFICE 95 MAIN STREET,
(*2d door, Up Stairs, Buffalo, N. Y.*)
A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgy pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea or Fleur Albus, &c. Likewise Epilepsy, Hysteria and Nervous Spasms.

Now, in ninety nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarly in the sexual organs, and arise from morbid excitement and chronic inflamation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $5 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

N. B. *A word of explanation* to those who have known us under the style of Evans and Co. The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world-wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to protect the few who may be unacquainted with us, we would state that we have no connection with any other Gift—Book House—and though many advertise under the name of Evans & Co., the firm constituted by D. W. EVANS and J. H. PRESTON, is the first and only concern rightfully using the name. But to prevent all confusion in the future we shall use the style of D. W. EVANS & CO., and all persons wrongfully using the appellation to mislead the public, will be made to suffer the penalty of the law.

FEMALE DELICACY.—Above other features which adorn the female character, delicacy stands foremost within the province of good taste. Not that delicacy which is perpetually in quest of something to be ashamed of, which makes merit of a blush, and simpers at the false construction its own ingenuity has put upon an innocent remark; this spurious kind of delicacy is *far removed from good sense*; but the high-minded delicacy which maintains its pure and undeviating walk alike among women and in the society of men—which shrinks from no necessary duty, and can speak when required, with seriousness and kindness of things at which it would be ashamed to smile or blush—that delicacy which knows how to confer a benefit with out wounding the feelings of another—which can give alms without assumption, and which pains not the most susceptible being in creation.

TOUCHING.—A few days ago, a bright little girl of probably three or four summers, who recently lost her father, came up to Professor Wise at the Jones House, and said:

"Mr. Wise, won,t you take me up with you in your balloon?",

"Why do you want to go my dear?" replied the Professor.

"I want to see my papa," was the touching response.

A tear was visible in the aeronaut's eye as he assured her that it was impossible for him to take her high enough to see her dap.—*Lafayette Journal.*

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

Womans Vanity.—A French paper related the case of a young lady in Lyons, who was engaged to be married, and who was predisposed to corpulency. Some of her young friends ridiculed her stout figure, &c., which at the time only excited her laughter. Her health subsequently declined, and she finally died rather suddenly. As there was no apparent cause for such a quiet death, the account states, "with grief, the parents resigned themselves to having a post mortem examination. They then found what they had never before suspected; her intestines were burned up by acids, which she had taken unknown to them, to stop the growing fatness, which reduced her to dispair. The young girl died the victim of rediculous vanity."

The Sky Show.—The *aurora borealis* of Sunday night and Monday morning last, was unusually brilliant and visible over a large extent of country. The Philadelphia Press says that at the time of going to press, "the whole heavens were brilliantly illuminated with a corruscating light of many colors, crimson and purple predominating. Streams of light ascended from all points of the horizon, and met at the zenith in the form of a canopy, where they assumed the most fantastic shapes. A more beautiful sight could not be imagined." At Buffalo, the appearance was equally beautiful.

The New York Evening Post makes the observation that many of our burglars are under twenty years of age. This is a fact deserving of attention. When, some months since, young Rogers expiated his crime on the gallows, many advocates of the death-penalty were horrified at the idea of hanging a boy. But the fact is, that rowdyism, burglary, highway robbery, and murder, are common offences among the youth of the cities, and if transgression is to be visited with its appropriate penalties the boys should constitute no exception to the rule. If their conduct could be improved, our criminal calendar would speedily become abridged.

The President in A. D. 1900.—The boy is now living who will be President of the United States in 1900. He is about ten or twelve years of age. His parents are in humble circumstances, but of sterling traits of character, and their son is not one of those dirty, noisy boys that spend their days, evenings and sabbaths in idleness and rowdyism. On the contrary he is of a serious cast, is very studious, and withal is well behaved. Teacher, weigh well your responsibility! The future president may be in that grammar class that you think scarcely worthy of a respectful attention. What boy of all our readers will lay claim to this distinction? Recollect, the future President is not found amongst the Sabbath breakers, the everyidlers the evening rowdies, the blasphemous, the vulgar, or among those that love and make a lie. He is not one of those who pride themselves as being Young America, and despise the authority of a father, or break away from the gentle restaint of a good mother.

The Republicans Propose to "Shut the "Nigger."—The Republicans are fast coming to the conclusion that they have run the "nigger" portion of their capital into the ground and that the colored people and their real friends have at last found it out. Hence Senator Doolittle of Wisconsin, and other republican leaders are gradually advocating a colonization project, and the Albany Journal now comes out squarely, and speciously of course, for banishing the free negroes of the United States to some uninhabited quarter of the globe "in which they will possess the attributes of Freedom; whose soil and climate is suited to their constitution and habits; and where they can enjoy health, happiness and prosperity."

Behind the Age.—It was about the year 1800 that De Witt Clinton wrote to Thomas Jefferson that they had a plan in New York to connect by canal the Atlantic waters, through the Hudson River, with those of the Great Lakes. Jefferson, in his reply, stated that he was half a century too soon. About the year 1824 Clinton wrote again to Jefferson, who was then well advanced in years and afflicted with disease, and informed him that the enterprise had been accomplished, and that "about was run yesterday." Jefferson, who was not only a great but a frank man, replied: "It was I who made a mistake; I was fifty "years behind the age."

More Gold at Pike's Peak.

Special Dispatch to The Missouri Republican.

Atchison, Mo., Monday, Aug. 22.

A party of seven persons arrived here this morning from the Pike's Peak gold mines. They brought with them over one hundred ounces of gold. They report much sickness, but only a few deaths.—This party will return in a few weeks.

Leavenworth, Aug. 22,

The Overland Express has just arrived here from Denver City, bringing dates to the 12th instant. The news received is considered of an important character.

Rich discoveries have been made in the Medicine Bow Mountains, near the headwaters of the Cachee Poudre, which are situated one hundred and fifty miles northwest from Denver City.

Gregory and Detrees, the latter of whom is a member of the famous Indiana Company, left for the North on the 10th inst.

Great excitement still prevailed with regard to the discoveries about the headwaters of the South Platte.

Nearly a thousand persons from the Gregory Diggings passed through Denver City within forty-eight hours' time on the way to the above discoveries.

So intense was the excitement, and so eager were the miners to get off, that many left claims behind them that averaged $10 per day.

Advices from the South Park, or Colorado Diggings, continued to be favorable.

From Pike's Peak.—*The St. Louis Democrat* of Aug. 23, says: Pike's Peak gold is now arriving daily in small quantities, and we think the arrivals will increase very much in value this Fall. Two small parcels from Gregory's diggings were brought to-day by Clark & Bros., bankers. It is mostly scale gold, taken out with quicksilver, and sells at $15 @ $18 per ounce. The fact that gold is there in paying quantities is fully established, but machinery is needed to realize large fortunes. Mr. Charles Leslie, of Clinton, Pennsylvania, arrived at Omaha on the 14th, bringing over one thousand ounces of dust from Clear Creek. He thinks he has discovered far richer leads than have yet been worked, but is not disposed to communicate their locality. He states, however, that they are north or northwest of the Gregory diggings. This locality corresponds precisely with the latest discoveries made public, and which are reported as being extravagantly rich. Among numerous specimens of quartz brought by Mr. Leslie are several lumps weighing 8 or 10 pounds each, and estimated to contain between fifty and sixty dollars worth of gold.

Taking Children for Debt.—The Utica Herald tells of a singular occurrence that took place on board a Central Railroad train in that city last Thursday night.—The captain of the night watch, happening to be at the railroad depot, was applied to by a man named Harper to rescue his children from the custody of a man who had kidnapped them under the pretence that Harper *owed him money, for which reason he had seized the children.*—Captain Keiser went into the cars, asked the children if they desired to accompany Harper, to which they replied that they did, and that he was their father. Thereupon the officer delivered them up to their father, in spite of the boisterous threats of the abductor.

A young blood of Buffalo recently "wooed and won" a fair damsel, all on the sly, and induced her at length to consent to a runaway match. On the day appointed for celebrating the nuptials he sent a gaily caparisoned hack driver after his betrothed, who succeeded in insinuating himself into the good graces of the young lady to that extent that she married him in the short space of half an hour after seeing him. The jilted lover has given up marriage for the present, thinks he has had a narrow escape, and does not, therefore, contemplate suicide.

We noticed, the other day, the "left handed" compliment paid to Bennett of the Herald, by the N. Y. Tribune, when the latter nominated the proprietor of "the Satanic" for the office of Mayor of the city of New York. Bennett declines the "honor," on the ground that at present all political organizations are so corrupt that no honest man will consent to be a candidate, and he warmly urges the claims of Mr. Greeley upon his party, and his peculiar fitness for the nomination.

Richard Busteed—more familiarly known as "Dick Busteed"—the Corporation council for New York, has been on a visit to Judge McArthur, of Milwaukee.—The Milwaukee Sentinel of the 20th, says that an article in that day's issue was edited and set up by Mr. Busteed, "who, besides being an excellent lawyer and thorough good fellow, is also a practical printer."

Canada will have at present prices ten millions of dollars worth of wheat, oats, barley, rye, Indian corn, peas and flour, for export this season. In addition to this, there will be fifteen millions of dollars worth of lumber, and fish worth a million and a quarter.

ARRIVAL OF THE JASON.

Two Days Later From Europe.

St. Johns, N. F., Aug. 30.—The steamship Jason, Capt. Carter, of the Atlantic Royal Mail Steam Navigation Company, New York and Galway Line, from Galway on the 20th inst., passed this point this afternoon, enroute for New York, where she will be due on Saturday evening next.

The Jason brings Liverpool dates by telegraph of the 20th inst., two days later than those by the steamer City of Washington.

The political advices by this steamer, are not of special importance.

From Paris, we are told that the general amnesty recently announced by the Emperor, although it had created much surprise, nevertheless gave great satisfaction to all classes.

Louis Blanc, however, flatly refuses to place himself again under French jurisdiction.

In addition to the civil pardons, numerous military sentences had also been commuted.

It is officially announced that the Empress Eugene is again *inciente.*

Advices from Italy state that the National Assembly of Tuscany, had formally declared that the dynasty of Hapsburgh-Loraine, could not be recalled.

The National Assembly of Modena are also taking strong grounds in behalf of National liberty.

M. Could had accepted the dictatorship of Parma.

Cardinal Antonelli had resigned the Presidency of the Council of Rome, but retains the Secretaryship of State.

The steamship Great Eastern was to leave the Thames on the 2d of Sept. for Portland, in Dorsetshire, and thence proceed on her trial trip, and return in season to take her departure from Holyhead for America on the 15th, as already announced.

Calcutta advices to July 16 by the overland mail have been received in London. They contain the announcement that the King of Oude, who was seized during the Indian war, and been detained in captivity ever since, has been finally released by the Indian government.

The Wyoming County Mirror in recounting the attractions to be offered at the County Fair, says there will be a grand display of female equestrianism, and adds: "Among the riders will be the acknowledged star of lady equistrians in Western New York—a young lady who, for gracefulness, rapidity and terrific daring is not excelled. She will ride on a horse of her own training from a colt."—This "young lady" would be a valuable partner for a circus rider.

A man named Gardner, of Oswego, has an apparatus for walking upon water. He walked out on the Lake, Thursday. He proceeded with a swinging gait, his body swaying to and fro as he stepped. A short distance from the shore the apparatus was hardly discernable. His progress was about the same as in ordinary walking on land.

A Warning to Fruit Eaters.—Geo. Baxter died at Buffalo last week, and the doctors held a post mortem examination. He had been taken violently sick immediately after eating some plums, and it was found, upon opening the abdomen, that a stone of one of the plums had perforated one of the large intestines, causing excessive inflamation and consequent death.

A gentleman in Lockport, has ordered a model steamboat to be built for him at Buffalo. He intends to make a trip with it to Texas where his friends reside. The boat is about forty feet long, seven feet beam and eleven feet over all. The engine is to be eight horse power. The boat, when finished, will cost about $800.

The Philantropic Convention for the purpose of considering the cause and cure of evil, which held its first meeting in Utica in September last, will hold its second annual assemblage in Buffalo, on the 16th, 17th and 18th of September.

STAR WRITING FLUID.

In bringing this Writing Fluid before th Public, the Proprietor knows he has a gre deal to contend with, as there is so man spurious Inks manufactured that are utter worthless, but I do not wish to say this is th only Ink and best in use. I will say that it second to none, as my motto is, "Try it, if yo like it—buy it." The superior qualities of th Fluid are, namely: It is decidedly a busine Ink, and so permanent and indelible, th even the test of Oxalic Acid cannot remove from paper; hence its value to business me and the community. This Acid instantly affec most Inks, even that from the largest establis ments. Arnold's of London, is gradually effe ted by it. Harrison's of Philadelphia, instant disappears, while no effect upon the Star Ink visible, till at last it is changed by the Acid a reddish tinge, but remains ever afterwards permanent and legible as ever. Test our in with a drop of the Acid, then test others' yo will observe the result. There is but one othe kind of Ink besides ours that will stand the tes that is thicker, redder and dearer than ours, a all of these combined, every one can see that th Ink which cannot be effaced, and then counte felted by rogues as is often done on Bank Bill Deeds, Wills, Records, &c., not only deserve but will command the custom of an enlighten community. As it is a Chemical preparation challenge all competition. It flows more read ly from the pen, will not mould, and is easily re moved from the hands when stained. It need only to be tried and you will buy no other kin

LOCAL MATTERS.

Court of Oyer and Terminer.

A special term of this Court convened on Monday, and proceeded to empannel a Jury for a new trial of the case of POLLY FRISCH, charged with the murder of her child by the administration of arsenic.—It will be remembered that a new trial was granted in this case on the ground of some irregularity in the proceedings at the last session of this court, when a verdict of guilty was obtained.

Yesterday the testimony of some ten witnesses was gone through with, and it would seem that the case will be again submitted to the jury at an early day.

HORSE TAMING.—We stepped in a few moments yesterday to see Prof. Rarey subdue a wild young horse brought in for the purpose. We were told that previous to Prof. Rarey's attempt, the animal had chased a number of persons out of the yard and was in every respect a vicious bad tempered animal. While we were in, Prof. Rarey caused the animal to lie down, and then sat upon his shoulders and upon the haunches, and to all intents seemed to have gained perfect controll of the beast.

Prof. Rarey claims that the basis of his system rests upon the fact that the horse is thoroughly honest and never runs without being frightened, or kicks unless excited from motives of self defence. To break the horse of these vicious habits, it is only necessary to show to the animal that there is nothing to fear. To be able to teach the horse is the art.

Among its Regular Contributors will be found the names of some of the best male and female writers in the United States! Such writers as Justin Jones, (Harry Hazel,) Augustine J. H. Duganne, William Earle Binder, Harry Hazleton, James Reynolds, Francis S. Smith.

Mrs. Mary J. Holmes, Helen Forest Graves, Mary C. Vaughan, Margaret Verne, Anna Raymond, Eda Mayville, Write for it regularly, while a score of other well known writers occasionally contribute to its columns.

THE NEW YORK WEEKLY has now engaged a force of talent that cannot be rivaled by any establishment in the world!

NOTICES OF THE PRESS.

Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters, our editorial brethren have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.

GENERAL CHARACTER OF THE NEW YORK WEEKLY.

The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means. We shall never publish a word or line, the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's Intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.

Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."

Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.

Our Mirthful Morsels, our Items of Interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or at the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taken tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly"

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops, you do not lose advance subscriptions, sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.

OUR TERMS:

The price of the NEW YORK WEEKLY is FOUR CENTS, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $12. Postmaster and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty-five cents extra with every subscription, to pre-pay the American postage.

All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to,

The Proprietor of the Great American Shoe Store, No. 2 Odd Fellows Hall, south side Main street, nearly opposite the Post Office, claims to be the inventor of the cheapest and best mode of advertising in the world. He claims to be the manufacturer of

DR. M'LANE'S

CELEBRATED

VERMIFUGE AND LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public, We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,

PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and *take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa.* To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium, of the fluids in the body, the want of which is the sole cause of inflamation!

NOTICE TO INVALIDS!! The following forms which the unballanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*.

Ask your neighbors about the *New Medical Salt*. If sick, try it; if not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S NEW MEDICAL Salt is for sale in Batavia by H. W. Fallows and by all enterprising druggists wherever the Herald is read. As it is not a Patent Medicine, but the prescription of an eminent Physician, no one should fail to try the New Medical Salt. For [illegible] testimonial and directions see circular.

Dr. Coggswell's Antiphlogistic Salt.

ACUTE PACKAGES, $1.00; CHRONIC $2.00.

Sent by mail free of expense on receipt of price.

GRAPE GROWERS CAN CARRY on their business most successfully at Hammonton, free from frosts; some forty vineyards set out the past season; see advertisement Hammonton Lands, another column.

Scrofula, or King's Evil

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S
Compound Extract of Sarsaparill

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER, and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "*impurity of the blood*," is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills

FOR ALL THE PURPOSES OF A FAMILY PHYSI

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice*, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectora

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

DR. CHURCHILL'S REMEDY

FOR THE PREVENTION AND CURE OF

CONSUMPTION.

WINCHESTER'S

GENUINE PREPARATION OF THE

HYPOPHOSPHITES

OF LIME AND OF SODA,

The Specific Remedy for Consumption, Chronic Bronchitis, Asthma, Scrofula, Dyspepsia, General Debility and all Nervous Diseases.

The success of this NEW REMEDY (discovered by Dr. Churchill of Paris) is obtaining for it the most UNPRECEDENTED POPULARITY throughout Europe and the United States. It is a purely SCIENTIFIC PREPARATION and acts with INVARIABLE EFFICACY in all stages of Pulmonary and Nervous Diseases. The *Hypophosphites increase the Principle which constitutes nervous force, and are the most powerful blood generating agents known.*

The Cure of Consumption,

In the second and third stages (of a period, consequently, when there can be no uncertainty as to the nature of the disease) can be obtained, IN ALL CASES by this treatment, except when the existing lesion of the lungs is of itself sufficient to produce death.

This REMEDY has not only a curative effect, but will, if used whenever there exists a suspicion of the disease, PREVENT ITS DEVELOPMENT and thus act AS A PRESERVATIVE WITH REGARD TO CONSUMPTION, JUST AS VACCINATION DOES WITH REGARD TO SMALL-POX.

Professional Correspondence.

"COLUMBUS, OHIO, Aug. 5, 1859.—I have been treating this disease for twenty-five years, and have derived more satisfaction from the use of the HYPOPHOSPHITES *than from all other forms of medication combined.*"

"MANCHESTER, MASS., Aug. 9, 1859.—I have used the Hypophosphites in my practice *with very happy effects*—so much so that I WOULD NOT BE SATISFIED TO REMAIN WITHOUT THEM."

"MIDDLEBURY, VT., Aug. 8, 1859.—I believe the Hypophosphites used in the manner and way Dr. Churchill used them, WILL CURE CONSUMPTION."

"SHEPHERDSTOWN, VA., Aug. 13, 1859.—I have prescribed the Hypophosphites in several cases, and *am delighted with its effects.* IT IS ACCOMPLISHING WONDERS.

"LORAIN, O., July 2, 1859.—I have used in all about forty bottles, and in but one instance have they failed to benefit the patient and that was a hopeless one before I was called. I have had several cases given up by attending physicians, WHO ARE NOW ENJOYING COMPARATIVELY GOOD HEALTH, and EXEMPT FROM ALL THE SYMPTOMS of pulmonary disease. I have used the Remedy in my own case *with decided success.* It was regarded as incurable by physicians and friends, and I was, by myself, under the 'cod treatment.' I am now able to ride, in attending on the sick, as many miles, perhaps, in a day, as any other physician in the county."

"CHATHAM, PA., June 28, 1859.—I received the twelve bottles of Churchill's Remedy for Consumption. * * * IT HAS WORKED A CHARM IN EVERY CASE.

CONSUMPTIVES, in any stage of the Disease, should resort *immediately* to the use of the HYPOPHOSPHITES OF LIME AND SODA. "WINCHESTER'S GENUINE PREPARATION" (in [illegible]), in extra large bottles, is "chemically pure," is the combination proposed by Dr. Churchill "for general use," and is prepared according to his *original Formula.*

Dr. Churchill's Work on Consumption, Comprising his Report made to the Imperial Academy of Medicine, Paris; Notes of Cases and Letters, Documents, Testimonials, &c., together with a Circular, will be sent on receipt of TWELVE CENTS in stamps.

CAUTION.—Interested Druggists will try, to sell you *other preparations of no value.* Do not buy them! My "Genuine Preparation" bears my *fac simile signature.*

Beware of all Preparations claiming to be the Hypophosphites, which contain IRON, or any DRUG. The country is likely to be flooded with spurious preparations. By writing to me, you obtain information that will prevent any deception being practised upon you.

PRICES.—One Bottle, $2; three Bottles, $5; Concentrated Solution, by mail, post-paid, $2. Sold Wholesale and Retail at the Sole General Depot in the United States, (where all orders should be addressed) by

DR. JOHNSON'S HERB DISPENSARY!

OFFICE 95 MAIN STREET,

(2d door, Up Stairs, Buffalo, N. Y.)

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgy pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea, or Fleur Albus, &c. Likewise Epilepsy Hysteria and Nervous Spasms.

Now, in ninety nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflammation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $5 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

N. B. *A word of explanation* to those who have known us under the style of Evans and Co. The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world-wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to protect the few who may be unacquainted with us, we would state that we have no connection with any other Gift Book House—and though many advertise under the name of Evans & Co., the firm constituted by D. W. EVANS and J. H. PRESTON, is the first and only concern rightfully using the name. But to prevent all confusion in the future we shall use the style of D. W. EVANS & CO., and all persons wrongfully using the appellation to mislead the public, will be made to suffer the penalty of the law.

THE DAILY HERALD.

ONLY SIX CENTS A WEEK.

The World, The Flesh and the Devil.

My first wife was a lady whose dominant passion
Was thorough devotion to parties and fashion;
My second, regardless of conjugal duty,
Was only the worse for her wonderful beauty;
My third was a vixen in temper and life,
Without one essential to make a good wife;
Jubilate! at last in my freedom I revel,
For I am clear of the *world*, the *flesh* and the *devil!*

THE TYRANY OF FEMALE "HELP."—"We are a conquered people," said Washington Irving, in reference to our slavery to domestics; and bitter groans from the vanquished reach our ears continually. A writer in the Perth Amboy *Journal* recommends that lady housekeepers make a strike; or if that cannot be done, (as it certainly cannot) that the young ladies of a family may be less dependant on servants. "I believe physical labor," says the writer, "to be as necessary to the developement of human intellect as stirring and cultivating the soil is necessary to perfecting the plant. In Germany, where certainly intellect and literary acquirements are pre-eminent, the ladies, even among the noble, spend the early part of each day in their kitchens, which are fitted up with the most scrupulous order and elegance, so that they can allow a friend to see them so occupied. In France, every lady understands the mysteries of the *cuisene*, and with a small furnace filled with charcoal, a frying-pan and a skillet, will perform miracles of cooking."

THE GROVER & BAKER Sewing Machine Co.

Having greatly increased their facilities for manufacturing their CELEBRATED FAMILY MACHINES, with all the recent improvements, have reduced their prices, and offer for sale

A NEW STYLE MACHINE,

PRICE $50.

It is no longer questioned that these Machines are the best in use for family sewing. They

HEM, FELL, GATHER, AND STITCH

in the most superior manner, and are the only machines in the market that are so well and simply made, that they may be sent into families with no other instructions than are contained in a circular which accompanies each machine, and from which

A CHILD OF TEN YEARS

may readily learn to use them, and keep them in order. They make upwards of

FIFTEEN HUNDRED STITCHES A MINUTE

and will do the sewing of a family cheaper than a seamstress can do it, even if she works at the rate of

ONE CENT AN HOUR.

Is there a husband, father, or brother in the United States who will permit the drudgery of hand sewing in his family, when a Grover & Baker Machine will do it better, more expeditiously, and cheaper than can possibly be done by hand?

Growing Tea in America.

Concerning the tea culture, the WashingtonStar says: 'A letter has recently been received by the Commissioner of Patents, from Mr. Robert Fortune, London, in which, after congratulating the Commissioner on the great success which has attended the efforts to propagate the tea plant in this country, from the seeds which were forwarded by him from China, remarks that as much has been done in one year for the United States as was done in three for the Government of India, owing to the experience which time and opportunity has given him. He trusts that many of the other vegetable productions which he sent have also been raised, as they would doubtless succeed admirably in some parts of our large dominion. He will, he says, take great pleasure in answering the carefully drawn up questions proposed by the Commissioner. He has no doubt, from his experience in China, that he will be enabled to give such answers as will prove valuable to all who desire to attempt the cultivation of tea in the United States."

SHORT ANSWER.—Barnum is said actually to have offered Mr. Spurgeon, the celebrated English Baptist preacher, $2,000 a. year to come to America and make a lecturing tour. Mr. Spurgeon replied by writing simply, "Acts, xiii: 10," and sending it to Barnum. The verse reads thus: "O, full of subtilty and all mischief, thou child of the devil, wilt thou not cease to pervert the right ways of the Lord?"

The Central Railroad Company have decided to transport all animals intended for exhibition at the International Horse Fair, which takes place in Buffalo next month, free of charge.

A malignant type of dysentary which has prevailed in and around the village of Camden, Oneida Co., has caused a number of deaths. Mr. and Mrs. Whitfield lost their three children from it, all in one week!

FELL OVER.—We learn that a man fell over the Genesee Falls at Rochester yesterday. He had gone to see De Lave walk the rope. He undoubtedly seen more than he sought for.

The editor of the Wyoming *Times* acknowledges the receipt of a basket of green apples and a pitcher of lemonade! What bowels do the donors think the editor possessed of?—*Exchange.*

Bowels of compassion of course.

ADVANTAGES OF WOMEN OVER MEN.—Some one sums up the advantages of women over men as follows: "A woman may say what she pleases to you without being knocked down for it. She can take a snooze after dinner, while her husband has gone to work. She can go forth into the street without being invited to treat at every coffee-house. She can paint her face if it is too pale, and flour it if too red. She can stay at home in time of war, and wed if her husband is killed. She can wear corsets if too thick—other fixings, if too thin. She can eat, drink and be merry, without costing a cent. She can get divorced from her husband whenever she sees one she likes better. She can get in debt all over, until he warns the public, by advertisement, not to trust on his account any longer."

RATHER HASTY.—A Mrs. Peters, of Franklin county, Ohio, recently "went off dead," as her husband supposed. Feeling too acute grief at the sight of his beloved partner's corpse, he obtained a coffin in great haste, placed her in it himself, and buried her beneath the turf. But the neighbors did not approve of such "haste, post-haste;" and so the coffin was opened, and Mrs. Peters, who was found to be only in a sort of fainting fit, was resuscitated and is in a *fair* way of recovery. Mr. Peters had now better bury himself, for his domestic peace will doubtless suffer gravely from this incident.

CAVING OF THE BANKS OF THE MISSISSIPPI RIVER.—The following letter from a planter of West Baton Rouge to *The Advocate*, describes a singular and remarkable caving of the banks of the Mississippi River in that Parish. The writer says:—

"About three hundred yards below the point known as LeBlanc's, the caving began about sun up, and when I arrived there, at 8 o' clock, it had gone in about half an acre in depth and was crumbling in rapidly. The noise made by the crumbling of the earth was so continuous that it resembled distant thunder. When I returned at sundown it had taken in the house of the widow Godosu, at least an arpent from the bank, she having but barely time to escape, having saved only half her furniture. It had also taken in a large oak tree behind the house, at least 75 feet in hight, which had disappeared entirely, and the caving extended back to an old gin some distance in the rear.—Upon measuring with a line the next morning, the depth at the mouth was found to be 80 feet; over where the house stood it was 75 feet, and 50 feet as near the bank where it had caved as it was safe to approach. By the known lines of the proprietors in front, it is about 180 to 200 feet wide, and 260 steps or 700 feet in depth.

SLY BUT NOT WISE.—The Mannsfield Herald is informed of a most strange event which occured a few days ago in the Northern part of Richland county. It seems that a man, whose name was not learned, recently returned from California, where he had been for several years. His sojourn there had been quite profitable. A week or two ago he reached home, with between $15,000 and $16,000 in gold coin. Feeling it unsafe to keep so much money about the house, and doubting the honesty of banks, the fortunate gold hunter concluded to deposit in the same bank from which it was taken. Looking around, he finally discovered an eligible place to hide it, and accordingly did so. Being very suspicious, he never informed his friends of its hiding place. His mother insisted upon knowing, and at her repeated solicitation, he at last promised to take the money up and rehide it—taking her along that she might know the spot. Unfortunately, however, the man went out that day, riding a young and fractious horse, becoming frightened, threw him off and *broke his neck.* Of course, no one can tell where the money is. Great numbers of persons have been searching for it, but up to the present time unsuccessfully.

In England, the servants are kept for years; a good servant considers her interest indentified with that of the family with whom she resides, and seldom changes; this promotes an attachment between them, which is frequently preserved for generations, and the families of the same domestics will, for successive generations, live with the same families.

How is it in the United States? The young ladies are most generally brought up with no culture. Their habits are indolent, as regards bodily exertion, and they think making any exertion degrading. This being the case, they are thrown completely in the power of a class who, are at once promoted to the office of regulators and arbiters at home.

NEWSPAPER PUFFS.—The "local" of one of our exchanges gives the following schedule of tolls for the benefit of those who read and seek after his "puffs:"

"For a modest puff, three juleps; a tolerably good one, one box cigars; a good one, one pair boots; a very good one, one vest and two shirts; a 'splendid' one, one cloth-coat; a perfect one, a whole suit."

People who are daily soliciting gratuitous "puffs," and when they have any little patronage to bestow, take it to another office, will please notice.

A schoolmaster, as a punishment to one of his pupils for using profane language, ordered him to take a pair of tongs and watch a hole in the hearth until he had caught a mouse. The boy took the tongs and demurely waited for the visitor. Directly after he saw a mouse peeping out of the hole. Cautiously placing a leg of the tongs on either side of the hole, he grasped the mouse, and triumphantly swinging it aloft exclaimed, "d——d if I haint got him!"

The Commencement exercises of the Ladies' Department of Oberlin College took place on the 23d. The young ladies were dressed in white, with green garlands about the waist, and as they marched to the church with heads uncovered, the effect is said to have been most charming and impressive. The Graduating Class numbered twenty-five, being much the largest class that has ever gone out from the institution.

Formerly women were prohibited from marrying until they had spun a set of bed furniture, and hence were entitled spinsters until married. A morose old bachelor at our elbow remarked: "Nowadays they spin street yarn!" We "looked daggers" at him, of course, as every body knows we don't like to hear ill natured remarks about the ladies.

Miscellany.

There was frost at Schodack, five miles from Albany, Monday night.

The Utica Herald says that "it is currently reported that the Hon. Daniel E. Sickles and lady have declined the invitation of the Hon. Gerrit Smith to visit Peterboro."

The Hon. Amos Kendall of Washington reached his seventieth year on Tuesday last, on which occasion he was visited and congratulated by a number of friends in that city.

The death of Wm. H. Jewett, Esq., a respected citizen of Skaneateles, is announced.

How Girls are Raised Now a Days,

The following is from the pen of a young lady graduate of a female college in Missisippi. Read and reflect upon it, ladies, young and old; it contains suggestions which, if properly heeded, will prevent much grief and many tears:

"It is astonishing that, at this advanced age, when we see everything has a tendency to reformation, there are such sad mistakes in the way girls are raised now a days.

"The time was when girls toiled like old women, wore dresses spun and woven by their own hands, assisted in household affairs, rising at day in the morning, retiring early at night; but *now*, if they can arrange their toilet by nine o'clock, and appear with eyes wide open at the breakfast table they look for some one to speak an encouraging word relative to their industry.

"They think it nothing out of the way to take a nap in the afternoon to refresh their bodies, so wearied by an hour's practice on the piano or humming a little air from the opera, accompanied by the guitar. They will cover their hands with a little hide—called by the fastidious kids or gauntlets—smother themselves in long-eared bonnets, daub white lead on their faces, in order to elicit sympathy from some, and, on the other hand, serves as a bait for compliments from those who think colorless faces beautiful. One will exclaim, 'Her face is of alabaster whiteness;' another, equally as shallow, exclaims, 'Her face is like Parian marble,' and *she*, so elated at her success, in plastering on these shameful cosmetics, lengthens her hook and line, empties her papa's lard keg to make a favorite pomatum for the hair.

"They will indulge in late hours, flattering Mr. Dick So-and-So, or Tom; *they* tell her she is pretty, smart, and good, and *she*, so delighted that she could sit until daybreak without the shutters to the windows of her soul having any disposition to close, goes to school the next day and cannot say any lessons, thinks entertaining beaux better business than studying.

"The girls now-a-days are very extravagant; to be *anybody* you must dress—dress. No matter how much you load on the finery, put rings on your fingers, and bells on your toes, if it is only the fashion. Nothing is beautiful now unless it is inlaid with pearl and overlaid with gold.

"Away with such folly, girls; think less of the cart-wheels on your fingers! lay aside your superabundance of riband and lace gear; go to board work; learn your books, and have more Anglo-Saxon common-sense to boast of."

STAR WRITING FLUID.

In bringing this WRITING FLUID before the Public the Proprietor knows he has a great deal to contend with, as there is so many spurious Inks manufactured that are utterly worthless, but I do not wish to say this is the only ink that [illegible] in use. I will say that it is second to none, as my motto is, "Try it, if you like it—buy it." The superior qualities of this Fluid are, namely: It is decidedly a business ink, and so permanent and ineffaceable, that even the test of Oxalic Acid cannot remove it from paper; hence its value to business men and the community. This Acid instantly affects most Inks; even that from the largest establishments. Arnold's of London, is gradually effected by it. Harrison's of Philadelphia, instantly disappears, while no effect upon the Star Ink is visible, other than it is changed by the Acid to a reddish tinge, but remains ever afterwards as permanent and legible as ever. Test our ink with a drop of the Acid, then test others' you will observe the result. There is but one other kind of Ink besides ours that will stand the test, that is thicker, redder and dearer than ours, or all of these combined, every one can see that the Ink which cannot be effaced, and then counterfeited by rogues as is often done on Bank Bills, Deeds, Wills, Records, &c., not only deserves but will command the custom of an enlightened community. As it is a Chemical preparation I challenge all competition. It flows more readily from the pen, will not mould, and is easily removed from the hands when stained. It needs only to be tried and you will buy no other kind.

THE

NEW YORK WEEKLY,

A HANDSOME QUARTO PUBLICATION,
BEAUTIFULLY ILLUSTRATED,
IS NOW UNIVERSALLY ACKNOWLEDGED TO BE

THE BEST STORY PAPER IN THE WORLD!

Among its Regular Contributors will be found the names of some of the best male and female writers in the United States! Such writers as Justin Jones, (Harry Hazel) Augustine J. H. Duganne, William Earle Binder, Harry Hazleton, James Reynolds, Francis S. Smith.

Mrs. Mary J. Holmes, Helen Forest Graves, Mary C. Vaughan, Margaret Verne, Anna Raymond, Eda Mayville. Write for it regularly, while a score of other well known writers occasionally contribute to its columns.

THE NEW YORK WEEKLY has now engaged a force of talent that cannot be rivaled by any establishment in the world!

NOTICES OF THE PRESS.

Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters, our editorial brethren have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.

GENERAL CHARACTER OF THE NEW YORK WEEKLY.

The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means. We shall never publish a word or line, the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c., &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's Intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.

Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."

Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.

Our Mirthful Morsels, our Items of interest, etc., etc. In a word its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or in the counting room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are, at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taken tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly."

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops, you do not lose advance subscriptions, sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.

OUR TERMS:

The price of the NEW YORK WEEKLY is FOUR CENTS, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $12. Postmaster and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty-five cents extra with every subscription, to pre-pay the American postage.

All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to.

DR. M'LANE'S

CELEBRATED

VERMIFUGE AND LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,
PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and *take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa.* To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other) by producing an equilibrium, of the fluids in the body, the want of which is the sole cause of inflammation!

NOTICE TO INVALIDS!! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*

Ask your neighbors about the *New Medical Salt*. If sick, try; If not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S NEW MEDICAL Salt is for sale in Batavia by H. W. Fellows and by all enterprising druggists wherever the Herald is [illegible] As it is not a Patent [illegible]edicine, but the [illegible]ption of an eminent Physician, no one [illegible] fail to try the New Medical Salt. for [illegible] testimonial and directions see circular

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER, and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "*impurity of the blood,*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures, and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from a disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice,* and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness, and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

BATAVIA, Thursday, September 1st.

OFFICIAL PAPER OF THE COUNTY

FANDANGO AT STAFFORD!

THE WORTHY TRIO.

He who fights and runs away,
May live to fight another day.

That unequalled political *nosegay*—uniting the combined attractions with the concentrated fragrance of the presiding genius of the defunct "Genesee Mutual"—the Ex-Canal Commissioner and *creditor at large* of the State of New York, and the lesser half of the "head" of the Batavia Female Seminary—made a formidable descent on Thursday evening, upon the quiet town of Stafford, for the purpose of holding a general Horticultural exhibition! The entertainment, considered in all its diversified ramifications, was decidedly "rich, rare and racy." As indicating the general character, or rather the utter want of character, of the political operations of this *ex*-tinguished Trio, in their missionary perigrinations throughout the county during the present canvass, it deserves at least a passing notice.

It seems that at a late hour in the day, it by some means "leaked out" that "free passes" had been issued by the managers to a *very* select few of the admirers of the fine arts of the town of Stafford, to attend an exhibition of the description referred to, where they might behold with the naked eye the genuine "century plant"—of the Genesee Mutual—admire its elegant proportions and inhale its exhilerating fragrance—"free grati for nothing" under the enlivening strains of appropriate explanatory remarks by the "Chief" and O'Brien!" At the appointed hour, the principal assembly room of the village hotel was properly illuminated for the occasion, by order of the committee of arrangements, and the "chief" and "O'-Brien" appeared upon the scene, with the aforesaid fragrant "Century plant" in their loving embrace! But, *presto*, change! Such a racing, chasing and scampering as occurred at this particular juncture of affairs, was never equalled since the famous advent of the long-tailed rat among the vermin of the cellar, with his tinkling little bell! It is said that the "ghost scene" in Hamlet was re-enacted with the most thrilling effect! "*I am thy father's ghost*," continued to ring with excruciating distinctness and *accelerating* effect in their individual and collective ear until their respective corporeal proportions were safely ensconced beneath a neighboring shoe-bench!

When such another race comes off,
May I be there to see!

It shortly became satisfactoirly apparent that all danger of pursuit was over, inasmuch as no respectable "ghost" or denizen of the flesh would ever intrude its presence into such a "hole in the wall" as a "seven by nine" shoe shop—more especially when filled with *such* a fragrance—and the "Century" was duly rescued from its retreat and placed "on end."—Like Balaams Ass of old, it then found "living voice." "*I am the regular call*" —came forth in those majestic, yet melodious tones so often used in beguiling the ear and depleting the pockets of the "Mutual" victims! "My *pale faced* brother Follett, will bear me witness on this point, as well as freely certify to the entire success of my numerous *financial* operations. *He* is thoroughly "posted," gentlemen, in the mysteries of finance and will entertain you with some highly interesting developements upon that topic.—As to my literary, scientific and pettifogging abilities. I refer you by express permission, to my well beloved brother O'Brien, of whom I was wont to sing in ancient times.

"Billy O'Brien had no breeches to wear,
So he bought him a sheep's skin and made him a pair,
With the wooley side out and the skinney side in,
They are a nice pair of breeches, says Billy O'Brien."

It is an entire mistake, gentlemen, to say that I ever refered to him as, that damned dishonest,intriguing, little English cuss!" It is undeniably true that I read him out of the Democratic party but inasmuch as I have also *read myself out* and our joys and sorrows are more mentally and fraternally shared, he magnanimously "forgets and forgives"! (Pathetic groans and sobs on the back seats!) Having safely accomplished, in a satisfactory manner, this highly interesting delivery, the "Century" gracefully subsided into its normal state and our reporter, not desiring to become "bail" for the concern in any other capacity, went "leg bail" and vamosed instanter. The subsequent features of the entertainment are said to have been of a truly affecting nature. But we forbear to intrude upon the privacy of the scene, except generally to remark, that a more comical looking funeral assembly never before was seen, take it *awl* in *awl*, in a Shoe Shop in Stafford or any other town, If there was "wax" enough there to "stick" them to the truth for five successive minutes, it possesses more potency than any other substance which could be used for that purpose.

The entertainment came to a formal conclusion, in the use of these consoling old stanzas beginning—

"How pleasant 'tis to see
Kindred and friends agree."

Sung by Harry to *his* favorite melody—the "Irishman's Lament," (*i. e.*, lamenting because he wouldn't pay them!) and the procession moved on.

In common with the large concourse of citizens of Stafford who had assembled, pursuant to notice, to attend a *public* exhibition by these gentlemen, we regret that it should have been so unceremoniously abandoned and all opportunity for examination and information prevented by their obstinate refusal to appear in public, even after an *express invitation* so to do. **The performance resulted, very naturally, in the conviction, that a concern which could not withstand public inspection but insisted upon concealment in a "hole in the wall" must intrinsically be very rotten and little worthy public attention, confidence or consideration. This conclusion, it is submitted, was not only entirely correct but inevitable from the premises.**

Roorback!

The clique who run the Genesee Democrat are undoubted believers in the doctrine, that "a lie well stuck to is as good as the truth." The last issue of that beautiful print again puts forth, with the most unblushing effrontery, the assertion that Mr. Wilber was expressly designated as Chairman of the County Central Committee by the Convention at which the Committee was appointed. *The assertion is in its entire length and breadth, absolutely and unqualifiedly untrue*, as every member of that Convention very well knows, and no one knows *its entire falsity* better than its author in the Democrat.—The fact that it is manufactured for the purpose without the semblance of a foundation, constitutes, with him, no sort of objection to its repeated use, in carrying out his disorganizing projects.

We have before us the published proceedings of the County Convention of 1857, which on their face give very satisfactory evidence of the entire falsity of the statement. The profound logician of the Canal Department, who gives form and expression to the incoherent ravings of his master, in the columns of the *Democrat*, gravely insists that the Convention which appointed the committee, possessed authority superior to and controlling that of the committee itself in the designation of its own Chairman! The bare statement of the proposition sufficiently establishes its absurdity. In as much, however, as the Convention never assumed the exercise of any authority ordirection in the premises it stands as a mere "parliamentary" abstraction.

It will be observed then,as the final result of the severe mental cogitations and consequent logical conclusions of the logician aforesaid, that our position of last week with reference to the entire regularity of the call for the Convention of the first of September, is clearly conceded, as well as the converse of that position, that the call for the 10th is entirely irregular and unauthorized.

We ask our Democratic friends to note the fact, that the argument of the Democrat expressly concedes *the abstract authority of the Committee over the subject* as claimed by us. This disposes of the whole question. The "Roorback" is altogether too transparent and its falsity quite too readily established, to answer the purposes for which it was invented.

Caucus in Batavia.

We publish in another column the official proceedings of the Democratic Caucus of this town, held on Tuesday evening.—We have neither time nor space for any extended comments thereon. Indeed, comment is quite unnecessary—they "speak for themselves." As indicating the nearly unanimous expression of the democracy of the locality honored by the continual presence of the "Worthy Trio" presiding over the *Genesee Weekly Democrat*, it may safely be assumed that such an unquestionable 'endorsement' fully establishes the fact that these personages are "best understood and appreciated where they are best known!" We shall refer more at large to some features of the proceedings, hereafter.

Town Caucuses.

We give below the result of the several town Caucuses held in this county, for the selection of delegates to the Democratic County Convention, to be held at Ellicott Hall, Sept. 1, at 12 M. The result is truly gratifying to contemplate in contrast with the unparalleled and *unprincipled* efforts which have been made on the part of that highly interesting "Trio," comprising the "length and breadth" of the factious clique of party disorganizers in this county. **A more sweeping, emphatic and well-merited rebuke to political intriguers and their detestable operations, has never been administered, than that furnished by the action of the sterling and reliable Democracy of "Old Genesee" in the present Canvass. A reference to the list of delegates selected in the several towns will furnish gratifying evidence that the bone and sinew—rank and file of the party in this county, are in common with their brethren throughout the states, determined upon *unity of* action in future political campaigns. Intriguers, disorganizers and political *outcasts*, generally, may rely with the utmost confidence upon being "counted out," henceforth and forever! *Selah!***

Mr. A. U. Willis, one of the "hesitating', members of the County Committee, it will be seen, is selected to represent the town of Elba in the Convention of Sept. 12th. From this we infer that his misgivings—if he ever really had any—with reference to the regularity of the "call" have entirely vanished! Mr, J. Pervier, of Alabama, another gentleman in the like category, *presided as Chairman* at the Caucus in that town, at which the above named delegates [illegible] Having been thus ruthlessly bereft of all—even his "right bower" from Alabama—the "mutiny" may very appropriately exclaim:

I feel like one who treads alone
Some battle field deserted,
My lies all shed—my hopes all dead,
And none but me are *hurted!*
RECUSICAT-IN-PACE.

Democratic Caucus.

Pursuant to a call, there was a full meeting of the Democracy of Batavia at Ellicott Hall on Tuesday evening to elect Delegates to the County Convention to be held on Thursday the 1st day of September.

The meeting was called to order by B. G. Tisdale Esq., Chairman of the last caucus, and the following gentlemen were chosen officers:

Junius A. Smith, Chairman.

David E. E. Mix and B. G. Tisdale, Secretaries.

On motion the meeting proceeded to ballot for delegates to the county Convention.

After the polls had been open for about an hour the ballots were counted, upon which the following gentlemen were found to be elected, by a vote of 199, two hundred votes being the whole number cast.

Hon. Heman J. Redfield
Col. Wm. Seaver
Junius A. Smith
Myron H. Peck.

On motion, the Chair appointed a committee to call future town caucuses consisting of the following gentlemen:

S. A. Wilson
David Seaver.
James M. Willett.

During the balloting for the Delegates to the county convention, Myron H. Peck, Junius A. Smith and J. M. Willett, were in turn called upon for speeches and each responded in a happy and appropriate manner.

It being learned that G. B. Benedict, Esq., of Michigan was present, loud calls were made for him to take the stand upon which he did so and entertained the meeting in a very happy and characteristic speech.

Mr. J. Haskell was also called upon for a speech which opportunity he embraced and proceeded in a brief and explicit manner to set the public right with regard to the *Resolutions* introduced and acted upon in a Caucus, claimed to be Democratic, held in this place on a former occasion in which Hon. Edgar C. Dibble and Wm. G. Bryan, were attempted to be read out of the Democratic Party by Harry Wilber.

Mr. Haskell stated in substance as follows:

"When Mr. Wilber submitted those Resolutions to me I at once expressed my disapproval of them, wherupon Mr. Wilber assured me that he had submitted them to Mr. Dean Richmond and that he had expressed his entire acquiescence in them; upon which of course I withdrew my objections, believing this statement to be true.

Afterwards Mr. Richmond on my first interview with him, after their publication, called my attention to them, and expressed his unequivocal disapprobation of the proceeding, at the same time commenting upon the utter absurdity of the action of a political body that attempted to vote down an inherent and constitutional right belonging equally to all men."

A man named Gardner, of Oswego, has an apparatus for walking upon water. He walked out on the Lake, Thursday. He proceeded with a swinging gait, his body swaying to and fro as he stepped. A short distance from the shore the apparatus was hardly discernable. His progress was about the same as in ordinary walking on land.

A WARNING TO FRUIT EATERS.—Geo. Baxter died at Buffalo last week, and the doctors held a post mortem examination. He had been taken violently sick immediately after eating some plums, and it was found, upon opening the abdomen, that a stone of one of the plums had perforated one of the large intestines, causing excessive inflamation and consequent death.

More Gold at Pike's Peak.

Special Dispatch to The Missouri Republican.

ATCHINSON, Mo., Monday, Aug. 22.

A party of seven persons arrived here this morning from the Pike's Peak gold mines. They brought with them over one hundred ounces of gold. They report much sickness, but only a few deaths.—This party will return in a few weeks.

LEAVENWORTH, Aug. 22,

The Overland Express has just arrived here from Denver City, bringing dates to the 12th instant. The news received is considered of an important character.

Rich discoveries have been made in the Medicine Bow Mountains, near the headwaters of the Cachee Poudre, which are situated one hundred and fifty miles northwest from Denver City.

Gregory and Detrees, the latter of whom is a member of the famous Indiana Company, left for the North on the 10th inst.

Great excitement still prevailed with regard to the discoveries about the headwaters of the South Platte.

Nearly a thousand persons from the Gregory Diggings passed through Denver City within forty-eight hours' time on the way to the above discoveries.

So intense was the excitement, and so eager were the miners to get off, that many left claims behind them that averaged $10 per day.

Advices from the South Park, or Colorado Diggings, continued to be favorable.

FROM PIKE'S PEAK.—*The St. Louis Democrat* of Aug. 23, says: Pike's Peak gold is now arriving daily in small quantities, [illegible] we think the arrivals will increase very much in value this Fall. Two small parcels from Gregory's diggings were brought to-day by Clark & Bros., bankers. It is mostly scale gold, taken out with quicksilver, and sells at $15 @ $18 per ounce. The fact that gold is there in paying quantities is fully established, but machinery is needed to realize large fortunes. Mr. Charles Leslie, of Clinton, Pennsylvania, arrived at Omaha on the 14th, bringing over one thousand ounces of dust from Clear Creek. He thinks he has discovered far richer leads than have yet been worked, but is not disposed to communicate their locality. He states, however, that they are north or northwest of the Gregory diggings. This locality corresponds precisely with the latest discoveries made public, and which are reported as being extravagantly rich. Among numerous specimens of quartz brought by Mr. Leslie are several lumps weighing 8 or 10 pounds each, and estimated to contain between fifty and sixty dollars worth of gold.

TAKING CHILDREN FOR DEBT.—The Utica Herald tells of a singular occurrence that took place on board a Central Railroad train in that city last Thursday night.—The captain of the night watch, happening to be at the railroad depot, was applied to by a man named Harper to rescue his children from the custody of a man who had kidnapped them under the pretence that Harper *owed him money, for which reason he had seized the children.*—Captain Keiser went into the cars, asked the children if they desired to accompany Harper, to which they replied that they did, and that he was their father. Thereupon the officer delivered them up to their father, in spite of the boisterous threats of the abductor.

A young blood of Buffalo recently "wood and won" a fair damsel, all on the sly, and induced her at length to consent to a runaway match. On the day appointed for celebrating the nuptials he sent a gaily caparisoned hack driver after his betrothed, who succeeded in insinuating himself into the good graces of the young lady to that extent that she married him in the short space of half an hour after seeing him. The jilted lover has given up marriage for the present, thinks he has had a narrow escape, and does not, therefore, contemplate suicide.

We noticed, the other day, the "left handed" compliment paid to Bennett of the Herald, by the N. Y. Tribune, when the latter nominated the proprietor of "the Satanic" for the office of Mayor of the city of New York. Bennett declines the "honor," on the ground that at present all political organizations are so corrupt that no honest man will consent to be a candidate, and he warmly urges the claims of Mr. Greeley upon his party, and his peculiar fitness for the nomination.

Richard Busteed—more familiarly known as "Dick Busteed"—the Corporation council for New York, has been on a visit to Judge McArthur, of Milwaukee.—The Milwaukee Sentinel of the 20th, says that an article in that day's issue was edited and set up by Mr. Busteed, "who, besides being an excellent lawyer and thorough good fellow, is also a practical printer."

DR. CHURCHILL'S REMEDY

FOR THE PREVENTION AND CURE OF

CONSUMPTION.

WINCHESTER'S

GENUINE PREPARATION OF THE

HYPOPHOSPHITES

OF LIME AND OF SODA,

The Specific Remedy for Consumption, Chronic Bronchitis, Asthma, Scrofula, Dyspepsia, General Debility, and all Nervous Diseases.

The success of this NEW REMEDY (discovered by Dr. Churchill, of Paris) is obtaining for it the most UNBOUNDED POPULARITY throughout Europe and the United States. It is a purely SCIENTIFIC PREPARATION, and acts with INVARIABLE EFFICACY in all stages of Pulmonary and Nervous Diseases. The *Hypophosphites increase the Principle* which constitutes *nervous force*, and are the most *powerful blood generating agents known.*

The Cure of Consumption,

In the incipient and early stages in a period, consequently, when there can be no uncertainty as to the nature of the disease, a cure can be obtained, IN ALL CASES by this treatment, except when the existing lesion of the lungs is of itself sufficient to produce death.

This Remedy has not only a curative effect, but will, if used whenever there exists a suspicion of the disease, PREVENT ITS DEVELOPMENT, and thus act AS A PRESERVATIVE WITH REGARD TO CONSUMPTION, JUST AS VACCINATION DOES WITH REGARD TO SMALL-POX.

Professional Correspondence.

"COLUMBUS, OHIO, Aug. 8, 1859.—I have been treating this disease for twenty-five years, and have derived more satisfaction from the use of the HYPOPHOSPHITES *than from all other forms of medication combined.*"

"MANCHESTER, MICH., Aug. 4, 1859.—I have used the HYPOPHOSPHITES in my practice *with very happy effects*—so much so that I WOULD NOT BE SATISFIED TO REMAIN WITHOUT THEM."

"MIDDLEBURG, VA., Aug. 9, 1859.—I believe the HYPOPHOSPHITES used in the manner and way Dr. Churchill used them, WILL CURE CONSUMPTION."

"FREDERICKSBURG, VA., Aug. 10, 1859.—I have prescribed the Hypophosphite in several cases, and *am delighted with its effects.* IT IS ACCOMPLISHING WONDERS."

"LOWELL, O. July 8, 1859.—I have used in all about forty [illegible], and in but one instance have they failed to benefit the patient, and that was a hopeless case before I was called. I have had several cases given up by attending physicians, who are now ENJOYING COMPARATIVELY GOOD HEALTH, and HARDLY SHOW ANY THE SYMPTOMS OF PULMONARY DISEASE. I have used the REMEDY in my own case, *with decided success.* It was regarded as a nostrum by physicians and friends, and even by myself, before the trial was made. I am now able to [illegible] attending to the sick, as many miles, perhaps, in a day, as any other physician in the country."

"CHATHAM, VA., July 16, 1859.—I received the twelve bottles of Churchill's Remedy for Consumption. * * * IT HAS [illegible] IN EVERY CASE."

Consumptives, in any stage of the Disease, should resort immediately to the use of the HYPOPHOSPHITES OF LIME AND SODA. "WINCHESTER'S GENUINE PREPARATION" (in eight-ounce [illegible] bottles), is "chemically pure," is the [illegible] prepared by Dr. Churchill "for general use," and is prepared according to his *original Formula.*

Dr. Churchill's Work on Consumption,

Containing his Report made to the Imperial Academy of Medicine, Paris; Notes of Cases and Letters, Documents, Testimonials, &c., together with a Circular, will be sent on receipt of TWELVE CENTS in stamps.

CAUTION.—Dishonest Druggists will try to sell you other preparations than mine. Do not buy them! My "Genuine Preparation" bears my *fac simile signature.*

A NEW, SPEEDY, AND MOST SUCCESSFUL MODE OF TREATING

Spermatorhoea, Nervous Debility, Marasmus or Wasting Consumption.

AND ALL

Diseases of the Urino-Genital Organs.

A CLASS of Maladies prevail to a fearful extent in community; dooming at least fifty thousand youth of both sexes, annually to an early grave. These diseases are very imperfectly understood. Their external manifestations or symptoms are Nervous Debility, relaxation and exhaustion; Marasmus, or muscular wasting and consumption of the tissues of the whole body; shortness of breathing, or hurried breathing on ascending a hill, or a flight of stairs—great palpitation of the heart, asthma, bronchitis and sore throat; shaking of the hands and limbs, aversion to society, and to business or study, dimness of eye-sight, loss of memory, dizziness of the head, neuralgy pains in various parts of the body; pains in the back and limbs, lumbago, dyspepsia or indigestion, irregularity of the bowels, deranged secretion of the kidneys and other glands of the body, as Leucorrhoea, or Fleur Albus, &c. Likewise Epilepsy Hysteria and Nervous Spasms.

Now, in ninety-nine out of every one hundred cases, all the above named disorders and a host of others not named have their seat primarily in the sexual organs, and arise from morbid excitement and chronic inflammation—a state of morbid irritability, hence the want of success on the part of Old School Doctors.

Dr. JOHNSON is now engaged in treating this class of modern maladies with the most astonishing success. The treatment adopted by the Institution is new, it is based upon scientific principles, with new discovered remedies, without minerals or poisons. The facilities of cure are such, that patients can be cured at their own houses without expense, in any part of the country, from an accurate description of their case by letter, and have the medicine sent them by mail or express.

Young Men suffering from these direful ills, will receive for $5 a series of Health Rules, and perfect chart of cure, which will be to them a true polar star through life.

The Business located by us at No. 677 Broadway, New York city, is the oldest established house in the country, and is known world-wide as the original "Evans & Co.'s Gift Bookstore." Many have taken the advantage of our popularity to advertise under the same name to increase their trade, to protect the few who may be unacquainted with us, we would state that we have no connection with any other Gift——Book House——and though many advertise under the name of Evans & Co., the firm constituted by D. OUR NEAREST RELATION.—An article in Dicken's *All the Year Round* makes out the animal known as the Gorilla as the one nearest resembling the human species. Mr. Hurst, the Taxidermist, at the Natural History Rooms, in the State Agricultural Hall, has the only specimen of this animal in this country. It was imported to this country in May last by a gentleman of Philadelphia, who paid for it the sum of $1000. Soon after it sickened and died in a fit. Mr. Hurst had the good fortune to possess himself of the body, and after several weeks of hard labor has succeeded in preserving it in most beautiful style. It can be seen at his rooms, and is really one of the greatest curiosities in this country. There are at present two young ones alive in the Zoological Gardens, and every effort will be made to raise them.

The Gorilla is of the average height of man—five feet six inches; his brain case is low and narrow, and at the fore-part of the skull is high, and there is a very prominent ridge above the eyes, the top of the head is perfectly flat, and the brow, with its thick integuments, forms a "scowling pent-house over the eyes."

JOB PRINTING, OF ALL KINDS, EXECUTED AT THIS OFFICE WITH TASTE AND DESPATCH.

FAST RUNNING.—On the Central Rail road on Wednesday night last there was some of the tallest traveling that ever occurred on any Railroad. The Cincinnati Express wich left Buffalo at 11 P. M., on arriving near Town Line, fifteen miles from Buffalo, could go no farther in consequence of a fire in some wood piles on the track. The engineer, Matthias Erhardt, backed up the train to Lancaster, switched off on the north track, and started again. At Town Line they met the mail train from New York city on time. Having lost considerable in backing up and changing tracks, Erhardt determined to make it up again. And he did. He made the run from Town Line to Rochester, *fifty four miles, in sixty minutes, made two stops, and took in wood and water at Batavia.* This was over a mile a minute, and the fastest time for the number of miles run ever accomplished by any road in the Union that we ever heard of.

BLONDIN'S LAST.—Mon. M. Blondin walked over the rope suspended over Niagara river on Wednesday evening surrounded by fire works, and performed many skilful turns, such as standing on his head &c.

The fire-works were attached to each end of his balance pole and gave off green, red, blue and other lights like the 4th of July. Before he had reached half the distance across, the light went out, leaving him in darkness to govern his way by the sense of feeling. The spectacle was said to have been very brilliant—until the lights went out.

CHARLES DICKENS' WORKS.—The well-known firm of T. B. Peterson & Brothers 306 Chestnut street Philadelphia, have just commenced publishing a remarkable cheap edition of these unapproachable works of fiction. It is called "*Peterson's, Cheap Edition for the Million, of the entire writings of Charles Dickens, Boz,*" and will be issued complete in twenty-eight weekly volumes. One volume will be published regularly on each and every Saturday, until the whole number of volumes—twenty-eight—is completed. The low prices fixed by the publishers for them are only 25 cents a volume, or the whole twenty-eight volumes for five dollars. A complete set will be forwarded *free of postage, by Mail,* to any part of the United States, to any one, by the publishers, on receiving a remittance of five dollars for the twenty-eight volumes; or a remittance of three dollars will pay for the first fourteen volumes; or a remittance of one dollar will pay for the first four volumes.—The volumes will be neatly printed, and each volume will contain 160 large octavo pages, printed on fine white paper, and neatly bound with paper cover. The revised uniform Edinburg edition, from which this is reprinted, comprises twenty-eight volumes, the cost of which is *seventy-five dollars;* and this edition will contain every word of the Edinburgh edition. We commend the determination of this enterprising Philadelphia firm, to furnish the complete and entire works of Charles Dickens at a price so reasonable, that all persons whatever may posess a full set, and direct the especial attention of our readers to the fact, and would advise them all to make a remittance of Five Dollars at once, per first mail, to the publisher, for the entire set, who will send them complete to any one, *free of postage,* on receipt of that sum.

The editor of the Lansing (Mich.) Republican has been presented with a complimentary pass, entitling "Col. Rufus Hosmer" to a free ride on the "Erie Line of Canal boats." The editor says it is his intention to visit all these *thoroughfares,* "especially the feeders whatever they may feed upon, provided it is nutritious and palatable."

A DOCTOR'S OPINION OF CATS AND BABIES.—The editor of the Buffalo Commercial is a man of medicine and commenting on a recent statement that a baby's breath had been nearly all drawn away by a cat, he says:

But we argue from well-known premises that babies have a much stronger power of suction than cats, and that in a contest at drawing breath the cat would be the victim. We can readily see, however, that a cat would be likely to select a cradle as a warm spot for a nap of forty winks.—Creeping stealthily upon the breast of the child and lying there, the weight upon the chest would be sufficient to cause nightmare and that might, as it is known sometimes to do, result in death. These are our deliberate opinions on the cat question.

THE GREAT REVIVAL.—The extensive religious awakening in Ireland, greater than heretofore in that country, is extending to Scotland and Wales. It has reached the colliers of Staffordshire, and in one place it is estimated that there are five hundred converts. From among their own number, a collier has been raised up who daily preaches the Word with great power. In many of the coal-pits daily prayer meetings and Bible readings are held. In South Wales, so extraordinary is the revival interest, that all the churches and chapels are crowded on week days as well as Sundays. Prayer meetings in churches, in school rooms, in workshops, and even in fields, are held morning and evening. In one town eight public houses have been closed since the work began. It is now spreading into Wales. A clergyman of the Established Church writes: "This is no enthusiasm, but a deep, profound, and awfully solemn impression." In some districts, notorious for blasphemy, an oath is now never heard, and drunkards in thousands have become total abstainers. It is estimated that in two counties only, 9,000 persons, within the last five months, have been converted.

MARVELS OF HUMAN CALORIC.—A writer declares that we are "all living stoves—walking fire-places—furnaces in the flesh," if these terms can be applied to any apperatus for the express production of human caloric. After stating the fact of the latent heat of the human frame, the writer says—Suppose it to be the month of January, when winter is presumed to be reigning in full vigor, and every inanimate object appears to have been drained of its caloric; still the human structure will exhibit a surplus of 65 degrees above the freezing point. Why is this? How does it happen that while a bronze statue fluctuates in its temperature with every passing breeze, the living organism maintains its standard unimpaired, and preserves its tropical climate within, though the air should be full of frost and the ground enveloped in snow? It is manifest that we must have some power of "brewing" caloric for ourselves.

Assuming that our bodies are veritable stoves, the reviewer proceeds to explain whence we procure our fuel. Fortunately our coal and fire-wood, he adds, are stored up in a very interesting form. They are laid before us in the shape of bread and butter, pudding and pies; rashers of bacon for the laborer, and haunches of venison or turtle soup for the epicure. Instead of being brought up in scuttles, they are presented in tureens, dishes, or tumblers, or all of them in pleasant succession. In fact, whenever you send a person an invitation to dinner, you virtually, request the honor of his company to take fuel; and when you see him enthusiastically employed in your dainties, you know that he is litterally "shovelling" coke into his corporal stove.—*Utica Telegraph.*

EXCITING TIMES AT NIAGARA—A TOWN COUNCILLOR ROTTEN EGGED!—Quite an exciting and lively affair occurred at Niagara the other evening, says the St. Catherines Journal. It appears that one of the Councillors owns a tavern stand in the town, which he rented some time since to a man named welch, who, two or three weeks since left his wife and ran off with a young girl of that town. Mrs. Welch continued the tavern, which was known as the "Rossin House," but for some reason at present unexplained the owner of the property did not like the arrangement and proceeded to eject the lady, depositing her furniture, &c., in the street. This came to the ears of Mrs. Welch's friends, and they procured a large quantity of decayed Shanghai berries, better known as rotten eggs, and commenced throwing them in the direction of the aforesaid Councillor. Many of them came in contact with his person, and owing to the effluvia engendered thereby he was compelled to beat a hasty retreat.

The Black Republican candidate for Governor in Ohio says: "If I am elected Governor of Ohio—and I expect to be—no fugitive slave shall be sent back to Kentucky, or any other slave State; if I cannot otherwise protect him from his pursuers, *I will employ the bayonet,* so h[illegible] me, God!"

In Cincinnati, the other day, while a mother was absent, her infant fell out of a second-story window, and struck upon the back of a passing dog. The dog broke the child's fall, and the child broke the dog's back. The child's life was saved, but the dog's was the sacrifice.

We see it stated in the Detroit papers that at Chicago last week a valise containing between $5,000 and $6,000 in notes, papers, &c., was stolen, at the wells street depot, from a passenger named Fowler, residing in Livingston Co., New York.

Out of seven hundred deaths in New York city week before last, upwards of five hundred were children under ten years of age. Swill milk, unripe or rotten fruit, bad nursing, and the foul atmosphere of the filthy "tenant houses" are supposed to be the seeds of this harvest of death.

The London Medical Time announces the appearance of the Asiatic Cholera, by its usual route, from Hamburg. Two cases had proved fatal, both being importations on the Hamburgh steamers. In the latter place, during the week ending July 31st, there were 424 cases, of which 332 proved fatal. The proportion of deaths is very large, being four-fifths of the whole number attacked.

The entire cost of the fifth avenue Hotel, opened last week, was one million one hundred and fifty thousand dollars, of which the furniture, carpets and paintings cost three hundred and fifty thousand dollars. One hundren guests were registered the first day. The St. Nicholas has for three weeks past averaged something like seven hundred guests; the Metropolitan between five and six hundred; the Lafarge three hundred; the New York Hotel between five and six hundred.

It is reported that ERASTUS CORNING, of Albany, and some twenty other capitalists, have recently formed a company with a capital of one million of dollars.—It is called the "St, Mary's Canal Mineral Land Company." The object of the company is to work lands covering a surface of 182,000 acres; and proved to be rich in iron stone, from which the finest quality of iron ore may be produced, situated in the upper peninsula of the State of Michigan.

THE FIRST LOCOMOTIVE IN THE UNITED STATES.—According to the American Railroad Guide, the first locomotive in the United States were imported from England in the fall of 1829, or spring of 1830. The first Stephenson locomotive ever imported was the Robert Fulton in 1831, for the Mohawk and Hudson Railroad. The first locomotive built in this country was constructed at the West Point Foundry in 1830, for the South Carolina Railroad. The second was built for the same road at the same place. The third was built by the same establishment in the spring of 1831, and was the first [illegible] run in the State of New

HOW TO TEST EGGS.—A correspondent of the Springfield Republican says:

"There is no difficulty whatever in testing eggs; they are mostly examined by a candle. Another way to tell good eggs is to put them in a pail of water, and if they are good they will lie on their sides, always; if bad, they will stand on their small end, the large end always uppermost, unless they have been shaken considerably, when they will stand either end up.—Therefore, a bad egg can be told by the way it rests in water—always end up, never on its side. Any egg that lies flat is good to eat, and can be depended upon.—An ordinary mode is to take them into a room moderately dark, and hold them between the eye and a candle or lamp.—If the egg be good—that is if the albumen is, still unaffected—a light will shine through of a reddish glow; while, if affected is will be opaque or dark."

ABOUT CORSETS.—Tradition insists that corsets were first invented by a brutal butcher of the thirteenth century as a punishment for his wife. She was very loquacious, and, finding nothing would cure her, he put a pair of stays on her in order to take away her breath, and so prevent her, as he thought, from talking. This cruel punishment was inflicted by other heartless husbands, till at last there was scarcely a wife in London who was not condemned to the like affliction. The punishment became so universal at last that the ladies, in their defence, made a fashion of it, and so it has continued to the present day.

Boot & Shoe Store,

No. 2, Odd Fellow's Hall.

GREAT DISCOVERY!

NEW MODE OF ADVERTISING.

The Proprietor of the Great American Shoe Store, No. 2 Odd Fellows Hall, south side Main street, nearly opposite the Post Office, claims to be the Inventor of the cheapest and best mode of advertising in the world. He claims to be the manufacturer of

BOOTS AND SHOES

that will advertise themselves, by giving ample satisfaction to the wearer, thereby speaking in language not to be misunderstood by him, which he immediately interprets to his neighbors. After having tested the merits of his invention for the last twenty years, he feels confident of its

ENTIRE SUCCESS.

and would recommend it to all the other Boot and Shoe makers and dealers in this vicinity to be adopted by them. And he would especially call the attention of the citizens of Genesee county and advise them to study well its operations.

He has on hand a good assortment of Stock, such as

Oak and Hemlock Sole Leather,

French calf skins, kip and morocco, &c., which he holds will stand investigation from the best of judges; and *MECHANICS* to manufacture it who are second to none in the State.

Also the largest stock of Ready Made Boots and Shoes in the county; both *Eastern and Home Made, at prices that defy Competition.*

Thankful for the very liberal patronage you have been pleased to extend, I would respectfully solicit a continuance of the same.

STAR WRITING FLUID.

In bringing this WRITING FLUID before
Public, the Proprietor knows he has a g
deal to contend with, as there is so m
spurious Inks manufactured that are ut
worthless, but I do not wish to say this is
only Ink and best in use. I will say that i
second to none as my motto is, "Try it, if
like it—buy it." The superior qualities of
FLUID are, namely: It is decidedly a bea
Ink, and so permanent and ineffaceable,
even the test of Oxalic Acid cannot remov

LOCAL MATTERS.

The Convention Yesterday.

Every town in this county was represented in the Convention yesterday except Elba. A glance at the Convention indicated sound heads, earnestness of purpose and ability to protect the interests of the Democratic Party in this county.

Hon. Heman J. Redfield officiated as Chairman, and the business of the Convention was conducted with the utmost order and circumspection.

On motion, an informal ballot was taken to ascertain the voice of the Convention as to the candidate for Delegate to the State Convention. On counting the ballots, DEAN RICHMOND was found to have received 45 votes out of 49, upon which it was unanimously,

Resolved, That he be the Delegate from this county to the State Convention to be held at Syracuse on the 14th inst.

THE

NEW YORK WEEKLY,

A HANDSOME QUARTO PUBLICATION,

BEAUTIFULLY ILLUSTRATED,

IS NOW UNIVERSALLY ACKNOWLEDGED TO BE

THE BEST STORY PAPER IN THE WORLD!

Among its Regular Contributors will be found the names of some of the best male and female writers in the United States! Such writers as Justin Jones, (Harry Hazel,) Augustine J. H. Duganne, William Earle Binder, Harry Hazleton, James Reynolds, Francis S. Smith.

Mrs. Mary J. Holmes, Helen Forest Graves, Mary C. Vaughan, Margaret Verne, Anna Raymond, Eda Meyville. Write for it regularly, while a score of other well known writers occasionally contribute to its columns.

THE NEW YORK WEEKLY has now engaged a force of talent that cannot be rivaled by any establishment in the world!

NOTICES OF THE PRESS.

Never before has any new candidate for public favor in the Literary World received such flattering notices from the Press. From all quarters, our editorial brethren have cheered us on by speaking of our enterprise in a manner to stimulate our vanity, and to excite the envy of our rivals.

GENERAL CHARACTER OF THE NEW YORK WEEKLY.

The WEEKLY is designed more especially as a First-Class Story Paper, in which we intend to give our readers a succession of THE BEST STORIES EVER PUBLISHED IN THE UNITED STATES! The aim and object of these productions will be to inculcate useful knowledge under the pleasing guise of fiction, or to teach great moral lessons through the same means. We shall never publish a word or line, the tendency of which is to injure the morals or taste of the reader. Every issue of the NEW YORK WEEKLY will contain short sketches of Life and Manners, Notings of Travel and Adventure, Short Stories, General Summary of Events, Humorous Gleanings, Poetry, Editorials, &c. &c. As specimens of our serials, we would point to A. J. H. Duganne's great story, Garibaldi, The Hero of Italy! Harry Hazel's exciting Indian Romance, The Mute Spy! Francis S. Smith's intensely Interesting Domestic Story, Maggie, The Child of Charity! While, as specimens of our standing departments, we point with pride to our Ballads of the Bible, admitted by all to be the most chastely written and beautiful scriptural poems ever produced.

Our Knowledge Box, in which is weekly contained a number of paragraphs of the greatest importance to house-keepers and others.

Our Pleasant Paragraphs, an interesting *melange*, ranging "from grave to gay, from lively to severe."

Our Ladies' Column, prepared especially for the ladies by one of the most brilliant lady writers of the present day.

Our Mirthful Morsels, our Items of interest, etc., etc. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome visitor wherever it goes—equally popular in the workshop and the office—at the fireside of the farmer, or in the counting-room of the merchant—a paper that parents can, with safety, place in the hands of their children without note or comment, feeling certain that its influence will be to stimulate their minds to the pursuit of knowledge, or lead them to abhor vice and wrong.

OUR CIRCULATION & PROSPECTS

The NEW YORK WEEKLY has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the WEEKLY.

The indications are at present, that the circulation of the WEEKLY will soon reach half a million. Where the newsmen were taking tens, they are now taking hundreds of copies. This is the general effect among the *five* thousand News Agents who are now regularly selling the NEW YORK WEEKLY, while from nearly every Post Office in the country, we are daily getting subscriptions and orders for specimens.

How and Where to Get the "Weekly"

Wherever there is a News Agent, get the paper from him. By so doing, you do not run the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stops, you do not lose advance subscriptions, sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sustain a Post Office, will have its News Agency.

OUR TERMS:

The price of the NEW YORK WEEKLY is FOUR CENTS, but where Agents have to pay extra freight or postage, a higher price is necessarily charged. When sent by mail, the price will invariably be $2 00 a year, in advance. Subscriptions taken for three months. Two copies will be sent for one year for $3, four copies for $5, eight copies for $12. Postmaster and others who get up clubs of ten, and send us $15 at one time, will be entitled to an extra copy for their trouble. The bills of all solvent banks taken at par for subscriptions. Canada subscribers must send twenty-five cents extra with every subscription, to pre-pay the American postage.

All letters and communications, in relation to the Editorial or Business Departments of the NEW YORK WEEKLY, must be addressed to,

DR. M'LANE'S

CELEBRATED

VERMIFUGE

AND

LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public. We refer to

Dr. Chas. M'Lane's Celebrated

Vermifuge and Liver Pills.

We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,

For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,

For the cure of LIVER COMPLAINTS, all BILIOUS DERANGEMENTS, SICK HEAD-ACHE, &c. In cases of

FEVER AND AGUE,

preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,

FLEMING BROTHERS,
PITTSBURGH, PA.

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.

P.S. Dealers and Physicians ordering from others than Fleming Bros., will do well to write their orders distinctly, and take none but Dr. M'Lane's, prepared by Fleming Bros., Pittsburgh, Pa. To those wishing to give them a trial, we will forward per mail, post paid, to any part of the United States, one box of Pills for twelve three-cent postage stamps, or one vial of Vermifuge for fourteen three-cent stamps. All orders from Canada must be accompanied by twenty cents extra.

DR. COGGSWELL'S NEW MEDICAL SALT.

For Inflamatory Diseases Only.

New Medical Salt! New Medical Salt!

IT IS NOT A CURE-ALL.

For Inflammatory Diseases only

DR. COGGSWELL'S NEW MEDICAL SALT, instead of its being a remedy for all ills, has control over but one ill, has but one aim, and accomplishes but one thing, to wit: subdues inflammatory diseases, whatever be its form or locality, whether in the head, throat, abdomen, extremities or skin.

NEW MEDICAL SALT. Its peculiar excellence is, that without the useless loss of blood and strength, it effectually cures inflammatory diseases, (no other,) by producing an equilibrium, of the fluids in the body, the want of which is the sole cause of inflamation!

NOTICE TO INVALIDS!! The following forms which the unbalanced fluids assume, and many not here mentioned, that have more or less fever or pain, are as easily subdued by the *New Medical Salt*, as fire is extinguished by water, to wit: Brain Fever, Headache, rush of blood to Head and Heart, Fits, Inflamed eyes, ears, nose, lungs and liver, Neuralgia Spinal affections, Erysipelas, Bronchitis, Pleurisy, Asthma, Cough Dyspepsia, Venereal Diseases, Rheumatism, Gout, Scrofula, and all itching and other cutaneous eruptions.

DR. COGGSWELL'S NEW MEDICAL SALT does just what it claims to do—no more no less—equalizes the fluids by removing from the system all arterial and venous obstructions. Descriptive circulars may be obtained from any Druggist who has this valuable medicine for sale.

DR. COGGSWELL'S NEW MEDICAL SALT. Get a Circular. Ask any Druggist about the *New Medical Salt*.

Ask your neighbors about the *New Medical Salt*. If sick, try; if not sick, remember the *New Medical Salt*.

DR. COGGSWELL'S NEW MEDICAL Salt is for sale in Batavia by H. W. Fellows and by all enterprising druggists wherever the Herald is read. As it is not a Patent medicine, but the prescription of an eminent Physician, no one should fail to try the New Medical Salt. For additional testimonial and directions see circular.

Dr. Coggswell's Antiphlogistic Salt.

ACUTE PACKAGES, $1.00; CHRONIC $2.00.

Sent by mail, free of expense on receipt of price.

Invalids with chronic or long standing diseases, should always order a chronic package.

WM. BENDER.

You who have drank "BILL'S" Lager Beer,
And felt its warmth arise,
Know well it drives out ev'ry fear,
And wakes up *fresh* surprise!
It fills the nerves with Native life,
And warms the stomach so,
Digestion moves with greater strife
And sets the soul in glow!
"Bill's" Lager is the best of drink,
It makes a man FEEL all he'd think;
It warms him through and through, you know
And puts his senses in a glow.
It never makes a man *quite* drunk
Nor filthy as a common skunk?
But always makes the senses rise
To Truthful triumph if he *buys!*
BILL'S glasses, too, are just the thing,
They hold as much as Nature'll swing,
And keep the mind in equal poise,
And conscience from a drunken noise.
So you who want your senses whet
You drink Bill's Lager, and you'll get
The drippence worth in sparkling foam,
At Bender's shop and happy home!
So you that want a bev'rage clear
And one that sparkles fine,
Come buy of Bill his Lager Beer,
